There is still a margin left, but we are only at the beginning of the year, and as there is a strong rise going on, it seems reasonable to conclude that we shall not get far into the year without the margin being wholly consumed. Everything will depend on the continuance of the traffic increase, and the spring months, when the great rise of last year began, will be a most critical period; but it is important to observe that the increase of business since we wrote has been greater than we counted on. The astonishing increase of the present week especially is a new fact, and seems to show that the volume of business, great as the expansion has been, is yet swelling more rapidly than ever. All things considered, and looking to the amount of capital seeking investment, the sharp rise of the last fortnight ought not to be surprising. If the present increase of traffic goes on, a most excited period in the railway market, probably ending, we fear, in another mania, is what we may expect during the next few months.

Concealment in Insurance.—The case of Morrison *v.* the Universal Marine Insurance Company, which we referred to some time ago, on the occasion of the first trial, when the jury were unable to agree, has now been tried a second time. The question, it will be remembered, related to the insurance of the Cambria on a voyage from Bahia to South-West Pass, for orders, thence to Galveston, New Orleans or Mobile, and to Liverpool; and the points were whether the plaintiff had concealed anything material by not bringing to the notice of the underwriters a doubtful report in "Lloyd's List" of the loss of the ship, and a telegram which, it was alleged, he had received from his own captain—the doubt in the latter case arising from the insufficiency of the address, and the inability of the Post Office authorities to trace its delivery. The second trial has ended in a verdict substantially for the defendant. The questions left by Mr Justice Blackburn to the jury were:—"Did the fact of Messrs Previté and Greig "not mentioning the notices in the *Liverpool Mercury* and "'Lloyd's List' amount to a concealment of a fact material "to be known by the insurers? Did the insurers (who had "seen the paragraph on the 12th, after the slip was initialled) "elect to continue the risk, and did the plaintiff receive and "conceal the telegram from the captain." The latter two questions were answered in the negative; but the first being in the affirmative, the verdict was for the defendants.

The Redemption of the United States' Debt.—The gradual working of the causes which enable the Americans to convert their 6 per cent. debt is again shown by the report from Washington that Mr Boutwell can no longer purchase under par in gold. The paper price has not fallen, but as the paper has become appreciated, this really means a rise in price corresponding to the decline in the gold premium. The difficulty of redemption by purchases in the open market is in fact the reason why Mr Boutwell has given notice to pay off 4,000,000*l* Five-Twenties in March next. Such being the state of the market, we should anticipate that notwithstanding the only moderate success of the last Funding loan, a farther attempt of the same kind will soon be made. With a convertible currency at least, and the European money markets as full of money as they are, a very large part of the American 6 per cent. debt should be convertible into 5 per cent. bonds.

THE SOUTH-EASTERN RAILWAY.—We receive the following from a correspondent :—

TO THE EDITOR OF THE ECONOMIST.

Sir,—In the calculations as to the possible dividend of the South-Eastern Railway Company, the fact is not considered that the July receipts are this year, for the first time, transferred from the account of the first half-year to that of the second half-year. To this company in particular July is a very profitable month, giving a net profit in excess of January of about 40,000*l*, and this must not be overlooked in an estimate of dividend for the current half-year based on that paid for the six months which terminated on 31st January, 1871. In the current half-year July takes the place of January, and the difference of gross traffic in 1870 was 47,100*l* in favour of July. In 1871 the excess was 61,395*l*, owing no doubt to the fact that the traffic in January was suffering in consequence of the war and the blockade of Paris. For safe comparison I take the year 1870 as fairly illustrating the facts.

The account then as to the traffic stands as follows :—	£
Increase in gross traffic in 25 weeks	71,166
Estimated increase for the last week of the half-year	2,734
Excess of gross traffic in July compared with January, 1870	47,100
	121,000
Deduct 20 per cent. for working expenses, which is ample, as the increase in this line is in passenger traffic	24,200
	96,800
Deduct amount carried over the first half-year of 1870	20,000
Net increase divisible in current half-year	76,800

According to the above statement the dividend to be added to the 4 per cent. dividend for the corresponding period 1870 should be 2 per cent., or a total of 6 per cent. per annum.—I remain, sir, yours truly,

A CONSTANT READER.

The point which our correspondent mentions is certainly one which should be kept in view, but we fear his estimate is too sanguine. The aggregate gross receipts of the half-year ending January, 1871, were 754,000*l*; up to 23rd December of the current half-year they were 796,000*l*, and the remaining week may be taken as a set-off against the 20,000*l* carried over from the first half of 1870. This would only give a gross increase of 42,000*l* for the half-year, but allowing 18,000*l* additional for odd days not included in the weekly returns, and the difference between 20,000*l* and the actual return for the present week, we should still have only a gross increase of about 60,000*l* to deal with. In our article on the 9th of December we estimated a larger gross increase, having in our recollection the fact which our correspondent refers to, but the traffics since we wrote have rather come short of our expectation, and we doubt if the result will be any better than our estimate, which, though less sanguine than our correspondent's, showed a satisfactory enough improvement in the position of the South-Eastern Company.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending Dec. 23 :—

	Receipts of Week Ending Dec. 23.
	£
Customs	545,000
Excise	328,000
Stamps	203,000
Taxes	2,000
Income tax	43,000
Post Office	100,000
Telegraphs	60,000
Crown lands	20,000
Miscellaneous	11,475
Total	1,312,475

The total receipts of the previous week were 2,597,662*l*.

The Exchequer issues of the week on account of expenditure were 614,704*l*, viz. :—

	£
Interest of debt	1,515
Other charges on Consolidated fund	5,875
Supply services	607,314
Telegraph services	nil.
	614,704

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Dec. 16	4,059,733	1,006,762	5,066,495
— 23	4,656,193	1,100,198	5,756,391
Increase	596,460	93,436	689,896

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Dec. 28.

The returns of the Bank of France for this week, last week, and for the week ending 8th September, 1870, are as follow :—

	Dec. 28, 1871.	Dec. 21, 1871.	Sept. 8, 1870.
DEBTOR.	f c	f c	f c
Capital of the bank	182,500,000 0	182,500,000 0	182,500,000 7

A comparison of this week with last, in the principal items shows :—

DEBTOR.	Increase. francs.	Decrease. francs.
Notes in circulation	21,400,000	...
Treasury balance	2,300,000	...
Deposits	16,000,000	...
CREDITOR.	Increase. francs.	Decrease. francs.
Coin and bullion	...	800,000
Bills discounted	38,400,000	...
Advances on securities	...	3,400,000

The Bank return for the week shows an increase of about 38 millions in the discounts, corresponding to an augmentation of 21½ millions in the circulation, and of 17 millions in the private accounts. Several other modifications are also to be remarked. The distribution of the dividend of 200f for the second half of the year has increased the item dividends payable by about 36 millions, and has reduced that of sundry interests by 50 millions; this difference of 14 millions, and a reduction of 12 millions in the reserve for eventual losses on prolonged bills, now set down at 14 millions instead of 26, has formed the new item of special reserve, 24 millions. The small balance has been carried to the profits in addition to capital. The debt of the city of Paris has again decreased by four millions.

The debate on the proposed general income tax terminated yesterday by the complete defeat of its partisans, only about forty members of a Chamber consisting of over 750 deputies holding up their hands in its favour. The ground of the discussion had been considerably circumscribed by the resolution of the Minister of Finance to levy a tax of three per cent. on the revenue of stocks and shares, as the principle of a tax on incomes being thus admitted, all that remained was to decide how far the measure should extend. A choice had therefore to be made between three systems, that of the Government corresponding to the Schedule C of the tax in England but omitting French rente, and including

all foreign securities; that of the committee of last session and which properly formed the subject of the debate. This second plan accepted schedule C as modified by the Minister and added schedules D and E, but exempted A and B in order not to add any new charges to real property, which the committee believed to be already overtaxed. The third system was that of M. Wolowski, who proposed to adopt the tax as in England, charging all incomes from any source above 1,200f a year. In each of the plans it was understood that the rate should be three per cent. Notwithstanding the former large majority of members of the committee of 19 to 8 in favour of the tax, it was now but feebly defended. M. Casimir Perier, who originally drew up the report favourable to the tax, is now in the Cabinet as Minister of the Interior, and divided between his former opinions and his duty to his present colleagues, took no part in the discussion. His successor as reporter to the Committee, M. Leonce de Lavergne, only supported the tax like an advocate who is but half convinced of the justice of his cause, and defends it from necessity; and M. Wolowski, who had separated from the Committee in wishing to extend the tax to land and houses, found himself almost isolated, with a few members of the Left, so that when M. Thiers rose to argue that property was already sufficiently burdened, and that the greater part of the new revenue required must be obtained from consumption, he found an Assembly already prejudiced in his favour. Of the former Budget of 2,100 millions he said 1,034, or nearly one half, were obtained by charges on acquired property; about 300 millions obtained from Algeria, the State domains, the telegraph, post office, and other sources, not pertaining to any one particular class of the population; and only 724 millions derived from articles of consumption. Of this last sum he supposes 335 millions to be paid by the property holders and 391 millions by the people, thus making 1,370 millions as the share of taxation borne by the former class out of a total of 1,760 millions. In England, he said, the balance was on the other side, for there the wealthy classes paid only from 700 to 800 millions of taxes while the portion falling on the classes who "work with their arms" was from 700 to 800 millions; besides, the direct taxes on land and houses which in France amounted to 582 millions, in England reached only a sum of 87 millions; and stamps, registration, succession dues, &c., which produced 452 millions in France, amounted to 230 only in England. The conclusion he drew from those premises was that as property was but lightly taxed in England an income-tax was possible, whereas in France property already bore the greater part of the public charges, and could not be more burdened. The majority in the Assembly, which is of course chiefly composed of property-holders, were quite willing to believe that they paid more than their share of taxes, and to allow M. Thiers to obtain his 600 millions from the consumer. The President impressed on the Chamber that the vote about to be taken must be considered as final, and the country may now be considered as definitively committed to M. Thiers's financial policy. The question of the duties on raw material and textile substances which the income tax was to replace was quite lost sight of in the discussion.

The restricted income tax, from which the Minister of Finance proposed to obtain a sum of 30 millions, is to comprise all the dividends and interests of stocks or shares excepting French rente. Capital invested in commercial undertakings, *en commandite*, will be assessed at five per cent.; should the profits exceed that sum, the excess will be exempt from taxation; should they not reach that proportion, the lender will be admitted to furnish proofs, and the tax will be only levied on the real returns. Should the Bill be adopted, securities will in future be liable to the following charges:—1. A stamp duty of 1f 20c per cent. of the nominal capital, which may be converted into an annual payment of six-hundredths per 100f; 2, a transfer duty of 60 centimes per 100f, which may be converted into an annual charge of 18 centimes per 100f; 3, a tax of three per cent. of the dividend as interest. All foreign bonds, stocks, or shares will be subject to those charges; they will not be admitted to any Bourse in France unless represented by a French agent, who will be responsible for the payment of all the above dues. This interdiction extends to the exposing for sale at money changers', and the advertising of the issue or payment of such stock or shares; nor can they be made the security for any loan or advance of money, or appear in any public document, excepting inventories. The agent appointed in France will deduct the amount of the tax from the coupon or dividends. Foreign Governments will be admitted to redeem the tax by a payment of three per cent. of the nominal capital raised. The Minister of Finance anticipates that this measure will drive a number of foreign securities from the French market, but, he adds, that he will not regret such a result, as the capital will be employed in investments at home. Another consequence of the law, which he appears to overlook, is that the coupons of all Russian, Turkish, Italian, and other loans will be transmitted to London for payment, and that the importance of the London money market, as a centre of European financial transactions, will be increased, to the detriment of that of Paris.

The committee on the Bank Bills has decided against all the proposed means of improving the situation of the Bank, with the exception of an increase in the circulation. That resolution being come to, it had to fix the limit of the enlarged issue; the sum of 3,000 millions, as proposed by the Government, was rejected unanimously less one vote; that of 2,800 millions obtained in its support only a minority of four to eleven against it; finally, the sum of 2,700 millions, or an augmentation of 300 millions, was adopted by nine votes to six. The majority of the committee also voted the formal expression of a desire that the City of Paris should reimburse the 210 millions owing to the Bank, and that the Government should pay as early as possible the first instalment of 200 millions of its debt to the Bank, as provided for in the Budget of 1872. As those payments are made, the limit of the Bank circulation is to be reduced in a like proportion. One hundred millions of the increased circulation is to be in five and ten-franc notes. The discussion of these conclusions will probably take place on Saturday, as the Minister of Finance is anxious for a decision before the adjournment for a short vacation next week.

The Bourse has continued to decline all the week, foreign stocks alone showing any firmness. Both rente and the loan have been affected by the increase in the rate of interest on Treasury bonds, which now return a larger revenue than the ordinary stock. The following are to-day's prices:—

	December 21.			December 28.

The premium on gold coin is to-day eleven francs per thousand, and on silver 9½; the exchange on London is at 25f 70c, the price of English sovereigns, 25c 70c, and bank-notes, 25f 80c.

The Bank of France has fixed its dividend for the second half of 1871 at 200f, making 300f for the year.

Two reports have been current on the Bourse to-day; one that the Treasury has negotiated 300 millions of bonds in London; the other that MM. de Rothschild have offered to advance to it 200 millions without interest. I mention them as rumours only.

The Minister of Finance, in his printed statement, remarks on the abuse of subventions to the mail steam companies, under the last Government, the three companies, the Messageries Maritimes, Transatlantic, and Valéry Company in the Mediterranean, receive together a sum of 26,400,000f, while they only distribute a revenue of 2,197,000f; the share of the Messageries is 15,741,727f, and the produce 1,752,000f; the Transatlantic receives 10,063,797f, and pays to its shareholders 275,745f, and the Valéry Company with a grant of 640,000f, distributed 170,000f. The Government will continue to pay these sums, which are secured to the companies by conventions, but the Minister makes no secret of his intention to free the State from this burden when the concessions shall have expired.

In striking out from the Budget of Public Works the sum of 41 millions for guarantees of interests to railway companies, and substituting for it an annuity of two millions, representing the interest on it, the object of the Government appears to be to extend to the payment of those interests the system adopted for the payment of the subventions. The companies themselves will procure by an issue of bonds the sum necessary to cover the insufficency of receipts, and the Government will remain charged with the payment of the interest of the capital thus created. The Minister of Finance believes that with the present increased traffic the companies might, with a little effort, completely relieve the State from this charge.

The Comptoir d'Escompte has held a meeting of shareholders in which various modifications of the statutes were agreed to. The principal changes are these—the company will be henceforth authorised to make advances on foreign securities; the branches abroad may adopt their system of working to the legislation of the countries in which they are established; the choice of the chairman of the board of directors is transferred from the meetings of shareholders to the board itself.

A meeting of the Immobiliere Company, which was to have taken place on the 21st, was postponed, a sufficient number of shares not having been deposited.

The Government has raised its interest on Treasury bonds at fixed date by one per cent. The new rate varies from four per cent. on bonds for one month, to six per cent. on those for one year.

The receipts of the Suez Canal Company in November amounted to 1,272,622f, against 548,182f in the same month of 1870. A drawing of 447 bonds of the loan of 100 millions has taken place. The prize of 150,000f was won by the No. 132,262, and those of 25,000f by Nos. 95,216 and 76,524. Twenty-three prizes of from 2,000f to 5,000f were also drawn.

A drawing of Credit Foncier bonds has also taken place. The numbers which obtained prizes were the following:—105,342, 100,000f; 17,259, 50,000f; 177,779, 40,000f; 90,840, 30,000f; 120,784, 20,000f; and 143,242, 10,000f.

The French Customs returns for 1870, which had been only published at the commencement of the present month, have been already followed by those of the first ten months of this year. As the table for that period was not made up in 1870, the comparison has been made with the years 1868 and 1869 The value of the trade was as under:—

VALUE OF IMPORTS FOR CONSUMPTION.

	1870. francs.	1869. francs.	1868. francs.
Articles of food	818,805,000	566,100,000	815,505,000
Raw materials and natural productions	1,473,128,000	1,619,948,000	1,631,048,000
Manufactures	260,335,000	220,642,000	195,800,000
Other articles	192,952,000	125,091,000	126,714,000
Total	2,745,220,000	2,532,781,000	2,769,067,000

VALUE OF EXPORTS OF FRENCH PRODUCTIONS.

Manufactures	1,281,316,000	1,472,791,000	1,337,738,000
Articles of food, raw materials, and natural productions	844,270,000	990,346,000	852,979,000
Other articles	105,352,000	108,765,000	91,062,000
Total	2,230,938,000	2,571,902,000	2,281,779,000

The movement of the precious metals during the same period was as under:—

IMPORTS.

	1871. francs.	1869. francs.	1868. francs.
Gold bullion	6,597,561	128,633,901	177,697,364
Gold coin	117,052,719	244,180,722	258,069,102
Silver bullion	37,755,032	58,933,360	57,643,149
Silver coin	92,270,828	112,636,549	113,527,124
Total	253,676,140	554,384,532	307,846,819

EXPORTS.

Gold bullion	1,986,075	35,160,450	23,031,313
Gold coin	233,935,820	119,186,100	203,379,945
Silver bullion	14,463,196	35,296,860	20,829,954
Silver coin	143,361,078	40,134,580	49,071,721
Total	393,746,169	229,777,930	296,312,933

The imports being deducted from the exports, the stock of gold and silver will be found to have decreased by 140,070,029f, or 5,602,801*l*.

The following are the latest quotations of the Havre produce markets, per 50 kilos (1 cwt), duty paid:—

COTTON.—New Orleans very ordinary, 126f; good ordinary, 134f; choice, 140f. Georgia, same marks, 121f, 128f, 134f; Tinnevelly, good ordinary, 96f; Oomra, good ordinary, 96f; M dras, 89f; Bengal, 81f. Sales for last week, 5,575 bales; arrivals, 20,804; stock, 142,179.

COFFEE.—Hayti, 150f to 155f; Rio, 148f; washed, 153f; Santos, 151f; plantation Ceylon, 159f. Sales last week, 16,500 bags; arrivals, 3,960; deliveries, 2,900 and 16 tierces; stock, 157,154 and 2,611 tierces.

SUGAR.—French West India, 67f 50c to 73f 50c, according to sample.

HIDES.—Monte Video salted, 77f; dry, 140f; Bahia dry, 105f; La Plata salt, cow, 77f; ox, 82f; Valparaiso salted ox or cow, 75f; Monte Video salted horse skins, 70f. Importations for fortnight ending 21st, 52,553 skins and 2,208 horse; sales, 10,005 and 4,991 horse; stock on 21st, 42,534 ox and cow, and 732 horse.

WOOL.—Brazil pelades scoured, 235f; Monte Video unwashed, 170f to 210f; Peru scoured, 460f; skins, 95c to 1f 5c per kilos. Stock on 20th, wool, 5,095 bales; skins, 134 bales.

TALLOW.—Monte Video saladeros ox, 59f 50c; New York, 58f.

COCOA.—Hayti, 50f in bond; Para, 115f, duty paid.

COMMERCIAL AND MISCELLANEOUS NEWS.

According to a circular of Messrs Groves and Co., the vintage in most of the wine-producing countries has this year been very unsatisfactory. Of Bordeaux wines, the Department of the Gironde will, it is estimated, produce barely one-half an ordinary yield, and the quality will undoubtedly be quite mediocre, the best that can be said of them being that they are not so bad as those of 1860 or 1866. The champagne vintage has been most disastrous, and the wines are the worst that have been made since 1866. The Burgundy wines are exceedingly inferior, and the quantity is very deficient. Of those of Roussillon the report is similar, and from the Rhine and Moselle the accounts are equally unfavourable.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 27th day of December, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	39,308,055	Government debt	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	24,308,055
		Silver bullion	...
	39,308,055		39,308,055

BANKING DEPARTMENT.

	£		£
Proprietors' capital	14,553,000	Government securities	15,001,028
Rest	3,097,583	Other securities	17,950,156
Public deposits, including Exchequer, Savings' Banks, Commissioners of National Debt, and dividend accounts	9,086,223	Notes	14,681,225
Other deposits	21,120,177	Gold and silver coin	606,767
Seven-day and other bills	382,193		
	48,239,176		48,239,176

GEORGE FORBES, Chief Cashier.

Dated the 28th December, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

LIABILITIES.	£	ASSETS.	£
Circulation (including Bank post bills)	25,009,023	Securities	33,398,184
Public deposits	9,086,223	Coin and bullion	24,914,822
Private deposits	21,120,177		
	55,215,423		58,313,006

The balance of Assets above Liabilities being 3,097,583*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit—

	Increase. £	Decrease. £
Circulation	507,979	...
Public deposits	586,266	...
Other deposits	593,923	...
Government securities	...	...
Other securities	1,716,566	...
Bullion	...	20,456
Rest	7,932	...
Reserve	..	576,656

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending Dec. 27, 1871. £	Week ending Dec. 20, 1871. £	Week ending Dec. 28, 1870. £
Thursday	13,787,000	13,418,000	9,583,000
Friday	15,361,000	42,372,000	11,859,000
Saturday	170,069,000	19,146,000	10,206,000
Monday	Christmas Day	16,408,000	6,831,000
Tuesday	Bank Holiday	15,024,000	9,712,000
Wednesday	17,234,000	14,434,000	9,854,000
Total	63,451,000	120,802,000	58,135,000

JOHN C. POCOCK, Deputy Inspector.

Bankers' Clearing-house, December 28th, 1871.

The total since the 4th of January, 1871, is 4,671,176,000*l*, compared with 3,812,604,000*l* for the corresponding period last year, showing an increase of 858,572,000*l*.

The following shows the amount of the Circulation, Bullion in both departments, Banking Deposits, Banking Securities,

Reserve, and Rate of Discount, for three months ending 27th December, 1871 :—

Date.	Circulation.	Coin and Bullion.	Deposits.	Securities in Banking Departmnt	Reserve.	Rate of Discount
	£	£	£	£	£	%
Sept. 20	25,356,777	23,497,160	26,756,326	31,824,604	13,711,115	4
27	25,556,647	21,090,088	29,183,060	36,880,542	11,077,113	4
Oct. 4	26,881,601	20,214,524	27,655,863	37,549,247	8,919,849	—

Clearing-house returns	...	60,751,000	51,457,000	58,135,000	63,451,000

In 1861-2, there had been a demand for money to the close of the year, but the market was easier in the first two or three days of the new year, also included in the corresponding week. The news from America in relation to the Trent difficulty was now peaceful.

In 1868, the only feature was the usual demand at the close of the year. It was anticipated that in 1869 there could not be much increase in the value of money, as the depression of 1866 and 1867 was only slowly disappearing. The disestablishment of the Irish Church was becoming the political question of the moment.

In 1869, money was generally easy, but for the usual pressure in the last days of the year. Dearer money, however, was expected in future, owing to the general return of confidence. The Ollivier Ministry had just been formed in France.

In 1870, there was rather more than the customary pressure for discounts at the close of the year, owing to the joint stock banks calling in their balances; but the regular condition of the market was one of great abundance, in consequence of the prolonged suspense at Paris.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1862 (Jan. 1), a deficiency of 3,724,996*l*; in 1868 (Jan. 1) an excess of 1,529,959*l*; in 1868 (Dec. 30), a deficiency of 1,294,888*l*; in 1869, a deficiency of 1,577,381*l*; and in 1870, an excess of 1,077,044*l*. In 1871, there is an excess of 3,170,021*l*.

Discount and Money Market.—The pressure of discounts which arose during the last two days before the Christmas holidays has been maintained since the resumption of business on Wednesday. Both at the Bank and in the open market there is a strong demand, and the uniform rate in the open market is 3 per cent. for Bank bills, except for the very best short paper, which is taken at 2⅞. At the same time it is shown by the rate being uniform for long and short-dated paper, that the existing pressure is only temporary, and will cease with the close of the year. There is no other cause but the usual pressure of the joint-stock banks at the end of the half-year to show a good account.

The Stock Exchange settlement being large, we believe beyond former precedent, there has naturally been an active demand for money, the rate on first-class securities being at or a shade under 4 per cent. But there is no scarcity of money at these rates.

The principal change in the Bank return for the week is an addition of 1,716,000*l* to the private securities, showing the extent to which the Bank has been resorted to at the end of the year. There is a corresponding increase of 594,000*l* in the private deposits, and the public deposits have also increased 586,000*l*, the recent increase of this item, it may be observed, being very large, and the amount now being 9,086,000*l*. The reserve has diminished 577,000*l*, the circulation has increased 508,000*l*, and the change in the bullion is only nominal. The accounts clearly show the temporary pressure of the week, and the probability of great ease in the money market at the beginning of the year. The large Government balance will be drawn on to pay dividends, and the private securities will begin to run off. This view of the matter is confirmed by the reports from the bullion market, which are that there is no demand for either gold or silver, and the bulk of the Australian arrival of 500,000*l*, expected in a few days, will probably be taken to the Bank.

We subjoin our usual quotation for mercantile paper having various periods to run —

Bank bills—Short	2⅞	per cent.
Do 3 months	3	per cent.
Do 4 —	3	per cent.
Do 6 —	3	per cent.
Trade bills—3 months	3	per cent.
Do 4 —	3½	per cent.
Do 6 —	3½	per cent.

The allowances for money at the private and joint stock banks and discount houses are as follows :—

Private and Joint Stock Banks at call	2	per cent.
Discount houses at call	2	per cent.
Do with seven days' notice	2¼	per cent.
Do fourteen days'	2¼	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	6	6	...	...
Vienna	6	6½	5½ 6	6
Berlin	5	4	4½ ¾	3½
Frankfort	5	4	4⅝	3⅝
Amsterdam	4½	3	3¾ 4¼	2¾
Brussels	...	2½	...	2¼
Hamburg	...	...	4¼	2¾
St Petersburg	8	6	7⅞	6

On 'Change to-day there was a good demand for short bills on Paris, where money is dearer now than elsewhere on the continent. The changes in the Bank of France account continue to exhibit pressure—the discounts having increased 1,500,000*l* in the week, and the notes 856,000*l*; while it appears, from the telegraphic reports of the proceedings in the Assembly, that M. Thiers has been urging strenuously the immediate passage of the Bill to extend the legal circulation of the Bank of France, the present limit being about to be passed.

The Stock Markets.—The distinguishing feature this week has been the great rise in English railways, for which an almost unlimited demand appears to have set in, while the supply of stock is unusually short. It has been obvious enough for some time that a great rise of this sort was coming off, and the conjuncture of cheap money, the approach of the dividend period, and the most favourable week's traffics of a year which has been unprecedentedly prosperous, has sufficed to give the start which shrewd observers were anticipating. There has never been such a period of prosperity in English railway history, and as the prosperity of the country is without a check, and there is no sign of a stoppage to the increase of railway business, the tendency being all the other way, it is hard to say what high figures the prices of the leading English lines may very shortly reach. We anticipate therefore the continuance of a strong demand, both for speculation and investment, in this department during the next few weeks. In other markets as well as railways, a good business has been done, chiefly for investment, the amount of money to place being beyond precedent, and every week apparently bringing out new supplies. The rise in foreign stocks, which we predicted some months ago, also promises to

continue, and business will probably be resumed with greater activity as soon as the present mania for railways is somewhat satisfied. A feature of the week is the demand for the shares of the principal banks. Business is here impeded by the want of a market,—the result of Mr Leeman's Act,—but the demand for investment, and in anticipation of improved dividends, has nevertheless a sensible effect.

The account of the settling to-day proves, as we anticipated, to have been unusually large, although the business, owing to the holiday, extended barely over ten working days. There has been a good demand for money, but the contangoes in most cases were light, and the rates charged on first-class securities have been about 4 per cent.

ENGLISH GOVERNMENT SECURITIES.—The prices here have been steadily maintained, in sympathy with the generally buoyant feeling in the market. To-day the market has continued good, and there is a rise of ¼ in Consols for the week.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June
Saturday	92¼	92⅜	92¼	92⅜	2s to 7s pm
Monday			Christmas Day.		
Tuesday			Bank Holiday.		
Wednesday	92¼	92⅜	92⅜	92½	2s to 7s pm
Thursday	92¼	92¼	92⅜	92⅜	2s to 7s pm
Friday	92⅜	92½	92½	92⅝	2s to 7s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	or Inc. Dec.
Consols for money	92½ ⅜	92½ ⅝	+ ¼
Ditto January	92¼ ⅜	92⅝ ⅜	+ ⅜
Ditto February	...	92½ ¼	... ...
Reduced 3 %	92½ ⅜	92⅝ ⅜	+ ¼
New 3 %	92¼ ⅜	92½ ⅜	+ ⅜
Bank Stock, last dividend 4½ %	239 41	239 41	... ...
India Stock, 10½ %, red. at 200 Apl. 30, 1874	207 9	shut	... ...
Do 5 %, red. at par, July 5, 1880	110½ 11½	110½ 11½	... ...

EXCHEQUER BILLS 2s to 7s prem.

COLONIAL GOVERNMENT SECURITIES.—The following shows the principal changes in the quotations for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	110½ 11	110 ½	+ ½
Ditto 5 %	103½ 4	104 ¼	+ ¼
New Zealand 5 % Consolidated Bonds	102⅝ 3½	103½ ⅝	+ ⅝
New South Wales 5 % Bonds, 1888 to 1896	105 6	106 7	+ 1
Nova Scotia 6 % Bonds, 1875	105 6	105 6	... ...
Queensland Government 6 % Bonds, 1884-5	111½ 12	111½ 12	... ...
Victoria 6 %	112½ 13	113 ½	+ ½
Ditto New 5 %	106 7	106 7	... ...

FOREIGN GOVERNMENT STOCKS.—In this department, as we have stated, there has been comparative inactivity, attention having been given during the account to other stocks, chiefly to English railways. This has been especially the case during the present week, when the arrangement of the account also assisted in preventing new business. The changes, nevertheless, have been of an upward character, and very general, all classes of stocks participating in the improvement. To-day there has been rather more activity, the high prices which have already been reached in other departments naturally directing the attention of speculators to a further great rise in stocks, which have been comparatively neglected.

It is understood that the new loan for Hungary will be introduced next week. Elsewhere we give a brief statement of the leading facts about Hungarian finance, which has been little known since the formation of a separate Government for that country.

Annexed are our usual quotations showing the changes for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Argentine 6 %	98¼ ⅜	99 100	+ 1½
Ditto 1871	93 ½	93½ ¾	+ ¼

ENGLISH RAILWAYS.—The excitement this week has been very great, and there has been a general rise in all the stocks, especially in the heavy lines. The buying was very active last Saturday, contrary to the general expectation of a lull before the holidays, and business opened on Wednesday with the execution of numerous purchasing orders, and an immediate advance of 1 to 2 per cent. all round. Prices became very wide, and have since continued so, the difficulty of purchasing being excessive, and the sharp rise having brought in very few sellers, even to realise. The rise has accordingly been continuous, without any sign of reaction, a slight tendency of that kind, which was exhibited on Wednesday afternoon, being suddenly checked by the publication of the North-Western traffic return, showing the astonishing increase of 28,000*l*. The Great Western and Midland traffics also showed a remarkable increase, and the other companies having also good returns, though not so striking, the good feeling in the market was fully maintained. It is moreover anticipated that the traffic returns of the next few weeks, especially on the heavy lines, will continue to be singularly favourable, the trade of the country apparently increasing daily, and the rolling-stock of the railway companies being hardly equal to the demands upon it. Putting the matter in the most moderate way, there is tolerably fair reason to believe that 1872 will exhibit nearly as great an improvement upon the preceding year as the improvement of that year is upon 1870. As the result of this impression, there is comparatively little stock coming to market, while the competition of new investors increases. It is also true however that, under the present excitement, speculation has taken a new development, and the market would be exceedingly weak if any serious incident was to occur. We subjoin the particulars of the advance in each case for the week, and as there has been no decline from the highest point, the table shows exactly where the improvement has been. The market closes firm.

The only exception to the improvement for the week is Metropolitan, which declines under the influence of unfavourable traffic.

The aggregate increase of traffic for the week on the eighteen lines, of which we here give the particulars, is 106,000*l*—the highest of any single week during the present year. As has been the case lately, the increase is pretty equally distributed between goods and passengers, the increase of passengers for the Christmas holidays being matched by a general and great improvement in the goods traffic. The increase is so large that it may make the dividends on the leading heavy lines still better than it was safe to estimate a month ago.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	118½ ½	123¾ 4½	+ 5⅛

The traffic receipts on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Dec. 23 to 868,544*l*, being an increase of 106,484*l* on the corresponding week of the previous year. The aggregate receipts of the half-year to date now are 19,843,616*l*, being an increase of 1,522,916*l* on the corresponding period of last year. The principal increases for the week are—North-Western, 28,337*l*; Midland, 14,530*l*; Great Western, 10,243*l*; North-Eastern, 9,591*l*; Great Northern, 7,198*l*; Lancashire and Yorkshire, 5,465*l*; Great Eastern, 4,814*l*; and Caledonian, 4,274*l*. Metropolitan has again decreased 254*l*. The following shows the details of the increase or decrease in each case for the week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

AMERICAN SECURITIES.—There has been a good demand for Five-Twenty bonds for investment, and both the 1865 and 1867 issues have further advanced, the 1862 bonds remaining stationary in value, as might be anticipated. State bonds are without material variation; but American railway shares have been in request, and have been subject to considerable fluctuation. The final price of Atlantic consolidated bonds and of Erie shares show a rise of 1½ and 1½ respectively on the week, but the latter advanced to 29 to-day on the receipt of a telegram from New York, announcing that 3½ per cent. would be paid on the preferred shares on February 1st. This, however, is probably only an unauthentic rumour.

JOINT STOCK BANKS.—As usual, at the period immediately preceding the declaration of the dividends, there has been a good demand for Bank shares, and the leading London institutions have advanced in value. London Joint Stock shares have risen 2; Union of London, 1½; London and County, Anglo-Austrian, and Colonial, 1; Oriental, Merchant, and Midland, ½; Anglo-Egyptian, ¼; and Imperial Ottoman, ½.

TELEGRAPHS.—There has been some loose talk this week in reference to a proposed purchase of the various competing cables between England and America by the British and United States' Governments, the idea being to work the lines under a joint management. The scheme, however much in advance of the present condition of mundane affairs, has had an apparent influence upon the market, and the shares of the various lines have been eagerly sought after, consequently Anglo-American have risen 10 on the week; Anglo-Mediterranean, 4; French Cables and Falmouth, ½; British Australian and Marseilles and Algiers, ¼; British Indian Submarine, ⅝; British Indian Extension and West India, ½. On the other hand, Great Northern have given way ¼. Construction shares have also been in request; Telegraph Construction showing an improvement of 1½; and Hooper's and Silver's of ½ each.

MINING.—The chief movements in the quotations for British mines are—an advance of 2½ on Tin Croft and Wheal Buller; 1 in Great Laxey and Tankerville. West Bassett and West Seton have given way 1; Marke Valley and West Chiverton ¼. In the foreign market Eberhardts have declined 1, while Russia Copper show a reaction of ½.

MISCELLANEOUS.—Credit and discount shares have been in demand this week, and close rather better. Credit Foncier shares are ½, General Credit ⅝; International Financial ½, and London Financial 1½ higher. Scottish Australian Investment are quoted at an improvement of 5; Submarine Cable Trust Certificates have advanced 4; Rhymney Iron, Foreign and Colonial Trusts, Nantyglo Ironworks "Preferred" 1; Rio City Improvements, City of Milan Improvements, and Company of African Merchants ½. We note a decline of 2 in Native Guano, 1 in Australian Agricultural and Canada.

In new undertakings Patent Gas shares have been in demand, at 16½ to 17, and the new shares 8¾ to 9¼. Limmer Asphalte are quoted 2¾ to 3¼; United Limmer, 4 to 3 dis.; Native Guano, 21 to 23; and Phosphate Sewage, 26 to 27.

A prospectus is issued this evening of the Lydney and Wigpool Iron Ore Company. Capital, 150,000*l*, in 15,000 10*l* shares. The company is formed to purchase and develop leases and royalties of "rich" iron ore mines, owned and now worked by Messrs Allaway, in the Forest of Dean, Gloucestershire. The vendors accept 100,000*l* for the property, half payable in cash, and the remainder in fully-paid shares. The property is to be transferred from the 1st of January, 1872, and an early dividend, it is stated, can be declared.

EXCHANGES AND BULLION.—On 'Change to-day there was a strong demand for bills on Paris. The exchanges on Germany and Holland also fell a little, but there was no great increase in the demand for bills. The bullion market is quiet, and the large Australian arrival of bullion at hand is expected to be mostly taken to the Bank.

The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—Owing to the holidays the market has been exceedingly quiet during the week, and but few transactions have taken place. The demand for gold has for the present ceased, and the Bank has received 182,000*l* since our circular of the 21st instant. The Simla has taken 85,000*l* to Malta and the East, and the Medway 113,000*l* to the Cape. The next mail from Australia, due about the end of January, is bringing 519,750*l* for England.

Silver.—We have received about 121,000*l* from New York during the week. The market has been very quiet, and there has been but little demand for the East; prices have therefore again declined, and the nearest we can quote is 60½d per oz standard. The Simla has taken 50,000*l* to the East.

Mexican Dollars.—The Simla has taken 244,270*l* to China and the Straits, and has thus cleared the market of the large amount lately received. Prices are not quite so firm, but we do not hear of any alteration in rate yet.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11½d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto refinable, 77s 10½d to 77s 11d per oz std, last price; South American, doubloons, 74s per oz. Silver—Bar silver, fine, 5s 0½d per oz std, last price; ditto containing 5 grains gold, 5s 0⅝d per oz std. last price; Mexican dollars, new, 4s 11½d, old, 5s 0⅛d per oz, last price, nominal Five-franc pieces, 3s 11½d each, last price.

We are indebted to Messrs J. Allard and Co. for a telegram of to-day's exchange and bullion quotations in Paris. The Paris exchange on London, long and short, is 25.62½ to 25.57½; Napoleons are at 9 to 8 per mille prem. Fine silver per kilog, 218.89 and 32 to 30 per mille prem., and Ecus V depuis, 1830, 9 to 7 per mille prem.

The sum of 114,000*l* in bar gold was sent into the Bank to-day.

According to the *Gazette* returns, the imports of the precious metals into the United Kingdom during the week ended December 27 were:—Gold, 60,054*l*; silver, 170,617*l*. The exports were:—Gold, 310,347*l*; silver, 419,580*l*.

Subjoined is a statement of the calls falling due on railway and miscellaneous undertakings in the month of January The total is considerably beyond the average:—

East Indian Railway, general.

NOTICES AND REPORTS.

RAILWAY COMPANIES.

Dutch Rhenish.—A provisional dividend of 15s 6d per fully paid share, and of 6s 2d per 8*l* paid share is announced.

East Indian.—The Chord line was opened on the 1st of January last, and the mileage was thus increased to 1,280 miles, 400 miles being double and 880 miles single, or making, in all, including sidings, a total length of single road of 1,950 miles. With regard to the extraordinarily high floods which prevailed in India during August and September last, the board state that little or no damage occurred to this company's line. The gross earnings for the half-year ended the 30th of June last were 1,256,198*l*, against 1,438,056*l* in the corresponding half of 1870, and the net earnings (after providing for 19,040*l* for outstanding accounts with the Government) were 732,334*l*, as compared with 865,874*l* in the corresponding half of 1870. A satisfactory settlement between the Government and the company has been arrived at, resulting in a balance of 29,824*l* for division between the two bodies. The company's moiety, 14,912*l*, and the surplus profits for the half-year, 39,715*l*, make in all, with profit on exchange, 57,700*l*, the board recommend the payment of a dividend, in addition to the guaranteed interest of 4s 4d per cent., leaving 880*l*. The gross earnings for the half-year on the Jubbulpore line were 76,931*l*, against 69,464*l* in the corresponding half of 1870, and the net earnings 19,501*l*, as compared with 8,583*l*.

London and Greenwich.—Half-year's dividend 1*l* 7s 1d per cent., free of tax.

Mexican.—The line is opened for passenger traffic to Cordova (66 miles), and for goods' traffic to Fortin, 70½ miles from Vera Cruz, on the 22nd of August last; and the board state that the works are in course of vigorous execution, and that large shipments of material have been made. The gross traffic receipts on the railway from Mexico to Puebla (116 miles) amounted for the half-year ended June last to 66,955*l*, the working expenses to 32,355*l*, and the net profits to 34,600*l*, against 30,245*l* for the same half of 1870. The gross receipts from Vera Cruz to Paso del Macho and the Atoyac amounted to 29,285*l*, the working expenses to 23,494*l*, and the profit to 5.791*l*, against 2,001*l*. The gross receipts on the line from Mexico to Puebla for the three months ended September amounted to 33,920*l*, the working expenses to 17,831*l*, and the profit to 16,088*l*, against 13,084*l*. The receipts from the Government in respect of subventions produced from the 1st of January to the 30th of September last 76,945*l* gross from 15 per cent. duties, and 106,595*l* from the 12 (now 16) per cent. duties.

BANKS.

Anglo-Austrian.—Interim dividend 10s per share, free of income tax.

Anglo-Hungarian.—Interim dividend 5 per cent.

Bank of New South Wales.—Including 3,122*l* brought forward, the half-year's available balance was 58,666*l*. Out of this a dividend at the rate of 10 per cent. per annum absorbed 50,000*l*, 5,000*l* was added to reserve (now 308,000*l*), and 3,666*l* was carried forward.

Bank of New Zealand.—The half-year's available profit was 52,604*l*, and after the payment of a dividend and bonus, at the rate of 15 per cent. per annum, 7,604*l* remains.

MISCELLANEOUS COMPANIES.

Canada Company.—A dividend of 2*l* per share, free of tax, is payable for the current half-year.

Castle Dykes Iron, Limited.—Capital, 80,000*l*, in 10*l* shares. The purchase and further development of some iron ore mines and limestone quarries in Northamptonshire will be effected, the price for which is 42,000*l*, the sum of 18,000*l* being in shares. Mr H. E. Taylor, of the firm of Messrs John Taylor and Sons, reports upon the property.

Western of Canada Oil Lands and Works, Limited, 12 *per Cent. Debentures.*—Capital, 450,000*l*, in 100*l* shares (225,000*l* reserved for conversion of debentures into shares, if desired); present issue, 225,000*l*, in 12 per cent. debentures of 100*l* each, which are redeemable at 130*l* per debenture, or convertible at the holders' option into shares. The shares receive no dividend until all debentures have been redeemed or converted. The particulars of this undertaking, combining oil wells and refineries, and chemical and superphosphate works, all in full operation, with about 10,200 acres of freehold land, will be found in our advertisement columns. The subscription list closes on Tuesday next for London, and on the following day for the country.

MINING COMPANIES.

Emma Silver Mining, Limited.—Wednesday, the 3rd of January, has been appointed special settling day.

Sierra Buttes Gold.—Interim dividend, 2s per share, free of income tax.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade ruled very quiet to-day, and the tendency of the quotations was downwards for all descriptions of produce. English wheat was in short supply, and there was a good show of foreign. The demand for both red and white samples was very inactive, and large sales could only be effected at a reduction in the quotations. Flour was easier to purchase in sympathy with the wheat market. Spring corn of all kinds met with little inquiry, and maize and oats show a decline of 1s per quarter on the week. Barley, beans, and peas were dull and unchanged in value. This week's imports of foreign and colonial produce into London have amounted to 12,780 qrs of wheat; 15,220 barley; 29,610 oats; 2,660 sacks and 6,370 barrels of flour.

The Liverpool cotton market has been quiet during the past week owing to the holidays, but prices have been firmly maintained. The total sales for the four days are 53,080 bales, of which the trade have taken 38,900 bales, speculators and exporters 14,180 bales. The imports for the week are 93,344 bales, the actual exports 10,501 bales, and to-day's official declared stock is 566,901 bales, showing an increase of 84,630 bales over the estimate. Quotations are unchanged since last Friday. To-day the market closes quiet; sales, 10,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended December 28, 1871:—

	Imported.	Exported.
American.....bales	58,185	1,760
Brazilian	13,376	1,975
East Indian	16,133	9,983
Egyptian	12,431	155
Miscellaneous	3,680	626
Total	103,805	14,499

At New York on December 28, middling Upland cotton was quoted at 10 cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Dec. 1:—There has been a steady demand for cotton on the part of shippers; and purchases to the extent of about 4,000 candies have been reported at prices generally much the same as we quoted for last mail. New Oomrawuttee has been contracted for February delivery at 235 rs; Broach (Macarthy ginned), April delivery, at 250 rs to to 251 rs; sawginned Dharwar, 1 month delivery, at 228 rs to 230 rs; Dhollerah, ready, at 215 rs to 222 rs, according to quality, which is very irregular; and Hingunghaut as high as 262 rs to 265 rs, for delivery in 15 days. One or two small parcels of new Hingunghaut and Oomrawuttee have come forward within the past few days, and both descriptions promise to be well up to the standard as regards quality. Our stock of ready cotton is however very limited, consisting almost entirely of old Dhollerah and sawginned Dharwar, and until supplies of new cotton begin to come forward in quantity, which will not be the case for a month or six weeks to come, we fear prices will continue relatively higher here than in Liverpool. Crop prospects continue on the whole favourable, the latest news we have from the various districts being as follows:—Dhollerah—"The crops in this and the surrounding districts are getting on well, and I expect some new Kuppas in January." Bhownuggur—"The cotton crops have been greatly benefited by the recent rainfall, and the deficiency as compared with last year is now expected to be one-eighth instead of one-fourth, as was generally anticipated." Broach—In the immediate neighbourhood of Broach the crops are said to be in splendid condition, although in some of the outlying districts the plants are somewhat stunted. Berars—The weather has continued fine, and picking has been commenced in some of the earlier fields. Hingunghaut—Supplies are beginning to come in steadily, and the quality is very favourably reported on. Dharwar—We have not seen any report from these dis-

tricts lately. Tinnevelly—A telegram dated yesterday quotes 7 1/16d per lb, c. and f., at which price there are sellers.

Actual exports since last mail left, 17,222 bales.

The colonial markets were suspended at the commencement of the week, but on the resumption of business a steady tone set in, and transactions were concluded to a fair average extent. Sugar has fully maintained the late improvement, refined goods being occasionally dearer; while coffee has met an active inquiry on fully former terms. Tea is unchanged in the absence of business. Rice has been neglected; but rum has been steady in value and demand. Spices are unaltered in price.

Mr Helmuth Schwartze reports:—On the 7th instant, a few days after the despatch of last mail, the fifth and last series of this year's London colonial wool sales closed, the catalogues having comprised about 75,000 bales, of which scoured, as usual at the season of the year, were the chief feature, and the opening average advance of 1d per lb on the closing rates of October having been—slight fluctuations excepted—fully maintained throughout. In the interval that has since elapsed, the firm tone has steadily continued, though transactions have been but few owing to stock-taking and the occurrence of holidays. The prices ruling in the business that has been done however, fully evidence the firmness of the market, which is also further strengthened by the healthy activity still everywhere prevailing in the industry. The large rate of consumption thus continuing undiminished, and the moderate stocks suffering thereby proportionate reduction, there seems a very good prospect that the present level of prices will be firmly supported in the next series, which is fixed to commence February 8, 1872, and for which the arrivals up date comprise:—Sydney, 824 bales, and there are afloat 13,568 bales; Port Phillip, 1,609, and there are afloat 37,751; New Zealand, 946, and there are afloat 1,829; Adelaide, afloat 28,330; Van Diemen's Land, afloat 381; Cape, 8,310, and there are afloat 1,807—total, 11,689 bales; total afloat, 83,666 bales. The following figures show the importation of colonial wool during 1870 and 1871:—Imports during 1870—Sydney, 142,352 bales; Port Phillip, 209,261; Adelaide, 68,545; Swan River, 5,298; Van Diemen's Land, 17,318; New Zealand, 106,628; Cape, 124,473—total, 673,473 bales in 1870. Imports during 1871:—Sydney, 147,468 bales; Port Phillip, 216,027; Adelaide, 66,400; Swan River, 4,884; Van Diemen's Land, 15,726; New Zealand, 110,510; Cape, 124,531—total, 685,546 bales in 1871. In order to arrive at the total actual consumption for this year, about 50,000 bales held over from 1870 must be added to the total of fresh imports. This gives a comparative actual consumption for the two years of about 624,000 bales in 1870, and 734,500 bales in 1871, that is a difference of about 110,500 bales more this year than in 1870.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on Nov. 14, report:—The mail steamer Cambrian, after a very protracted voyage, arrived in Table Bay on the 8th inst, bringing advices of a rise in the September sales of 1d to 2½d per lb. Many buyers here had already anticipated such a rise, and were giving ½d to 1d more than justified by last advices. Since the arrival of the Cambrian's mail there have not been many transactions, the very high prices asked by sellers inducing buyers to operate more cautiously. Scoured—Uitenhage in fair demand. A nice lot changed hands yesterday at 2s. Some few parcels of country scoured have been sold at ½d advance on last quotations. Fleecewashed—Good clean parcels have been sold at 1d advance, and lower grades at ½d advance. Grease—Before the arrival of the mail as high as 9⅜d was paid for good parcels. Since arrival of the mail holders have been asking 10d to 10½d, but the news from America being unfavourable, buyers will not respond, and no sales have taken place. Washing wools are in great request, and almost as dear as American sorts. Wool continues to come in more freely from the country towns, and the balance of the old clip will soon be in. We give the following quotations, based on the few transactions that have taken place:—Grease, full-grown, superior 9d to 9¼d; fine, light, for scouring, 8½d to 9d; heavy and inferior, 7½d to 7⅝d. Fleecewashed—Superior, clean, 15d to 16d; good average, 13½d to 14d; inferior and heavy, 11d to 12½d. Snow-white—Prime Uitenhage scoured, 23d to 24d; second quality scoured, 21d to 22½d; superior country scoured, machine washed, 21d to 22d; superior country scoured, 20d to 21d; inferior to good country scoured, 17d to 19½d.

The annexed is dated New York, December 16:—As usual during the closing weeks of the year, the volume of trade, beyond the customary traffic in holiday goods, is quite moderate. The demand for goods from the interior is mostly confined to small orders for keeping up assortments, and with a close money market, prices, as a rule, favour the buyer. The closing period of the year is always considered a good time to buy; though just at this time most operators have other uses for their money, and hence do not care to take advantage of the pecuniary necessities of sellers. The low ruling of gold has a tendency to restrict trade in foreign commodities, and to hold the exports of produce in check; yet there is about the average amount of business in progress. The demand for money continues active from the mercantile classes as well as from stock speculators, and the legal rate for call loans is obtained without difficulty, and in some instances a small bonus added by the more needy borrowers. Mercantile paper of the best quality is discounted at 8 to 9 per cent., while paper not so widely or favourably known passes at from 10 to 12 per cent. and upward. Exchange has ruled firm, and in some instances bankers' bills have realised a slight advance.

The following circular, dated November 27, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—The weather has with but slight exceptions been fine throughout the fortnight, and shippers have been enabled to make good progress. The exports of coffee have in consequence been well maintained at the previously advised excess over last season's operations:—

With fewer crops on our market, there has been decidedly less business doing in parchment, but generally prices have been maintained, and in the case of high-grown of favourite marks the extreme price of 13s 3d has been paid. There has been a good demand for native sorts at a further advance, picked and dried for shipping being now 54s.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, Nov. 29:—Since our report of the 21st three public sales have been held, comprising indigo of all descriptions, and the demand for all has been good. Sound shipping qualities, of which Lower Bengal furnishes a very short supply this year, are perhaps the most eagerly competed for, and command very high prices. 350 rs per maund is the highest price paid for any ten chests thus far, but when more of the fine Tirhoot marks come forward we shall no doubt see that figure surpassed. It is impossible to say with any degree of confidence how fine indigo is selling compared with the London July sales, there having been little or none of such quality in the catalogues, but at the exchange of the day, 2s per rupee, it appears to us to be bringing an advance of 1s per lb, and other qualities 8d or 10d per lb. The quality of the Tirhoot and Chuprah marks which we have seen is quite up to the usual standard, but we must see more of the crop before we can venture to give an opinion as to its general character. The up-country natives appear to be unwillling to sell freely at the prices obtainable for Oudes, and frequently put on limits considerably above market rates, on what grounds it is difficult to understand. We estimate the total quantity disposed of up to date at 45,000 maunds, or half the crop, against about 16,000 maunds at corresponding date last year. Exports of indigo from 1st to 25th November, 1871:—To Great Britain, 377 chests; France, 124; Trieste, 49; Foreign Europe, 2; America, 10—total, 562 chests.

THE COTTON TRADE.

LIVERPOOL.—DECEMBER 28.

The cotton market closed quietly on Saturday, and re-opened on Wednesday after the holidays without change, the quotations of last Thursday being generally resumed. In Sea Island only a small retail business has been done at previous prices. American has been in moderate demand, and is freely offered, but without quotable change. New York advices to the 28th inst., quote middling Upland 20 cents, costing to sell in Liverpool 10¾d per lb, by steamer. Brazil has been in limited request, at a partial decline of ¼d per lb. Egyptian continues in good demand, and prices have had an hardening tendency. East Indian has been difficult of sale, and prices are, in a few instances, slightly reduced; the better sorts of Bengal and Scinde, however, are rather dearer.

In cotton to arrive the transactions have been limited, and at rather lower prices. The latest quotations are:—American, basis of middling, not below good ordinary, from any port,

shipment November-December, 9 1/16d; January-February, 9¾d —New Orleans, shipment November, 10⅛d; November-December, 10⅛d; January-February, 10 1/16d; shipping or shipped, 10⅛d; December-January, 10⅛d; delivery, without clause, January-February, 10d; February-March, not below good ordinary, 10 1/16d, Dhollerah, fair merchants, not below middling fair, delivery February, 7⅛d; March, 7⅛d per lb.

The sales of the week (four days), including forwarded, amount to 53,080 bales, of which 5,540 are on speculation, and 8,640 declared for export, leaving 38,900 bales to the trade.

DEC. 29th.—The sales to-day will probably amount to about 10,000 bales, the market without change.

The actual stock of cotton, declared this morning, amounts 566,900 bales, which proves to be 84,630 more than the estimate, showing an increase of 59,030 American, 19,140 Brazil, 13,650 Egyptian, and 400 Smyrna, and a decrease of 600 West India, and 6,990 East India.

Saturday, the 30th December, and Monday, 1st January, 1872, will be close holidays in the cotton market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	762,500
An increase of quantity taken for consumption of	568,640
An increase of actual exports of	204,800
An increase of stock of	188,180

In speculation there is an increase of 429,340 bales. The imports this week have amounted to 93,344 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to Dec. 22) is 187,000 bales, against 345,000 bales at the corresponding period last year. The actual exports have been 10,501 bales this week.

LONDON.—DECEMBER 28.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

There has been but little doing this week, owing to the holidays, but the small business reported is at about previous rates.

Sales to arrive—700 bales Western Madras, at 7 7/16d to 7⅛d, November to January shipment and sailing, for fair: 300 bales Bengal, at 6⅞d to 6 7/16d, December-January shipment, for fair new—total, 1,000 bales.

NEW YORK.—DEC. 16.

The market on Wednesday for cotton on the spot was dull and irregular, closing steady. On Thursday the market opened strong at an advance of one-eighth of a cent, which was afterwards lost. Yesterday there was only a moderate request, and prices declined one-quarter of a cent, the market closing weak. The sales comprise 7,423 bales (including 226 to arrive), of which 1,723 were taken for export, 5,034 for spinning, 74 on speculation, and 592 in transit. On Wednesday the market for future delivery opened at a decline of one-quarter of a cent, which, before the close, was recovered. On Thursday the demand was active at an advance of ¼ to ⅜ of a cent, which was subsequently lost. Yesterday the transactions were limited, at a decline of one-quarter of a cent, the market closing steady. The sales aggregate 52,950 bales at 19 5/16 to 29¾ cents (basis low middling); 19 5/16 to 19⅞c for December, 19½ to 20⅛c for January, 19⅞ to 20⅜c for February, 19 13/16 to 20⅛c for March, 20 to 20¾c for April, and 20½ to 20¾c for May. We quote:—

Total import since 1st inst., 40,201 bales; total import since 1st Sept., 267,409 bales.

NEW YORK, Dec. 23.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States ports have been 130,000 bales; and since the 1st of September, 1,255,000 bales. Shipments to England, 39,000 bales; ditto to France, 10,000 bales; and to the continent, 16,000 bales. Total since the 1st of September, 635,000 bales. Stock at all ports, 434,000 bales. Middling Upland, 9 11/16d, cost and freight, per steamer.

NEW YORK, Dec. 26.—The receipts of cotton at all United States' ports for the last four days have been 60,000 bales. Shipments to England, 17,000 bales; ditto to France, none; ditto to the continent, 4,000 bales. Middling Upland, 9¾d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Dec. 28.—Our market during the past week has been very quiet and unsettled. The Christmas holidays and the anxiety upon the part of merchants and manufacturers to see the result of their stocktaking, has had the effect of limiting business to a very small compass. India and China shirtings are still in very poor demand, the large stocks held on the other side deterring shippers from operating further. Printers are in better request, and makers, being well under contract, adhere firmly to their quotations. Mulls and jacconetts are saleable, but at very unremunerative rates. Domestics and T'cloths are still very heavy of sale, and stocks are rapidly accumulating. In yarns for the home trade values are nominally unchanged, though it would be necessary to take lower prices to transact much business. This refers more particularly to the lower counts, as spinners of the finer numbers are heavily sold, and hold out for extreme rates, and are, therefore, not so good to deal with as the producer of coarser counts, whose contracts are running out. For export there is not much inquiry, though owing to spinners being well sold prices are steady.

BRADFORD.—There is no abatement of activity in the wool market. All descriptions of wool are in fair request, good wethers being still most in favour. Wool is bought for immediate consumption, and prices have again an upward tendency. Noils and brokes are in good request, and prices are very firm. There is an active inquiry in the yarn market, and a fair amount of business in most classes of yarns has been done at higher rates. The piece market is rather quiet, the high rates tending to discourage operations.

BELFAST.—Flax—There were small supplies in the market, in some of which prices were well maintained. Yarns—A further improvement in the demand may now be reported, and a good steady business has been transacted. Advanced rates —say 1½d to 3d per bundle—have been demanded, and in many cases realised. Linens (brown)—The business transacted in the various descriptions of powerloom goods has been generally to a fair moderate extent. Bleached and Finished Linens—Home transactions reached an average amount for the season. In stocks a slight reduction has been reported. Prices are fully maintained.

BIRMINGHAM.—There was a fairly numerous attendance of ironmasters and merchants on 'Change, but business was virtually at a standstill, as many of the leading firms have closed their order-books for the present, and the future circumstances of the trade are too uncertain to warrant any large addition to present engagements. One great element of uncertainty just now is the future price of coal, which represents so large a proportion of the cost of iron. The colliers are agitating for a general reduction of the hours of labour to nine per day, with a proportionate modification of the "stint" for those who work by the piece, and if these demands are conceded, it is estimated that the price of coal will have to be increased about 2s per ton, or 20 per cent., and iron advanced from 1*l* to 2*l* per ton. The masters express little apprehension of a strike, as they believe the men have no real grievance, and have been simply urged on to make their present application by agitators and emissaries from other districts.

DUNDEE.—Our flax market continues very firm, and prices have still a stiffening tendency. The business doing has not been extensive, but any transactions that have taken place have been at fully former prices, and consumers show a willingness to operate in parcels of suitable quality at about late rates. Tows continue in good demand, and advanced prices are now required by sellers. The jute market remains quiet, and without much alteration in prices. There has been a moderate demand for flax and tow yarns throughout the week, and firm prices have been granted. Jute yarns are not quite so active, but prices are without change. The demand for linens is good, and there is again a large business doing in jute goods at about former prices.

NOTTINGHAM.—The trade continues in a healthy state, and on the resumption of business manufacturers have plenty of employment, orders, both foreign and home, being on hand. The hosiery trade has of course been interrupted by the holidays; but business remains in the same satisfactory state, and hands are fully employed. Yarns are firm.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec. 16.

The wheat market remains inactive, with scarcely business enough to establish prices definitely, exporters still being without clear shipping margins. The views of sellers appear to have undergone no change, they still being averse to granting concessions necessary to a revival of trade in the hope of a favourable turn in the foreign markets, which, with liberal stocks on hand, continue inanimate. The seasonable curtailment of floating supplies for Great Britain from the Baltic and Black Seas and the United States does not have the same influence upon the English market now that it was wont to have when the railway system of Europe was not so well developed and before the days of telegraphic cables. Prices are decidedly dearer than at Liverpool, and until the equilibrium shall be restored, the export trade must continue in abeyance. There have only been a few small sales of wheat, mostly to millers, at $1.52 to $1.55 for good and choice No. 2 spring (closing nominally at $1.51 to $1.58), $1.59 to $1.60 for red winter Western, $1.62 to $1.65 for amber ditto, $1.65 to $1.75 for white State, $1.62½ for amber ditto, and $1.68 to $1.78 for white Michigan (closing nominal). Corn ruled dull, and rather weak till yesterday, when the market became firmer on favourable cable advices. Sales, 250,000 bushels—yesterday's transactions at 77½c to 78c for new, and 78c to 79c for old mixed Western; 81c for white Southern; and 79c to 80c for yellow Western.

The flour trade continues very dull, but there has been no material variation in prices of State and Western during the period under review. Exporters maintain that they cannot pay current prices and get out without loss, while sellers are unwilling to make concessions from prices already relatively lower than the cost of wheat. The home trade also continues moderate, but established brands of spring and winter wheat flour of good grades have a somewhat better support than the shipping grades, which are offered at $6.50 to $6.65, and even at 5 to 10 cents below for ordinary. The receipts are still light, the unsatisfactory condition of trade tending to keep back supplies, and this is regarded as the strongest feature of the market. Sales 22,000 barrels closing dull, with prices to some extent nominal. Southern flour has been purchased to a moderate extent for the West India and South American markets, including 3,000 barrels to arrive from Richmond for shipment to Rio; sales besides, 2,500 barrels, at $6.80 to $7.35 for inferior to fair extra bands, and $7.40 to $9.25 for good to choice ditto.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The grain trade has been much depressed during the past week, owing to the intervention of the holidays, and to the simultaneous arrival of a further large number of grain-laden vessels off ports-of-call. According to Mr George Dornbusch's floating cargoes list, the Christmas fleet of 1871 contains 199 vessels, being 5 less than in 1861. It is believed, however, that in a short time the whole will have changed hands, though it was natural that so large an arrival should exercise an adverse influence upon the quotations. The fleet is the largest of any one during the last eleven years, excepting the one in February, 1861, whose number exceeded the present by 36 vessels. At Mark lane business has been on a most restricted scale, and very little has been done, notwithstanding there have been only two working days this week. The open weather and the plethoric state of the granaries have caused millers to limit their operations as much as possible, and prices have accordingly shown weakness. Sales of foreign wheat have been effected at a decline of 1s per quarter, the reduction having been submitted to in order to save demurrage; but fine English wheat cannot be quoted cheaper. It may be remarked, in passing, that the recent arrivals are not of good quality, or in fine condition. Flour has ruled very inactive in sympathy with the wheat market, and prices have had a downward tendency.

There has been little inquiry for any kind of spring corn. Oats have met a slow sale on rather easier terms; while maize is the turn cheaper. Barley, beans, and peas are nominally unaltered, in the absence of important business.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 119 grain and seed-laden vessels have arrived at ports-of-call, viz.:—65 wheat, 18 maize, 9 barley, 7 rye, 8 beans, 1 wheat and barley, 5 linseed, 2 rapeseed, 1 cotton-seed, 1 valonea, and 2 sundries. The floating grain trade has been interrupted by the Christmas holidays. The large arrivals off the coast have depressed the market, the tendency in prices for all articles being downwards. Wheat—The sale even of fine cargoes has been difficult at 1s to 2s decline on the week; and inferior sorts have been altogether unsaleable. Maize unaltered at about last week's prices. Barley 1s to 1s 6d cheaper. Rye has been sold at late, if not enhanced, prices. The reported sales are as follows:—Wheat—29 arrived cargoes: New coast Ghirka, from Taganrog, 52s 6d to 54s 6d: ditto, from Nicolaieff, 48s to 53s 3d; Ghirka, from Odessa, 53s; new ditto, 52s and 52s 6d; old ditto, 50s; Nicopol Ghirka, 51s; Rostoff Ghirka, from Taganrog, 46s to 49s; new hard, 48s; Marianopoli, 54s per 492 lbs. White winter Montreal, 60s and 61s 6d; spring, from Boston, 55s; red winter, from New York, 56s; white Daira, from Alexandria, 50s; Saidi, 45s 9d and 46s per 480 lbs. Maize—8 arrived cargoes: Mazagan, 33s 10½d; Ibrail, 30s 4½d; Galatz, 34s; Foxanian, 28s; Danubian, 28s per 480 lbs. Odessa, 34s 3d per 492 lbs. Cassablanca, 33s 6d; mixed, from New York, 33s per 80 lbs. Barley—12 arrived cargoes: Moldavian, 26s; Wallachian, 25s 6d; Odessa, 25s 6d; Azow from Taganrog, 25s 3d and 25s 6d; new Danubian, 24s and 26s 6d; Ibrail, 26s 1½d; new white from Taganrog, 25s per 400 lbs. Rye—5 arrived cargoes: Nicolaieff, 34s; Odessa, 33s 10½d; new Berdianski, 33s 6d; Azow, 31s 9d per 480 lbs. Beans—2 arrived cargoes: Saidi from Alexandria, 32s 9d and 33s per 480 lbs. Linseed quiet but steady. 4 arrived cargoes: 3 cargoes Azow from Taganrog, 62s, and 1 cargo Trapani from Mazzala, 63s per 424 lbs. Rapeseed quiet. Cottonseed also quiet.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

MINCING LANE, FRIDAY EVENING.

SUGAR.—There has been a good demand, and holders generally are not sellers upon previous terms. The stock in London was further reduced to 41,100 tons on the 23rd inst., but there have been several arrivals since then. Home deliveries from this port will show an increase of about 17,000 tons for the year as compared with the previous one.

At the close of last week two floating cargoes of 12,000 bags Mauritius, numbers 14 and 15, sold for the United Kingdom, exact particulars of which did not transpire, subsequently a cargo of Cuba of the new crop sold at the high price of 29s per cwt.

Supplies of beet sugar arrive freely, and business has been done at rather higher prices. Refined is firmer here, with sales of dry goods at a slight advance.

RUM.—The market is lower, and further arrivals have taken place. Demerara proof, 2s to 2s 1d per gallon.

COFFEE.—Higher rates have been generally paid, and the market still shows an improving tendency. A few parcels native Ceylon have sold on the spot, and the last sale effected for arrival was at 69s, quality guaranteed. This price since refused. Plantation kinds obtain extreme rates. Further business has been done in Manila at 67s 6d to 68s. Two floating cargoes of Rio sold at the unusually high price of 71s for a near port, and one of St Domingo at 68s per cwt. The landings last week were 1,715 tons; the deliveries, 1,070 tons; leaving the deficiency in stock not more than 5,000 tons. Shipments from Colombo have been earlier and larger than last year, but the crop will probably prove less than in the previous season. The East India will also arrive sooner than usual, owing to the facilities afforded by the steamers.

TEA.—There have been five vessels reported from Shanghai, bringing a rather large quantity of black leaf congou. Part of the supplies were offered yesterday and to-day, when fair prices were obtained for the medium grades. The market remains quiet.

RICE.—Transactions have been upon a small scale, and there is not any improvement in the demand.

IMPORTS and DELIVERIES of RICE to Dec. 23, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ...tons	85350 ...	77750 ...	78850 ...	71000
Deliveries	102350 ...	75360 ...	61200 ...	55570
Stock	36400 ...	52000 ...	50350 ...	32650

SAGO.—The last sales of small grain were at 17s 3d to 17s 6d, and nothing of good quality can now be had at the latter price, holders generally asking a further advance.

SPICES.—Small orders have been executed in black pepper upon previous terms. The stock is increasing, and now exceeds those of the two previous years at the same date. Pimento firm, with considerable sales at 3d to 3½d per lb.

SALTPETRE.—Very little business has been done. The last sales of Bengal afloat were at 29s to 29s 6d per cwt, usual terms.

IMPORTS and DELIVERIES of SALTPETRE to Dec. 23, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ...tons	10750 ...	11270 ...	11190 ...	7070
Total delivered	11450 ...	13500 ...	10750 ...	11100
Stock	1700 ...	2580 ...	4636 ...	4190

Deliveries last week, 324 tons.

DRYSALTERY GOODS.—Cochineal is firm, and rather dearer since the last sales, as it is expected that supplies from Teneriffe will fall off. There have been some arrivals during the past week. A speculative demand has prevailed for cutch. Boxes sold up to 25s, and to-day 25s 6d paid. Gambier firm, but quiet. The last business was at 19s per cwt, ex ship. Turmeric quiet, at 17s per cwt for Bengal.

METALS.—Although comparatively few transactions are reported this week the quotations remain steady. A good business in Scotch pig iron up to 73s cash. The shipments this year show rather more than 30 per cent. increase upon the previous season. Copper has not shown any change, a few sales of Australian and Chili being made at last week's quotations. Lead maintains the recent improvement. Spelter has been rather cheaper, selling at 22*l* to 22*l* 15s for Silesian. Tin is under the influence of speculative operations. Straits afloat has sold at prices varying from 143*l* to 145*l*; on the spot at 145*l* cash.

JUTE.—Stocks are increasing here and in Dundee, and the supply of common quality is now large. The market has not presented any new feature this week. Business for arrival has been done up to 25*l* per ton.

OILS.—The principal alteration in these markets has been a slight decline upon linseed. It is now steady at 33*l* spot, and 5s to 10s more for delivery. English brown rape dull and rather lower—viz., 43*l* 5s to 43*l* 10s on the spot or for early delivery. Palm and cocoa-nut remain as last quoted, and are quiet. No change reported in olive.

PETROLEUM.—American refined, 1s 4d to 1s 4½d per gallon, and the market is dull.

TALLOW.—Prices of foreign are lower in all positions at the close. Petersburg, 48s 6d to 48s 9d; March, 49s 3d to 49s 6d per cwt. The deliveries are good, keeping the stock at a moderate point. A large quantity of Australian will be brought forward at next Friday's sales. No alteration in town tallow to-day.

LINSEED.—Prices are about the same as last quoted. Calcutta, 62s 6d; ditto afloat, 63s; and Black Sea on the coast 62s 3d per quarter.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that the consumption of oranges of all kinds has been good, owing to the present holidays. An increasing stock of lemons has rendered prices easier. Seville sours to hand, and in request. Barcelona nuts sustain their price. Black Spanish and cocoa-nuts in demand. French chestnuts dull, in consequence of mild weather.

ENGLISH WOOL.—Prices very firm, with an upward tendency.

FLAX.—Market firm.

HEMP.—Market very dull for Russian, but there is more inquiry for Manila by the last mail. Not any shipments made to Great Britain.

SILK.—Market very firm, and best silk a trifle higher in price.

SEEDS.—Very little business has been passing in seeds during the past week, and quotations are unchanged.

TOBACCO.—There has been but little inquiry for North American tobacco during the past week, and all other growths have participated in the general dullness of the market. Holders are firm at their asking prices. But little improvement in the demand is looked for for some few weeks to come, it being customary for buyers not to increase their holdings at this period of the year.

LEATHER.—There was not of course any leather market held at Leadenhall on Tuesday, but the transactions up to the close of last week were larger than usual at the season of the year. The supplies of leather are small, particularly light English butts, shoulders, and bellies, all which were greatly in request. Prime dressing hides are also wanted.

METALS.—The holidays have had more attention than business during this week. Copper shows great firmness, and the tendency is rather still to advance than to recede in prices. Iron is very much in request. Tin has fluctuated, but no very material change has taken place, and but little has changed hands. Spelter is steady. Lead is very firm at full quotations. Tin plates have again become dearer.

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 25.—The total imports of foreign stock into London last week amounted to 3,961 head. In the corresponding week in 1870, we received 7,695; in 1869, 8,588; in 1868, 4,545; and in 1867, 3,263 head. Imports into London last week:—Beasts—From Bremen, 53; Harlingen, 199; Rotterdam, 48—total, 300. Sheep—From Antwerp, 1,213; Bremen, 861; Harlingen, 330; Rotterdam, 1,129—total, 3,533. Calves—From Dordt, 90. Pigs—From Rotterdam, 38. The yearly comparison of weekly imports is as follows:—

	1870.	1869.	1868.	1867.
Beasts	987	924	423	167
Sheep	5,810	6,213	3,994	2,980
Calves	209	180	98	72
Pigs	689	1,241	30	44

This being Christmas day the cattle market has been closed.

METROPOLITAN MEAT MARKET.

Per 8 lbs by the carcase.

	s	d	s	d		s	d	s	d
Inferior beef	3	4	to 4	0	Inferior mutton	3	8	to 4	4
Middling ditto	4	0	4	6	Middling ditto	4	6	5	0
Prime large ditto	4	6	4	10	Prime ditto	5	0	5	4
Prime small ditto	4	10	5	0	Large pork	3	4	4	4
Veal	5	4	6	0	Small pork	4	4	5	0

HOP MARKET.

BOROUGH, Friday, Dec. 29.—The market has continued quiet. Transactions, owing to the Christmas holidays, have been restricted, and no change of importance has taken place in values. Mid and East Kent, 10*l* to 16*l* 16s; Weald of Kent, 8*l* 10s to 10*l* 10s; Sussex, 7*l* 5s to 9*l* 9s; Farnham and country, 11*l* to 16*l*. Yearlings: Mid and East Kent, 3*l* to 6*l* 10s; Weald of Kent, 3*l* to 5*l* 15s; Sussex, 3*l* to 5*l* 5s; Farnham and country, 4*l* 10s to 7*l*; odds, 1*l* 5s to 2*l*.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Dec. 29.—The supplies have been moderate. The trade has been quiet at late rates:—Flukes, 105s to 135s; Regents, 70s to 120s; Rocks, 85s to 95s; Victorias, 110s to 125s; French, 65s to 80s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 29.—The year closes with an active demand for home consumption, at prices with an upward tendency, and with stocks of but moderate compass, although the imports this year have been here nearly double those of the previous one, viz., 300,500 bales, against 151,200 bales in 1870.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 29.—There was about an average attendance, and the business in wheat was on a moderate scale, sellers obtaining fully last Friday's prices, and American spring was rather dearer. Flour quiet, but steady. Beans and peas dull, and previous prices not maintained. Oats and oatmeal quite inactive. Only a small business was done in Indian corn. Mixed American, 31s 6d to 31s 9d, prices being lower than during the past few days.

WAKEFIELD, Friday, Dec. 29.—Considering the season of the year, and the extremely open weather, we have had as good a market as could be wished for, and the value of fine dry wheats is fairly maintained. Common sorts quite neglected. Best barley fully as dear. Other descriptions go off slowly. Beans in poor request. Other articles as before.

The Gazette.

TUESDAY, Dec. 26.

BANKRUPTS.

Thomas Bayly, King Edward street, Islington, late miller.
Ambrose Maude Hurst, Barnet grove, Hackney road, financial agent.
Henry Boland, Aberavon, Glamorganshire, bootmaker.
George Hele, Plymouth, pianoforte tuner.
Richard and Joseph Henley, Ashford, Kent, seed merchants.
Charles Hill, New Malton, Yorkshire, tailor.
James Leggett, Penrith, Cumberland.
William Tharme, Stone, Staffordshire, victualler.

SCOTCH SEQUESTRATIONS.

James Cross Andrew, New Stevenston, near Holytown, draper.
George Stronach, Rye hill, Oyne, farmer.
Andrew Hamilton, Dunbar, grocer.
William M'Innes, Inverness, tailor.
Robert Don Watt, Kirriemuir and Alyth, watchmaker.
John Watson, Edinburgh, bedstead manufacturer.

THE GAZETTE OF LAST NIGHT.

BANKRUPTS.

Rowland Yate, Clarges street, Mayfair, Middlesex, and of the Special Commissioners' Department, Inland Revenue, Somerset House, Strand, clerk in Civil Service.
George Barrett, Portland place, Kingston-upon-Hull, joiner and builder.
Joseph Simpson, Chester street wharf, Aston road, Birmingham, coal merchant.
William Johnson, Matlock bridge, Matlock, ironmonger.

SCOTCH SEQUESTRATION.

David Stewart, Dalbrack, Lochlee, farmer.

STATEMENT

Of Imports, Exports, and Home Consumption of the following articles in the 50 weeks ending Dec. 23, 1871, showing the Stock on Dec. 23, compared with the corresponding period of 1870.

FOR THE PORT OF LONDON.

*** Of those articles duty free, the deliveries for Exportation are included under the head Home Consumption.

DUNN & HEWETT'S "BROMATINE," a Cocoa deprived of its superfluous Butter, 6d a Packet.

MANUFACTORY—PENTONVILLE, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

MESSRS GABRIEL'S

SEDADENT.

THE CURE FOR TOOTHACHE.

Sold by all Chemists.

Price 1s 1½d. Post free, 1s 3d.

MESSRS GABRIEL, DENTISTS,

(Established 1815),

64 LUDGATE HILL, CITY, and 56 HARLEY STREET, W., } London.

(Their only Establishments.)

Where they practice their painless system of DENTISTRY.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

DINNEFORD'S FLUID MAGNESIA.

—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

JOSEPH GILLOTT'S STEEL PENS.

SOLD BY ALL DEALERS THROUGHOUT THE WORLD.

KINAHAN'S LL WHISKY.

This celebrated and most delicious old mellow spirit is the very

CREAM OF IRISH WHISKIES,

in quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy.

HOLLOWAY'S OINTMENT AND PILLS.

—Sores which are daily extending, ulcers which are hourly deepening, may be arrested in their torturing progress, and induced to take a healthy action by applying this healing Ointment, and taking these purifying Pills. It soothes all distempers, and extracts all morbid matters from the skin. Old ulcers of the legs, inflammations caused by varicose veins, cramps in the lower limbs, can easily be eased and shortly cured by Holloway's never-failing Ointment, which represses excessive and stimulates sluggish, evascular, and nervous action. In constitutions breaking down under piles, fistulas, and other similarly painful maladies, a few applications of this soothing Ointment will give comfort, and a persistence in its use will effect a cure

LLOYD'S LIST
(Established in 1726).

The official organ of the Committee of Lloyd's, published daily in time for the Morning Mails, and containing the most complete reports of every description of SHIPPING AND COMMERCIAL INTELLIGENCE

		£	s	d
Annual subscription		3	0	0
Do.	with evening edition	4	0	0
Do.	evening edition alone	2	0	0
Quarterly subscription		0	16	0
Do.	with evening edition	1	1	0
Do.	evening edition alone	0	10	6

Extra for postage at the rate of 13s per annum.

On and after the 1st of January next, the size of this journal will be considerably enlarged, for the purpose of extending its Shipping and Commercial information. From that date this long-established journal, in addition to its complete Summary of Shipping News (which will include a Reliable Homeward-Bound List), will contain correct and early intelligence of each day's commercial transactions. Full reports will be given of Stock Exchange, Mincing lane, Corn, Cattle, and all other markets of interest to the mercantile classes. Reports will also appear in each issue of the Provincial markets of the previous day, including Corn, Cattle, Manufactures, &c. The state of the principal Foreign markets will also form a feature in its columns; and many other additions of importance to the commercial world will be made.

Evening Edition.—For the convenience of the Country and Foreign Subscribers, from January 1st an Advance Sheet will be issued daily in time for the Evening Mails. This Edition may be subscribed for separately, or together with the Morning Edition. The two Editions combined will keep subscribers informed up to the latest moment as to Shipping movements, the fluctuations of the markets, &c., &c.

Terms for insertion of advertisements sent on application to the Publishers,

SPOTTISWOODE AND CO.,

Anglo-Austrian Bank, 18 and 19 Fenchurch street, London, 27th Decemoer, 1871.

IMPERIAL OTTOMAN BANK.

GENERAL DEBT OF THE OTTOMAN EMPIRE.

The Imperial Ottoman Government hereby give notice to the bearers of Bonds of the General Debt (5 %) of the Ottoman Empire, who intend to receive in Europe the current half-yearly Interest, that they must declare such intention at the Agencies of the Imperial Ottoman Bank in London or Paris, or at its correspondents in Frankfort and Amsterdam, between the 30th December 1871, and the 9th January, 1872, inclusive.

This declaration must be accompanied by a list of the numbers of the Coupons intended to be deposited, but not by the Coupons themselves.

After the 13th January, the Coupons of which the lists have been sent in, in accordance with the above directions, are to be deposited for verification, together with a duplicate list, at the Agencies of the Imperial Ottoman Bank in London or Paris (in London daily, Saturdays excepted, between the hours of 11 and 3), or at its correspondents in Frankfort and Amsterdam, when they will be exchanged for a receipt payable at ten days' date.

Those Coupons which, although declared as above, shall not have been presented for payment at the places indicated before the 13th April, 1872, will, after that date, be payable at Constantinople only.

The necessary forms can be obtained on application at the offices of the Imperial Ottoman Bank, 26 Throgmorton-street.

N.B.—Cheques can be sent by post only at the written request and risk of the holder of the Bonds.

DEBENTURES AT 5, 5½, AND 6 PER CENT.

SOUTH OF AUSTRIA AND UPPER ITALY RAILWAY COMPANY.

Holders of all the series of bonds (obligations), Series X excepted, are informed that the Half-Year's Interest falling due on the 1st January, 1872, will be PAID from the 2nd January, at the rate of 7f 50c per bond, at the following places:—

Paris—MM. de Rothschild Frères;
Marseilles—At the Syndicate of the Agents de Change;
Lyons—MM. P. Gailline and Co., and Veuve Morin, Pons, and Morin;
London—MM. N. M. Rothschild and Son.

PENNSYLVANIA RAILROAD SIX PER CENT. GENERAL MORTGAGE STERLING BONDS.

The DIVIDEND WARRANTS, due on the 1st January next on the Pennsylvania Railroad Six per Cent. General Mortgage Sterling Bonds, negotiated through the London, Asiatic, and American Company (Limited) (T. Wiggin and Co.), will be PAID on the 1st January, or any succeeding day (Friday excepted), between the hours of 10 and 2, at their Counting-house, 26 Old Broad street, E.C., where the customary lists may be obtained.

The warrants must be left two clear days for examination.

26 Old Broad street, London, E.C.

HOLLAND.—STAATSEISENBAHN BETRIEBS GESELLSCHAFT (Company for Working the Dutch State Railway).

The Director-General begs to announce that the Fourth Coupon of the Bonds of the Five per Cent. Preference Loan of 6,667,000fl nominal, will be PAID on and after the 1st of January, 1872, as under:—

In Amsterdam—At Messrs Lippmann, Rosenthal, and Co's, and Messrs Wertheim and Gompertz.
In Frankfort on the Maine—At the Branch of the Bank fur Handel and Industrie.
In Brussels—At M. Jacques Errera Oppenheims.
In Berlin—At Messrs Cohn, Burgers, and Co.'s.
In London—At Messrs G. and A. Worms.

ITALIAN TOBACCO MONOPOLY COMPANY.

The shareholders of this Company are informed that on and after 1st January, 1872, the Coupon No. 6 will be PAID at the rate of Lire 25.50 (at the exchange of the day), for each share upon which Lire 350 have been paid, being—

Lire 15 for dividend for the year 1870
10.50 for interest at 6 per cent. per annum, from 1st July to 31st December, 1871.

Lire 25.50

The Coupons will be PAID at the undermentioned places, viz.:—

In Florence and Turin—By the Société Générale de Credit Mobilier Italien.
In Rome, Genoa, Milan, Naples, Venice, Palermo, and Leghorn—By the National Bank of the Kingdom of Italy.
In Geneva—By Messrs P. F. Bonnar and Co.
In Paris—By Messrs A. J. Stern and Co.
In Berlin—By Messrs R. Warschauer and Co.
In Frankfort-on-the-Main—By Mr Jacob S. H. Stern.
In London—By Messrs Stern Brothers.

Florence, 18th December, 1871.

ITALIAN 6 PER CENT. TOBACCO LOAN.

Messrs STERN BROTHERS beg to announce that on and after 1st January, 1872, they will be prepared to PAY the Coupons for the Half-Yearly Interest on this Loan, due on that date, which may be presented for payment in London.

Bonds of Series X, drawn in Florence on 2nd October last, will be PAID at the same time, provided they bear the English Government Stamp.

Lists, together with the coupons and drawn bonds, must be left for examination four clear days previously to calling for payment.

Angel court, Throgmorton street,
December 22nd, 1871.

THE BRITISH AND FOREIGN TRAMWAYS COMPANY (Limited).

Subscribed capital, £300,000.

DIRECTORS.

The West of England Bank, Bristol, and Ross, Herefordshire.

SOLICITORS.

Messrs Poole and Hughes, 9 New square, Lincoln's inn, London.
Messrs Fussell, Prichard, and Swann, Bristol.

BROKERS—Messrs Irvin and Slade, 7 Copthall court, London.
AUDITORS—Messrs Deloitte, Dever, and Hollebone 4 Lothbury, London.
SECRETARY (PRO TEM.)—Mr F. Bölling.

OFFICES—2 Laurence Pountney hill, Cannon street.

The Company is formed to purchase and develop the following valuable leases and royalties of the rich Iron Ore Mines, owned and now being worked by the Messrs Allaway, in the Forest of Dean, Gloucestershire.

(A) The well-known mineral property generally described as the Wigpool Mines, and held under grants from the Crown, made in pursuance of the Dead Forest Act (1 and 2 Vic. chap. 43), at a Royalty of 3d per ton, and a dead rent for the whole of £45 per annum, merging in royalty, and situate near the town and station of Mitcheldean, in the Forest of Dean, and extending under about 412 acres.

(B) The mineral property, known as Lydney Park Iron Mines, held under lease for 70 years, from 30th September, 1867, from the Rev. W. Bathurst of Lydney park, at a royalty of 15d per ton, and a dead rent of £1,000 per annum, merging into royalty, and with a seven years' average clause, and situate near the Town and Station of Lydney, Gloucestershire, and extending under about 614 acres.

In the case of both properties, there is the usual right of abandonment, should the minerals at any time become exhausted, or incapable of being worked at a profit. The risk of dead rent is thus avoided.

(C) A site of about 14 acres of building land, in close proximity to the Lydney Park Mines, and adjoining the Lydney Station of the South Wales Railway, taken for the erection of blast furnaces. The land is held under lease for 70 years, from Sept. 29, 1867, from the Rev. W. Bathurst, at the almost nominal annual rental of £5 per acre.

The Severn and Wye Valley Railway now in course of construction, will run close to the Lydney property, and sidings have already been finished and are in use.

The mines have not long been fairly in work, but their produce is well known to the trade, and that of Wigpool is in especially high repute.*

The demand for both the ores is greatly in excess of the present means of supply.

The mines have been recently examined for Messrs William Bird and Co., by a Mining Engineer of much experience in hematite mines, whose notes furnishing the following facts are confirmed by them:—

"All the surface work at the Wigpool mine is laid out in a most substantial and satisfactory manner, and suitable for the carrying on of a very extensive business. The plant and machinery are of first-class construction, and everything is in good order and repair, and the pumps in No. 1 pit are capable of draining all the water from these mines. The ancient workings surround the outcrop for a great length, and taking the ore ground that can be wrought from existing pits, 900,000 tons of ore may be taken out.

"The deposit at Wigpool consists of three seams, veins, or beds of the brown hematite iron ore, which is of a very splendid quality, yielding, according to analysis by Dr Percy, of Leaton, 57·85 per cent. of metallic iron in the raw ore.

"It is very valuable for the manufacture of Bessemer pig iron, of which there is a growing scarcity from the want of suitable ore.

"At the Lydney Park Mine there are three veins, of which two are of very good quality, and equal to Wigpool ore. The second is not so good, but the average of all the ore raised will produce in the furnace from 45 to 50 per cent. pig iron.

"The present mode of working these last mentioned mines is expensive. Working the ore by means of levels, rises, and slopes will effect a saving of 12d to 15d per ton. Although Nos. 1 and 3 veins run a distance of 1,900 yards in the grant, and appear to contain ore the whole length, the average produce has not been assumed to exceed the low estimate of 165,000 tons. This ore is very valuable for the production of Bessemer pig iron, as it contains neither phosphorus nor sulphur.

"It must not be understood that the ore contents named represent the full term of life of the mines, but only the quantities considered fair and safe for a purchaser to base calculations upon. The mines will undoubtedly remain to be profitably worked for a considerably longer period.

"The present raisings are 720 tons per week at Wigpool, equal to 37,440 tons per annum, and at Lydney Park Mine 360 tons per week, equal to 18,720 tons per annum.

"The difference between the cost of working and the selling price has averaged 6s 6d per ton on the two mines, which is equivalent to a profit of £18,252 per annum—say 18 per cent. on the purchase money."

Prices have already considerably advanced beyond the rates on which the above average was taken. The possession of mines in operation, combined with improved workings and favourable terms of purchase, justify the expectation of a constant high dividend.

There are no contracts outstanding at low prices, to prevent present rates being obtained for the Company.

The mines have been valued as for a purchase for amalgamation with blast furnaces, at £102,475 including plant. This is exclusive of the value of the leasehold site at Lydney, and is a low estimate of the value of these mines, intended to make the investment a safe one, and beyond a speculation, in the meaning of the term as applied to mining operations.

The furnaces will provide an additional outlet for the ore, and thus give increased value to the mines.

The Directors intend eventually to erect blast furnaces on land (C) in close proximity to the Harbour, and adjoining the Great Western, South Wales, and Severn and Wye Railway Stations.

The vendors have agreed to accept £100,000 for the whole property, including the leasehold land, the plant, and the already constructed tramways. Payment to be made as follows:—£50,000 in cash and £50,000 in shares fully paid up. An existing mortgage for £20,000 will remain at 5 per cent. per annum interest, and be paid off by the vendors after 3 years, in annual instalments of £10,000, the £50,000 in shares remaining answerable in the hands of the Company by way of indemnity.

The property will be transferred to the Company from the 1st January, 1872, and an early dividend can be declared.

The best hematite iron ores of Cumberland and Lancashire have risen 125 per cent. price, and other ores are advancing in proportion.

* Dr Percy's analysis of the Wigpool iron ore in December, 1870, was as follows:—

	Per Cent.
Peroxide of iron	82·64
Silica	5·07
Alumina	1·09
Phosphoric acid	0·05
Sulphur	0·06
Loss in calcination	10·68
	99·59
Metallic iron in raw ore	57·85
Iron in calcined iron	64·77

No promotion money or other fees will be paid by the Company.

An agreement has been entered into by the Company, dated the 19th day of December, 1871, and made between Thomas Allaway, William Allaway, and James Allaway, of the one part, and Charles Greenwood a trustee for the proposed Company, of the other part. The articles of association and copy of the said agreement can be seen at the offices of the Solicitors to the Company in London. Samples of the ore can be seen at the offices of the Company.

If no allotment be made, the application money will be returned in full.

The following is a copy of the memorandum of association of the Company:—
Companies' Acts, 1862 and 1867.—Company Limited by Shares.

MEMORANDUM OF ASSOCIATION OF THE LYDNEY AND WIGPOOL IRON ORE COMPANY, LIMITED.

I. The name of the Company is "The Lydney and Wigpool Iron Ore Company, Limited."

II. The Registered Office of the Company will be situate in England.

III. The objects for which the Company is established are—

1. The carrying into effect the agreement following, that is to say—

An agreement dated the 19th day of December, 1871, made between Thomas Allaway, of Highbury House, Lydney, Gloucestershire, Ironmaster; William Allaway, of Walford House, Ross, Herefordshire, Ironmaster; and James Allaway, of Moraston House, Ross, Herefordshire, Esquire (the vendors), of the one part; and Charles Greenwood, of Ewell, Surrey, gentleman of the other part, for the purchase of the vendors' interest in the Wigpool Mines, the Lydney Park Mines, and a piece of land near the Lydney Station, for ming a site for the erection of furnaces, and property connected therewith.

2. The purchasing, leasing, or otherwise acquiring of ironworks, collieries, coal mines, iron mines, or any other mines, mining ground, or minerals, and particularly the purchasing, leasing, or otherwise acquiring of certain ironworks and collieries, coal and ironstone mines, and other properties, land, and hereditaments known as the Wigpool Iron Ore Mines, and the Lydney Park Mines, and other works and hereditaments held in connection therewith, and the searching for and getting and working, raising and making merchantable, and selling and disposing of iron, coal, ironstone, and all ores, metales, and minerals whatsoever.

3. The carrying on the trades or businesses of ironmasters, coalmasters, miners, smelters, engineers, steel converters and manufacturers, iron founders, and general contractors, in all their branches, and the making, purchasing, hiring, and selling railway and other plant, fittings, machinery, and rolling stock.

4. The purchasing and selling as merchants, iron, tin-plates, coal, metals, and any other materials, articles, or things, on commission or as agents, or otherwise.

5. The purchasing or taking in exchange or on lease, renting or occupying, or otherwise acquiring of any works, mines, furnaces, collieries, lands, hereditaments, premises, properties, estates, and effects, or any grants, concessions, leases, or other interest therein, and purchasing or working of any patent or patent rights which may be considered desirable for the interests of the Company.

6. The purchasing the goodwill or any interest in any trade or business of a nature or character similar to any trade or business which the Company may be authorised to carry on.

7. The draining, paving, planting, building on, or otherwise improving and realising all or any parts of the lands from time to time purchased, taken in exchange, or on lease, or otherwise acquired by the Company, and the managing, farming, cultivation, maintaining, improving and underletting, selling, leasing, exchanging, selling, and otherwise dealing with and disposing of all or any parts of the lands, hereditaments, and real and personal estates and properties, and effects of the Company, and in such manner and on such terms and for such purposes as the Company may think proper.

8. The construction of any waterworks, ponds, reservoirs, or watercourses, and the making, providing, acquiring, leasing, working, using, and disposing of railways, tramways, and other roads and ways for the more convenient access to any parts or otherwise for the benefit or intended benefit of any property of the Company, or for any other purpose, or the contributing to the expense of constructing, making, providing, acquiring, working, and using the same.

9. The making and carrying into effect of arrangements with landowners, railway companies, shipping companies, carriers and other companies and persons for the purposes of the Company.

10. The making and carrying into effect of arrangements with respect to the union of interests, or amalgamation, either in whole or in part, with any other companies or persons having similar objects to this Company.

11. The establishing and regulating of agencies for purposes of the Company, whether in the United Kingdom or abroad; and,

12. The doing all such other things as are incidental or conducive to the attainment of the above objects.

IV. The liability of the members is limited.

V. The capital of the Company is £150,000, divided into 15,000 shares of £10 each.

YEAR 1870.

GENERAL RESULTS OF ITS COMMERCIAL AND FINANCIAL HISTORY.

UNTIL the outbreak of the Franco-Prussian War in July (1870) there was a real and extensive recovery of nearly all branches of trade from the depression of the three preceding years, and the faith in foreign politics was such that a wide-spread speculation in Foreign Bonds and Securities had spread from the Stock Exchange over the country. The sudden rush of the French Emperor into War of course produced a panic, and the month of July, 1870, will be long memorable for the vas losses which it brought to dealers in foreign investments.

After July everything centered on the War and in speculations upon its continuance. The collapse of the French armies at Sedan early in September ended the first and most doubtful chapter; but it was not until December that it became manifest that France must speedily accept such a peace as Germany might think proper to grant. The probability of this country having to interfere in the War, in order to support its guarantee to Belgium, was virtually decided in the negative at Sedan. But in November the repudiation by Russia of the Treaty of 1856 excited for some weeks disagreeable apprehensions, and greatly fostered the general desire for a reorganisation of our military forces and system. With the United States there has been no real difficulty, but rather the return of a more amenable temper; and the President's removal of Mr Motley is to be regarded as a step towards the adjustment of the *Alabama* and other disputes. The suggestion (in Feb., 1871), by the American Government of a Joint Commission is a further advance in the same sensible course. Spain has at last got a King, Italy has possessed itself of Rome as its capital, and Austria and Hungary are wisely intent on domestic concerns and progress.

The Harvest in this country was peculiar. The summer was almost as hot and dry as that of 1868. Hay was a general failure, and several kinds of spring corn were most irregular. The result of the Wheat crop must be considered to be under an average, but the quality is mostly superior.

The following are the comparative prices of 1870 and former years:—

(I.) GAZETTE AVERAGE PRICES of WHEAT (per Imperial Quarter) in UNITED KINGDOM—Immediately after Harvest, 1863-70—and TOTAL AVERAGE of CALENDAR YEAR.

After Harvest.	s	d	Yearly Average.	s	d
1870—Oct.	48	6	1870—Whole Year	46	11
'69— „	46	2	'69— „	48	2
'68— „	53	4	'68— „	63	9
'67— „	70	8	'67— „	64	6
1866— „	52	6	1866— „	49	11
'65— „	42	4	'65— „	41	10
'64— „	38	6	'64— „	40	2
'63— „	40	–	'63— „	44	9

The Annual Average price of 46s 11d is a trifle lower than 1869, and nearly 24 per cent. lower than 1868 and '67, but at the same time 12 per cent. above the cheap years 1863, '64, and '65. We shall not completely recover from our late calamities until we have two or three years of a price of wheat of 43s or under. It was the very low prices of wheat during the years of the Cotton Famine which greatly assisted us to surmount it.

The Bullion Trade with India has fallen into small proportions. In 1863 and '64, the export of Gold and Silver to India, Egypt, and China was 24 millions sterling per annum; last year, 1870, it had fallen to 4⅓ millions, and a reflux from the East to Europe has actually been witnessed on mercantile calculations of exchange. It is not unlikely that this reflux current will expand and continue. During the twenty years, 1851-'70, Europe has sent to the East 51 millions sterling of Gold and 176 millions sterling of Silver—together 227 millions—or an average export of (say) 11 millions per annum. The annual production of Gold from the new sources—California and Australia—has been about 15 millions sterling. The Eastern demand has amounted, therefore, to over 70 per cent. of the new production. The Australian and Californian supplies seem to be gradually but steadily diminishing, and there is an apparent probability that the effect of the development of India may be to render the hordes of treasure possessed by the natives available for Western purposes, and available at the very time when they are needed. This result will be assisted by the steady progress of the Bank Note Circulation of India. The authorities have quite recently satisfied themselves that the Bank Notes may be pushed more vigorously into circulation, and that the minimum denomination may be reduced from ten to five rupees.

Among the changes produced by the War will be most probably the discontinuance of the Line of French steamers from Marseilles, subsidised heavily by the French Government, and known as the Messageries Imperiales. Freights of specie are already sent via the Suez Canal. Another notable effect of the War has been the removal of the route of the Indian Mail from Marseilles to Brindisi; and at some early date we may expect to see steamers plying direct, via the Canal, to Bombay.

The following is the usual table condensed from App. (I.):—

(II.)—Export of Gold and Silver to Egypt and East, per P. and O. and French Steamers—1861-70.
(0,000's omitted—thus, 2.08 = 2,080,000*l.*)

Year.	Gold. Mlns.	Silver. Mlns.	*Totals.* Mlns.
1870	2.08	2.23	4.31
'69	2.62	6.44	9.06
'68	6.52	3.56	10.08
'67	1.65	2.05	3.70
1866	2.87	7.07	9.95
'65	4.35	9.74	14.09
'64	6.97	16.96	23.92
'63	8.02	15.13	23.16
'62	3.40	14.60	18.00
'61	1.48	8.86	10.28
10 years, 1861-70. Totals	39.91	86.64	126.55
10 years, 1861-70. Average	4.00	8.66	12.66
10 years, 1851-60. Totals	11.10	90.00	101.00
10 years, 1851-60. Average	1.10	9.00	10.10
20 years, 1851-70. Totals	50.00	176.00	226.00
20 years, 1851-70. Average	2.50	8.80	11.30

The discovery of Diamond deposits in a wild region in the Northern margin of the Cape Colony in South Africa may have important effects by attracting population to a country of great capabilities. The exports of Diamonds from Table Bay, Natal, and Port Elizabeth, in 1870, are estimated at a value of 200,000*l.* The best market for the gems is in the United States, among the suddenly enriched discoverers of, or speculators in, petroleum, shoddy, railway issues, and Erie "rings."

At last the Cotton Trade may be said to have righted itself. The price has touched perhaps the lowest point consistent with supply, and during the latter part of 1870, and indeed for the greater portion of the year, the Lancashire manufacturers have had a properous trade. The importers of Indian Cotton in the early part of 1870 sustained heavy losses, and there were many failures. These misfortunes have reacted on Bombay, where for many months there has been stagnation and discredit. "In 1870," say Messrs Ellison and Haywood, in the circular quoted *passim*, "the course of trade and the "fluctuations of values have been almost entirely against Im- "porters, and in favour of Consumers. Aside from the excep- "tional fluctuations caused by the outbreak of the Franco- "German War, the constant tendency of prices has been "downwards, whereby very serious, and in many cases ruinous, "losses have been entailed on Importers. On the other hand, "with a demand always sufficient to keep producers con- "tinually under orders, and to prevent the necessity for "pressing sales, prices in Manchester have been comparatively "strong. Of course there has been a decline, but the fall has "been less than the decline in the raw material, and the position "of producers has been proportionately improved." As regards the War, they say—"On the Continent the Cotton Industry "has been completely disorganised by the War. In France, "business has been almost totally suspended during the past "three months, and the aggregate consumption of the year "1870 has reached only 436,000 bales, against 699,000 in 1869. "In Germany, the consumption has fallen from 407,000 bales "to 340,000 bales, but there is more business doing now "(Jan., 1871), than there was three or four months ago."

The following Table (III.) collects the principal results of the trade of 1870 and preceding years:—

(III.)—United Kingdom, 1857-70.—Estimated Value of Raw Cotton Imported, Re-Exported, and Consumed.—*Ellison's Circular.* (00,000's omitted—thus, 51.0*l* = 51,000,000*l.* The *Bales* are given without abbreviation.)

Years.	Import. *Value.*	Import. Price.	Exported *Value.*	Consumed, United Kingdom. *Value.*	Total Weight.	Bales (400 lbs each) *per week.*
	Mln. £	per lb. d	Mln. £	Mln. £	Mln. lbs.	bales.
1870	51.0	9 5/16	8.2	42.1	1,071	51,530
'69	55.2	11 1/16	11.3	43.8	940	45,140
1868	52.0	9⅝	11.6	41.0	996	47,890
'67	53.8	10½	14.0	41.2	954	45,890
'66	75.8	13½	19.5	51.9	800	42,829
1865	63.2	15¾	17.1	47.2	718	34,550
'64	82.2	22	22.1	52.4	561	26,980
'63	58.0	20⅛	21.6	40.7	476	22,910
'62	31.1	14	12.4	24.7	449	21,620
1861	38.7	7⅞	7.9	32.2	1,005	49,800
'60	36.6	6⅞	5.5	28.9	1,079	51,890
1859	32.2	6½	4.1	27.6	977	47,000
'58	27.2	6⅝	3.3	24.8	907	not
'57	28.6	7⅛	3.5	24.8	825	given.

We have here an average price of 9 5/16d per lb, and a total weight consumed of 1,071 millions of lbs, equal to 51,530 bales per week—a weekly consumption very nearly as high as in the typical year 1860. The contrast between 1870 and 1865, and '66, is very marked. The effects of the augmented *quantity* of raw and manufactured material are most diversified. More warehouse room, more railway trucks, more ships, are required to accommodate and transport it, and the retailers have all the benefit of selling a commodity within the reach of more customers.

The Table (IV.) exhibits the American Cotton Crops, 1866-7 to 1869-70, and gives an estimate for the Crop of 1870-1:—

(IV.)—American Cotton Crops, 1866-7 to 1869-70.
(In 1,000's of bales.)—*Ellison's Circular.*

Detail.	1870–1. Estimte.	1869–70	1868–9.	1867–8.	1866–7
Total crop	3,700	3,155	2,414	2,577	2,204
Exported to Great Britain	1,850	1,475	990	1,229	1,216
" France	750	346	225	198	198
" Other places		358	233	230	130
	2,600	2,179	1,448	1,657	1,544
Consumed in Northern States	1,000	838	839	819	723
" Southern States	100	90	158	146	128
	3,700	3,107	2,440	2,622	2,404
Stock at end of season	—	60	11	37	82

Note.—The *Pre-War* Cotton Crops and Consumption in the States, and Export to Great Britain, were as follows:—
(In 1,000's of bales.)

Years.	Growth.	Consumed in U. States.	Exported to Great Britain.	Price in L'pool. d
1856-7	2,989	702	1,428	7¼
'57-8	3,113	469	1,809	6¾
'58-9	3,851	771	2,049	6
'59-60	4,675	810	2,669	6¾
'60-1	3,658	689	2,175	7¼

The estimate of the 1870-71 American Crop is as high as 3,710,000 bales, against 3,155,000 in 1869-70. It is quite impossible at present to say whether the South will find it profitable to extend its Cotton cultivation. It is contended in several quarters that already the profit has been exhausted. The season of 1870-71 will be a sort of crucial one for the American planter.

Table (V.) gives the Sources of Supply in 1860, and in the period 1868-71:—

The Iron, Metal, and Hardware Trades have, on the whole, prospered in 1870. "The Iron Trade," say Messrs Fallow and Co. *(passim)*, "continues to develop itself, and is every "year increasing in magnitude and importance. In 1860 the "production of Pig Iron in the United Kingdom was a little "under 4 millions of tons, whilst in 1870 we estimate it would "not be less that 6 millions. The large discoveries of minerals "on the North-East (Cleveland) and North-West (Furness) "coasts of England, have, during the last few years, given a "new impetus to the trade, and so far, there are no signs "of this abating, as new Furnaces are being erected in these "and other districts."

As regards the Cleveland District, of which Middlesbro' is the industrial capital, the *Iron Trade Review*, the organ of the trade, reports that "during 1870 a very considerable "extension of the Iron Trade has taken place, and we shall not "be far wrong when we put down the total make of Cleveland "Pig Iron for 1870 at 1,690,000 tons. Comparing this with "the production in the two previous years, we find that there "was 1,459,000 tons in 1869, and 1,233,000 tons in 1868. In "1870, therefore, the increase is (say) ¼ million of tons.

The effect of the War in July last was to create great irregularity in the Iron Trade, and for some months a considerable interruption of orders—so much so, indeed, that the North of England Masters' Association gave notice of a reduction of 10 per cent. in Wages, to commence on 1 Jan., 1871. This the men resisted, and the matter was referred to the Mixed Council or Committee of Conciliation and Arbitration established a year or two ago at Darlington, and including nearly all the Iron Industries of that region, and affecting more than 20,000 workmen. The Committee could not settle the final terms, and called in Mr Thomas Hughes, M.P., as arbitrator. After hearing evidence on both sides, Mr Hughes has directed a reduction of 5 per cent. in Wages from 1 Jan., 1871, to continue for six months, and then be subject to reconsideration on certain contingencies. The amicable termination of this large dispute is a most encouraging symptom of the growth of a sounder opinion among employers and workmen, and is especially valuable as a further example of the probability of bringing both parties to the bargain to see that it is for their interests that the rate of Wages should be settled for periods of time in advance, so as to enable masters to take Contracts with confidence so far as the cost of labour enters into the calculation. The *Iron Trade Review* says—"It may be taken for granted that the more intelligent work-"men are exercising their influence amongst their fellow "operatives for good, and that year by year Strikes will be "far less frequent than they are now. The arbitration expe-"riment could not have been tried in any locality more "favourable to its success than the North of England. To "the untiring attention of Mr David Dale, the first and "second President, and to the cordial assistance of the "employers and operative members of the Standing Committee, "is due the marked success that has up to this time attended "the establishment of this Arbitration Board in this part of "the country."

To Mr Rupert Kettle, also the County Court of Wolverhampton, still higher praise is due. Without any compromise of his principles as a lawyer and political economist, he has succeeded in gaining the confidence of the masters and workmen, and is now perhaps the first of living authorities on all questions relating to these Mixed Committees of Conciliation. Mr Hughes has done much in the same direction, but he permits sentiment to become predominant on occasions where it has no useful place.

"The policy of the United States," say Messrs Bird and Co., "in increasing the home production of Iron and Steel under a "Protectionist Tariff, and *at how great a cost to itself*, is beginning "to be discussed in America by an ever-widening circle well "able to appreciate the facts. A change of the American "commercial policy in the direction of Free Trade would very "naturally alter the whole course of the world's trade, and it is a "change which, as regards Iron and Steel, we are led to expect "much nearer than was until lately supposed." In this statement we concur. In App. (S) we give an analysis of the considerable changes resulting from the United States Census of last year (1870) in the distribution of the (say) 233 Representatives among the groups of States. The changes must take effect at the elections of October and November of this year, '71, and, looking at the decline in the New England and Pennsylvanian Vote, and the rapid accession of power to the South and West, it can scarcely be doubted that the Protectionist Tariff will be cut down. The best informed Americans speak with confidence of this result, and every day supplies them with new and telling facts. At this moment, for example, several American firms are building Iron steamers in England, because Protection has put an end to all power of economical shipbuilding in the States, and British capitalists find means of evading those clauses of the American Navigation Acts which exclude foreign bottoms by supplying British-built ships and sailing them under the names of American houses able to give satisfactory guarantees for the *bonâ fide* management of the vessels. In other words, the United States place themselves under tribute to the foreigner, both as regards the building and the hire of all the new part of their marine. The excessive pressure of the Federal Taxation has already led the public to insist on the abolition of the larger part of the Internal Taxes, and the cry is now extending to the Income Tax. With such a temper abroad, it is scarcely likely that the hundred times more costly burden of Protective duties will long be submitted to.

The scandal of the Erie Railway, and the conspiracies of Fisk, Gould, and Vanderbilt against not only the English, but also the American bond and share-holders in the lines which they command, still flourishes by the aid of paid Judges, corrupted legislators, and a system of barefaced bribery without any parallel. Appeals are going forward which may sometime or other reach the Supreme Court, where it is said the gang will at length meet with their deserts. But the process is so slow, and the failure of justice by the bribery of the inferior Courts so flagrant, that the subject has assumed a most grave character, and begins to affect the whole American reputation. No country can possibly exist, much less prosper, under a system which permits Erie robberies to be kept on foot year after year by means of *quasi*-legal sanctions obtained from Judges who are regularly and notoriously bribed by the conspirators; and Americans must either apply a speedy and sharp remedy, or find themselves shunned and distrusted by the rest of the world.

The reports given *passim* of the Colonial, Import, and Inland Trades generally are favourable. The China Tea Trade has at length worked itself free from the unsatisfactory conditions of former years. Silk, Sugar, and Coffee, are also better. The West Riding is busy, and so are Birmingham and Sheffield. Raw materials of all kinds are, on the whole, at reasonable prices, as appears by the following Table (VI.), presented in the usual form:—

(VI.)—Wholesale Prices in London.—Comparison of 1 *Jan.*, 1871, with Three former dates, stating in *Percentages* the degree in which the prices of 1 *Jan.*, 1871, were *Higher* or *Lower* than the prices prevailing at the three selected earlier dates.

The rates at Paris and Frankfort have been too irregular in 1870 to admit of any useful average. The extreme moderation of the rates generally during the last four years has greatly assisted the development of enterprise over Europe, and especially in the South-Eastern regions of it. In Austria, Hungary, and the Principalities of the Danube the progress has been on the largest scale, and the profits obtained have been most satisfactory. In truth no part of Europe has made of late years advances so rapid and solid as these countries. Several English makers of agricultural machines and implements have since 1866 derived the largest part of their trade, and for the most elaborate and costly articles, from the Danubian countries.

The Railway Companies in 1870 have been better, and several of the Lines, long in difficulties so severe as to imply no payment of dividend at all, are resuming divisions of profits. The *Great Western* has reached 3¾ per cent. per annum, and after wisely consolidating a large part of its minor stocks, is again a favourite property. The *Great Eastern* has not made the same progress, but in careful and honest hands is paying all preference charges and a little more. The *Brighton* also seems to be reviving. The recovery of these large railway properties, and of others in the same plight, is a real and important gain to the income and means of widely-diffused classes.

The process of liquidations in Chancery, and the proceedings and excessive emoluments of official liquidators, are still on a large scale; but there have been no discussions of very flagrant cases during the year. A short useful Act was obtained just as the Session closed, which permits companies in liquidation to resolve upon and carry out compromises by means of a two-thirds majority acting under the control of the Court, and it is hoped that this Act will at least diminish the nefarious contrivances under which a small knot of obstinate dissentients contrived to be bought off by excessive bribes. We are still, however, very far from a satisfactory state of law and practice as regards insolvent joint stock companies.

It is not easy to ascertain the degree of success which has attended the new Bankruptcy Act. On the whole, it may be assumed that it is a marked improvement on the previous state of things. But fraudulent debtors largely escape, because we are still destitute of the office of a Public Prosecutor. Creditors who have lost money, time, and patience by the failure of a rogue, are little disposed to embark in the annoyance and cost of a voluntary criminal trial. They reasonably argue that it is as much the duty of the State to prosecute a fraudulent bankrupt as an open thief.

The contest between France and Germany has ended in the complete defeat of the former—indeed so complete that France can scarcely assume any offensive attitude for several years. Beyond doubt, the whole industrial fabric in France has been most violently dislocated, and the country driven for a time out of the European competition. Germany has also suffered severely, but the recovery in her case will be much more rapid. There has now been nearly twenty years of war, beginning in the Crimea, and spreading over the rest of the world in one form or another. The exhaustion of the defeated States, and the sufferings and sacrifices of the conquerors, justify an expectation that we are entering upon a settled peace. The great disturber—France—is thoroughly humbled, to her own ultimate benefit, and certainly to the benefit of all other nations. Germany has no longer any aggression to fear. Her most serious peril lies in the rising spirit of militarism. Italy has become unified. Spain troubles only itself. Austria is occupied with internal reforms. The Pope has become a disendowed bishop, dependent on a salary, and nobody is disposed to attend to his complaints. The United States are hastening to cut down all burdensome taxes, and so leave to their posterity the burden of debt which a few years ago they loudly declared themselves able and willing to wipe off in a few years. South America, ever since the fall of Lopez, has scarcely had the usual course of monthly revolutions. The most threatening quarter is still the South-East of Europe—Turkey and the Roumanian Principalities—and these two and Russia are involved in intrigues and harbour designs which at any time may produce mischief; but scarcely in 1871. Peace and an abundant harvest will carry forward the amelioration already visible on all sides.

I.—CORN AND CATTLE TRADES.

CORN TRADE.

Mr H. Kains Jackson (London) wrote as follows to the *Times* on 31st December, 1870:—

During 1870 the corn trade has followed a somewhat smooth course, value keeping steady and at a moderate level, the following being the prices of *wheat* throughout the 12 months:—January, 43s 8d; February, 41s 3d; March, 41s 5d; April, 42s 8d; May, 44s 9d; June, 47s 5d; July, 50s 10d; August, 53s 11d; September, 47s 3d; October, 47s; November, 50s 1d; and December, 52s 6d, the year closing with the current tending upwards. The highest and lowest quotations of *British wheat* were 40s 7d February 26, and 54s 11d August 6. The gross imports of wheat and flour may be quoted roughly 9,000,000 qrs in 1870 against 10,000,000 qrs in 1869.

The following brief references bring under notice the fluctuations of the month, and indicate their causes. In *January* large stocks existed, estimated at 2½ million qrs, and the bulk afloat amounted to about two million qrs, so that value was depressed nearly 5s per qr below the average of the last five years, and with mild and rainy weather and favourable winds, the weekly imports of January averaged a rate of 17 million qrs per annum, one week's rate amounting to 2½ million qrs, and in the previous November and December we had received the overwhelming stock of 2,400,000 qrs. Thus the year started with glutted markets and prices were accordingly depressed, nor could they recover through the spring months, although the imports fell off in some weeks to the rate of only four million qrs per annum. As an incident worthy record, during *March* estimates were made by French correspondents, who, quoting official statistics, proved to themselves that the last French harvests gave them a surplus over consumption of two to ten million qrs of wheat. Subsequent events showed that no surplus whatever existed. *April* was a very inclement month, and harvest prospects were doubtful, and the frosts of May made them worse. In *May* the American canals opened, and speculation, after a suspension of two years, revived in cargoes on passage, which in some instances advanced 3s to 5s per qr. I find a singular note made in May, that "speculation was very strong in Berlin." *June* was marked by a sudden invasion of French buyers, and a consequent rise in value, notwithstanding the great improvement in harvest prospects, the weather being very hot and favourable, the thermometer marking 86 degrees in the shade on the 22nd. *The hay crop was a wide failure*, and the yield only about *one-third* of an average; and as there are over 20 million acres under pasture, the effects of the cold drought of the first six months have been seriously felt. In *July* France continued buying, prices rose to 50s 5d, from 40s 9d in March, cargoes sold quickly, and political rumours helped business; but they also disturbed the money market, and the rate of discount rising to 6 per cent. stopped rash speculation. The *rainfall* of the year in *August* was now 50 per cent. short of an average, but still the wheat harvest promised 30 bushels per acre, through an excess on the best lands making up for deficiency on the bad. Such was the view I then expressed in the *Times*, and here will be the appropriate place to speak of subsequent estimates on the very irregular harvest of 1870.

From Government returns we have since learnt the acreage under wheat was 3,490,000 acres, or nearly 200,000 *short* of the area of 1869. What was the yield? The *Agricultural Gazette* wrote:—"A journey through Eastern and Western England and Lowland Scotland left the impression of a good, productive wheat crop generally in England, and in the North great crops of grain and green." Later, the same journal collected after-harvest reports from its correspondents, about 200 in number, and the result from them was contrary—"that the yield appeared very deficient." The valuable experiments of Mr Lawes indicated a wheat crop rather over than under an average; and when the new samples appeared in Mark lane, weighing 63lbs to 65lbs per bushel, and some growers avowed a yield of 5 qrs to 8 qrs per acre, a still more favourable impression was created. But, later, complaints of the yield were too general not to be true, and I have now before me returns which may set at rest the question. In late numbers of the *Chamber of Agriculture Journal* ample reports have been furnished, and, as part of a thorough attempt to obtain harvest estimates, I group the figures referring to ten counties:—Lincoln sends 65 returns, making together the wheat crop 35 bushels per acre; Northampton, 36 returns, also 35 bushels; Essex, 45 returns, 30 bushels; Devon, 50 returns, 19 bushels; Hampshire, 44 returns, 25 bushels; Cambridge, 21 returns, 35 bushels; Hereford, 23 returns, 20 bushels; Huntingdon, 16 returns, 35 bushels; Rutland, 5 returns, 27 bushels; Staffordshire, 28 returns, 27 bushels; and the following summary is highly interesting, *the top line showing the yield*, and the under line the estimated average respectively:—

35 ... 35 ... 30 ... 19 ... 25 ... 35 ... 20 ... 35 ... 27 ... 29=290
32 ... 32 ... 32 ... 21 ... 29 ... 33 ... 27 ... 32 ... 31 ... 29=298

Thus, we may say the aggregate yield is 29 bushels, or not quite *one bushel under a full average*, and this gives a total on the acreage of 12,650,000 qrs, leaving us some eight to nine million qrs to obtain by import.

Returning to the course of trade, with war raging in France, the month of *September* reduced value from 49s to 45s, and the French demand collapsed, although its wheat crop was reckoned one-third deficient of an average, and drought had reduced its oat and green crops even more than in England. A large and good crop of *potatoes* in the United Kingdom and free deliveries of wheat from farmers kept value moderate through *October* and *November*, and heavy shipments of corn in Russia and America checked speculation until rumours of impending war with Russia sent up prices 3s per qr, red winter wheat realising 55s per qr; Russian, 49s 6d; and the news reaching America by cable, quotations were raised in San Francisco to 56s and 59s per qr. In *Germany*, whence the usual autumn shipments have been almost completely checked, prices continued very steady from August to October, when the continuance of the war directed them upwards; but relatively corn is not much dearer in Berlin than in London. During the past month of *December* the transactions in grain have not been extensive, as the fleet on passage with wheat and maize is very large, and early in the month the arrivals off coast were numerous and important. These, however, are being steadily absorbed, and with extremely cold weather, value has advanced 2s to 3s per qr. Compared with January, 1870, wheat is about 12 per cent. dearer in December, but the average at 52s 7d is still only 5s above the peace level of recent years, a moderation that has been maintained from the general soundness of trade through the past 12 months, by which adequate supplies have been attracted, and are now secured, for the winter.

To complete this review I may state that, compared with the large receipts of 1869, those of 1870 in wheat and flour, after deducting the exports, are about 1,000,000 qrs short; but in result this deficiency is trifling, since the crop of 1870 and the stocks we have in store leave us in as good a situation as we were in last January. Probably our stocks in London, Liverpool, and other ports may this year amount only to 2,000,000 qrs, falling half-a-million short of the bulk held in 1869; but the quantity afloat on passage to the United Kingdom and the stock in farmers' hands certainly reduce our needs to a level with those in ordinary years, and for our wants, such as they are, the sources of supply may be considered sufficient, and, for the next three months, secured. At the same time political affairs are sufficient in themselves to disturb all calculations, to enhance the value of grain, and check or deliver supplies. In 1870 the United Kingdom *has exported* about 600,000 qrs of wheat and flour, and this very unusual out-going seems likely to be repeated and exceeded in 1871. I find France, in bad seasons, is a competitor that, as in 1867-68, buys against us 4,000,000 to 5,000,000 qrs. She wanted scarcely any last year, but is likely to require this season 5,000,000 qrs. At most times her merchants buy largely in the autumn, and again summer; but, pressed with hostilities, after her late deficient harvest, the bulk of her stores have, I believe, yet to be purchased, and at a crisis when the markets, money and corn, are both against her merchants. This alone appears sufficient to keep up the value of grain to its present level under all common circumstances, and to advance them should those circumstances become more complicated.

Further, we have to notice that *Prussia*, who usually forwards us 1¼ million qrs of wheat, is now sending less than a tithe of that quantity. Nor is her harvest a good one, the result of 1,317 official reports giving but an average yield—of wheat, 78; rye, 86; barley, 88; oats, 86; peas, 93; beans, 82; potatoes, 85 per 100 of an ordinary crop, so that, with extra demands on her resources, Germany cannot spare the United Kingdom any quantity of importance. We have, therefore, to look to America, Russia, Chili, Australia, and Hungary, for the bulk of our supplies between now and next harvest; and were it not for Russia (with whom recent fears of war have been allayed), value must range high, since her one great competitor, the United States, always commands high figures when unopposed. It is, therefore, satisfactory to know the harvests of Russia and America were both satisfactory; of wheat especially in the first, and of maize in the last, which yield a total for disposal to importing countries probably equal to their greatest needs, so long as prices range over 50s per qr, and thus allow of costs of transit. For the present the surplus stocks available in Hungary and the Danubian Provinces (a most important item) are kept back by want of means of transit, but these difficulties must disappear in spring, when navigation reopens. In New York, where shipments have been very large, the stocks are reported only moderate, the bulk in store and transit being about 1,000,000 qrs, or 100,000 qrs less than at the same time last year; there, is, however, sufficient for local consumption till next May, and a margin of some 500,000 qrs for export. The past year has shown the granary accommodation of London to be unequal to the trade of the United Kingdom, and the erection of grain stores and elevators, on the plan of those built at Chicago and other great American centres, promises a successful result, since on several occasions the corn market has been depressed by the arrival of supplies, for which accommodation was wanting, and at the present time wharfs and granaries are in most instances occupied on every floor. The recent mails from Australia advise a fine harvest, now in process of being secured, so next summer we may expect a few shiploads to substitute fine Dantzic qualities.

COMPARATIVE AVERAGES OF GRAIN—1866-70.

Comparative statement for the years 1866, 1867, 1868, 1869, and 1870, of the quantities sold and *average price of British corn* in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87.

Years.	Quantities Sold.			Average Price.		
	Wheat.	Barley.	Oats.	Wheat.	Barley.	Oats.
	qrs.	qrs.	qrs.	s d	s d	s d
1866	3,134,557	1,723,316	254,722	49 11	37 5	24 7

TITHE COMMUTATION.

Each 100*l* of Tithe rent-charge will, for the year 1871, amount to 104*l* 15s 1d, or nearly ¾ per cent. more than last year. The following shows the worth of 100*l* Tithe rent-charge for the last seven years:—

Years.	£ s d	Years.	£ s d
1865	98 15 10½	1869	103 5 8½
1866	97 7 9¼	1870	104 1 0¼
1867	98 13 3	1871	104 15 1
1868	100 13 8		

The average value of 100*l* Tithe rent-charge for the 35 years elapsed since the passing of the Tithe Commutation Act is 10*l* 11s 7¾d.

THE CATTLE TRADE.

Owing to exceptional circumstances, the prices current for live stock in the London market during 1870 were not so high as was reasonably anticipated. The herds and flocks had not recovered from the effects of the forced sales made in 1868, which were necessitated by the severe and long continued drought of that year. Obviously the supply of flesh food cannot be regulated at will as the supply of breadstuffs. It is an easy matter to place a larger or smaller extent of land under wheat or corn according to the necessities of the time, and the depletion of stocks of grain, caused by the deficient harvest of one year, can be readily remedied by extended cultivation in the following season. This is well shown in the history of the Corn Trade since 1867, when prices rose to an extravagant height in consequence of the deficient harvest. The Cattle Trade, however, stands in a very different position in this respect. It is a work of time to bring up the herds to their proper numbers when once they have fallen below their ordinary level, and it is from the forced sales

of stock made by owners unable or unwilling to purchase artificial food in 1868-69 that graziers have suffered during the past year. Although grazing operations have been attended with vastly different success in various parts of the country, it is doubtful whether prices have, on the whole, offered adequate remuneration to graziers. Breeders have done well, as store animals, owing to the falling off in the supply, have maintained high values, but owners of grazing farms have had to dispose of their animals, in many cases, at comparatively small profits. The actual result of the year's operations, however, have been very variable. In the South of England the grass failed owing to the long continued drought; but in the North, and more particularly in Scotland, a good hay crop was secured, and Scotch graziers accordingly reaped a plentiful return at the expense, in a certain degree, of their less favoured competitors in the South.

Considering the circumstances attending the Trade, prices have ruled comparatively low, but the average price would have been much under the actual figures had not the importation of animals from France been stopped. The result of the war on the Cattle Trade will be seen from the statement given below, which shows an average price for breeders of 6s 6d for the last six months of 1870, against 5s 2d for the first six months. The decline in prices in August is to be attributed to the heavy imports from France on the outbreak of the war, and more especially after the disasters attending the operations of the French armies. The effect of the prohibition of export from France is seen in the advance to 5s 10d, which is the highest point that the quotations touched, and which was maintained during the closing months of the year.

One of the leading features in the trade of the past year has been the determination to build a market at the waterside for the reception and sale of foreign stock. This decision has been arrived at in consequence of the recurrence of rinderpest, which, with the foot and mouth disease, again made its appearance among our herds. Temporary accommodation has been provided for the arrivals from the interdicted countries, and a fair trade has been effected at the waterside. Owing to this, and to the falling off in the importations from France, the actual number of animals exhibited at the Islington market has been comparatively small, but a full average number of English beasts has come to hand. The returns for the foreign market are far from complete. The following statement, taken from the Board of Trade Returns, shows the imports of live stock during the past and two previous years:—

	1868.	1869.	1870.

II.—COLONIAL AND TROPICAL PRODUCE.

TEA, SUGAR, COFFEE, RICE, SPICES, DRIED FRUIT.

J. C. Sillar and Co. (London) report:—

Tea.—The year 1870 has proved an exception to the rule of constant losses to importers of tea to this country, and very *fair profits* have been secured by both merchants and dealers. Early in the year the "Association of Tea Brokers" was dissolved, having been in existence for a quarter of a century; and with it passed away the custom of allowing the extra pound draft, or "supertare," as it was termed, which was allowed to the buyer by the seller. The practice of charging brokerage to *both* buyer and seller has also been abandoned in many instances, the brokers who have taken this step simply acting as agents for one party. The brokers' rents are still collected by the Lord Mayor and Aldermen of the City, though there is no supervision of the brokers to entitle them to the receipt of this, and the exaction of it can only be regarded as an act of oppression. One feature of the trade during 1870, which is worthy of recording, is the movement which is gaining ground to prevent the import of spurious and unwholesome tea, the public sale of which has long been a disgrace to all engaged in the trade. The custom of selling teas with a *three months' prompt*, and of allowing the buyer to deduct usury at the rate of five per cent. per annum from the purchase-money if the teas are cleared before that time, is still in existence, the present race of merchants engaged in the China trade having proved too weak to resist this injustice, which has been imposed upon them by the brokers and wholesale dealers.

1870 will be memorable in the annals of the tea trade, as the first in which teas came to this country through the *Suez Canal*, no fewer than twenty-one steamers having arrived by this route, carrying 23,000,000 lbs.

The following table shows the shipments from China and Japan to Great Britain for the last seven seasons, also the import of Indian teas and total quantity delivered for home consumption and export, and the United Kingdom stock on the 31st December, for the last seven years.

EXPORT from CHINA and JAPAN to GREAT BRITAIN.

1863–'64	120,2	Mln. lbs.
'64–'65	120,3	,,
'65–'66	120,2	,,
'66–'67	122,6	,,
'67–'68	118,4	,,
'68–'69	145,4*	,,
'69–'70	141,5	,,

* Of this about 4,000,000 lbs went to the continent of Europe, having sailed to Falmouth for orders.

Years.	Import of *Indian* Teas.	Total Tea Delivered U. K.	Home C'nsump-tion.	Export.	Stock on 31st Dec.
	Mln. lbs.	Mln. lbs.	Mln. lbs.	Mln. lbs.	Mln. lbs.
1864	3,2	116,1	88,6	27,5	106,2

'70	13,1	149,0	118,0	31,0	80,5

* Nearly 1,000,000 lbs were exported under the head of stores.

The above figures give the total shipments from China and Japan for the seasons, commencing with vessels sailing with new teas in the month of May. The cargoes of ships lost are also included; the deliveries are taken from the Board of Trade Returns, with the exception of last year's, which are estimated.

1870.

January.—1870 commenced with a much more cheerful spirit than had been witnessed for some time. A brisk demand set in from the country, and sales of congous were made at an advance of ½d to 1½d per lb.

February.—A large business was done early in the month in the cargoes of the numerous vessels that arrived during the last week of January. Prices were well maintained. In the latter part of the month the market became very quiet, and large quantities of tea were withdrawn from sale. The clearances were very small in consequence of the dealers running off their stocks to the lowest possible ebb, in anticipation of a reduction in the duty.

March.—The market remained quiet but firm, the deliveries showing a marked contrast to those of 1869, as the feeling became general that the "Free Breakfast Table" policy was going to be introduced by the Government. Great excitement was felt throughout the trade by the condemnation and destruction, by order of the authorities, of several chests of the exhausted and putrid leaves, known in the market as "Maloo Mixture," which was originally introduced into this country from Bombay by the Parsee and European firms who had received it from Macao, in exchange for Malwa opium, and recently imported direct from Shanghai by firms hitherto holding a respectable position in this city.

April.—The Budget was brought out on the 11th April, and great depression was experienced by holders of common red-leaf congous, which had been held largely on speculative account. The attention of the wholesale dealers was almost entirely taken up by clearing their stocks, which had accumulated very much, the crush of business lasting till nearly the end of the month. Three millions of pounds of tea were delivered the day after the Budget came out. The Easter holidays also interfered with the usual routine of business.

May.—The market was very sluggish this month, and very little business done, except at public sale. There was no change of importance in prices. Complaints were general of the low quality of the bulk of teas on offer, and the market may fairly be said to have been glutted with kinds below 1s per lb in value.

June.—The market was in a very inactive state this month, and business was interrupted by the intervention of the Whitsuntide holidays; the deliveries, however, continued on a very satisfactory scale.

July.—The market was exceedingly dull, only one vessel

having arrived from China during the space of six weeks, the entire attention of the dealers was taken up in organising a resistance to the proposed alteration of the "Trade Customs," previously alluded to. News from China was received by telegraph, via Galle, on the 11th of this month, reporting the opening of the market for new season's teas at Canton, Shanghai, and Hankow, and the departure of several steamers for London, via the Suez Canal.

August.—The steamer Erl King arrived on the 4th of this month, and on the following day the Diomed, both from Hankow. Sales were made to a fair extent at prices ranging from 1s 9d to 2s 4d per lb, and for boxes up to 2s 6d, afterwards resold at 2s 8d per lb. Telegrams received from Hong Kong, dated 21st July, reported the opening of the market at Foochow. Early in the month business was greatly interfered with by the exciting news received almost hourly from the continent about the war between France and Prussia. The Agamemnon steamer arrived on the 12th instant, and some of her teas were sold by auction at an advance of 1d per lb upon private contract rates.

September.—Several steamers arrived from China this month, including the Achilles and Statesman from Foochow. Business was done in fine and finest Monings from 2s to 2s 8d per lb, teas very little inferior only realising 1s 10d to 2s. Common blackleaf of old season's import was forced off at extremely low prices, some second hand parcels sold for cash, showing a reduction of 2d per lb. Sales of the new Kaisows were made from 1s 7d to 2s 1d on the 6th instant, and afterwards some extra fine as high at 2s 8d.

October.—The market was very firm throughout this month, the accounts from China showing a considerable falling off in the shipments, being up to the end of September 69,000,000 lbs, against 87,500,000 lbs last year, and 107,874,000 lbs in 1868. A large business was done, and prices advanced 1d to 2d per lb for medium and fine Moning congous, which found ready buyers, and were frequently turned over at a profit.

November.—There was little change in the market generally; the deliveries continued on a large scale, being 12,700,000 lbs for the month.

December.—The market remained without change this month. A fair business was done in new season's Monings; ex recent arrivals from 1s 2½d to 1s 6d, and in better kinds, from 1s 7½d to 2s 2d, and in red-leaf congous from 10d to 1s 2d.

Messrs R. J. Rouse and Co. (London and Liverpool) report:—

Sugar.—In reviewing the events of 1870, the *consumer* will be found to have gained far more than the importer or producer, for he has not only had the full benefit of the reduction (4s to 6s per cwt in the duties, which was made in April last, but he has also been further benefited by a reduction in the bonded value, caused by an increase of nearly 108,000 tons in the imports. The low prices have stimulated consumption, which showed no change prior to July, but exhibits *an excess* of 70,000 tons for the year. The stock in August was 199,000 tons, being nearly 60,000 tons larger than at the same period in 1869; but it has since fallen to 136,000, against 120,000 twelve months since. The course of prices was *downwards* until September, when middling *West India* was quoted at 26s to 28s, and clayed *Manila* 21s to 23s per cwt, duty paid; but during the past two months a recovery of 2s 6d to 3s has taken place, leaving the present bonded value 1s, and the duty paid value 5s to 6s, below the quotations at the beginning of 1870. No. 12 *Havana* afloat declined to 26s 3d in July, and has since recovered to 29s, being on a par with the quotation twelve months since.

During 1870 the imports from the *West Indies* have *increased* 22,200 tons, and from *Mauritius* 10,300 tons; from *British India* there has been a falling off of 14,000 tons, and from Manila, &c., 6,200 tons. From Cuba, Porto Rico, Brazil, &c., the *increase* has been 57,300 tons, and of beet sugar 38,100 tons, fully half of the increase in beet having taken place since the 1st November. The quantity afloat from Mauritius is 5,500 tons, against 9,200; and from Manila 10,800 tons, against 10,400 last year. As regards *future supplies* full average imports from Cuba, the West Indies, &c., may be anticipated, but there will be a deficiency of 45,000 tons in the Mauritius crop. According to Herr Licht there will be an increase in 1870-1 of 90,000 tons in the production of *beet root sugar in Europe*; but looking at the condition of affairs in the North of France, where the largest beet fields and manufactories exist, it seems somewhat doubtful whether his estimate will be realised, and if realised this increased quantity will probably all be wanted to meet the increasing wants of this country. The position of sugar is therefore very favourable to holders, and it would doubtless attract the attention of speculators but for the bitter disappointments they have so often experienced, even when their operations have, according to statistics, been ever so well based. The following table exhibits the imports, stocks, &c., of sugar in Great Britain for the past three years:—

Coffee.—The fact that the Ceylon crop would be about six weeks later than usual, and the supply of native small, combined with advices of light receipts in Rio, caused a speculative inquiry for native *Ceylon* in the early part of 1870, but on a much smaller scale than in the spring of 1869; "good ordinary," which in January was quoted at 50s, had in March advanced to 57s 6d on the spot and 59s for arrival, but in April there was a decided re-

action, and by the end of May the advance was lost. The outbreak of war caused a decline to 42s to 43s, but there was a considerable recovery in the following month; the market has since gradually improved, and present rates are 3s above those of last year. Plantation *Ceylon* shows an opposite result, being now quoted 6s to 8s lower than it was in January last: in the early months it improved 3s, but the advance was lost as supplies increased, and when the market was unsettled in July, sales were made at a decline of 15s as compared with January, and 18s as compared with the highest point in February; in August there was a sharp recovery, but the fluctuations have since been unimportant. The finer qualities of *Madras*, &c., have brought relatively better prices, while the inferior kinds have assimilated in value to plantation *Ceylon*. *Costa Rica*, *Guatemala*, &c., have sold in proportion to other colory descriptions. Owing to the war, large supplies of washed *Rio*, which otherwise would have gone direct to France, have been shipped to this market, and being well garbled, have sold readily at full relative value. The small shipments from Rio de Janeiro to Europe have had a favourable influence on the value of Brazil coffee; in February a good channel cargo of *Rio* sold at 47s 6d for a near port, in April 44s 6d, and in August at 42s 6d; but in September recovered to 45s 6d, and the present value of 48s 6d is nearly 7s above the quotation twelve months since. The Dutch Trading Company's sales in the past year have comprised 875,000 bags, being 114,000 bags more than in 1869; good ordinary *Java* realised 36 cents in March, and declined at each subsequent sale until it touched 31½ in September; but in November it improved to 33½, and recent private transactions have taken place at 35 cents, being 2 cents above the value at the end of 1869.

The stock of coffee in the principal European *entrepots* on the 30th November was, as will be seen by the table in another place, 82,950 tons against 110,310 and 83,390 at the same period of the two previous years. The total import into this country in the past twelve months has slightly exceeded that of 1869; there has been a falling off of about 2,000 tons of native *Ceylon*, counterbalanced, however, by an increased quantity of plantation, but from other British possessions, as well as from Central America the increase has been trifling; *Brazil* shows a decrease of 4,000 tons, while other foreign descriptions exhibit an excess of 4,100 tons. The *home consumption* shows no change of note; but the *export* has enormously increased during the past four months, and for the year shows an excess of nearly 8,000 tons as compared with 1869. The stock, which a month since was 33,370 tons against 27,560 on 1st December, 1869, has undergone the important reduction of 4,730 tons, and, as will be seen below, is now 830 tons less than it was twelve months since. The deliveries in Holland in the twelve months have amounted to 884,500 bags against 694,500; the stock is 508,000 bags against 533,000; and the quantity afloat from Java 480,000 bags against 322,000 last year. The total shipments from Rio de Janeiro in the five months ending 30th November were 1,022,000 bags against 1,066,000, the proportion sent to Europe being only 306,000 bags against 490,000 in the same period of the previous season. The shipments from Colombo between the 1st October and 28th November were 55,000 cwts plantation against 55,100, and 4,200 cwts native against 5,400 in 1869. The past year has certainly been most discouraging for the Ceylon and Indian planters, but the small stocks in Europe and the low rates now current point to more favourable results for 1871. The following table exhibits the imports, stocks, &c., of coffee in the United Kingdom for the past three years:—

Cocoa.—The demand for *colonial* has been languid, and of 1,100 bags *Trinidad* brought forward, only half has been sold, at 50s to 60s per cwt for ordinary grey to middling, and 65s to 90s for good to fine red. About 1,500 bags fair greyish *Guayaquil* have been sold at 47s per cwt. 500 bags *Surinam* did not meet with adequate bids, and were bought in at 53s to 68s per cwt. The stock of *colonial* in this port is 17,200 bags against 12,600, and of *foreign* 23,400 bags against 15,500 last year.

Rice.—Notwithstanding the small quantity afloat in the beginning of 1870, the low price of wheat unfavourably influenced the rice market during the first five months, and in May the quotations of middling white *Bengal* marked a decline of 1s 6d, *Ballam*, &c. 1s, *Madras* 6d, and *Necranzie*, *Rangoon*, &c., 1s 6d per cwt. In *June* the decline was fully recovered, owing to continued drought, which caused an advance in the corn market, and the fluctuations have since been trifling. Present quotations are the same as those at the close of 1869, with the exception of *Bengal*, which is 1s lower, viz.: ordinary to middling white *Bengal* 9s 6d to 11s, and good to fine 11s 6d to 13s; *Ballam* and *Moonghy* 8s 6d to 10s 9d, *Madras* 9s 6d to 10s 3d, and ordinary to fine *Necranzie*, *Rangoon*, &c., 8s 9d to 10s 6d per cwt. The latest prices obtained for a *Rangoon* cargo afloat was 9s 10½d per cwt, continental terms, and 10s 1½d London, landed terms, being 6d above the value in January last. The imports into this port in 1870 were 77,500 tons against 78,800, and the deliveries 75,300 against 61,200. The stock is 52,000 tons against 50,300, and the quantity afloat for Europe from India, the Burmah ports, &c., 30,000 tons, against 27,000 twelve months since.

SPICES, &c.

Cassia Lignea has been quiet at 110s to 111s per cwt for second pile; the stock is 4,460 packages against 2,980 last year.

Pimento remains quiet at 1¾d to 2d per lb; the stock is 33,360 bags against 41,200 in 1869.

Pepper has been in good demand, and is ¼d dearer, black *Penang* being quoted at 5½d, *Singapore* at 6d, and white at 6¾d to 7d per lb; the stock is 1,140 tons against 1,690, and the quantity afloat from the East 1,520 tons black against 1,780, and 90 tons white against 90 last year.

Zanzibar **Cloves** are dull at 2¾d to 3d per lb.

The only sales of **Ginger** have been 100 barrels *Jamaica* at 33s to 45s, and 160 bags *Bengal* at 26s 6d per cwt.

The few transactions in **Cinnamon** have been at about the rates of the last quarterly sales; the stock is 6,900 packages against 2,510 in 1869.

Tapioca continues flat, good *Singapore* realising only 1¼d to 2d, while the quotation of 4d per lb for good *Rio* is almost nominal.

DRIED FRUIT TRADE.

Messrs R. Witherby and Son (London) report:—

The opening of 1870 was characterised by such an amount of mistrust in the prices of *currants* that the trade of the first two months was smaller than ever known at that period. Holders however, acted with such ability that the reaction impending from the excited time of October, 1869, was more imperceptible than had been anticipated, and with the exception of some forced sales at the period of the issue of the Budget, quotations never fell below 25s to 26s per cwt. On the approach of the spring months the valuations gradually improved, and by the end of *May* a steadily rising market had attracted so great attention that deliveries were nearly on a par with those of November. Several large American orders were supplied about June, and took away everything available at prices under 29s; so that on the arrival of the new crop only 2,680 tons existed in London. The first fruits of the crop were held for prices out of reach of dealers, and as old fruit was really better value, even at slightly enhanced rates, much was moved off.

The trade have probably held lighter stocks this past season than was wise for their own interests, but they have generally worked on a supposition that heavy arrivals were likely to take place, and consequently that a fall would follow. The prices altogether have been more regulated by shippers' demands than

for many years, and the statistics show that price does not so much influence consumption as has been thought to be the case. The present stock is lighter by 6,000 tons than on the same days of 1870-1869, and a wholesome trade on a rising market may be safely prognosticated.

In *Raisins* during the spring months very little trade was done for home purposes, but exporters, especially continental houses, took freely, and caused great diminution of stock of Valencias and Turkey growths; and although quotations of the latter were irregular, still, on the arrival of new fruit heavy stocks existed both of red and black fruit. Sultanas have been a favourite fruit throughout the year, and have quite regained the position in price that they lost in 1868. The continued improvement in the quality of *Valencias* appears yearly to exercise a worse influence on muscatels of medium and low growths, prices of which descriptions have only been lower once during the past five years than they now are. *Turkey figs* have met with a very ready sale, and the clearances have, owing to low prices, been larger than last year.

III.—WINE TRADE.

Messrs Ridley and Co. (London) report:—

The wine trade has gone through 1870 with more buoyancy than was hoped for, even before any disturbance of the peace of Europe was contemplated; for if no great impetus has been given, as in some former years, to the consumption of wine in the United Kingdom, we may safely affirm that it has been nearly kept up to the high standard reached in 1868. The annexed figures, indeed, indicate an increased demand, but we cannot ignore the fact that large quantities of *French wine* have passed our Custom house since the outbreak of hostilities, which under normal conditions would still have been quietly reposing in the Bordeaux cellars, and the statistics must on this occasion be read by the light of the exceptional times in which we find ourselves placed.

The official returns of imports, home consumption, exports, and stocks in bond, for the past seven years are as follows:—

Years.	Imports.	Home Consumption.	Exports.	Stocks in Bond, Dec. 31.
	Gallons.	Gallons.	Gallons.	Gallons.
1864	15,451,622	11,456,715	2,085,299	14,532,598
'65	14,269,750	12,061,386	2,204,580	14,277,132
'66	15,321,029	13,327,916	2,191,023	13,971,996
'67	15,442,581	13,754,343	1,864,726	13,585,987
'68	16,953,454	15,151,741	1,923,848	13,236,087
'69	17,184,307	14,840,158	1,978,912	13,422,428
'70	17,446,815	15,195,862	1,686,351	13,730,000

The estimated relative proportions of the total imports and home deliveries for the year were then as follows:—

	Imports.	Per Cent. of Total.	Home Consumption.	Per Cent. of Total.
	Gallons.		Gallons.	
Sherry	6,205,804	35.6	5,428,488	35.7
French, red	3,613,783	20.8	3,132,126	20.7
Port	3,414,105	19.1	2,962,141	19.5
French, white	1,066,811	6.2	1,094,222	7.2
Spanish, red	1,102,264	6.4	823,428	5.5
Marsala	531,611	3.1	509,639	3.4
Rhenish	521,889	3.0	482,884	3.2
Hamburg	533,598	3.1	422.968	2.8
Other sorts	456,950	2.7	339,966	2.0

On comparing these figures with those for 1869, the most notable feature is the *falling off*, trifling though it be, on both the imports and home deliveries of *sherry*, the former showing an estimated decline of 4.4, the latter 0.9 per cent. The apparent explanation of this retrograde movement is to be found in the fact that its two most formidable competitors—we mean Port and Marsala—have both been in increasing demand throughout the year; port exhibited an excess of 4.6 per cent. on imports, and 5 per cent. on the duty clearances—whilst the produce of Sicily has advanced in consumption 9.9 per cent.

Notwithstanding the improving condition of the *port wine trade*, there has been no displacement of the wholesome red wines of Spain, so often sold to consumers as the veritable produce of the Alto Douro; the deliveries having been about on a par with those of 1869. The arrivals show a diminution of some 8 per cent., but this is to be accounted for by the heavy shipments of the previous year, which were 20 per cent. in excess of 1868.

We next refer to the statistics relating to the *French growths*; but here, for reasons already given, no reliance can be placed upon figures as a guide to the actual state of trade, and we give them only *pro formâ*. The imports and duty payments on *red wine* show a respective increase over 1869 of 21 and 7.8 per cent.; whilst *white*, on the contrary, exhibits an apparent decline of 16 and 4.9 per cent., large quantities of champagne forwarded through Belgium being lost sight of in the returns, and massed under the head of wines from countries not enumerated. We must therefore fall back on the figures published up to the date when this disorganisation of business commenced, supplemented by our personal observation of the actual state of supply and demand; and from such data we are led to the conclusion that the consumption of *claret* has been about on a par with that of the previous year, whilst *burgundy and champagne*, especially of the finer sorts, has continued to increase in favour. Although we do not believe that claret has progressed as regards quantity, we think that, as a rule, better quality has gone into consumption than much of the trash vended in former years; it was certainly time some improvement was made in this particular, for the cheap and wonderfully nasty sorts with which the country had been flooded was fast bringing disrepute on the very name of claret. We are satisfied that if the sale is to be kept up to the present standard (nearly 20 per cent. of our total consumption), it is essential that sound full bodied wines should alone be put in bottle, and that dealers should eschew everything below 5*l* per hhd; *at which figure* a wholesome beverage may be obtained, and sold with a *good* profit even at 1*s* a bottle. When we say this we do not mean that the thing is possible if the large sums disbursed for advertisements and commissions are taken into consideration, but for the legitimate trader of the old school, who prides himself on being free from such expenses, giving these contingents of outlay entirely to his customers, the matter is not only easy, but satisfactory to buyers and sellers; the public ought to see this in a common sense light; but we fear up to the beginning of this year of grace have failed to do so.

The trade in *Hock and Moselle* shows no great increase, but is well maintained at the improved standard of 1869; a fact which says much for the good taste of the British public, and for the close application to business of their German purveyors. Having said this, we think, as their business is so flourishing, we have reason to again urge upon the Excise the duty of enforcing payment of licenses from all these enterprising and indefatigable travellers. Some little stir has been made, it is true, since our last annual *résumé*, but very much more remains to be done. It would be difficult to find such an anomaly in any other country as that of carefully taxing the natives, and letting the foreigners, n many instances, go unscathed.

Some improvement has been manifested in the *Madeira trade* during the past year, although its consumption is still only an infinitesimal part of the total; we may look forward, however, to a further increase, more especially should providence again favour the vineyards with heavy crops. This wine cannot with confidence be shipped before the third year of its age; but we do not despair, before long, of seeing fair drinkable qualities from the island quoted at 30*l* per pipe in bond in London. There are plenty of enterprising people who know well how to make and manage the *Must*, and if vended here worth the money, Madeira may be again generally seen on the tables of consumers.

The shipments from that unenviably notorious port, *Hamburg*, are the last calling for remark under this section of our review. The imports thence during the year we estimate at 533,598 gallons, about the former year's figure, and the duty payments at 422.968 gallons, an increase of nearly 4 per cent. The whole of the augmentation may be fairly credited *to pure wines from Austria and Hungary*, which have of late been offering at more reasonable prices than formerly; but we regret to find that the largest caterers for the supply of wine to the public are still the largest dealers in the abomination known as "Hambro sherry," and could wish to see more consideration for the health of their customers evinced by gentlemen whose business enterprise has been so liberally rewarded. Even the medical faculty, who are too often open to the reproach of selling their names to advertising wine merchants, have never been found bold enough to say one word in favour of this miserable compound, whilst the most eminent members of the profession have times and again stigmatised its use in no measured terms, and done good service to the interests they make it their duty to protect. We are aware the great people here alluded to will only laugh in their sleeves at these remarks, which they know are not likely to meet the eyes of any of their customers: this Hamburg concoction is by far the most lucrative portion of their trade, and the handsome profits it affords help materially to meet the heavy outlays such a business inevitably labours under ere one sixpence of net revenue can be counted upon.

In the preceding analysis of the various articles forming the staples of our trade we have perforce confined ourselves to the question of imports and home consumption, no classification beyond the general headings of "red," "white," and "mixed" wines, being afforded by Government as regards the export deliveries; the total of which for the year we estimate at 1,686,351 gallons, consisting of red, 657,287; white, 1,011,770; mixed, 17,100—all showing a falling off from the figures of former years. This may be accounted for partly by the fact that *direct shipments from France, Spain, and Portugal, to foreign markets* are becoming every year more common; whilst in Australia, once our best outlet, and in America, the *native production* of wine has largely increased, and is consumed at moderate prices, in preference to the mixtures formerly prepared in our dock vats at home. Indeed it seems more than probable that before many years have elapsed, only the wealthy classes of those two great Anglo-Saxon communities will luxuriate in European growths—of course of the choicer qualities,—and that our export trade in wine must grow "small by degrees and beautifully less."

The *vintages* of the year have, on the whole, been such as to give it a high rank in the annals of the century. In Spain, both white and red wines were of excellent quality,—the quality of the former was large, and of the latter not much below an average. Portugal has been favourably treated in both respects, and the 1870's will, 10 or 15 years' hence be esteemed by lovers of really fine old bottled port, which, in the language of an eminent member of our trade, whose verdict is the more reliable as his material interests are concentrated in sherry and claret, "is undeniably a noble and generous beverage, and so long as Englishmen are Englishmen, will never fail to find admirers." In most departments of France, the vintage has been good and abundant, despite the unfavourable circumstances of the presence of invading armies, which it might have been feared would have impeded, one way or another, the operations of the farmers. The claret of the year cannot yet be definitely pronounced upon as regards quality; but if not absolutely fine, there is undoubtedly a large quantity of useful wine suitable for the English market. Champagne gives excellent quality, but a deficient quantity—a fact to be regretted, considering the increasing demand; whilst in Burgundy and the south nothing remains to be desired in both particulars. Germany is the one exception to the general bounty of nature,—from the Rhine and Moselle, Austria and Hungary, nothing but bad reports are to hand, the grapes having been so parched by a blazing sun and lengthened drought in early summer, as never to have developed necessary elements for the production of good wine.

The question of a reduction of the *wine duties* again engrossed some share of attention during the early part of 1870; but the Premier's incidental remark in the course of the debate on the sugar duties, that "it was not very likely" any alteration would be made,—supplementing the Chancellor of the Exchequer's avowed doctrine in his Budget speech, that "he was not willing to let go any branch of the revenue which was not felt as a grievous imposition, as if he did he must press heavily elsewhere,"—seems to have given the *coup de grace* to agitation on the subject, so far as those few members of the trade who kept alive were concerned. The Halifax Chamber of Commerce, however, so recently as last November, again "urged on the Government the desirability of negotiating treaties of commerce with Spain and Portugal, based on a reduction of duty on wines from those countries; but here again we have to bear in mind Mr Lowe's publicly stated antipathy to all such treaties, to say nothing of the failure of protracted negotiations already entered into with those countries, in which the question was exhaustively argued in all its bearings, not only under the auspices of the present Government, but also of their Conservative predecessors. We have for years past freely expressed our opinions on the subject, and events have so far demonstrated their accuracy: we still feel persuaded that no good results either to the English merchant or the consumer would follow the reduction of the present moderate existing rates, whilst holders of duty-paid stocks would certainly be considerable sufferers; and knowing that our views are those of nearly every established firm—except shippers interested in the value of stocks abroad, which would, of course, according to precedent, immediately rise in value on any reduction of duty taking place—we hope our Government will hold firm to their determination, and prevent the trade being again disturbed, by taking the first available opportunity of publicly notifying to the Halifax memorialists that the question will not be re-opened.

The number of *insolvencies* has been considerably *less* than in either of the previous years; making up a total of only 141 wholesale dealers throughout the Kingdom, 58 of whom have been publicly gazetted, and 83 arranged with their creditors under the liquidation clauses of the Act. The publicans and retailers have also considerably diminished in the list of defaulters, about 560 having gone to the bad—only a third of the previous year's total.

The majority of failures were for amounts of no serious importance, indeed the only name calling for special notice on this occasion seems to be that of *Messrs Lemon Hart and Son*, whose affairs are now engrossing so much attention; the suspension of Messrs Julian Pemartin, T. G. Sandeman and Sons, and one or two other foreign firms, in no way pecuniary affecting the trade in this country. We take leave of this portion of our subject with more satisfaction than in many previous years; for although in some few instances—those in which the bankrupts' antecedents were such as to render it a matter of wonder that they should have been trusted with a single pipe of wine—ridiculously small dividends have been realised, still, as a rule, we think the Bankruptcy Act of 1869 has been productive of one good result, that men behind the world have suspended operations whilst there was yet a reasonable amount of assets in hand for distribution—and two or three criminal prosecutions under its provisions, which have resulted in the conviction and severe punishment of reckless traders, have doubtless had a salutary effect in bringing about this improved state of things.

Our obituary for the year includes the following well-known names—gentlemen all highly respected in their peculiar stations, and lamented by a large circle of survivors:—T. G. Sandeman; D. Sandeman; N. Johnson; J. Beck; J. Henry; J. B. White; A. Thompson; R. Davies; P. Cossart; J. Rebello Valente; J. Gorman; J. Vallentin; J. J. Selby,—most of whom lived amongst us a fairly allotted lease, and not a few to a ripe old age, practically proving that the wine trade proper is not necessarily a short-lived calling.

Brandy.—The eleven months' imports into the United Kingdom (including cases) were equal to 55,506; home deliveries, 27,873; and exports, 2,661 puncheons; which, compared with the like period of 1869, exhibits an *increase* on imports of 24,139, and on home consumption of 2,041, but on exports a *decline* of 567 puncheons. The bonded stock on the 1st Dec. was equal to 90,578 puncheons, against 65,357 in the previous year, and 64,693 in 1868.

In reviewing the aspect of the brandy market throughout the year 1870 we have little change to note as regards the value of the article; quotations having been maintained with monotonous uniformity, and now ruling at almost the identical rates current twelve months since—1865's at 7s 5d; 1866's at 6s 9d; 1867's at 6s 7d; 1868's at 6s 3d; and 1869's at 5s 2d per gallon, on quay: being about the original opening prices for 1866's, 1868's, and 1869's, and 5d below the Cognac quotations fixed for 1865's and 1867's in January, 1869.

There can be nothing surprising in such a result when we note the steady and excessive augmentation of our bonded stock month after month, as shown in the accompanying table; unless indeed it be the fact that no decline in the quotations has to be recorded, which might naturally have been expected to ensue from the arrival of such unprecedentedly heavy supplies. The stocks in all parts of the United Kingdom on the 1st of each month were as follows:—

	Puns.		Puns.
1st January	65,230	1st July	79,312
1st February	65,032	1st August	80,863
1st March	69,132	1st September	79,965
1st April	72,031	1st October	82,007
1st May	74,714	1st November	84,225
1st June	76,841	1st December	90,578

The maintenance of values in the face of such figures appears to be chiefly attributable to the fact that holders in this country being either capitalists, or from the abundance of money enabled to obtain accommodation on moderate terms, can afford to wait until the tide turns; for scarcely an instance has come under notice where anything like a disposition to force sales at reduced rates has been manifested. The future course of supply and demand is doubtless a question of paramount importance; and as it may be taken for granted that the magazines at Cognac are now almost denuded of their reserves, it follows that not only our home trade, but foreign markets (including America, where the large reduction of 33 per cent. on the duty must lead to a materially increased consumption) will for some time to come draw heavily on the stocks accumulated in this country, which are equal to about three years' *ordinary* deliveries from bond, but which cannot be estimated at more than sufficient for two years' demand from all parts under existing circumstances.

The *vintage* of 1870 must of course not be altogether omitted from consideration, and should a low opening figure be quoted by influential shippers, the value of 1869's might no doubt be injuriously affected; but as yet there are no indications in that direction. It is stated on credible authority that but little new spirit is likely to be made, and the increasing dearth of labour consequent on the prolongation of the war raging in France—the end of which appears so unhappily distant—must undoubtedly operate not only against the present distillation of brandy, but from the probable want of culture the vines may suffer from the same cause, the production of wine in 1871 may be seriously curtailed.

IV.—RAW MATERIALS.

WOOL, JUTE, SILK, INDIGO, LEATHER, OILS, CHEMICALS. TIMBER, METALS.

(1) WOOL.

Messrs R. W. Ronald and Sons (Liverpool) report:—

The result of 1870 with regard to *wool*—next to cotton the most important staple for textile fabrics in this country—may be summarised thus:—*Domestic Wools*, in average supply, have somewhat receded in value; *Fine Colonial*, with greatly increased arrivals, but materially decreased exports, have suffered a considerable decline; whilst *Low Foreign*, with diminished imports, and an abnormal demand, consequent upon orders for army clothing, have ruled very steadily, and of late, in many instances, experienced some advance upon the rates current a twelvemonth ago. Whatever progress the *wool trade* in general may have made during the first five or six months towards recovering the activity of former years, the war between France and Prussia has certainly, for the remainder of the year, materially interfered with this as with most other branches of commerce; still it is a matter for congratulation that the consumptive power of our *home trade* has been equal to absorb enough of the increased supplies of the raw material to prevent a greater decline in prices of all fine colonial and River Plate wools than has actually taken place. If we refer to the Board of Trade Returns available for the eleven months ending 30th November, 1870, we find an increase of nearly 12 millions of pounds in the *imports* of *colonial* wools over those for the same period of 1869, but a decrease of nearly 3 millions of pounds in those of *foreign* wools. The *exports* of *colonial* have been about 16½ millions of pounds less, and those of *domestic* wools about 3½ millions of pounds less than in the preceding year, whilst those of *foreign* have been pretty much the same as in 1869. The quantity left for *home consumption* is consequently, in 1870, about 29 millions of pounds more than in the previous year. To this must be added wools pulled from imported *sheepskins*, chiefly from the River Plate district, the arrivals of which at this port alone have been 13,556 bales during the past year, or nearly double the quantity imported in 1869, although, strange to say, we find no *record* of *sheepskins* under the imports in the Board of Trade Returns. The declared value of the *exports* of *woollen yarns* and *woollen manufactures* of all kinds for the eleven months of 1870 amounts to 24,529,074*l*, against 26,544,638*l* for the same period of 1869, or about 8 per cent. less. Now, assuming the yield of the *home clip* for 1870 to have been equal to that of former years (which, according to a paper recently read before the Statistical Society, in London, taken as an average of the four years 1867 to 1870, amounts in round figures to 160 million lbs), and considering that stocks of the raw material in the hands of consumers and dealers are admittedly very light—only importers of fine colonial wools holding rather more than the usual quantity at this time of the year—it appears to us beyond all doubt that the consumption of wool during 1870 has *been on an unprecedentedly large scale, that more machinery than ever is profitably employed, and that the woollen trade altogether is decidedly in a most healthy state.*

Australian and Cape Wools.—The imports from these colonies during the year 1870, despite the generally anticipated decrease, have, with the exception of Cape wools, exceeded those of any previous year.

An impression existing amongst the leading importers of *colonial wools* that it would be more beneficial, both to the grower and importer, to hold auctions *more frequently* during the year than had hitherto been the case, a resolution was come to at the end of 1869, altering the arrangement of four series in favour of five. This was carried out, it will be seen, so far as the first six months are concerned; but as the bulk of the *Australian wools* arrive before July, it became evident that, in order to better equalise the remainder of the year, only one more series of auctions should take place. The outbreak of the war at this juncture between France and Prussia naturally exercised a depressing influence on all *fine wools*, and it was, therefore, on every account, the best action that could be taken in the matter.

The position of this article at the commencement of 1870 was generally regarded as dull; but the impression extensively prevailing amongst importers, though not generally shared by manufacturers, that the effects of unprofitable returns to squatters for some time past, and the consequent boiling down of stock, would result in an important diminution in the receipts, made many hope for higher prices in the February auctions. Though this was not realised on the opening day, a better feeling manifested itself as the series progressed, and an advance of 1d per lb all round was established on the first day's prices. At the second series the large quantity offered, and the uncertainty as to the ultimate result of the various clips, had the effect of keeping prices only firm at the rate established in March, but as they progressed an improvement of about 5 per cent. was realised on the better kinds of combing descriptions. The declaration of war on the continent, on the 15th July, had the immediate effect of causing *a drop* of about 2d per lb on almost all prices; and although the series was brought to a close a few days earlier than had been intended, with large withdrawals during the week, no appreciable rally was experienced.

River Plate Wools show a *decrease* of imports, both in the aggregate to Europe as well as to England, as will be seen from the subjoined particulars:—

	1870.	1869.	1868.	1867.	1866.
	bales.	bales.	bales.	bales.	bales.
Belgium	135,586	115,359	141,398	94,057	82,664
France.....(about)	80,000	101,312	78,387	81,305	50,600
England .....(about)	12,000	14,093	16,369	16,495	18,818

Total	229,164	235,854	192,929	152,354	131,710

East Indian and Persian.—The arrivals during the year 1870 have been considerably short of those of the previous year, showing a decrease of 27 per cent., but this is chiefly to be attributed to the short supply from *Kurrachee*, where there is a falling off of 57 per cent.

Alpaca has come to this port to the extent of 27,572 ballots, and stocks at the commencement of January, 1870, amounted to about 18,500 ballots, but with the exception of the months of July and August, when the state of affairs generally was the gloomiest, sales to a fair extent were made every month, and stocks at present are only about 5,000 ballots. Prices made at the beginning of the year were 2s to 2s 4d, and the best classes reached their highest point in June and July, when 2s 9d and 2s 8d were paid for Arequipa wool. In September 2s 7d was paid for Arequipa quality, and last sales were 2s 8d; but 2s 8½d has since been offered and refused, whilst Tacna qualities realised 2s 5½d.

Domestic Wools.—During the first few months of 1870, the same sluggish demand which prevailed at the close of 1869 continued to be the chief characteristic of the English wool markets, and by the end of March a decline of about a 1d per lb on December rates was to be noticed. There was a recovery at clip time, and it was a noteworthy fact prices stood identically at the same point as at the corresponding date of 1869; but this advance was again soon lost, and by the end of June a drop of 5 per cent. had occurred upon the opening prices at the country fairs. The panic which ensued at the declaration of war between France and Prussia, on the 15th July, had the immediate effect of causing a decline of 2d per lb on most descriptions, good lustre sorts suffering least; but as the first shock subsided, the ground lost was soon regained. All through the autumn months a steady inquiry for home consumption has occasioned a slow but gradual advance on both combing and clothing descriptions, and we close the year with an average depreciation in value, as compared with corresponding date of last year, of barely 1d per lb.

(2) JUTE.

Messrs Seaton, Clark, and Co. (London) report :—

In reviewing the market for jute during 1870, the first thing which strikes the observer is the almost entire absence of fluctuation in prices, which is the more noticeable, as almost every other important article of production has been affected one way or the other by the events of the past six months. The market opened rather quietly in January, under the influence of heavy shipments from Calcutta for the first four months of the season; but towards the end of the month, when it became evident, both by the great falling off of the receipts in Calcutta from the interior, and the short growth of the jute which then began to arrive in London, that the crop of 1869-1870 would not exceed that of the previous year, prices advanced about 30s per ton in the course of a fortnight—R B J, No. 4, which in the beginning of January had been difficult of sale at 21*l*, advancing to 22*l* 10s by the beginning of February, with a very large amount of daily sales. From this time to the close of the year, medium and good showed scarcely any alteration, though common qualities, owing to the large quantity retained in India for local consumption, gradually advanced 15s to 20s per ton. The outbreak of the war between France and Germany, which threw the markets for the other two great manufacturing fibres—silk and cotton—into utter confusion, had scarcely any effect upon this, principally owing to the fact that the orders for bagging, &c., for the armies, compensated for the absence of the continental orders. During the past few months, new channels having been opened up, the continental demand has returned, while the *army orders* still continued, so that prices have steadily advanced from the end of October to the close of the year, hessians from 2⅞d to 3 5/16d per yard, and 7 lb yarns from 2s to 2s 1d per spindle. *Both spinners and manufacturers are now generally under orders for several months to come, and are doing a more profitable trade than at any period during the last three years.*

A new feature in the trade was a large amount of "*bear*" sales of first Greek marks, nearly 50,000 bales being sold in September for shipment before the end of the year at 20*l* 15s to 21*l*, or more than 2*l* below the current value of the same on the spot. The Dundee spinners, with an accurate knowledge of the ever-increasing requirements of their trade, which gives them an incalculable advantage over the mere speculator, bought them readily, knowing that the shipments for the past season had been nearly 120,000 bales less than the consumption, and that if it had not been for the opening of the *Suez Canal*, their mills must have been partially stopped during the last few weeks of the year for want of material. Even now, though 50,000 bales have arrived by steamer, their stocks are reduced as low as they can possibly be, being about 40,000 bales less than on the 1st January, 1870.

The consumption in Europe, although the exports to the continent have been only 50,000 bales in the last six months, against 98,000 bales in the first six months, has been 955,000 bales, and for the coming year may fairly be estimated at over a million bales. Unless, therefore, the shipments for the present season exceed this amount, there is no chance of our seeing lower prices for some time to come; and should they be much less, prices must still advance considerably. We earnestly hope, in the interest both of importers and spinners, that the present highly remunerative rates will induce a much larger cultivation, so that the production may not only keep pace with the consumption, but that stocks may accumulate here to counteract the effect of any unforeseen event, such as the partial failure of a growing crop. It would be a great misfortune for all concerned in this large and increasing trade, if, in consequence of short supplies, prices were driven up so high that flax and cotton would take its place for the finer description of goods. In connection with this point we may notice the arrival last year of about three thousand bales of jute from *Madras*, which, if proper care were taken in its preparation and baling, would at the present moment realize from 20*l* to 21*l* per ton in this market—a price which, we think, would pay the growers, and cause a considerable increase in the cultivation in that district. The parcels hitherto arrived have sold at 18*l* 10s to 18*l* 15s per ton. The direct imports into Dundee have again increased, being 230,000 bales for the past year, against 200,000 bales in 1869.

(3) SILK.

Messrs Durant and Co. (London) report :—

Taking Chinese thrown as China silk, we have had in 1870 in all classes (except Japan) an *increase of importation*—nothing of moment in Bengal, Persian, or Brutia silk, in aggregate amounting to 30 per cent.; while the deliveries, although showing slight differences in the several classes, are in fact almost identical in aggregate, and we commence the new year with a stock again in aggregate 30 per cent in *excess* of last year. China silk alone shows no increase, while Canton silk absorbs nearly the entire increase.

1870 opened with a buoyant market, and buyers and sellers all more or less sanguine of further improvement, although we had had fully six weeks of large business with a rise of 10 per cent. in prices, and were really at a very high range. For the first six months these expectations were fully realised. *All looms or mills went more or less merrily*, occasional moments of hesitation and misgiving whether or not we were going a little too fast, but only just sufficient to prevent too great a rise in prices, which by these checks were kept within comparatively moderate bounds—only about 10 per cent. upon the opening,—and although this was looked upon as excessive by the cautious, there were not wanting many, especially among the foreign consumers of the products of our best mills, who were willing to make contracts to be delivered at comparatively indefinite periods. The usual hesitations and doubts as to European crop were not wanting—in fact the fluctuation of opinion was perhaps even beyond the usual extent—the natural result perhaps of our high range of prices, and distrust as to continuance of such apparent prosperity; but even as late as *the last days of May* a strong notion was prevalent that the result would be 20 to 30 per cent. below the previous year. This was no doubt telegraphed to China, and this, with their small estimates of probable export, and the idea of "safe prices" given from this side in March and April, would fully account for the extravagant prices and large extent of their early settlements. This opinion of short European crop was not finally given up for some weeks, so that even in the last days of *June*, and almost the first week of *July*, all was apparently prosperous, with a hope that the early shipments from China might escape loss, although bought at such extravagant prices.

Then came the great change. *On the 7th July* the alarm was struck. There were alternations of hope and fear for a few days, but on the 15th war was declared, and with that came a collapse of market. This continued for two or three weeks, and some few small parcels were forced off at a reduction of 12½ to 15 per cent. upon the highest moment; but with the arrival of the new silk from China, and the continued reiteration of the estimates that the total export could not exceed 40,000 bales, an opinion was hazarded that a reduction of 10 per cent. would be ample. This seemed more or less to be accepted by both buyers and sellers after six weeks of small doings, and with some occasional exceptions of hardening and relaxation of prices, without almost at any moment the slightest pressure on the one hand or anxiety to purchase on the other, we have so continued, buyers generally feeling no reason for anticipating their actual necessities, and importers, influenced no doubt by continued confidence in their advices as to probable export, and more or less hope of cessation of war, a reluctance to face the large losses upon all except the latest shipments. The only exception as to pressure was perhaps the moment when the first few hundred bales were received

direct from France early in October, immediately after the breaking off of the first attempts at an armistice, and then prices gave way 1s per lb—scarcely 4 per cent. This has been regained, and so closes the year with a fairly firm market. The range of prices having been at the extreme—an advance of 10 per cent. upon the starting point—ending very much as we began, *about half-way* between the highest moment and the lowest of November, 1869—a year, we believe, *of considerable profit to our home manufacturers and throwsters*, especially to all of them who have taken and kept the lead in their respective productions.

The *export* of silk, both raw and thrown, was very large in the first six months, but since the declaration of war the falling off has been considerable. In the case of the import of manufactured goods we have had the exact reverse. The total import of goods shows as in silk an increase of 30 per cent. upon 1869.

In China silk, always first in importance, the arrivals were considerably in excess of the previous year, while the deliveries show a small diminution, the last six months comparing very unfavourably with the preceding. In this more than any other class the point that attracts attention is the great change in the proportion of sold and unsold stock. Last year the figures were 9,500 and 5,500 bales, whereas now they are 6,100 and 8,600 bales, marking extreme caution on the part of buyers, and confidence or reluctance to face heavy losses on the part of importers, and showing how as it were by intention the market has been fed from week to week. Prices close slightly higher for medium and low qualities, while the better classes are slightly weaker than last year.

Chinese thrown silk and re-reeled Haineen silk were always in small supply.

Japan silk has experienced an unhappy fate throughout the year—almost always neglected, and scarcely any reduction of prices sufficing to make it go into consumption, occasional attempts almost invariably resulting unsatisfactorily. Prices close fully 3s to 4s below last January. Stock only slightly increased, but this only because no new silk has yet come forward, so that the crop of 1870 may be considered intact.

Canton silk is the one class that has shown the most altered feature, the importations being 7,000 bales beyond the previous year. A large portion of this increase came forward in the early months of the year from Bombay, generally of a class materially lower than ordinary importations; but in the last six months we have had unusually large quantities, some parcels coming direct from France, and others no doubt diverted hither by the altered state of that market. A very large portion of this season's silk is Tsatlee reel, for the moment perfectly overwhelming in quantity, and reducing prices 3s to 4s per lb—a very large percentage upon old rates, and we fear upon cost; and notwithstanding these low prices, the deliveries do not show that at present it is entering largely into consumption, while the old long reel have been in very small quantities, and those generally of the finer classes, which have throughout commanded comparatively good prices, and are only about 1s to 1s 6d lower than last year.

Bengal silk has for the last six months shared very much the fate of Japan, always more or less difficult of sale; and prices of the better classes—a large proportion of the whole—2s to 3s 6d below opening prices, and 5s to 6s below the highest moment of the year, and with all this showing a large increase of stock; and, as in China silk, the proportion of sold and unsold stock being materially changed, say, last year 2,500 bales and 1,350 bales, now 1,900 bales and 3,400 bales.

Brutia silk shows some increase in importation, but this now goes with Italian of the highest class.

Italian silk has perhaps suffered the greatest reduction in value, fully 20 per cent., and this is leading to a large increase of consumption.

(4) INDIGO.

Messrs Layton and Co. (London) report:—

To indigo the absence in 1870 of the usual foreign demand has operated most adversely, and throughout the year prices have continued to fall. The consumption of East India indigo in Europe during 1870 has been 28,921 chests.

The four periodical sales of 1870 may be thus reviewed:—In *February*, 7,180 chests were offered, and only 1,850 found buyers, fine Bengal qualities and choice Kurpah alone maintaining their previous value; other descriptions suffered a decline of 3d to 9d per lb. Before the commencement of the May auctions the stock of Bengal indigo had fallen to 5,377 chests, being the smallest in the table, and the accounts from Calcutta of the growing crops were very discouraging (a great drought prevailing throughout Bengal and Tirhoot). The export houses, however, abstained from purchasing, in consequence of the *direct importations from Calcutta to Germany, France, and Russia then arriving*, and which would prevent any demand from those quarters for some time. The home trade bought freely *at a decline* of 3d to 6d per lb on previous rates. Of the 6,800 chests declared, 2,250 were returned as sold. For the sales of *July*, 13,150 chests were declared, 4,000 of which were sold. The political difficulties, which exercised so depressing an influence on the sale at its commencement, culminated before its close in the declaration of war by France against Prussia. The scarcity of fine Bengal was again the cause of spirited competition at the May rates to occasionally a slight advance, while consuming kinds and Oudes towards the close of the auctions could be purchased at a discount of 9d to 1s per lb. Throughout August and September the most excessive dulness prevailed, and transactions in the market were few and insignificant. Several parcels of good and fine Bengal and Tirhoot *were imported from France*, and appeared in the October sale, which opened with an augmented stock of 20,953 chests, and a declaration amounting to 12,941 chests; and although great support was given by proprietors in withdrawing 7,000 chests from the catalogues, it was insufficient to check a further fall in values of 3d to 1s per lb, the lower qualities again suffering the greatest depreciation; 4,200 chests were sold.

The consumption of East India indigo in Europe in the last sixteen years, as nearly as can be ascertained, was as under:—

	Chests.		Chests.		Chests.		Chests.

(5) LEATHER.

Messrs T. J. and T. Powell (London) report:—

Although the year 1870, so memorable from the desolating war which has raged on the continent, presents fewer points of interest bearing on the leather and hide trades than circumstances of such immense importance might have been expected to produce, it has nevertheless been marked by changes attributable chiefly to the effect of the war on the markets, both for leather and hides. The first six months of 1870 did not show a very satisfactory position of the trade, especially with regard to heavy sole leather, and more particularly with respect to the relative prices of salted *South American hides* and heavy *foreign butts*. Hides, under the effect of a large continental demand, showed an advancing tendency, while prices of the manufactured article were with difficulty supported. In *July*, however, after the declaration of war between France and Prussia, and a feeling of uncertainty as to the position of England in the impending conflict, an impression was created that higher prices would prevail for leather, and very large sales of South American butts were made. Existing stocks were generally cleared, and many sales were made for forward delivery: this was not, however, the only boon to the tanners; the prospect of blockaded ports, and the impediments the war caused in the ordinary channels of trade on the continent, diverted many cargoes of hides bought afloat for foreign account to this country, and thereby brought about some concession in prices of the raw material. The active demand for heavy foreign butts, however, that prevailed in July and August, being chiefly the result of impression, subsequently subsided, and it was not until the last three months *that the requirements of the continental Governments for military purposes had any positive effect on our market*. Since that period dressing hides, shaved hides, and curried hide leather of all kinds have been greatly required at advanced rates, but sole leather, with the exception of Australian sides, has shown scarcely any alteration.

Raw Goods.—There has been a diminished import of Australian hides, but they have been compensated for not only by the large increase of South American hides, but also by a variety of other goods, especially both dry and salted hides from the Cape. The fluctuations in prices have not been great, the supply and demand throughout the year having in general nearly approximated.

Tanning materials have been in good supply. *English bark* marked a slight decline from the previous year. *Gambier*, with some few fluctuations, has had a declining tendency. *Mimosa bark* has been abundant, and has gone largely into consumption *Valonia* of the best quality has been somewhat scarce, and

although the total supply has been large, full quotations have consequently been maintained for the best samples.

The review of all the circumstances and results of the trade during 1870 must, we think, prove satisfactory; and in looking forward it may fairly be hoped that a large and equally satisfactory business may be anticipated. Should the existing lamentable war be continued, it appears almost a necessity that many, if not all, of the equipments must be provided by some of the neutral Powers, and at the same time our own Government will maintain the necessary supply of our own army and navy stores; but should a termination of the war happily be brought about and peace prevail, it seems equally certain that the wants of the countries desolated by the war must be supplied from without, and in either case it must be remembered that whatever may be the stocks of leather in this country in the hands of tanners, they are unusually small in those of factors, dealers, and consumers.

PRICES of TANNED LEATHER at the close of each Year from 1860-69 inclusive; also at the Four Quarterly Periods of March, June, Sept., and Dec., 1870; and on Jan. 3, 1871 :—

(6) OIL TRADE.

Messrs Rose and Wilson (London) report :—

The opinion entertained in most mercantile circles twelve months ago, viz., that after some two years' prostration in trade generally a speedy reaction might naturally be expected should no unforeseen fatality arise—would doubtless have been realised but for the momentous political events which have since and are still taking place, to the hinderance of commerce in many quarters, and upon their continuance or otherwise future prospects must hinge; at the same time we consider markets for most descriptions of produce which interest us *are in a healthy state, and all that is wanting to develop them is a solution of continental difficulties.*

Linseed.—There has been a *large import* during 1870, but notwithstanding *high prices* have been generally maintained. The greatest advance occurred during the months of *June, July, and August,* when Calcutta linseed realised 64s to 65s per quarter, in consequence of the extreme drought, which resulted in the partial failure of the *hay crop,* and imparted a stimulus to the cake trade. Recent advices from Calcutta represent the old crop as nearly exhausted, which would appear to be borne out by the diminished shipments during the months of October and November. The quotation for Calcutta linseed on spot is 59s 6d, with a firm market, and December-January shipment, 61s to 61s 3d; Bombay and Madras, spot, 60s 6d; Black Sea, off coast, 58s, and 59s for late shipments.

The following is the range of prices of Calcutta and Bombay during 1870 :—

	Jan.	April.	July.	Oct.	Dec.
	s d	s d	s d	s d	s d
Bombay.....	60 3 ...	61 – ...	64 – ...	61 – ...	59 6
Calcutta.....	59 3 ...	59 6 ...	63 – ...	59 6 ...	58 6

Linseed Oil.—The market opened in January at 30*l* per ton on the spot, and gradually improved until 32*l* 10s was paid in *April;* as will be seen by the range of quotations below, the fluctuations during August to December did not exceed 15s per ton; large purchases were made in May for delivery during the last six and four months of that year, which resulted adversely to the buyers. In spite of the impediments in the way of shipments caused by the present continental war, the export from Hull was nearly the same as that of 1869. To-day's quotations are 30*l* per ton on the spot, and 31*l* to 31*l* 5s for January-April deliveries. Owing to the anticipation of the maintenance of present rates for cakes, crushers have sold oil freely for these months. In Hull spot offers at 29*l* 15s, and January-April, at 31*l* per ton.

RANGE OF PRICES.

	Jan.	April.	July.	Oct.	Dec.
	£ s	£ s	£ s	£ s d	£ s
1870.....	30 5 ...	32 10 ...	31 10 ...	29 17 6 ...	29 15

Oil Cakes.—For linseed cakes we commenced the year 1870 with as low prices as we have had for *ten years,* and lower than the previous three years; but, contrary to our former experience, we had a considerable rise during the summer months, and they were at their *highest in June,* being about 10s per ton higher than the previous summer; it will be noticed by our quotations that pure English made linseed cakes hold the first position and command more money than the finest American imported, even in packages. We look for an increased demand now for oil cake, and may have improved prices, as feeders will find themselves short of hay owing to the bad crop last season in the south. To-day's quotations are 12*l* for pure London made linseed cakes, 11*l* 5s to 11*l* 7s 6d for best New York in barrels; 11*l* 5s for thin seedy in bags; 10*l* 17s 6d for Boston, New York in bags; 10*l* 15s for fine western bags. Decorticated American cotton-seed cake is 8*l* 10s; London made (undecorticated) 7*l*; for first three months' delivery, 6*l* 15s; and first six months, 6*l* 10s. *Rape cake* from East India seed, 5*l* 15s; from Danube seed, 6*l* 5s; and for green cake made of rubsen, 6*l* 10s; red poppy cakes are scarce, at 7*l* 15s; and white, at 6*l* 10s. Niger cakes command 7*l*. *Palm nut meal,* 4*l* 10s; and cake of palm nut meal, 5*l*. Dark sessame or gingelly seed cake, 6*l* 10s.

Rape and Oil Seeds.—The import of rapeseed has been heavy, especially from the *East Indies;* but the failure of the *continental crop* of 1869, followed by one far below an average in 1870, brought exporters into the market, and established a high scale of prices, which has been maintained throughout the year. The export to the continent during the past twelve months has been large, being 235,518 qrs, against 81,281 qrs last year. The quantity afloat of East India seed is but small, being only 67,699 qrs, but the stock in London is large, amounting to 121,810 qrs; the demand, however, is likely to be large, both for home and export consumption, there being hardly any continental seed, which we expect will tend to maintain prices; the more especially as last Calcutta prices current represent the stocks there as getting low and held for local consumption. The market is firm. Brown Calcutta spot, 67s, R.A.T., with bags, and 67s 6d to 67s 9d December-January shipment; yellow mixed Calcutta, 73s; Madras and brown Ferozepore, 68s; yellow Scinde, 69s; Guzerat, 73s.

The following is the range of prices of ordinary brown Calcutta rapeseed during the past year on R.A.T. basis :—

Jan.	April.	July.	Oct.	Dec.
s d	s d	s d	s d	s d
61 6	65 –	66 –	62 –	67 –

Rape and Seed Oils.—*Rape oil.*—The continued concentration in Paris of *brown rape oil* from all parts of Europe materially affected prices in our market; with hardly a reaction the value improved each month from 39*l* 10s per ton in January 1870, until it reached 47*l* 10s in December; speculative operations were on a large scale throughout the year, and purchases were made in September at 40*l* for monthly deliveries during the whole of 1871; the value for forward is now 47*l* 10s for January to April, 47*l* May-June, 46*l* July-December, and 44*l* 10s September-December; our stock is almost *nil.* Fine foreign refined oil met with a ready sale at extreme rates, on account of its scarcity, and it now commands 50*l* per ton; the demand for English refined was very active, owing to the absence of supplies from the continent. Refined cotton oil ruled at 36*l* 10s per ton during the months of January, February, and March; but the low rates prevailing for olive oils checked the export to the Mediterranean, and prices receded from 35*l* in April to 33*l* in September. The decline was in a measure counteracted by a fair home consumption and continental demand. The present moderate quotations have attracted the attention of speculators as well as exporters, and considerable quantities have been taken for January to June deliveries at from 33*l* 10s up to 35*l* per ton; in Hull, it is worth 32*l* 5s to 33*l* 10s on spot, 33*l* 5s January-April, and 34*l* March-June. With a continuance of present rates for rape oil and an improvement in olive oils, an advance in the price of cotton oil may reasonably be anticipated. *Crude* was worth 30*l* in January, 32*l* in February, 31*l* in May, down to 28*l* in December. *Madras ground-nut oil.*—Arrivals during the past year were on a limited scale, and the last sale was at 48*l* per ton. *Gingelly oil.*—We have had no stock for many months. *Niger oil* fluctuated between 37*l* 10s in January and 40*l* 10s in May, down to 37*l* 10s in December, and *poppy oil* at about same rates. Very little of the latter was crushed.

PRICE OF BROWN RAPE OIL.

	Jan.	April.	July.	Oct.	Dec.
	£ s	£ s	£ s	£ s	£ s
1870	39 10 ...	42 10 ...	42 10 ...	41 10 ...	47 10

Olive Oils during the whole of 1870 were of slow sale, and experienced a depreciation in value month by month, until at the end of December an improvement took place in consequence of an advance at most shipping ports. Buyers came forward readily for cargoes of spring shipment, and several changed hands, principally of Ionian Island oil. Qualities such as Gallipoli and Gioja are held for higher rates than buyers are disposed to pay. Supplies received were principally from the Ionian Islands, Sicily, and Tunis. Imports of Spanish oils were nearly *nil.* We

quote Mogadore, 47*l*; Tunis and Sicily same price; Gioja, 49*l*. Although stocks are large they are well held. Taking Mogadore as a standard, it will be seen that the present quotation is lower than at the same time during the last ten years.

PRICE OF MOGADORE.

£	£ s	£	£	£ s
2nd Jan..... 47	... 52 10	... 52	... 61	... 55 10

Cocoa-nut Oil.—The large production and use of substitutes, especially *palm nut kernel oil*, have tended to keep prices in abeyance; notwithstanding our deliveries show no diminution, as will be shown by the following statistics:—Prices of Cochin during the year have not fluctuated much—the lowest being 43*l* 10s in January, October, and November, and the highest, 46*l*, in March-April. Ceylon, however, did not sustain its relative value, and declined from 42*l* in February to 37*l* in August-November. 38*l* 10s in pipes is now the quotation on the spot, for arrival 39*l* is demanded. Fine Cochin is worth 45*l* 10s down to 43*l* to 44*l* for middling and ordinary.

£ s	£ s	£ s	£	£ s
41 10	41 10	38 10	38	38 10

Palm Oil.—During our many years' experience in the trade, we never remember so little variation in prices as during the last, the extremes being 38*l* 10s and 40*l* 10s per ton. We quote Lagos 38*l* 10s, and 39*l* down to 35*l* for Sherbro', with a dull market.

Tallow.—For some time past there has been little disposition to enter into speculative transactions of magnitude, and the consumption, which has been unusually large, has to a great extent been met by Australian and South American. St Petersburg yellow candle has consequently not ranged widely, 46s 3d per cwt in January, February, and March, and 43s in October, being about the scope.

PRICE OF P. Y. C. ON SPOT.

Jan.	April.	July.	Oct.	Dec.
s d	s d	s	s	s
46 3	44 6	45	43	45

Fish Oils.—Most descriptions have been comparatively *driven out of consumption* by the free substitution of lubricating oils, which can be produced at much lower rates. This applies more particularly to sperm, which in April, 1868, was worth 103*l* per tun; in January last 86*l* was accepted, in April 92*l* was paid, since then prices have been quite nominal and gradually declining; even 78*l* cannot now be obtained. Southern has been in very limited demand, and during the past few months has declined from 40*l* down to 36*l*; the same will apply to cod, viz., from 43*l* to 36*l*, and pale seal from 43*l* to 35*l* 10s; now 37*l* is demanded.

(7) CHEMICALS.

Messrs W. Caudery (London) report:—

The discouraging report of the *chemical trade* which appeared in my annual circular for 1869 must unfortunately be repeated in this for 1870, although prospects are of a more cheering character, manufacturers judiciously declining to enter into forward contracts at present prices, prefering to take the chance of the market from week to week, such exceptional contracts as have been made for 1871 being at more favourable rates than those made at about the same period last year.

If the conclusion of a review of 1869 was of a gloomy character, what shall be said of the end of 1870? But while our neutrality has not prevented our rendering substantial aid to the wounded of either antagonist, it has enabled us to suggest peaceful conditions to all; and with improvements in every department of our national home, we may reasonably expect our reward when the present derangement shall have passed away.

Alkali or Soda Ash experienced but little variation, maintaining 1869 rates, namely, January to March, 1¾d; April and May, about 1¾d; June to October, $\frac{1}{16}$d to ⅛d less; leaving off with a firm market at 1⅞d, landed.

Bi-Carbonate of Soda.—The slight variation was in favour of manufacturers, shipments to the United States from Newcastle being on the increase. At the beginning of the year 9s 9d per cwt, landed, was quoted, present value 10s 6d.

Bleaching Powder also improved: January to March prices were 8s 6d to 8s 3d per cwt, landed; April, 9s 6d; May to August, 9s to 8s 9d; September to December, with diminished stocks and increased demand, advanced to 9s 9d, closing at 10s to 10s 3d.

Caustic Acid.—An extra demand for America, Russia, and the home trade, met with increased supply, and this article to a great extent taking the place of soda ash, manufacturers have been kept free of stock, and prices ruled within 5s per ton of last year, namely about 14*l* 5s per ton, landed, for best white 60 to 62 per cent.

Crystals Soda.—The entire year's prices were not below 1869; the lowest quotations being 3*l* 15s per ton, ex ship, in the first and last months, with an occasional advance of 2s 6d to 5s per ton from March to September.

Acid Citric met with a good demand at from 2s 5d per lb in January to 2s 3½d in February and March, thence to July 2s 6d, declining to 2s 3½d in December, but during the last few days has advanced to 2s 4½d.

Acid Oxalic was slow of sale at 7½d per lb during first five months, June to October 8d, November to December 7½d to 7¾d, with additional extra discount of 2½ to 5 per cent.

Sal Acetoscella, being in limited request, realised about 2d per lb more.

Acid Tartartic.—A good and steady business was done. January value was 1s 2d per lb, slowly advancing to 1s 3¾d in August, its highest point, thence as gradually declining to 1s 2½d, the price of the day being 1s 2¾d.

Alum met with the usual good demand both for home use and export, but in consequence of undue competition, prices declined, *loose* lump to about 7*l*, and *ground* 8*l*, delivered free here tierces, and barrels 7*l* to 7*l* 5s, f.o.b. Thames, up to the end of November; but last month the same cause again produced a further decline of 5s per ton for each description.

Ammonia.—*Sulphate* has been in good demand, both for home trade and export, and prices well maintained, though below previous year, the lowest being 16s, and the highest 17s per cwt for the best white; present value 16s 6d, the quotation of January last. Manufacturers anticipate an advance in the spring, with a generally increased foreign demand. *Carbonate* continues without change at 6d per lb in casks, with good demand.

Arsenic.—*Powdered* 7s 3d first six, and 7s last six, months.

Brimstone fluctuated but little during the year, in the early part of which, in consequence of heavy stock and large imports, the trade continued in a dull state. In the belief that sellers would maintain the current rates, buyers resorted to

pyrites, and when the war broke out, prices, f.o.b., began to decline, since which a fall of fully 10s per ton must be quoted; but with heavy stock and only limited demand, the value, c. f. and i., must be quoted only nominally at 6*l* 12s 6d and 7*l*, and for landed 7*l* and 7*l* 7s 6d to 7*l* 10s per ton for best thirds and seconds respectively.

Cream Tartar advanced during the first seven months from 82s to 90s, declining to 88s in August, 87s in September and October, in November 87s 6d was the price, and December 88s to 90s.

Green Copperas in good demand at 50s to 60s, according to quality, but improving in December 5s per ton.

Iodine.—Sales were limited at 9¼d to 9½d per ounce for good dry seconds, but advanced in December to 10½d.

Nitrate Soda was firmly held at 16s in January, advancing to 17s 3d by the end of February, and 18s in March, there being an unusually good demand for agricultural purposes, and very light stocks; but large arrivals in April produced a decline of 1s per cwt, and 17s continued to be the average price of the month, and with gradually decreasing demand for home use, prices again receded to 15s 9d and 15s 6d, notwithstanding the stock being lighter than usual. In November and December sales were made at 15s to 15s 6d per cwt, closing with the year firmly at 15s 9d, ex ship, to 16s, landed. Higher prices are asked for spring delivery, with every prospect of an increased demand for agricultural purposes.

Potash.—*Bichromate* produced 5⅛d per lb net from January to March, continuing stationary for the remainder of the year at 5d, with a varying discount of from 2½ to 7½ per cent. *Chlorate*, without much animation, was quoted at 10d for the first three months, ¼d to ½d per lb less the next three months, then, in consequence of unnatural speculation during August, it advanced to 1s 4d per lb, declining to 11d in the following month, and is now quoted at 10½d. *Muriates* were in demand at 8s 6d to 9s during the first seven months, afterwards 9s 6d was obtained, but this was merely nominal, the German exportation being suspended, and 10s 6d to 11s is now the quotation.

Quicksilver ruled at 6*l* 17s per bottle January to May, 7*l* 17s June to August, 8*l* 8s September to October, 8*l* 18s November, and 10*l* December, present price 11*l* to 12*l*.

Refined Camphor.—January to July 1s 3d was realised, but during the last five months it fell to 1s 1½d, recovering at the end of the year to 1s 2½d.

Refined Borax.—69s first three months, 68s last nine.

Sal Ammoniac.—First quality in January was quoted at 40s per cwt, and 38s for second, but by the end of February increased demand induced a simultaneous advance to 42s and 41s, which was maintained through the year. As the demand is good and stocks limited, these prices may fairly be expected to continue.

Saltpetre, between January and the beginning of July, only varied to the extent of about 2s *per cwt, but the effect of the war was to force up the price* to 31s, and by August to 34s; but this being chiefly of a speculative character, the wants of the belligerents being anticipated, by the end of December prices receded to 29s 6d for fine Bengal, fluctuating 2s 6d in the meantime. With about equal imports and floating parcels as compared with 1869, an increased delivery of 25 per cent., and stock reduced to nearly one-half the quantity twelve months since, present rates appear likely to be maintained; the exportation of muriate of potash being suspended, nitrate of soda dearer, and refined petre consequently confined to its native material for supply: the latter has been in fair demand, and ranged from 26s to 27s January to July, advancing then to 35s, gradually declining to present value, 31s 6d.

Sugar Lead.—Best white 39s, January to July, 38s August to November, and 40s December.

Sulphate Copper January to June was 23s 6d per cwt., July to December 23s.

Sulphate Quinine in January was 5s 6d, February to April 5s 8d, May and June 5s 7d, during July and August 6s 3d was obtained, September to November 6s 4d, but in December, in consequence of a great inquiry, price advanced to 7s 9d per ounce, but a reaction setting in, it again declined to present quotation of 7s 4d per ounce.

Naval Stores.—The year has been marked by considerable fluctuations in the price of *American turpentine*. The season opened with sales to arrive at from 28s to 30s, but on some parcels being forced for re-sale after arrival, 26s 6d was accepted. About the middle of October considerable purchases were made for speculation, and from that time it advanced steadily, closing with buyers at 34s, stock in London being in very few hands. *French* sold to arrive in July at 28s to 29s, but after the commencement of the war was forced down as low as 26s by pressure of sales from Bordeaux. The market was then influenced by the advance in American, and closes at 33s to 33s 6d, both to arrive and spot.

Rosin.—Common has been in good demand during the year, prices have ranged from 5s 7½d to 6s 4½d, with very little on the way, and small stocks. Fine rosins in fair demand; sales of *virgin* made early in the year at 15s 6d to 16s, it then became easier on arrivals being forced for sale, some of the very finest being thrown away at P.S. at 14s. Lately there has been good inquiry, and with small stocks here and in Liverpool, higher rates may be looked for.

Petroleum.—Standard white opened in January at 1s 8½d per gallon, but by March the stock becoming considerably reduced, the value gradually advanced to 1s 11d; a full supply arriving in the spring caused a decline to 1s 8d, and cargoes subsequently finding their way to this market intended for the continent, it still further declined to 1s 5½d for the last four months; but this extremely low value inducing large purchases, the price advanced to 1s 6d, and so continued until December, when the stock of really fine oil being again diminished, the value improved to 1s 6½d to 1s 7d, about present quotation.

(8) TIMBER.

Messrs Churchill and Sim (London) report:—

The importation of foreign and colonial timber and other wood, as far as can be gathered from the returns of the Board of Trade, may be computed for the United Kingdom as follows:—

Wood Imported (in loads)—United Kingdom—in the following Years.

Kinds.	1866.	1867.	1868.	1869.	1870.*
Colonial sawn wood ...	808,329	723,006	768,930	753,186	820,000
— hewn wood ...	559,943	453,535	500,493	443,063	480,000
Foreign sawn wood.....	1,380,645	1,453,452	1,648,481	1,576,776	1,760,000
— hewn wood ...	889,426	757,023	825,932	831,870	870,000
Colonial & foreign staves	89,444	62,516	61,117	60,450	70,000
Total in loads	3,727,787	3,449,532	3,804,953	3,665,345	4,000,000

* Computed.

At the present time a review of the wood trade in respect of the supply imported for the United Kingdom may not be without advantage to those interested in its progress. We find it recorded that when the several changes in the tariff were considered the *annual imports* of wood previous to the year 1831 were assumed to be *one million* of loads—half of colonial and half of foreign growth. From 1831 to 1841 these importations rose to 1⅛ million; from 1842 to 1851, with several reductions in the import duties, the annual supply of wood increased from 1¼ to 2 millions, but the average of the four following years (1852 to 1855) did not exceed 2 millions of loads. In 1850 the quantity imported was 2¼ millions, was sustained at the same average in 1857 and 1858, rose to 2¾ millions in 1859 and 1860, and after *the remission of import duty* again rose in 1861 and 1862 to 3 millions. From 1863 to 1868 the annual supply continued to increase from 3⅛ to 3¾ millions, and it has now culminated in the computed importation of 4 millions of loads in the past year 1870.

From the subjoined table it will be seen that our supply of wood in the port of London has not increased in like proportion with the quantities imported for the United Kingdom. In former times, and up to 1865, it had been thought that *one fourth* of the whole supply of wood was entered through the port of London, but the greater facility of access by railway every year brings the centre of the country in more direct communication with the *Coast ports*, and we cannot but observe that the share of London is gradually reduced from one-fourth to *one-fifth* of the imported quantities, when the tonnage of the shipping is compared with the estimated cubic contents of the cargoes.

But in respect to the *consumption in London*, it is very satisfactory to point out that during years of much commercial mistrust there has been no permanent increase in the stocks of wood, and taking one year with another the quantities imported have not exceeded the average requirements for ultimate consumption. During 1870 some cargoes, originally intended for France and brought here for safety, have swollen the importation, and perhaps added to the stock a great part of the present excess of foreign deals and battens; but there should be no substantial difficulty in dealing with the aggregate stock in the ordinary course of trade, for experience shows the vitality of industrial pursuits when governed by the laws of supply and demand. By desolating war the trading influence of France and Germany has almost collapsed for five months past, while the material interests of this country in the great branches of our import trade have but slightly suffered.

Estimated Consumption in London of Sawn Wood, or Deals, Battens, Boards, and Ends.

	Pieces.
1866	12,719,000
1867	12,991,000
1868	14,359,000
1869	14,387,000
1870	13,137,000

Hewn Wood, or Timber, Square and Round.

	Loads.
1866	303,000
1867	223,000
1868	181,000
1869	200,000
1870	157,000

On the separate branches of the London trade the following detail is submitted :—

Norway.—Flooring boards, prepared for builders' use, continue to be numerically, as actually, the principal item of the Norwegian supply. Their realisation during the year has been tolerably prompt, and we may suppose satisfactory from the extent of the shipments. While it is not easy to give in a few words the various prices of the many varieties now imported, we may state generally the fluctuations from 6s 6d for ¾-inch to 10s 6d for 1-inch will embrace the regular dimensions of good yellow and white flooring. We have received but little supply of flooring from Sweden and Russia in the past year. Sawn scantlings, dressed mouldings, architraves, skirtings, and finished joiners' work, have not been appreciated in our wholesale trade; but of matched boarding there has been an increasing trade, forming an important part of the general importation of flooring, and the prices of the several thicknesses have ranged from 6s to 8s per square.

Firewood.—The importation has been very large, and as beneficial in the amount of labour employed here as it is to the shipowners, whose tonnage is absorbed to the extent of 80,000 tons in the slack season of the year. This direct trade, in respect to the large tonnage employed, must not be overlooked when dealing with the imports of wood.

Sweden.—Our trade in *Swedish* deals opened with bright prospects for the current season; the stocks of Baltic redwood deals and battens in our docks were small, and the engagements for importing were somewhat extensive. For the early importation of Swedish deals there was a good market, at prices ranging from 9*l* to 10*l*, with an upward tendency. This gave encouragement to shippers, and when in August war broke out, and neutral ships were required to replace German tonnage, the higher freight increased the cost of subsequent importation, and no adequate advance in the market value could be realised. For the general shipments we now quote the opening prices of the season, having failed to maintain the advance of 10s standard which followed the outbreak of hostilities on the continent. Battens, owing to the competition of prepared flooring, are no longer in such good demand as of old, and have to be sold at increasing allowances.

Swedish Fir Timber and Balks.—The stock of Swede timber during the great part of the year was very small, and it has grown suddenly into large proportions from the supply in the fall fleet. The market prices were in the spring 45s to 53s per load, and advanced 3s and 4s when the stock was extremely low; at the present time we quote 52s 6d to 57s 6d for the preferable, and 50s and under for the secondary class. We carry over in stock 18,000 loads, which is large by comparison. For balks the value has been unusually low throughout the year, 30s to 40s representing the general prices.

Lathwood.—No fresh importation; the old wood has been sold as low as 60s, and from that price up to 80s per fathom.

Russia.—From the ports of Finland, in the Gulf of Bothnia, imported in 1870, 500,000 deals and battens and 90,000 boards, the relative supplies in 1869 and 1868 having amounted to 774,000 and 896,000 pieces of sawn wood, the proportion of battens varying from one-third to two-fifths. The mill-sawn shipments now prepared at Helsingfors, Abo, Nystad, Raumo, Bjorneborg, Christinestadt, Wasa, Carleby, and Jacobstadt, as well as at the more northerly ports of Braestadt and Uleaborg, are not unimportant contributories in supplying us with useful qualities and dimensions, and have been generally sold for about 10 per cent less than the value of the better descriptions of Swedish deals and battens.

Prussian Ports.—The importation of *fir timber* was computed to have been in 1868, 62,000 loads, and in 1869, 43,000 loads; in the year 1870 we estimate the quantity as 38,000 loads. The supply in 1870 and 1869 was consistent with the gradually diminishing use of hewn square timber, since wood, in the form of long and thick deals, has been sawn into useful sizes for building scantling. We have not had many large contract works in progress, but there has been sufficient demand to preserve the value of square timber from falling below the import cost. When war broke out, advanced prices might have been expected, but the blockade was neither so long nor so rigid as eventually to curtail the supply. The prices opened for fresh timber at 50s for common *Dantzig*; 55s to 65s for good middling *Dantzig* and second middling *Memel*; the undersized being worth nearly as much.

British America.—Imported from Quebec and other ports on the St Lawrence in 1870, 2,540,000 pieces; in 1869, 2,282,000; and in 1868, 2,337,000 of deals. The proportions of pine and spruce, as near as we can ascertain, were in last year's supply—2,015,000 of pine, and 525,000 of spruce; and in 1869, 2,100,000 pine, and 180,000 spruce. The stock of pine deals in our public docks at the close of 1869 amounted to 1,411,000 pieces, and we now carry over from 1870 1,524,000 pieces. The deliveries for consumption in the past year are estimated to have absorbed 1,900,000 pieces, against the imported quantity of two millions of pine deals—now leaving us with 100,000 more in the present stock than were carried over at the beginning of 1870. The import cost of *bright pine deals* has been very high, caused in a measure by the *preferential markets of the United States*. The selling prices of first quality may be given as 18*l* to 19*l* 10s; of second quality, 13*l* to 13*l* 10s; and of third quality, 9*l* to 9*l* 10s per standard hundred, subject to greater reduction than heretofore in the irregular and smaller dimensions with which recent importations have been much encumbered.

LONDON IMPORTATION of WOOD and ESTIMATED CONSUMPTION.

Mahogany.—The market has been very steady through out the past year for nearly all descriptions of *cabinet woods;* there has been no great fluctuation in prices, neither has there been any unusual demand. The reduction in the stocks of mahogany, with the advance in our quotations, are due more to the falling off of the supplies than to increased consumption or demand. The continental war for a time completely stopped the export trade, and moreover diverted to this market various descriptions more suited to the foreign than the home trade. 1871, however, opens with very light stocks, which are mostly held by the dealers, and as prices have lately been steadily advancing, the prospects look favourable for the future.

The following tabular statement shows the landings, deliveries, and stocks (exclusive of cargoes in course of discharge) of mahogany, cedar, rosewood, and walnut wood during the past four years :—

MAHOGANY—*Honduras.*

	Landings.	Deliveries.	Landed Stock, 31st Dec.
	logs.	logs.	logs.
1867	14,029	12,270	3,614

1869	41,684	38,829	21,193
1870	47,736	40,803	28,126

(9) METALS.

Messrs W. Fallows and Co. (Liverpool) report :—

The *iron trade* continues to develop itself, and is every year increasing in magnitude and importance. In 1860, the production of *pig iron* in the United Kingdom was a little under 4,000,000 tons, whilst in 1870, we estimate it would not be less than 6,000,000 tons. The large discoveries of minerals in the north-east and north-western coasts of England have, during the last few years, given a new impetus to the trade, and, so far, there are no signs of this abating, as new furnaces are being erected in these and other districts. Up to the breaking out of the war on the continent, there was an active and satisfactory trade in metals. The immediate effect of the commencement of hostilities was most manifest in the prices of pig iron and rails, the former on account of the wild speculation which prevailed at the time, and the latter through the suspension of large Russian and American orders. Notwithstanding these untoward events, the *home trade* of the country has been exceptionally good, whilst the exports will be in excess of those of 1869, which were the largest on record. The increase, however, is entirely under the head of *rails*. According to the Board of Trade returns, the exports of rails (for eleven months, ending 30th November, 1870) were 984,949 tons, against 844,904 tons same period 1869. Of this quantity the United States took 371,188 tons; Russia, 277,765 tons; and India, 146,413 tons.

Staffordshire Iron.—The Staffordshire works being principally engaged in the manufacture of bars, hoops, plates, sheets,

angles, and T iron, which are shipped to all the markets of the world, were but little affected by the breaking out of the war, and it was only after the fall shipments were completed that there were any symptoms of quietness in that district. There has been no change in prices of the leading brands during the year, and other descriptions have not fluctuated more than five shillings per ton.

Rails.—In the early months of 1870 there was an almost unprecedented activity in rails on orders for *Russian and American* account, and the price rapidly advanced from 6*l* 15s in January to 7*l* 10s in June. The unsettled state of continental affairs produced very great uncertainty in this department of the trade, and, to obtain orders, some makers were compelled to accept 6*l* 5s per ton, which is about the closing price of the year. The large demand for rails during the last two or three years has stimulated the production, and it is now estimated that the *north-east coast* of England (which only lately has undertaken this branch of manufacture) has capacity for turning out 500,000 tons per annum, which, added to the production of Wales and other districts, would enable this country to turn out fully 1,250,000 tons per annum. It is worthy of notice, that the proportion of rails made wholly or in part of *steel* is increasing at a very rapid rate, and threatens in time to almost supersede iron rails.

Welsh Bars have fluctuated between 6*l* 15s to 7*l*, and 6*l* 10s to 6*l* 15s, free on broad Wales, closing at the lower quotations.

Pig Iron.—*Scotch pig iron*, which on the 1st January stood at 58s for G.M.B. warrants, gradually drooped until the beginning of March, when 53s 6d was touched. During the month of *April* and *May* there was some reckless speculation, which succeeded in pushing the price up to 61s 6d, but the breaking out of the Franco-German war produced a panic amongst holders, and the failure of two or three leading operators brought down the price to 49s 10½d on 5th August. Since that date the fluctuations have not exceeded 2s per ton, and the year closes at 51s per ton. The production of *Scotland* has been large, and is estimated at 1,206,000 tons. The shipments, though affected for a little time by the war, have been on a very liberal scale, and are slightly in excess of 1869. The stock has increased from 620,000 tons on 25th December, 1869, to 665,000 tons on 25th December, 1870. The price of No. 1 *Middlesborough* has fluctuated between 56s 6d and 51s. The highest point was touched in July, since which there has been a gradual decline. The make of the East Coast district, which in 1869 was 1,459,500 tons, will, we estimate, have been about 1,650,000 during 1870; and it is satisfactory that, with this increased production, there has been a *decrease* in stocks of about 20,000 tons.

The **Tin-Plate Trade** has been unsatisfactory during 1870, for, notwithstanding the considerable advance in tin, prices of tin-plates have not responded, the fluctuations not exceeding 1s 6d per box. Attempts have been made to reduce the make, but it is to be presumed these have been attended with very partial success, otherwise the result would have been manifest in improved prices. The shipping returns show a slight increase in the total exports, of which the United States (which is our largest customer) has taken about 1,300,000 boxes.

Copper.—Chili bars were 66*l* 10s on 1st January, and advanced to 68*l* 15s in July. The war on the continent led to a reaction, until 62*l* was reached in October, since which there has been a steady recovery, and the year closes at 63*l* 10s.

Tin has experienced constant fluctuations throughout the year. Beginning at 115*l* for English blocks, it fell to 111*l* in February, afterwards advancing to 137*l* in May, which was the highest point. During the last half of the year the price has ranged between 124*l* and 134*l*, closing at the latter figure.

English Lead, which was quoted 18*l* 15s on 1st January, receded to 18*l* 2s 6d in July. The war caused a temporary advance to 19*l*, but this was speedily lost, and the year closes at 18*l* 5s.

The experience of the past few months has shown how much the iron trade is *affected by war*, and it is only with the advent of peace that we can look for a return of that prosperity which was so suddenly arrested. The unsettled state of Europe restricted orders from all quarters, but so soon as confidence is restored buyers will order much more freely, and we may anticipate under such circumstances a still further development of the export trade. The *United States*, which was one of our largest consumers in 1870, is likely to continue so, as the continued fall in gold, coupled with the reduction *of two dollars per ton duty* on pig iron, will favour the introduction of English iron in that quarter. The Eastern markets are recovering somewhat from a long period of depression, and promise favourably for next year. As the *home trade* of the country has been so satisfactory during 1870, it is reasonable to anticipate that the return of peace would not only create a demand for materials to replace those destroyed during the war, but also stimulate those enterprises which were arrested by the breaking out of hostilities.

Scotch Pig and Malleable Iron—1867-70, and in 1854.

Messrs William Bird and Co. (London) report:—

The year 1870 was on the whole a prosperous one for the British iron trade. General descriptions of merchant iron were at no time in great request, but the large contracts for *railway and public works requirements*, which came upon the market either as orders or inquiries, prevented any fall in prices, and even forced a rise in many articles where prompt delivery was essential.

On Russia we must not perhaps reckon to the same extent for the future, and even in the past have met there with fierce competition from foreign industries; but India promises to be a very large consumer of railway requirements, and the United States in increasing the home production of iron and steel, under a Protectionist tariff, has also drawn attention to it from an ever-widening circle able to appreciate at how great a cost it is done.

A change of American commercial policy in the direction of Free-trade would very materially alter the whole course of the world's trade, and it is a change that, as regards iron and steel, we are led to expect much nearer than was until lately supposed.

We may also anticipate, amongst the compensations arising out of the Franco-German war, *a complete revolution in our trade relations with the continent*. The competitive power of foreign industrial establishments must be greatly weakened. In a great measure artificially created and sustained by high tariffs, *acquits à caution*, and similar expedients, the young industries of both combatants cannot fail to suffer from the loss of cheap and skilled labour, and increased taxes will not tend to remedy this. The accounts from France speak of total disorganisation, and the employment of capital and labour on the manufacture and use of weapons of destruction. From Germany pour forth complaints of the want of coal and workmen, and the interruption of traffic and other losses and inconveniences of trade, whilst neutral Belgian manufacturers apply for State aid, anticipatory of future wants in the shape of rails, engines, &c.

The new Zollverein tariff came into operation on the 1st of October, 1870, and will, to some extent, moderate the inconveniences to German consumers arising out of their disorganised home industry.

The *Iron and Coal Trades' Review* published at Middlesborough, reports :—

During 1870 a very considerable extension of the Cleveland iron trade has taken place. The annual statistics issued under the authority of the Ironmasters' Association have not yet been published for the whole year, but estimating the production for December at about the same figure as it was in October last, we shall not be far wrong when we put down the total make of *Cleveland* pig iron for 1870 at 1,690,000 tons. Comparing this with the production in the two previous years, we find that in 1869 the make was 1,459,508 tons, and in 1868 it was 1,233,418 tons. It will by this be seen that during the year 1870 there is likely to be an increased make of nearly a quarter of a million tons. At the commencement of 1870 the number of furnaces in blast was 98, nine furnaces were out, but not available, and the official list contained 14 furnaces "not likely to be blown in again in their present form." The total number of furnaces in the district was thus 121, and since that time Messrs Swan, Coates, and Co. have completed one new furnace, and have had it in blast for some time; Messrs Jones, Dunning, and Co. have finished the alterations in two furnaces that were being rebuilt a year ago; Messrs Gilkes, Wilson, Pease, and Co. have got their two new furnaces into blast; also Messrs Lloyd and Co., Messrs Samuelson and Co., and the Stockton Furnace Company, all of whom were building two furnaces each at the beginning of this year. The Middleton Iron Company have completed their third furnace, and the Consett Iron Company have finished one new furnace. At the Walker Iron Works, two out of the three furnaces have been put in blast. Beyond these new furnaces that have been added to the list, we find now that there are even a greater number of furnaces in course of erection than there was a year ago. The official lists show that at present there is a total of 111 furnaces blowing, 7 are out of blast but are available, two are not likely to be blown in again, and the total number of furnaces is 120. Though the total number at the end of this year is one less than it was at the beginning, this is due to the fact that a number of furnaces that are not likely to be worked again have been taken off the lists. The firms building new furnaces are Messrs Bolckow, Vaughan, and Co., 3; Messrs Swan, Coates, and Co., 1; Messrs Cochrane and Co., 1; Messrs Bell Brothers, 1; the Norton Iron Company, 1; the South Durham Iron Company, 1; the Weardale Iron Company, 2; Consett Iron Company, 2; Gjers, Mills, and Co., 2; the Lackenby Iron Company, 2; and the proprietors of the Carlton furnaces are now engaged in making such extensive alterations in their plant as will practically place the furnaces upon the list of new ones. The *average make per furnace* for the district in 1870 was very much less than it will be for the current year, because the new furnaces and those that have been rebuilt are of much larger capacity than those they have replaced. At the commencement of 1870 the stock accounts showed that there were in makers' hands 84,243 tons, and in the warrant stores 31,364 tons. A marked decrease is now apparent, if we take the aggregate stock of iron in the locality, for at the end of November makers' stocks were 80,810, and the warrant stores only contained 13,739 tons, giving a total of 94,549 tons this year, against 115,607 tons in 1869. At the commencement of 1870 the *pig iron trade* was in a very satisfactory condition, prices being about 50s net cash for No. 3. During the first half of the year great activity prevailed in all parts of the district, and prices not only maintained their ground, but steadily advanced. The outbreak of hostilities on the continent, however, disorganised the trade altogether, and though it was some time before any fall in prices took place in the Middlesborough market, by the end of the third quarter they had receded to a very marked extent, and it may be said that from the highest to the lowest point there must have been a fall of about 8s per ton, leaving out of account sundry exceptional sales that did not materially affect the trade. In the meantime, whilst prices were steadily falling, makers' stocks suddenly increased, but during the last three months a change has taken place; stocks have gone down, and altogether there is not now in the Cleveland district nearly as much iron as the exigencies of the trade absolutely require. So much iron is now sent away by consumers that it is always desirable for a maker to have a tolerably large quantity on hand, and it is generally thought that even at the present figure the locality is under rather than over-stocked. Contrary to general expectation prices began to rally about September, and they are now considerably above the lowest point they have touched during the year.

The statistical returns of the Cleveland iron trade have in 1870 been far more reliable and important than they had been previously, because each firm in the district has furnished authentic information, whether connected with the Ironmasters' Association or not, and thus it has not been necessary to depend upon estimates for any part of the returns. The great increase in the production of the *blast furnaces* has naturally led to additional activity in the iron mining districts. *Mines* that had before been only partially worked have this year been producing a large quantity of stone, and especially in the neighbourhood of Brotton and Lofthouse. New mines have been begun, whilst several royalties have been opened up, and in a short time, there is no doubt, the quantity of ore produced in that part of the district will be very much greater than it now is. Early in 1870 the miners commenced an agitation for an *advance of wages*, ranging in some instances as high as 25 per cent. A very strong resistance was offered to this demand by the masters, though they agreed to give a rise of 5 per cent. The ironmasters, as a matter of course, were very badly supplied with stocks of minerals at that time, and hence a good deal of apprehension prevailed as to the result to be feared from this strike of the men. Vigorous efforts were made by the mine owners to bring down men from other districts where labour was abundant but employment scarce, and the end of it was that in a very short time the men returned to work, and gladly accepted the 5 per cent. addition that had originally been proposed by the masters and declined by them. Since that time we have heard of no difficulties in connection with the miners, and the district is now in a much better position than it was then, because nearly all the makers have large stocks of materials on hand—sufficient, indeed, to carry them over a considerable period.

Great interest continues to be felt by all connected with the iron trade of Middlesborough in the experiments of Mr Isaac Lowthian Bell and Mr Cochrane respectively, for the purpose of discovering the best form and most economical capacity of *blast furnaces*. Mr Bell has given a great deal of attention to this subject, and has published many important and highly valuable papers upon it. Mr Cochrane is also much interested in the matter, and he too has written articles on this question. He has put his views to the test of experiment by building two gigantic furnaces, having a height of 90 feet with a diameter of 30 feet. One of these has recently been put in blast, but at present the results obtained do not admit of being compared with those produced elsewhere. His new furnaces are heated with Cowper's stoves, which, as is well known, embrace all the leading features of Mr Siemens's regenerative furnaces. A heat of about 1,400 degrees is by this means employed, and it is asserted that economical results are secured by the use of this high temperature. Mr Whitwell produces a like result by the use of his fire brick hot blast stoves, two sets of which have been applied at Consett, and others are being put up in connection with the Carlton Works, near to Stockton. On the other hand, Mr Bell and other ironmasters of Cleveland maintain that the best and most economical results can be obtained by the adoption of furnaces about 80 feet in height, and from 23 to 25 feet in diameter at the bosnes, with blast heated to from 1,000 to 1,100 degrees in cast iron stoves. It is impossible to say at present which of these two systems is the correct one, but the trade generally are watching with much interest the numerous experiments now being made in Cleveland, which may be expected to afford sufficient data for settling the question in an authoritative manner before long.

During the year, Mr I. Lowthian Bell has been the President of the Ironmasters' Association.

Manufactured Iron.—At the beginning of 1870, *the finished iron trade* was in a very unsettled state, chiefly because the *wages question* was under discussion, and manufacturers were unable to tell what they would have to pay during the year. They had agreed to an advance of five per cent., and to leave the matter of another five per cent. demanded by the men to the decision of an arbitrator. Some time was occupied in the investigations of the board, but early in February, Mr Thomas Hughes, M.P., the gentleman selected as referee, attended at Darlington, and after an inquiry of two days, the men agreed to bind themselves for the whole year at a further advance of five per cent. This was conceded by the masters, and thus the wages question was disposed of with the exception of sundry matters that had been before the board previous to the arbitration meeting. One difficulty in connection with the board, which has given a great deal of trouble, has been the refusal of a number of men to continue the system of working on Mondays. By this alteration in their usual mode of working, they certainly caused great inconvenience and loss to their employers, and it is also clear that they evaded the strict letter of the agreement entered into for the year, because the alterations which they made had the effect of materially increasing the cost of producing finished iron at those establishments where the men had hitherto commenced work on Monday mornings. This question has not yet been disposed of, because the board has regarded it as one upon which they could not legislate collectively, as in some cases the men did not object to Sunday fettling, and in others the employers were not anxious to begin until Monday night. The agreement entered into early in this year has been *very fairly and honourably kept* by both parties up to the present time, notwithstanding that some minor differences and disputes have arisen in connection with individual works; more particular in the spring, for since the outbreak of hostilities, and the comparatively depressed feeling in the trade, the men have worked much better and more regularly than they did at the beginning of 1870. This department has felt the influence of the Franco-Prussian quarrel, and the threatened war with Russia, much more severely than the pig iron market. A very large portion of the iron made in the North of England is for railway purposes; probably at the present time from 60 to 65

per cent. of the finished iron turned out will be in the *form of rails*, and of these a large proportion will be for the Russian market. When, therefore, the demand from that quarter was suddenly interfered with by political rumours, which, at one time, were of a very warlike character, the rail manufacturers found themselves compelled to take much lower rates than had previously prevailed, and even at these low prices they were unable to book contracts at all freely. Bar iron has also gone down, in a marked degree, from the cause above-named. In shipbuilding iron, the demand remains tolerably good, and a large quantity of work is now on hand, but even here prices have receded considerably.

Early in October, 1870, the men gave notice *for an advance of wages*, whilst the employers at the same time intimated that at the end of the year they should claim a general reduction. The whole wages question has been recently under discussion at Darlington, but up to this time no definite understanding has been come to with respect to next year. The men have not pressed their claim for an advance, as it must be quite evident that there is not the slightest chance of anything like the advance being conceded, so that this part of the case has dropped out. The masters, on the other hand, have felt compelled to press for a substantial reduction in wages, to date from the beginning of next year. The *Arbitration Board* has had this subject under consideration for some time, and the men have been furnished with contract returns of the same character as those supplied in the arbitration cases before Mr Kettle and Mr Hughes. The operative representative has investigated these, and as there is a reduction in at least two out of the five departments of the trade, that is upon the contracts now in hand, it has been decided that the men should be offered a reduction of five per cent. for the first three months of the year. By that time a large proportion of the contracts now being worked will be cleared off, and it is feared that if the trade should not revive very materially, it will be necessary to make a more sweeping reduction than is contemplated for the first three months. It remains to be seen whether the novel experiment of the Board of Arbitration to deal with the complicated questions arising in connection with 20,000 workmen can be made a permanent institution in the North. If now the state of trade is against the men, and they accept the reduction that are made from time to time upon the recommendation of the Board or its referee, then it may be taken for granted that the more intelligent workmen are exercising their influence amongst their fellow operatives for good, and that year by year strikes will be far less frequent than they are now. We believe that the arbitration experiment could not have been tried in any locality more favourable for its success than the North of England. To the untiring attention of Mr David Dale, the first and second President, and to the cordial assistance of the employer and operative members of the Standing Committee is due the marked success that has, up to this time, attended the establishment of this Arbitra ion Board in this part of the country.

The prospects for 1871 are anything but satisfactory. We cannot expect, indeed, that any real and permanent revival of trade will take place until matters on the continent are settled, and as this is likely to occupy some time, the trade will probably be in a very unsatisfactory state, at all events, for the earlier part of the year.

The iron manufacture of the North of England has been very greatly extended during the past year, not only by the erection of new works, but also by additions made to various existing establishments. Messrs Bolckow, Vaughan, and Co. have started a new forge at Witton Park; Messrs Fry, Ianson, and Co. are building an additional forge; the Drinkfield Iron Company have put up new furnaces; the Bishop Auckland Works have been greatly enlarged; the Darlington Iron Company have added a number of new puddling furnaces to their Springfield Works; Messrs Hopkins, Gilkes, and Co. have erected a new forge at Middlesborough; Messrs Thomas Richardson and Sons have built a number of new puddling furnaces; Messrs Abbott and Hyde have started their new works; Messrs Oswald and Co., of Sunderland, have got part of their projected works in operation; the Britannia Iron Company at Middlesborough has been formed, and the works are making rapid progress; and the Ayrton Rolling Mills, the West Marsh Iron Works, and the Imperial Iron Works, all near Middlesborough, will soon be ready for commencing work. Nearly every firm throughout the district has been adding a number of puddling furnaces, so that in the course of a very short time the North of England will be the largest iron manufacturing, as well as the largest pig iron making, district in Great Britain.

The following statements shows the progress of Iron Shipbuilding in 1870 on the Tyne, Wear, and Clyde:—

Tolerably accurate returns have been published of iron vessels on the *Tyne* and *Wear* in 1870. The total number of iron vessels of all kinds built on the Tyne in 1870 is 83; of these two are war ships, 55 iron screw steamers, 5 iron paddle steamers, 10 iron tug steamers, and 1 ferry boat. The largest vessels launched during the year on the Tyne were the iron-clad frigates Swiftsea and Triumph, each 3,892 tons, built by Messrs Palmer and Co. (Limited.) The largest vessels for commercial purposes were the Wisconsin and the Wyoming, each 3,336 tons, also built by Messrs Palmer and Co., and intended for the Liverpool and New York trade. Twenty-one iron ships are reported as having been built on the *Wear* in 1870; but the returns are rather imperfect. The most remarkable circumstance in connection with the iron steam shipbuilding trade of 1870 in the North is the extraordinary increase in the number of *steamers* that have been built for local owners. The vessels are mostly held by partnerships, each share being of the value of between 200*l* and 300*l*. North Shields, which had scarcely a ton of iron steam shipping five years ago, will have steam shipping property worth a million sterling, it is anticipated, by the end of 1871. There has been a very great increase in the number of iron steamers owned by Newcastle in 1870; and Sunderland and South Shields are going extensively into iron steam shipping property. If the trade developes at the rate it has done during the past year, sailing ships on the northern rivers in ten years' time will be as rare as stage coaches in the streets of London. The steam shipping of the North did well in 1870. Some of the steamers returned as much as 40 per cent. to their owners; and very few of the new vessels made less than 25 per cent.

SHIPBUILDING ON THE CLYDE IN 1870.

The total result of the year 1870, although scarcely up to that of 1869, which was an exceptionally prosperous year, is most satisfactory, and shows a large increase over every other previous year. The *total number* of vessels launched during 1870 was 234, with a *tonnage* of 189,800 tons, a *decrease* of 7 vessels of 4,200 tons as compared with 1869, but an increase of 6 vessels of 4,800 over 1868, and 75,800 tons over 1867. Of war vessels there was only 1 of 2,640 tons launched this year, against 3 of 9,100 tons in 1862, and 8 of 5,384 tons in 1867. Of *paddle steamers* there were 18 iron of 9,400 tons and 2 composite vessels of 750 tons, against 11 iron of 6,500 tons and 4 composite vessels of 1,800 tons in 1869, and 18 of 6,291 tons in 1868. Of the *screw steam* vessels, 1870 shows a most remarkable result, there having been launched the extraordinary number of 121 vessels of 133,000 tons, exceeding by 30 vessels and 50,000 tons last or any previous year. The average screw steam tonnage launched during the last seven years was about 65,000 tons, just the half of the screw steam tonnage launched during 1870. The cause of this increase in the demand for screw steam vessels was the opening of the *new route* to India and China, *via* the *Suez Canal*, for which traffic a lighter draught of vessel, with engines of moderate consumption of fuel, was required. The new Canal route, while thus increasing the demand for steam vessels, caused a corresponding decrease in the demand for *sailing* vessels, and 1870 shows a decrease of nearly 60 per cent. in both iron and composite sailing ships. There were launched this year 40 iron ships of 30,030 tons, 6 composite ships of 6,100 tons, and 16 wooden vessels of 2,740 tons, against 78 of 71,600 tons iron, 16 of 16,150 tons composite, and 10 of 1,400 wood in 1868. In *iron barges* for Indian traffic there was a considerable increase, 20 of 3,700 tons of these having been launched this year, as against 10 last year, and 8 in the preceding year. There were two steam dredge boats of 1,000 tons and 8 yachts of 450 tons launched this year, which was about the ordinary average for these vessels. We have to thank those shipbuilders who so promptly returned the information from which the subjoined statement is compiled. In the case of four firms the returns have not come to hand, and in these cases we supply the want by giving the vessels launched by them from the usual monthly statements of the shipbuilding on the Clyde.

The growth of Iron Shipbuilding in this country prepares us to expect such reports as the following from Canada. Thus the *Quebec Chronicle* comments as under on the decline of Wooden Shipbuilding in Canada:—

SHIPBUILDING IN CANADA.

We publish below a statement of the vessels built and launched in Quebec from 1852 till 1870 inclusive. It affords a clear idea of the recent condition of *this languishing industry*, with which our city has such extensive connection. It will thereby be apparent how this business has been declining, and the greatness of its influence on the general prosperity will be understood. It is seen from these figures that shipbuilding has reached its lowest point of late years, that the only year that can compare with 1870 is 1859, when but 10,169 tons was put up. For the former the quantity stands 10,875 tons. The worst feature of the case is, moreover, *that there is no prospect of any improvement.* Unless the art dies altogether among us, it will be hard for it to sink any lower. Eighteen small vessels, of under eleven thousand tons, is anything but a cheering exhibit. The carpenters will this winter be for the most part idle, unless they can find different work. Of the ten ships at present on the stocks, five are reported finished, leaving but a small amount of occupation for the craft generally. Already it has philosophically resigned itself to the discouraging prospect, either by removal from the city, or the search for or discovery of other employment. Yet other descriptions of shipbuilding have not taken much root among us. If ever there was a time when the men of this trade needed fresh resources to enable them to tide over the long, dull

winters, it is the present. All power, therefore, to the North Shore Railway and kindred schemes.

Vessels built and launched in *Quebec* district from 1852 to December, 1870 :—

Messrs Vivian, Younger, and Bond (London) report :—

Copper.—We have again to chronicle a year of deceptions to all interested in copper. The unsatisfactory state of the trade, however, has not been due to any disappointment of expectations founded on calculations of the probable production and consumption of the metal, but altogether to the disorganisation of business in general, brought about by the war which has now raged for nearly six months between France and Germany.

At the beginning of 1870, importers and holders of copper seemed to feel a kind of passive confidence that their position could hardly in any case be much worse; while consumers saw no sufficient inducement to change the practice which had answered for a long time previously, of buying only for immediate wants, and speculators not already interested in the article looked upon the future as altogether uncertain. This state of feeling continued to influence the market—if we except a spurt in April—until June, the advance in prices which had in the meantime taken place being entirely the result of demand for actual and immediate consumption. This fact, and the evidence of *a real falling off* in the supplies from Chili, as compared with 1869, began in June to attract attention; while in several quarters the prospects of the trade were looked upon as more favourable than they had been for many months, and prices advanced for Chili bars 2*l* above the quotations of the beginning of the year, and all other descriptions showed great firmness.

The second half of 1870 thus opened well, but all the hopes of the future which had gradually been formed were suddenly baulked by the outbreak of the war, and the sustained firmness of the first six months gave place to general despondency, culminating in something like panic. From early in July till the middle of October the course of prices was downward, with occasional movements of reaction, as events occurred which seemed to make an early peace probable. During the time business was done at the lowest price recorded in the history of copper, viz., at 60*l* for Chili bars, 12s for regulus, 68*l* 10s for Wallaroo, 65*l* 10s for tough, and 70*l* for India sheets. Towards the end of October the demand for war purposes began to tell, and the course of the market since that time has been pretty steadily upward.

The following list of the average quotations of each month will show the course of the market better than a more detailed description :—

	Jan.	June.	August.	October.	Dec.
	£ s	£ s	£ s	£ s	£ s
Chili bars	66 10	68 –	63 –	61 10	64 –
Double refined Urmeneta ingots	72 –	72 10	72 10	69 –	70 –
Australian copper	73 –	73 –	70 –	70 –	72 –
Tough	70 10	71 –	69 –	67 –	69 10
India sheets	76 10	75 –	74 –	71 10	73 10

On the 7th March the discount on English copper was altered from 3 per cent. to 2½ per cent., and later the same alteration was made on refined Chili ingot and Australian.

Among the most noticeable features in the business of the year are the new importance given to the position of *tough* in the market, by the large production of the companies treating pyrites, the extent to which Australian copper has been dealt in, at prices but little higher than those paid for tough at the same time, and the increased competition of double refined Chili ingot with best selected copper.

Production.—Considering the great importance to the trade of information as to the cost of production of copper in Chili, it would seem that something like certain data might ere this have been arrived at. But it is not so, and we are still left to form the best conclusion we can from the statistics of exports, and the facts and opinions sent us from Valparaiso.

The element of chance enters so largely into all mining enterprises, that the production of copper is acted upon much more slowly by the ordinary laws of supply and demand than in the case of a manufacture, where the price of the material, the cost of wages, carriage, &c., and the selling price can be at once calculated. To draw any safe conclusion, therefore, as to the cost of production from the actual exports, we ought perhaps to take into account a considerable number of years.

We may assume that the five years—1853 to 1857 inclusive—of very high prices in England (114*l* to 126*l* for tough), assisted by the introduction of railways as a means of transport, gave a great stimulus to production in Chili, which however would only gradually show its results in increased shipments. From 1858 to 1862 the exports from Chili averaged 35,000 tons a-year, and the price of tough 103*l* per ton; from 1863 to 1867 the shipments averaged 44,000 tons, and the price of tough 90*l*; and from 1868 to 1870 we calculate the average shipments at 49,000 tons, and the average price of tough at 74*l*.

From these facts it might be argued that the exports proved the equivalent of 78*l* for tough—the average price in 1867—to have yielded a sufficient remuneration to the miner, seeing it had not prevented largely-increased shipments during the three following years. But bearing in mind the slow action of low prices here on production in Chili, the fact that the extremely low rates (as they were then thought) current early in 1863 were followed in 1864 by an average price for tough of 101*l*; and the conviction that further reductions were altogether unwarranted, which has ever since 1864 induced large speculative investments on this side, it is possible that the production in Chili may have been kept up, and even increased, on the calculation that the depression was only temporary, and would be succeeded in due time by a long period of high prices. The firmness of importers, who are also the largest holders of copper, and the uniform tenor of the advices from Chili for a long time past, are important in their bearing on this point. It is also to be remarked that the full force of our lowest prices has never been felt in Chili.

We estimate the exports from Chili for the last year at 48,000 tons, about the same as in 1865, and 7,000 tons less than in 1869; but it is important to observe that our actual importations in 1870 were about the same as in 1869, and therefore the effect of this reduced export from Chili will fall altogether upon our imports of 1871.

The importation of ores, regulus, and fine copper from other countries than Chili will probably show a reduction of nearly 800 tons, and the production of the *United Kingdom* may be taken as 800 to 1,000 tons *less* than in 1869. But these reductions are counterbalanced by the large increase in the importation of *pyrites*. We ought to add that *pyrites* are said now to yield a higher percentage of copper than that at which we have hitherto calculated them, and that the fine copper contained in the importations of 1870 is in some quarters estimated at nearly 12,000 tons.

We assume, however, that the *total falling off in the production* of copper in 1870 will be about equal to 7,000 tons, the effect of which will only appear in the imports of 1871. As to the Chilian production of this year, we can only say that in Chili itself, and amongst those best informed on this side, it is asserted that it will *be much less than* last year, and that the newly-discovered rich silver mines of Caracoles are stated to be diverting from copper mining a large amount of labour. The Chilian export of 1871 will, therefore, in all probability be fully covered by an estimate of 45,000 tons fine, and while this figure is not likely to be exceeded, it might (according to reliable advices) be materially diminished by a continuance of low prices here.

Consumption.—The home coppersmiths and engineers, and the Birmingham manufacturers, have been doing a steady trade, and they and the railway companies have taken more than their average supplies of copper, while the general export trade has been moderately good. The exports to the 30th November show a slight increase over those of the same period in 1869, in spite of the interruption of the trade with France.

The *war* has produced a large demand for copper for casting bronze ordnance, and for the manufacture of cartridges, and we may expect this demand to continue and increase for the armaments of our own and other countries.

Conclusion.—We have endeavoured to give in what precedes a sketch of the trade during 1870, and data for forecasting to some extent the probable course of the market for 1871. During 1870, speculation has been practically dead, and the war has been the only disturbing cause affecting the course of prices to a serious extent. The first effects of the war are gradually losing their force, and even if it is to be prolonged it seems probable that the demand for actual wants will in a short time bring up prices to the level attained before it broke out. The undoubted falling off to the extent of about 7,000 tons in the exports of 1870 from Chili, which will only now begin to be felt here, the great firmness of importers and holders, the activity of the home trade, and of the demand for warlike purposes, and the absence of supplies of old material in the market, seem alone sufficient to produce this result; while speculation, revived trade with India, and the conclusion of peace between France and Germany, might enhance prices much more. An alteration of the American tariff in a Free-trade sense would also no doubt favourably affect our market. On the other hand, should further political complications arise, the large stocks must weigh heavily on the market, and these anticipations of improvement might be disappointed.

COPPER—1861-70.—PRODUCTION in U. K., and IMPORTS into, and EXPORT from, U. K.; with AVERAGE YEARLY PRICE of TOUGH CAKE.

Increase in the present year	—	120,022			
Decrease in the present year	85	—	Increase in the present year.....	416,863	19

The export list shows the distribution of coal imported into the port or district of London, by sea, rail, and canal, and afterwards exported coastwise or to foreign parts, or sent beyond limits of London district, by rail or inland navigation, during the year 1870:—

EXPORTS.		Tons.
1.—Railway-borne coal passing "in transitu" through district		455,723
2.—Sea-borne coal exported to British possessions, or to foreign parts, or to the coast.....	Tons. 413,664	
Ditto, sent beyond limits by railway	110,682	
Ditto, by canal and inland navigation.....	39,429	
		563,775
3.—Railway-borne coal exported to British possessions, or to foreign parts, or to the coast	151,454	
Ditto, by rail beyond district	246	
Ditto, by canal and inland navigation.....	2,052	
		153,752
4.—Sea-borne coal brought into port and exported in same ship.....		6,180
Total quantity of coal conveyed beyond limits of coal duty district during the year 1870		1,179,480
Ditto, 1869.....		1,088,548

From the above it appears that after two years of diminished imports of coal to London, and consequent depression, the twelve months just closed have witnessed a considerable rebound, and a comparatively large increase in the supply both by sea and railway. This result following on two years of contracted supply may be attributed—firstly, to the long and severe winter and spring of 1869-70, causing a largely-increased consumption during the early part of the year; secondly, to the severe competition between railway companies north of the Thames, resulting in the *Midland* (only open to London the year previously) bringing the large quantity of 923,600 tons, being 164,000 tons in excess of their carriage in 1869; and thirdly, in the partial revival of trade by the increased supply, especially for export. Of the increased tonnage for 1870, viz., 536,000 tons as compared with 1869, the distribution may be thus explained. The requirements of the Metropolis within the area of taxation has absorbed (mostly for gas and household purposes) at least three-fourths of this increased quantity; while the tonnage conveyed *in transitu* beyond limits by railway conveyance shows a comparative increase of 37,000 tons. The *exportation* coastwise to British possessions or to foreign parts likewise dispose of an increase of 57,000 tons,—an item indicative both of the revival of trade and the effect of the war. Of the *railways* south of the Thames, whose trade in inland coal has mostly increased during the past year, the London, Brighton, and South Coast, by the adoption of special rates, shows chiefly to advantage, 20,000 tons being in excess in 1870 of the quantity conveyed through London from the Midland counties in 1869 over their line.

V.—SHIPPING AND FREIGHTS.

Messrs Rucker, Offor, and Co. (London) report:—

We must assume, in the face of some awkward facts, that shipowning is still a profitable enterprise, otherwise it would be abandoned—instead of which, in spite of low freights and apparently far from remunerative employment, *our tonnage increases in quantity*, and there is a keen competition for what would appear to be very poor business.

Every year gives evidence of one important, fact, viz., *the rapid displacement of sailing vessels* by those propelled by steam, and as improvements in the construction of the machinery are developed, by which economy of fuel is secured, the absorption of the carrying trade by steamers will become more complete.

The *Suez Canal* has been open for more than twelve months, and nothing has occurred during that period to call in question its success as a great engineering work; the evil prognostications of those who prophesied its speedy close from the destruction of its banks by the wash of the passing steamers, filling of its channel with sand, &c., having been falsified by the result, although much remains to be done before the works can be said to be absolutely complete. The Canal has been very extensively used, although, from want of suitable vessels and the time necessarily involved in diverting the course of the trade and organising important steamship enterprises, the traffic is far less than may be expected during the present and future years. From the opening of the Canal a large number of vessels have passed through, comprising steamers of the Peninsular and Oriental Company, Messageries Imperiales, the British steamers Hibernia, 2,164 tons, Delaware, 2,597 tons, and the transport Jumna, 3,001 tons, the passage of which proves the capability of the Canal for ships of very large size.

One result of the opening of the Canal, to which we alluded in our last annual circular as sure to take place, was "the diversion of the trade between the East and the continent of Europe, which at present passes through our ports," and in confirmation of that opinion, we find steamers running *direct* between Bombay, Calcutta, Zanzibar, &c., and Constantinople, Trieste, Genoa, Marseilles, Havre, Bordeaux, Dunkirk, Lisbon, &c. From the 17th November, 1869, to 6th October, 1870, only *six sailing* vessels appear to have used the Canal, from which it would seem that the new route is only practicable for steamers. An experiment has been tried of the value of the Canal for steamers between China and the United States, but it proved unsuccessful, the time occupied by the steamer Magdala between Shanghae and New York being ninety-seven days, which was no more than a fair passage for a clipper ship round the Cape of Good Hope.

The steamers loaded on the berth in London, Liverpool, and Glasgow have commanded full cargoes for India and China at very fair rates of freight as a rule; but *homewards* owners have submitted to very moderate terms: thus, from Bombay to Liverpool 45s has been accepted, and the highest rate throughout the year did not exceed 65s, only a reasonable freight for sailing vessels. From Madras 40s for rice to London was taken, while from Calcutta during the period when freights were highest we find steamers loading for London at 71s 3d rape-seed, 40s saltpetre, 75s tea, 62s 6d jute, 50s rice, &c.

The rates for *steamers* have, of course, been seriously affected by the competition of the sailing vessels, which appear determined to die hard, and which, as will be seen from our table of rates further on, have accepted ruinously low freights; but eventually steam must gain the victory, and carry off the best part of the trade. The use of horses was not materially affected by the establishment of railways, nor has the introduction of machinery annihilated our working classes, and so we may expect to find sailing ships acting to a large extent as auxiliaries to steamers, although the best of the carrying trade both in goods and passengers must, sooner or later, be monopolised by ships independent of calms or adverse winds, and capable of performing voyages in the least possible time.

As steam supersedes sails, and the carrying trade is conducted

so much more rapidly under the new system, the question naturally arises as to the extent to which the mercantile marine may be reduced in tonnage, and the sailors in number; but although more work will be done by fewer ships and men, no diminution in the mercantile navy nor those who man it is likely to take place, inasmuch as increased facilities for communication create additional trade, and in the fresh development of commerce even increased shipping accommodation may become necessary.

The statistics of tonnage trading with British ports during 1870 possess some special features of interest; the ships entered inwards and cleared outwards during the eleven months ending 30th November, 1868, 1869, and 1870, were as follows:—

ENTERED INWARDS.

	1868.		1869.		1870.	
	vessels	tons	vessels	tons	vessels	tons
British	25,074	8,751,899	25,342	9,241,526	25,142	9,492,073
Foreign	17,611	4,023,878	17,474	4,086,062	17,359	4,260,056
	42,685	12,775,777	42,816	13,327,588	42,501	13,752,129

CLEARED OUTWARDS.

	1868.		1869.		1870.	
	vessels	tons	vessels	tons	vessels	tons
British	29,629	10,119,577	29,346	10,476,837	30,524	11,043,306
Foreign	19,582	4,225,740	18,688	4,171,861	19,109	4,358,452
	49,211	14,345,317	48,034	14,648,698	49,633	15,401,758

One effect of the war between France and Prussia is apparent in a falling off in the number of German ships visiting our ports, while no material difference has been experienced in French tonnage, which, unlike the German, has been free from the risk of capture. Another noteworthy point is a marked increase in *American* tonnage, the first turn of the tide since the war between the Northern and Southern States so thoroughly crippled the mercantile marine of our once powerful competitor. In 1869 350 American ships, registering 342,620 tons, were entered at our ports, whereas last year the number was 454, registering 50,552 tons.

This improvement still leaves our American cousins very far in arrear of the position they occupied in our trade in 1861, scarcely, in fact, *one-fourth* of the tonnage then visiting our ports; nor is it likely that any rapid increase will be made until the protective policy of the United States is abandoned, and American shipbuilders are enabled to import materials on terms that will enable them to construct *iron* sailing ships and steamers to compete with those built on the Clyde and other English rivers. It is affirmed that iron, which realises $100 per ton at Boston, only costs about one-third of that price on the Clyde, while labour is also trebly as dear at Boston as at the Scotch port; under these circumstances competition seems hopeless, and the only remedy appears to be the relaxation of the laws of the United States which forbid the purchase and Americanising of foreign-built vessels, or, at all events, a substantial reduction in or entire abolition of the import duties on materials for iron shipbuilding.

In examining our tonnage statistics we find that *Norwegian* shipping continues to increase, the number of ships entered inwards last year being 4,810, of 1,190,882 tons, against 4,162, registering 1,019,798 in 1869. Of other European nations there is an increase in Russian, Swedish, Danish, Dutch, Belgian, French, Italian, and Greek; while we notice a decrease in Prussian and other German flags, Spanish, Portuguese, and Austrian.

Turning from the statistics of *tonnage* to those of our exports and imports, the Board of Trade presents us with figures for which we were scarcely prepared. The badness of trade has been a universal topic during great part of the year, and among other causes to which it has been attributed the disastrous war on the continent has been specially alluded to; and yet we find that we have transacted a *larger business both in imports and exports* than we ever did before, and our trade with France and Germany has been interrupted to a very moderate extent. The returns before us represent our imports for ten months, and our exports for eleven months, as follows:—

	1869.		1870.
	£		£
Declared value of imports.....	195,480,921	...	203,894,233
Do exports.....	174,450,252	...	182,562,925
Total	369,931,173	...	386,457,158

With reference to our trade with the two great Powers at war, we find with respect to *France* that while we exported in the ten months ending October, 1869, to the declared value of 9,523,563*l*, our shipments for the corresponding period of last year reached 9,673,837*l*. To *Germany* (Prussia, Schleswig-Holstein and Lauenburg, Hanover, Mecklenburg-Schwerin, Oldenburg, and Kniphausen, Hanse Towns), we exported during the same period 16,217,466*l* in 1870, against 19,659,196*l* in 1869.

The import trade with *France* exhibits equally good results: thus, during the eleven months ending November, 1870, we received 4,290,544 gallons of wine, against 3,949,471 in the same months of 1869. In silk manufactures there was also an increase in importations, the quantity in 1869 being 2,910,769 lbs, against 3,501,208 lbs in 1870. In breadstuffs there is a large decline, the wheat and flour imported last year being 854,933 cwts, against 1,679,328 cwts in 1869.

In connection with France, an important concession has been made in the provisional opening of the French coasting trade to neutral vessels. This relaxation of the French Navigation Laws is limited to one month ending 19th instant, and has been made in consequence of the derangement in the railway arrangements resulting from the state of war, and the insufficiency of French tonnage. Having tasted the advantage of this alteration in the law, we may hope that the French Government will be induced to permanently change a system which cannot but be injurious to the commerce of France.

The trade with *Japan* last year exhibts some improvement, but the progress is still very slow. The declared value of exports for the ten months ending 31st October was 1,368,837*l*, against 1,093,826*l* in the corresponding period of 1869. The working of the Takasima coal mines at Nagasaki is likely to interfere with the export of coal from this country, but will facilitate the working of steamers on the coast by a considerable reduction in the coast of fuel.

Emigration to Australia was not very brisk in 1870. The Agent-General for Victoria chartered twelve ships during the year, the average rates paid being within about a shilling per head of the price of 1869—say, 12*l* 10s per statute adult.

The Imperial legislation of last year was of a negative character so far as related to the shipping interest. In Her Majesty's speech on opening Parliament a long expected measure was promised for "consolidating and improving the body of statutes which relate to merchant shipping." This important measure was introduced and read a second time without opposition; but it was found impossible to proceed with it further owing to the state of business, and towards the close of the Session it was numbered among the massacred innocents. The Bill was substantially the same as that introduced in the Session of 1869, but amended in a few particulars, the alterations suggested being decided improvements on the original proposals. With reference to payment of wages, instead of fixing a time within which wages were to be paid after a ships' arrival, the new provision is that wages are simply to run on until the men are paid. Advance notes are only to be recognised as a set off to the extent of one month's advance. Investigations into the conduct of masters and officers, which the old Bill left with the magistrates and nautical assessors, is given by the new Bill to the Local Admiralty Courts, assisted by assessors appointed by the Judge of the High Court, and the jurisdiction in the matters of local marine boards is proposed to be abolished.

The question of pilotage was separated from the Merchant Shipping Bill, and dealt with by a distinct measure, which proposed the absolute repeal of the compulsory system. Strong opposition was brought against this measure by those interested in maintaining the existing practice, and in an unusually busy Session it was not difficult for the opponents of the Bill to induce the Government to postpone legislation for another year. The Bill was referred to a select committee, the usual course adopted for delaying a measure, and after a large amount of evidence was collected the opponents of the Bill obtained a postponement, on the plea that time should be allowed for considering the evidence obtained by the select committee. There can be little doubt that

during next Session the advocates of the abolition of compulsory pilotage will realise a triumph.

An important reduction in the light duties came into operation on the 1st October, under an Order in Council made on the 18th May. The reductions amount *to about* 15 *per cent.*, and are based on the very sound principle that no ship should be charged for lights which she did not pass within sight of, and which were therefore of no use to her. We hope the time is not far distant when light duties will be charged to the nation, and the shipping interest altogether relieved from the impost.

As to the prospects for 1871, we think there are indications of *considerable improvement* in the freight market. We have already advices of an advance in rates at Calcutta, China, and other ports, resulting from an insufficient supply of tonnage to meet a growing demand. The shipping which sailed from ports in the United Kingdom to the East Indies, China, Australia, &c., were much less in 1870 than in 1869, the returns showing for the eleven months ending 30th November, 1,606 ships, registering 1,450,853 tons last year, against 1,852 ships of 1,552,609 tons in 1869. The requirements of the rice trade must absorb a large amount of tonnage beyond that secured on this side, and in the Peruvian guano trade a very large business may be looked for this year as the natural result of the limited engagements during the great part of 1870. The close of the war between France and Prussia may be confidently anticipated as among the early events of 1871, and with a return of peace we may expect an immediate and large increase in commercial transactions. On the whole, we look for better times for the shipping interest than have been experienced for two or three years past, and sincerely hope that our predictions may be amply realised.

VI.—COTTON TRADE.

Messrs Ellison and Haywood (Liverpool) report:—

From almost every point of view the movements of the cotton trade during 1870 have presented a marked contrast to the course of affairs which ruled in 1869. In that year the tendency of prices was nearly uniformly in favour of importers and against consumers. During the first eight months of 1869 holders made enormous profits in consequence of the great advance in values; and although an important decline took place in the course of the subsequent four months the losses incurred thereby were comparatively trifling in extent, owing to the small quantity of cotton affected by the fall. Meanwhile trade in Manchester was in such an unsatisfactory state throughout 1869 that the pecuniary result of the twelvemonth's business was most disastrous to producers—quite as disastrous, in fact, as the worst period of the cotton famine. In 1870, however, the course of trade and the fluctuations in values have been almost entirely *against importers*, and in favour of consumers. Aside from the exceptional fluctuations caused by the outbreak of the Franco-German war, the constant tendency of prices has been *downwards*, whereby very serious, in many cases ruinous, losses have been entailed upon importers. On the other hand, with a demand always sufficient to keep producers continually under orders, and to prevent the necessity for pressing sales, prices in Manchester have been comparatively strong. Of course there has been a decline, but the fall has been less than the decline in the raw material, and the position of *producers* has been proportionately improved. The subjoined comparison of prices puts this in a very clear light. The true explanation of the great difference in what may be termed the trade results of the two years is that in 1869 we expected more cotton than we received, while in 1870 we received more than we expected.

Comparative Prices of Cotton, Yarn, and Cloth.

Kinds.	*Close* of each year.			*Average* of each year.		
	1869.	1870.	D'cline	1869.	1870.	D'cline

Printers, 4 1/4 lbs.	16 1/4	14 1/8	2 1/8	16 5/8	15 3/16	1 7/16
— 5 1/4 lbs.	16 9/16	14 5/16	2 1/4	16 1/2	15 5/16	1 3/16
Shirtings, 7 lbs.	15 3/4	13 1/2	1 1/8	16 1/4	15 1/16	1 3/16
— 8 1/4 lbs.	15 1/2	13 5/16	1 1/16	15 1/16	14 1/16	1

The *average decline* in the rates current at the close of 1870, as compared with those ruling twelve months previously, was 3 1/8d in cotton, 3d in yarn, and 2d in cloth. The mean decline in the average for 1870, as compared with 1869, was 1 7/8d in cotton, 1 3/4d in yarn, and 1 3/16d in cloth. In both cases the results show *a clear gain to producers*.

As a rule the trade of 1870 has been most unsatisfactory to *shippers*, particularly to those having business with the more distant markets. The Bombay returns have been especially bad, and the combined losses on piece goods imported and cotton exported have caused the suspension of numerous firms at that port. At Calcutta a rather better state of things has existed; but even there great losses have been sustained, owing to the fall in values during the past half-year. The China market has formed an exception to the general rule, prices there having been well maintained throughout the year. The average price of 8 1/4 lbs shirtings in 1870 was about 7d per piece lower than in 1869 in Bombay and 4d lower in Calcutta, but 1d higher in Hong Kong and 4d higher in Shanghai.

The shipments of *piece goods* largely exceeded those of any previous year, but the exports of yarn were slightly below those of 1860. As compared with those of 1869, there is an *increase* of about 386,000,000 yards and 18,000,000 lbs, or 11·3 and 11 per cent. respectively. There is an increase to all countries except Germany, Holland, France, Italy, Brazil, and Australia. *The decrease to Germany and Holland reached* 20 *per cent.*, *all in July, August, and September*—the shipments in the last three months of the year being rather larger than in the corresponding quarter of 1869. *The exports to France* show a reduction of 25 per cent. for the year, but no less than 42 per cent. in the last six months, the figures for the latter period being only about 8,000,000 yards, against 21,000,000 in 1869. The decrease to other places is only slight, except to the Brazils, which exhibit a decline of above 68,000,000 yards, or over 33 per cent.; but this falling off is quite counterbalanced by enlarged exports to other parts of South America, Mexico, &c. To China and Hong Kong there is an increase of 88,000,000 yards, or over 23 per cent.; and to India an increase of 210,000,000, or nearly 30 per cent. Of *yarn* there is a slight increase to Germany and Holland, entirely through the latter country; a small decrease to Italy; but a considerable increase to Turkey and the East.

In the subjoined table we give the exports of goods and yarns to the chief districts of the world in 1870 and 1860:—

Piece Goods.—(00,000 omitted—thus, 85.5 = 85,500,000.)

Countries.	1870. Total yds.	Per Cent.	1860. Total yds.	Per Cent.

Total	187,7	100,00	197,3	100.00

On the continent, the *cotton industry* has been completely *disorganised by the war*. In *France* business has been almost totally suspended during the past three months; and the aggregate consumption of the year has reached only 436,000 bales, against 699,000 in 1869. The import into Havre between the 30th September and the 31st December reached only 19,000 bales, against 134,000 in 1869, and 133,000 in 1868. In December alone the arrivals were only 1,000 bales, against 40,000 in 1869, and 90,000 the year before. In *Germany*, the consumption has fallen from 407,000 to 340,000 bales, but there is more business doing now than there was three or four months ago. Russia also figures for a small decrease. Holland and Belgium show very little change. Austria, Spain, and Italy have all done a larger business than in 1869. Great Britain has benefited by the disasters of her competitors, having taken 2,217,000 bales, against 2,628,000. The total *deliveries* were as follows in actual packages and bales of the *uniform weight* of 400 lb in 1870, 1869, 1868, and 1860:—

Great Britain.

	1870.	1869.	1868.	1860.
Actual packages	2,817,000	2,628,000	2,802,000	2,633,000
Bales of 400 *lbs*	2,697,000	2,354,000	2,484,000	2,817,000

All Europe.

	1870.	1869.	1868.	1860.
Actual passages	4,420,000	4,594,000	4,855,000	4,321,000
Bales of 400 *lbs*	4,180,000	4,043,000	4,256,000	4,612,000

At the opening of 1870, the current opinion was that the supply of cotton would be materially larger than in 1869, but not very much greater than 1868. The most sanguine did not look

for an American crop of over 2¾ millions bales, and no one anticipated any material increase in the arrivals from other sources. Such being the case, the popular notion was that prices would not greatly vary from the rates then current, *and that* 11*d per lb* for middling American would be a safe basis for operations. With the exception of a few days of activity during the second week, the market was very tame throughout the month of *May*. Speculation was curbed by the surprising way in which the American receipts kept up, while the hands of holders were weakened by the rapid accumulation of stocks. Prices, consequently, receded fully ¼d here, but only occasionally ⅛d in Manchester, where a fair amount of business was done during the month. *June* was a month of almost uninterrupted gloom. Prices were comparatively steady during the first ten days; holders being tolerably firm sellers, in consequence of the general impression that business would look up after the Whitsuntide holidays. In this, however, they were greatly disappointed, for instead of improvement matters became a great deal worse than before. The depression was greatly increased by the "bear" party, who flooded the market with fictitious cotton, and undersold the *bona fide* merchant. Down to the 18th, arrivals gave way ⅝d in American, and ½d in Surats; and cotton on the spot ⅜d to ½d per lb. The decline induced more business, and on the 20th and 21st, there was a recovery of ¼d to ⅜d and ½d respectively. The improvement, however, was only short lived, and between the 22nd and 30th values declined almost daily, showing a net fall of ⅝d in arrivals, and ¾d in cotton on the spot in the month. In Manchester business was quiet, but producers were kept under contract, and yarns gave way only ⅜d to ½d per lb, and goods 1½d to 3d per piece. A comparison of the rates current then and at the close of December, shows that the position of spinners and manufacturers had undergone a material improvement in the course of the six months.

1870.	Middling Uplands.	Fair Dhollera.	30's Twist.	40's Weft.	Shirtings. 7 lb.	Shirtings. 8¼ lb.

Decline ...	1 5/8	1	¾	1	...	Advc. 1½

The market opened very tamely in *July*, with the tendency of prices still in favour of buyers. During the first week there was a decline of ⅛d to ¼d per lb; but the opinion was rapidly gaining ground that a reaction was at hand. It was the prevalence of this feeling that caused buyers to enter the market freely on the 6th and 7th; the upshot of which was that the previous irregularity in prices entirely disappeared. This incipient improvement, however, was completely checked on the 8th by the receipt of unlooked for warlike accounts from the continent. The Franco-Prussian dispute arising out of the Spanish succession had for some days been a source of disquietude; but it was confidently believed that the matter would be amicably settled. The unfavourable turn which affairs had taken, therefore, created great uneasiness. Between the 7th and 13th operators anxiously waited the progress of the negotiations between the two Governments. On the last named day hopes of peace revived owing to the withdrawal of the candidature of Prince Leopold; and on the strength of this the market became very firm. But on all sides the apprehension prevailed that the war feeling of France had been worked up to an uncontrollable pitch, and that a conflict was almost inevitable. The actual declaration of war on the 15th, therefore, scarcely surprised anyone. *The effect on the cotton market was as instantaneous as it was disastrous.* The sales fell to 7,000 bales on the 16th, to 6,000 on the 18th, and to 5,000 on the 19th, and prices receded fully 1d per lb. On the 20th the fright somewhat abated, and thence to the 25th (on which day the sales reached 14,000 bales) confidence gradually revived; but there was no quotable recovery in values except that it was impossible to repeat the very low purchases made at the height of the preceding panic. The general impression was that the "bottom" had been touched, and everyone hoped that the worst had been passed. But the whole aspect of affairs was completely changed on the 26th by the publication of the now notorious projected Treaty, having for its object the extinction of the kingdoms of Holland and Belgium. The revelation thoroughly unsettled the public mind, and strengthened the fear previously existing that this country might eventually be drawn into the war. Panic once more regained possession of the cotton market, and a further serious fall in values was the result: middling Uplands being purchaseable at 7½d per lb, and fair Dhollerah at 6d per lb on the 29th. These were the *lowest prices of the year*, and showed a decline of about 2½d per lb, or from 20 to 25 per cent. since the opening of the month, and a fall of 4d in American and 3½d in Surats since the close of December. The utmost confusion prevailed, business was quite paralyzed, numerous failures were announced, and altogether *July was one of the most dismal periods in the history of the trade.* In Manchester business was brought almost to a standstill. Numerous contracts were cancelled upon the most frivolous grounds, and producers found themselves suddenly saddled with large stocks. The fall in yarns was quite as great as the drop in cotton, but cloth did not give way more than about 2d per lb. The advance in the Bank rate of discount from 3 to 5 per cent. during the month was an additional source of uneasiness.

The net result of the fluctuations for the second half-year of 1870 was against spinners, but in favour of manufacturers; but a comparison of the prices ruling at the close of December, with those ruling at the end of 1869, shows a gain to both branches of the trade. Cotton during the twelve months having given way 3d to 3½d per lb, while yarns receded only 2⅞d to 3⅛d, and shirtings 1s 1½d to 1s 3d per piece, or according to weight, 1¾d to 2d per lb.

The following is a comparative statement of the prices of the leading descriptions of cotton yarn and cloth at the close of 1869, and at the end of each month of 1870, with the annual averages of 1870 and 1869:—

Months.	Cotton. Mid. Upls.	Cotton. Fair Egpt.	Cotton. Fair Dhol.	Yarn. Best 2nds. 30's Water.	Yarn. Best 2nds. 40's Mule.	Grey Printers. lb oz	Grey Printers. lb oz	Grey Shirtings. lb oz	Grey Shirtings. lb oz

Taking the *average prices* of the leading descriptions of cotton, we have the following results:—

	Average 1870.	Average 1869.	Decline Per lb.	Decline *Per Cent.*
	d	d	d	
Orleans.....	10 3/16	12⅜	2 3/16	18·19
Pernambuco.....	10 5/16	12½	2 3/16	18·0
Egyptian	11 1/16	13	1 15/16	15·39
Smyrna.....	8 7/8	10⅝	1¾	17.32
Dhollerah.....	8⅛	9¾	1⅝	16·67
Bengal	7 5/16	8¼	15/16	12.13

It now remains to draw attention to the tabular statemen's appended to this report.

The *import* of the year has amounted to 3,462,330 bales, weighing 1,315,397,730 lbs, or 79,710 bales, and equal to 117,043,180 lbs *more* than in 1869. The total increase is only slightly smaller than was generally looked for twelve months ago; but the details vary very considerably from the estimates then put forward. The *American* supply has largely exceeded, while that from *India* has greatly fallen short of the current computations; the increase from the one source being no less than 624,290 bales, while the decrease from the other has reached 432,870 bales, owing to a late and unfavourable season. From the *Brazils* there is also an unanticipated diminution of 111,440 bales, from which it is inferred that the cultivation of the plant has been abandoned for the growth of more remunerative products. *Turkey* has also sent us 13,830 bales less than in 1869; but *Egypt* has given us 7,110 bales, and the *West Indies* 6,450 bales more. The preponderance of American has increased the average weight of the import from 354 to 380 lbs per package; so that, although the aggregate increase in the arrivals from all quarters is given as only 79,710 bales, the excess in weight is equivalent to 292,610 bales of 400 lbs each, or only 78,000 bales less than the estimate put forth in our last annual report. Included in the import are about 90,000 bales from Havre, chiefly American.

The *export* figures again show a considerable decrease, in consequence of the continued increase in the *direct trade* between the continent and the various producing countries; the shipments in 1870 being only 658,430 bales, against 791,850 in 1869, 915,120 in 1868, 1,015,040 in 1869, and 1,136,560 in 1856.

The deliveries for *home consumption* have amounted to 2,817,090 bales, but as the trade hold 20,000 bales more at the end than at the beginning of the year, the actual con-

sumption has reached only 2,797,090 bales, or 53,790 per week, as shown in the following statement :—

	bales.	Mln. lbs.
Stock held by spinners 1st Jan., '70.....	80,000	31,
Stock in the ports 1st Jan., '70.....	460,180	164,
Import during 1870	3,462,330	1,315,
Total supply, 1870	4,002,510	1,511,
Export during '70	658,430	234,
Stocks held by spinners, 31st Dec., '70.....	100,000	39,
Stocks in the ports 31st Dec., '70	446,990	165,
Total deduction	1,205,420	439,
Leaving for actual consumption, 1870.....	2,797,090	1,071,

—which compares as follows with the figures of the preceding nine years :—

Year.	bales.	Mln. lbs.	Year.	bales.	Mln. lbs.
1870.....	2,797.090	1,071,	1865.....	2,034,730	718,
'69.....	2,628,460	939,	'64.....	1,566,400	561,
'68.....	2,801,940	996,	'63.....	1,303,500	476,
'67.....	2,552.498	954,	'62.....	1,185,500	449,
'66.....	2,406.394	890,	'61.....	2,363,600	1,005,

In *weight* the consumption of 1870 exceeded that of any previous year, except 1860, when the figures reached 1,079,321,000. In order to give a correct comparison of the amount of cotton consumed in each of the past ten years, we have reduced the bales to the *uniform weight* of 400 lbs each, as follows :—

	Total in bales of 400 lbs.	Average per Week.		Total in bales of 400 lbs.	Average per Week.
1870	2,679,420	51,530	1865	1,796,639	34,550
'69	2,347,540	45,140	'64	1,402,990	26,980
'68	2,490,490	47,890	'63	1,191,110	22,910
'67	2,386,290	45,890	'62	1,124,550	21,620
'66	2,226,800	42,820	'61	2,563,690	49,300

As compared with 1869, the consumption of 1870 shows an increase of 6,390 bales of 400 lbs each per week, or 14 per cent. against a decrease of 2,750 bales, or 5¾ per cent. in 1869, from 1868. As compared with 1860, the weekly consumption of 1870 exhibits a deficiency of only 360 bales, or barely ¾ per cent. *The current rate of consumption is larger than at any previous period in the history of the trade*, being about 56,000 bales of the present average weight.

The aggregate *stock* remaining in the ports at the close of 1870 is officially declared to be 446,990 bales, including 378,720 bales in Liverpool, against 460,180 and 337,760 bales respectively at the end of 1869. The Liverpool figures show a deficiency of 34,620 bales, as compared with the previous estimate. Subjoined is a comparative statement of the stocks in the ports and in the hands of spinners on the 31st December, 1870 and 1869.

Kinds.	In the Ports.		Held by Spinners.		Total.	
	1870.	1869.	1870.	1869.	1870.	1869.
American	110,000	77,000	41,000	20,000	151,000	97,000
Brazil, Egypt, &c...	99,000	60,000	26,000	20,000	125,000	80,000
East India, &c.....	238,000	323,000	33,000	40,000	271,000	363,000
Total	447,000	460,000	100,000	80,000	547,000	540,000

There are, therefore, 547,000 bales unconsumed, against 540.000 bales a year ago.

We give a tabular statement of the *value of raw cotton imported, exported, consumed, &c.*, for the past ten years. The average per lb we estimate as follows :—

	Import.	*Export.*	Consumption.
	d	d	d
1870	9 5/16	8 3/8	9 7/16
'69	11 7/16	10	11 3/16
'68	9 3/8	8 11/16	9 7/8
1867	10 1/2	9 1/4	10 3/8
'66	13 3/8	11 7/8	14
'65	15 3/4	14 1/8	15 3/4
1864	22	21 1/2	22 7/16
'63	20 1/8	19 7/8	20 1/8
'62	14	13 3/8	14 1/4
'61	7 5/8	6 7/8	7 5/8

The value of the stock is given at the current prices on the 31st of December in each year.

We give particulars of the *consumption of cotton in Great Britain and the various countries of continental Europe* in each of the past three years, as compared with the great year 1860, when the largest deliveries on record took place. The total import into all Europe in 1869 amounted to 4,413,000 bales, of which 3,462,000 bales were received into British, and 951,000 bales into continental ports. Of the 3,462,000 bales into Great Britain, 658,000 bales were re-exported to the continent, making the total supply to foreign Europe 1,609,000 bales, and leaving 2,804,000 for British consumption. The stocks at the close of the year showed a decrease of 7,000 bales, as compared with those of twelve months previously, so that the deliveries reached 4,420,000 bales, of which 2,817,000 bales were to English, and 1,603,000 bales to continental spinners.

In the subjoined table we give the *deliveries* in the leading countries in each of the three past years and in 1860, in bales of the *uniform weight* of 400 lbs each : —

Countries.	1870.	1869.	1868.	1860.
Great Britain	2,697,250	2,354,000	2,483,750	2,817,250
France.....	411,000	607,250	617,000	674.250
Germany and Holland	492,500	530,500	589.000	438.500
Rest of continent	579,500	551,250	566,500	681,750
Total	4,180,250	4,043,000	4,256,250	4,611,750

The *weekly averages* in the same years were as follow :—

Countries.	1870.	1869.	1868.	1860.
Great Britain	51,870	45,270	47,764	54,178
France.....	7,905	11,678	11,865	12,967
Germany and Holland	9.471	10,202	11,327	8,432
Rest of continent	11,144	10,600	10,894	13.110
Total	80,390	77,750	81.850	88,687

A further analysis of the figures shows the *proportionate deliveries* in each district to have been as follow :—

Countries.	1870. Per cent.	1869. Per cent.	1868. Per cent.	1860. Per cent.
Great Britain	64·5	58·2	58·4	61·1
France.....	9·8	15·0	14·5	14·6
Germany and Holland	11·8	13·1	13·8	9·5
Rest of continent	13·9	13·7	13·3	14·8
Total	100·0	100·0	100·0	100·0

The foregoing figures exhibit several very remarkable features. The influence of the war is shown to have been most disastrous to *France*, but much less injurious to *Germany* than might have been expected, the falling off in the deliveries to the one being more than 32 per cent., but only about 7 per cent. to the other. Great Britain, however, has more than supplied the deficiency in the production of the two belligerents, and the out-turn of cotton goods in all Europe has therefore been greater than in 1869. Our statement also shows that while the consumption of cotton in Europe in 1870 was larger than in 1869, and not much less than in 1868, it was very much below the total attained in 1860.

From the outbreak of the war to the close of the year some 135,000 bales were imported from Havre, of these about 90,000 came to Great Britain, 20.000 went to Belgium, and 25,000 to Holland, &c.

Our concluding tables furnish an estimate of the *weight and value* of the *total production* of cotton manufactures in Great Britain with the cost of cotton consumed, and the balance remaining for wages, all other expenses, and interest of capital and profits, for each of the past ten years; and a statement of the weight of yarns and goods produced, the quantities exported and consumed at home, and the stock on hand at the close of each year.

The total weight of yarns and manufactures produced in 1870 reached 942 million pounds, or about 14 per cent. *more* than in 1869, when the out-turn amounted to only 817 millions. As compared with the average annual production of the three years ended with 1861, namely 913 millions, the figures for 1869 show an increase of about 3 per cent.

Of the total production of last year, 84 per cent. was *exported*, against 85½ per cent. in 1869, 82 per cent. in 1868, 81 per cent. in 1867, 81 per cent. in 1866, and 75½ per cent. in the three years 1859-61; leaving 16, 14½, 18, 19, 19, and 24½ per cent. respectively, for home consumption and stock.

The *value* of the entire production we estimate at 96,630,000*l*, against 87,571,000*l* in 1869, and 91,717,000*l* in 1868; and the *cost of cotton* consumed at 42,145,000*l*, against 43,772,000*l* in 1869, and 40,989,000*l* in 1868.

The stock of goods in first hands on the 31st December we estimate at about a ten days' production.

With the certainty of a considerable increase in the American crop, and the probability of an augmented import from India, the *prospects of supply* for the year 1871 are *exceedingly favourable*; and as prices are, therefore, likely to be lower than for some years past, we may safely anticipate a larger *demand* than has been experienced since the great year 1860, especially as there is now some prospect of Europe being blessed with an early and enduring peace.

But although we look for a large increase in the supply from

the States, we are not prepared to endorse the very sanguine views which are just now freely adopted by many authorities in the trade. Few people now look for a crop of less than 3,600,000 bales, while many are inclined to believe that the yield will reach as much as 4,000,000 Our own impression, however, is that the yield will not greatly, if at all exceed 3,700,000 bales, all told.

The extent of our supply from *India* will depend in a great measure upon the price we shall offer to the producer. If the receipts at the South keep up to their present ratio of increase values are more likely to decline than to advance during the most important months of the Bombay shipping season, and such being the case we may look for very tardy shipments before the monsoon. They will be almost certain to exceed 1870's figures, as the stock of old cotton is said to be about 250,000 bales greater than at the commencement of 1870; but whether the total exports of the season will be greater or not than those of last year will depend upon the prices ruling in this market. At 6d per lb we doubt whether the figures will materially exceed those of 1870, especially as the fall in values during the sowing season led to some reduction in the area of cultivation. Last year we got 1,064,000 bales. Had the season been more propitious we should perhaps have also got the 250,000 bales now in the Bombay Presidency, which would have given us 1,314,000 bales. We should also most likely have got 100,000 bales more from the other side of India—or, in all, 1,414,000. Price will determine whether we shall get nearer 1,000,000 bales or 1,400,000 bales this year.

The supply to all Europe will, therefore, be about 5,000,000 bales of 382 lbs each, or 4,775,000 bales of 400 lbs each. This is certainly a very large figure, but it is only about 130,000 bales more than the quantity received in 1860, and taking into account the increased wants of the world, is not greater than will be required on the basis of 8d per lb for middling American.

The distribution of the above supply will depend upon the course of trade on the continent. Assuming peace to be secured, the deliveries to the spinners of *Germany* will rapidly approach the highest figures yet touched, but the consumption of France will probably not recover much more than half of last year's decrease. Meanwhile, the deliveries to other portions of the continent will certainly be greater than in 1870. Great Britain can easily find customers for 100,000 more than she took in 1860—say 2,917,000, of 400 lbs, against 2,697,000 last year. Probably the distribution of this year's import will be about as follows, compared with the actual figures of 1870, 1868, and 1860, in packages of the uniform weight of 400 lbs :—

Countries.	1871.	1870.	1868.	1860.
Great Britain	2,920,000	2,697,250	2,483,750	2,817,250
France	520,000	411,000	617,000	674,250
Germany and Holland	580,000	492,500	589,000	438,500
Rest of Europe	630,000	579,500	566,500	681,750
Total deliveries	4,650,000	4,180,250	4,256,250	4,611,750

This disposes of all but about 125,000 bales of the estimated import, and still leaves France 97,000 bales behind 1868, and 154,000 bales behind 1860, Germany 9,000 bales short of 1868, and the rest of the continent 52,000 short of 1860. The actual distribution may differ somewhat from the figures we have given, but if we receive so much as 4,775,000 bales, we have no doubt that purchasers will be found for the whole at somewhere in the neighbourhood of present prices.

During the ensuing three or four months the market will be severely tested by accumulating stocks, and prices may very easily experience a marked decline; but the retarding influence which an important giving way in values would have upon shipments from India and America would inevitably lead to a sharp reaction later in the year. Such a fall, too, would be certain to prejudice our supplies for 1872, and push up prices to a comparatively high figure during the closing months of the present year.

IMPORT INTO GREAT BRITAIN in 1870.

VII.—LINEN TRADE.

Messrs G. Armistead and Co. (Dundee) report:—

The anticipations of improvement in our linen trade which were entertained at the close of 1869 have been realised to a considerable extent; and, notwithstanding the derangement caused to the general course of business by the great events which have lately been taking place on the continent, our local trade has not sufered more than temporary depression, and is at present in a healthy and active condition. During 1870 various fluctuations have been experienced, and at some periods the trade has yielded small remuneration to those engaged in it; *but at no time has there been an amount of depression so great as to lead to any permanent stoppage of machinery.* On the contrary, with alternate intervals of dulness and activity, the demand has upon the whole kept full pace with the production, so that there has been steady employment for the working classes, in the benefit of which all engaged in the trade have from time to time participated to a greater or less extent.

The *consumption of jute* has been on a large scale—the whole of the machinery in this quarter adapted to the manufacture of this fibre having been in full operation. The supply being no more than what is required by the trade, prices have had an upward tendency throughout 1870, and latterly the market has been very strong. Stocks are at present light both in consumers' and in first hands, and had it not been for the direct supplies of new jute which have been coming forward within the last two months, by steamers, *via* Suez, it is probable we would have experienced a temporary scarcity of the article, and considerably higher prices. The reduced state of stocks, and the large wants of the trade, are likely to have the effect of maintaining a high range of prices for some time to come, and it remains to be seen whether the large quantities now on the way, and the heavy shipments still in progress in Calcutta will have the effect of causing a temporary depression in the market on their arrival in this country. *The year 1870 will be memorable as being the first in which we have had steamers coming direct from Calcutta,* four large steamers having arrived here with cargoes of jute within the last two months. The direct importation by sailing vessels from Calcutta is largely on the increase, and promises to be a very important branch of our trade in the future; at present no fewer than 32 large vessels (including 3 steamers coming *via* Suez) are now the way, or loading for this port at Calcutta.

The demand for linens has lately been very good. For a considerable period in the early part of 1870, although manufacturers were generally well employed, the demand was not so strong as to enable them to get prices up to a remunerative point; and considerable derangement and uncertainty was caused by the breaking out of the French war. Since then, however, the demand from the home markets, from the West Indies, and from America, for various fabrics of our local manufacture, has been very active, and manufacturers have not only been able to establish higher prices, but they now have their hands full of employment for some time to come.

VIII.—WEST RIDING WOOLLEN, WORSTED, AND OTHER TRADES.

LEEDS.

For many years until 1867 the various trades of Leeds had enjoyed uninterrupted and unexampled prosperity. This was followed by two years (1868-69) of great depression in some of the principal trades of the town; but at the beginning of 1869 strong hopes were entertained that the worst had been seen, and that we should shortly enjoy a return of former prosperity. Although these hopes have not been fully realised, it is satisfactory to be able to state that if 1870 has not been one of great activity, yet, taking the trade of the town as a whole, it has been decidedly the best since the disasters of 1866. Unfortunately some trades have not shared in this returning prosperity; but in others the improvement has been marked. Nor does the unfortunate outbreak of hostilities on the continent seem to have materially interfered with business here. It to a certain extent disarranged it, especially to France and Germany, and for a few weeks almost entirely stopped it; but as the war progressed there sprang up a brisk demand for various articles suitable for the use of the armies; so that as far as the amount of business done with these countries is concerned nearly as much was gained in one way as was lost in another.

Woollen Trade.—This, the oldest and largest trade in this district, has not been very lively during 1870. Still a fair business has been done, but without much push. The year opened well, and during the first two months a good business was done. The following months up to June are always quieter, as the bulk of the wholesale trade is generally done during the first ten weeks of the season. Altogether a fair spring trade was done. About the middle of June buyers began to operate for the winter trade, and a large business was done during the latter half of that month and the early part of July. The threatening appearance of continental affairs then caused considerable confusion in the trade. Though it did not interfere with the home demand as seriously as might have been expected, it put a complete stop to exports to most important European markets. A considerable number of orders were cancelled, and for many weeks scarcely an order for any description of goods was received from France or Germany. About this time the public sales of colonial wools were in progress, and great anxiety was felt as to the effect on prices which the forced absence of continental buyers might have. To the surprise of most prices varied but little, and confidence being in this way restored, there was a fair demand for goods for the home market; but as the shipping trade was reduced to very small dimensions, the manufacturers were not so well employed as could have been wished, and a good many began to work short time. This state of things has continued with little variations to the close of 1870.

The woollen manufacturers have had an ample and consequently cheap supply of raw material. At the beginning of the year clothing wools were very low—lower than for many years past.

Linen Yarns, &c.—Up to 1866 the flax trade had been remarkably good. This was especially owing to the cotton famine. In consequence of this favourable state of things, there was a very large increase in machinery in nearly all parts of the world. The trade has ever since been struggling against this, and during 1868 and 1869 the evil was greatly aggravated by the scarcity and high prices of the raw material, the crop having been bad for several years consecutively. Only one of our spinners made any material increase in the means of production; and had the spinners in other places acted with equal prudence, the flax trade would now have been in a far more favourable position. The crop of 1869 having proved good, there was a *great fall in prices*, which are now about 20 per cent. *lower* than during the past few years. As this fall took place towards the close of 1869, we thought ourselves justified in hoping that the past year would be a great improvement on the previous one. It has hardly come up to our expectations. There has not been any great increase in the demand, and the spinners have at times had difficulty in keeping their works in full operation. Whilst flax ruled so high in price, the prices of yarns were comparatively low. We hope, however, that with the present moderate prices, the trade has been more profitable.

Iron.—There was a marked improvement in the iron trade in 1869, and during 1870 the trade has been still better. Large quantities have been made for foreign railways, especially in Russia. Fears were entertained that the war would have a prejudicial effect on the trade, but so far this has not been the case to any great extent, and it has continued good to the close of the year. In the ten years preceding 1866, this trade was continually increasing here, but although it is now good, especially compared with the past few years, there is not much increase taking place at present. Should, however, this improvement be continued, and peace be secured, the same talent and spirit in our townsmen, which in a few years have raised this trade from such small things to such magnitude, would cause it to be even more extensive.

Engineer Tools.—No trade felt the effects of the panic of 1866 more than this, and the almost complete stoppage of new railway works for several years caused fears to be entertained that it would be the last to recover. There were considerably more orders received in 1869 than in the two previous years, and from that time there has been a gradual improvement, and during 1870 many of the works have been decidedly busy, and nearly all have been fairly employed. There can be no question that of late years the continental manufacturers have made great progress in this as in other branches of machine making. Of course our manufactures practically monopolise the home trade, and notwithstanding the protective duties levied in various countries on our products, most of them still draw their supplies of tools from this country, and our makers do not suffer much from competition in neutral markets. There has been a large demand for foreign markets, which is likely to continue for a ong time, and the trade may be reported to be a fair one.

Locomotives.—Like the tool trade, this branch suffered severely from the collapse in railway enterprise in 1866, but the improvement we were able to report in 1869 has been continued during 1870. Many large foreign contracts have been taken by Leeds makers. About three years ago there was considerable surprise manifested when a foreign house entered into a large contract to supply an *English* railway with locomotives. This was in fact an exceptional case, but there was reasonable ground for alarm in the fact that foreigners should, under any circumstances, be able to meet us in our own market. It is not probable that it will occur again very soon, and the English makers have not reason for the present much to fear from competition in neutral markets; but there is no doubt that foreign makers enjoy advantages in the low price of labour, which go far to counterbalance the advantages on our side in respect to mineral wealth, which ought to warn manufacturers that they should avail themselves of every means of improvement which offers. We believe they do so, and trust they will not relax in their endeavour.

Leather.—Leeds is at all events the second, if not the first, leather market in this country. A few years ago the extensive tanneries in the district were not so prosperous as they had been. They have, however, recovered their former position, and during 1870 have generally been fully employed. Besides the ordinary demand, there has been a large one for leather suitable for army purposes, as for accoutrements, harness, &c., which has caused the leather trade to be brisk, and raised prices to a higher rate. On the whole, the position of the trade has been good.

Wholesale Shoe Trade.—This trade has varied little from the previous year. Though not one of the principal trades in this town it employs a good many hands. It has not been very brisk, but a fair business has been done.

Paper.—The paper manufacturers have had a fair trade. During the summer there was a considerable advance in the price of some classes of material, and manufacturers had great difficulty in getting a corresponding advance in the price of paper. *The difficulties caused some years ago by foreign competition have passed away.* They did not arise from want of skill in our makers, but almost altogether from the high price of material here. Some countries in which material was cheap placed duties on the export, and thus created for their own makers an artificial cheapness. The constantly-increasing variety of material has done much to obviate this inconvenience, and will prevent a recurrence of the state of things which existed from 1860 to 1866.

Trade has also, on the whole, proved sound. There have, we think, been fewer failures in this town than in most years. This is, no doubt, to some extent, owing to the *new Bankruptcy Laws*, which, though by no means so good as could be desired, have yet put a stop to that very easy mode of obtaining relief from liabilities which the previous law afforded. But we think, independently of this, there has been a considerable improvement over previous years, and we believe trade is, on the whole, in a sound state.

HUDDERSFIELD.

The trade of this district has, upon the whole, been of a generally satisfactory and progressive character during 1870. This is all the more gratifying when the sad aspect of affairs on the continent is taken into consideration, together with the continual state of anxiety and suspense in which business men more especially have been kept by a series of subsequent political complications. Even with our export trade to the continent, however, it is marvellous to note how little it has been affected by the war. The French demand, except for army goods, has entirely ceased, it must be admitted; but the year's return to all other continental countries — Germany itself not excepted—has not been seriously affected. As to the prospects for 1871, very little need be said. The disastrous element of war, actual and possible, on the continent, is a very disturbing one in any such calculation, although it may have affected us but slightly hitherto. One thing is, however, certain—that the skill and industrial resources of this enterprising commercial community were never more highly developed than they now are, the machinery employed being very generally of the newest and best description; and our manufacturers may therefore rest assured that, whatever the course of business may be during the year upon which we are about to enter, they at all events are certain to secure a full share.

BARNSLEY.

The coal interest has undergone several important changes during 1870, few of them being of a beneficial character to colliery proprietors. The close of 1870, however, has a far more healthy appearance than its advent, which was ushered in amid serious disputes, causing a large number of men to be unemployed, culminating in one of the most serious outrages that ever disgraced any mining or manufacturing district, and for participating in which several persons are at present undergoing various terms of imprisonment. The demand for house coal from January to April was tolerably good, but the prices obtained were not by any means remunerative. The business doing with London in the quality named was very small in comparison to what it ought to have been, or to what it was some five or six years previously. This was owing entirely to the rates charged by the *Great Northern Railway Company*, and which being from 1s 4d to 1s 10d per ton higher than from Derbyshire by the *Midland*, acted as an effectual barrier in preventing the *South Yorkshire* coal from maintaining the position it formerly enjoyed in the Metropolitan market. So far back as 1863, an

rrangement was entered into between the *Midland* and *Great Northern* Companies, by which the rate to London was based on ertain contingencies. The arrangement would have suited at he time, seeing that the Midland had no line to London, and ad to go by the Great Northern; but as soon as the line to St Pancras was finished, the former was then in a position to bsorb a very large proportion of the traffic, at the present time nore than two-fifths of all the coal conveyed by rail to London peing sent from Derbyshire and the adjoining county. The esult has been that whilst in 1865 there were sent from South Yorkshire to London 304,000 tons, in 1868 it had fallen to 220,000 tons, and in the present year it has been very little more than 200,000 tons. Looking at the increase which has aken place in other districts, the traffic to London in 1870, nstead of being 200,000 tons, should have been from 600,000 to 700,000 tons from South Yorkshire. Towards the close of 1869, the coalowners and the directors of the *Manchester, Sheffield, and Lincolnshire Railway Company* endeavoured to get the rate reduced, and for that purpose memorialised the Great Northern. The latter, bound by the agreement, were powerless to make any alteration without the consent of the Midland. The whole matter eventually was left to the arbitration of Sir John Karslake. After waiting for upwards of eight months, Sir John gave his award a short time ago, to the effect that the agreement could not be broken. Several suggestions were then made with a view to get the rate reduced, and in November, 1870, the Manchester, Sheffield, and Lincolnshire Railway Company lowered the rate to Retford (for the Great Northern) 11d per ton, and the coalowners making a reduction of 1s 1d, the coal from South Yorkshire has since been selling in London at 2s per ton less than it was previously. This having the desired effect of placing the Derbyshire coal in a very disadvantageous position the Midland Company recently made a reduction of 11d per ton from that county. This was followed by the Great Northern also reducing its rate 11d per ton. Both companies having, therefore, broken the agreement which had hitherto bound them, the coalowners entirely dependent on the Great Northern at present for reaching London are expecting that the rate will be reduced still further, to enable them to compete with the Derbyshire colliery proprietors for the London trade. Should such, however, not be the case, then they are determined to give every possible support to the new line, known as the Associated Coalowners' London Railway. This line, which has been promoted by large coalowners, it is proposed should be a single one, entirely devoted to mineral traffic, and would commence from a point on the Manchester, Sheffield, and Lincolnshire, near to Lincoln, and join the Great Eastern at Long Stanton. It has already found much favour in South Yorkshire, and its advantages to the coalowners of that district have been very forcibly pointed out by Mr R. Baxter, of London (the well-known Parliamentary solicitor), himself a large colliery proprietor.

WORSTED TRADE.

The year 1870 opened with returning commercial confidence. Money was abundant, the Bank rate being 3 per cent. Food was cheap, corn selling at 5s 6d per quarter lower than the average of the preceding ten years, and no cloud appeared in the political horizon of nations. The price of wool was moderate, and the stock of combing wool in the country was a fair average, whilst the foreign supply is yearly on the increase. Wethers ranged from an average of 15½d to 15⅝d per lb, and hogs from 18½d to 19d. Such was the position of the trade on the 1st of January, 1870, and there was a grand expectation that we had surmounted our troubles, and that we should enter upon a more remunerating period. These expectations have been sadly disappointed, for the year that has just closed has proved a much more disastrous one than its predecessor.

Wool was firmly held in the country, and continued to be so for the first five months, but it was moved off very sluggishly in the local markets, and it gradually drooped in price ¾d per pound during that period, showing a slight rally in May to the extent of ¼d per pound. Skin wool during the period that it was being pulled was freely brought to market and pressed for sale so as disproportionately to reduce its price in comparison with pieces, whilst they maintained within ½d per lb their value up to this day. Its near approach as usual, brought a slight concession from holders, and the early sales of new wool were made at ½d per lb below the clip of 1869. The outbreak of war on the continent in July completely paralysed the foreign yarn trade, and also checked the home trade, from the fear that England might be dragged into it, and prices consequently fell 1d per lb. In *August* the successful progress of the Germans suggested the hope that the war might be brought to a speedier termination than it was at first thought probable, and new and adequate channels for the transit of goods being opened out, prices rallied slightly from a little greater activity in trade. In *September* spinners, having run down their stocks of wool, were obliged to come more freely into the market, and an advance of ½d per lb from the lowest was established. At Bristol fair skin wool was found to be scarce, and advanced in value from ¼d to ½d per lb. Wether wool had now become more inquired for than hogs, and the difference that had been obtained for years back in their respective values was reduced from 1d to ½d per lb. The higher classes of wool throughout the year had relatively obtained better prices than the lower; but as winter approached, and with it the certainty of the war continuing in France, a heavy demand for clothing for both of the belligerents took place, and raised the value of these wools. The mills were now consuming larger quantities, and the demand improved to the end of the year, and advanced wool to within ¼d to ½d per lb in wethers of the price they stood at the beginning of the year; but in hogs, owing to the demand not having run so largely upon them as formerly, the fall was from 1d to 1¼d per lb. In picked supers this difference is most marked. The average of wether wool may now be quoted at 15¼d to 15½d, and hogs at 17¼d to 17¾d. Australian, New Zealand, and River Plate wools have been largely used during the year, and a considerable weight of skin wool has been pulled in this country from fleeces imported from the River Plate.

Accurate and intelligent observers are of opinion, that notwithstanding the short time that had been run, and the stoppage of spinning frames during 1870, the present stock of combing wool in the country is less than this time last year.

The agricultural returns for 1870 again show a decrease in the number of sheep, as exhibited in the following table:—

ESTIMATE of the 1870 CLIP of the SHEEP in the UNITED KINGDOM—the Sheep and Lambs returned at Midsummer.

Years.	England and Wales.	Ireland.	Scotland.	Total in United Kingdom.
1868	23,673,256	4,822,444	7,112,112	35,607,812
1869	22,606,777	4,648,158	6,995,337	34,250,272
1870	21,599,563	4,333,984	6,750,854	32,684,401

To this decrease in number must be added the lighter weight of the fleeces, which in wethers is considered to be equal to 1 lb per fleece, and in hogs ¼ lb per fleece below the previous year.

In *Lincolnshire* the wool was neither sound nor clean, but the north wool had a good staple, and other counties had no ground of complaint. There has also been a larger demand for all wool goods, and a greater proportion of low counts of yarn have been spun during the year.

The estimate of *home grown wool* for 1870 is thus summed up:—

From sheep shorn	124,017,000
From lamb shorn	2,470,000
From skin wool	33,482,404
Total	159,969,000

It is a point of interest to compare the extent of the *colonial and foreign* supply with our *home produce*, and the following is compiled from the agricultural returns:—

1. Number of sheep in United Kingdom		32,684,401
2. No. of sheep in 1868 in the following British Possessions, viz.:—New South Wales	13,909,574	
Victoria	9,532,811	
South Australia	4,477,445	
Western Australia	599,746	
Queensland	8,921,784	
Tasmania	1,742,914	
New Zealand	8,409,919	
Mauritius (including goats)	18,057	
Natal (including African sheep)	286,264	
Cape of Good Hope, ditto	9,836,065	
		57,734,508
		91,984,861
3. Number of sheep at latest dates in the following foreign countries:—		
Russia in Europe (exclusive of Poland and Finland)	Average of 1859 to 1863	39,315,000
Russia in Asia	1863	5,815,000
Sweden	1867	1,621,931
Norway	1865	1,705,394
Denmark	1866	1,875,052
Prussia	1866	22,262,087
Wurtemberg	1867	655,856
Bavaria	1863	2,039,983
Saxony	1867	304,087
Holland	1867	1,027,215
Belgium	1856	583,485
France	1866	30,386,233
Spain	1865	22,054,967
Italy	1867	11,040,339
Austria	1864	16,573,459
Switzerland	1866	445,400
Greece	1867	2,589,538
United States	1867	32,795,797
		192,840,823
Total		284,825,684

We thus get a total of 285,000,000 sheep in the countries reckoned, of which amount England possesses one-eighth, the British possessions enumerated one-fifth, and England and these possessions together one-third. *The calculation unfortunately is not exhaustive, omitting, for instance, the Argentine Republic,* but with that exception all the countries which contribute materially to the great international markets for wool appear to be included.

It is a subject of congratulation for the worsted and the woollen trades that the increase in the imports of wool far exceeds that of the other raw materials of our textile manufactures. Within the last 30 years *flax* has increased 15 per cent., *silks* 59 per cent., *cotton* 110 per cent., whilst wool has increased 349 per cent. It is also fortunate that the necessary supply of food in the growth of sheep, to meet the wants of our increasing population, goes hand in hand in providing for the requirements of their clothing.

Less combing wool has been exported this year than usual, and the exports to France have been partly reshipped to this country.

The *great improvements in combing machinery* has widened the range available for the worsted trade, as we can now comb sorts that it would not formerly pay to work. Whilst the comparatively higher price of long combing wool offers a premium for its preferential cultivation over clothing wool wherever practicable.

Noils and Brokes.—The stocks at the beginning of the year were heavy, but during the first half of it they were reduced, prices remaining nearly stationary. The demand then gradually increased, the prices being so low as partially to lead to their consumption instead of foreign wools. The demand *for low woollens occasioned by the war* greatly increased the consumption, especially in the lower qualities, which have advanced from 1d to 1½d per lb. The better qualities have only partaken of this improvement, the middle qualities to the extent of ¾d per lb, the better only ½d, at which advance they remain at the close of the year. The stocks of the coarse qualities have entirely disappeared from the hands both of spinners and dealers, and the better qualities are not plentiful. The tendency of prices to advance has not been arrested.

Yarn.—The production of yarn during 1869 had been in excess of the demand, and heavier stocks were generally held than is usual in a healthy state of trade, and the average run of prices was below the cost of production, whilst spinners were increasingly feeling the efforts of foreign competition: some spinners resorted to short time, or stopped a portion of their frames.

This depressed condition of the trade continued without any alleviation during the first half of this year. Stocks of yarn continued to increase, and few spinning contracts were attainable. There were from time to time, under various temporary influences, spasmodic purchases made out of stock, but at ruinously low prices, and a general curtailment of production was the consequence. Hope of improvement was the only support of the market, when the depression experienced its culminating disaster in the outbreak of war in the middle of July between our two largest European customers. There was also great fear that we might not be able to preserve our neutrality, but become a principal in the war.

Prices of yarn had fallen up to this period from 5 to 10 per cent., according to the particular class, either wefts, 2-folds, carded, or genappes, the latter experiencing an almost total stoppage of demand.

The German merchants were constrained to delay receiving goods or yarns, and to withhold spinning particulars against contracts, *as the various establishments abroad were broken up by the summons of both masters and workmen to enter the ranks for war,* as well as by their total inability to forward goods to their destination by the employment of the railways and other modes of transit in Germany for the transport of men and war material. France also declared the German ports blockaded, and thus suspended all business. The prices of yarns thus became nominal, as purchasing was out of the question, and most mills resorted to four days a week, besides stopping a good deal of machinery. At the end of *August* the continued successes of the Germans prompted the hope of an earlier termination of the war than was at first thought probable, besides removing the fear that Germany might have been the theatre of the war. New routes for the despatch of goods, and the release of the railways from the engagements of the war, and finally the raising of the blockade, revived business. Spinning particulars were given against old contracts, and partial buying was resumed. Stocks of yarn had accumulated during this period, which were disposed of to the merchants at heavy sacrifices. The mills were now able to resume the usual hours of running, and the year closed with the productive powers of the trade nearly in full operation. The firmness of wool had sustained prices in a degree, and the renewed activity in the demand experienced as the year closes has led to some rally in prices.

The *arrest of manufacturing industry in France* has contributed to this improvement. The war has penetrated to Amiens, and affected the trade of Roubaix, as well as the other districts where the worsted trade is carried on, and the Germans now draw from our markets the supply of yarns before furnished by France; not in the soft Botany yarns which they purchased, but by the hard yarns of this district. 30's weft has largely profited by this melancholy cause. The *piece trade* has also been a gainer, especially in furniture goods, which were largely imported into this country from France and Germany. The spinners for the home market share in this advantage. A much larger proportion of the *stuff trade* to the United States also now falls to our share, and swells the demand. The attention paid to the combing of Botany wools since the markets of France have been closed is likely to leave us in possession of a large portion of this trade, even when French industry resumes its natural condition.

A slight check was given to business by Russia's repudiation of the Treaty of 1856, and also by Prussia's charge against Luxembourg of not preserving her neutrality; but the effect in both cases was transient.

The prices of yarn at the close of the year show a decline in wefts of 2½ to 3 per cent., and in 2-fold of 5 per cent., as compared with the prices that ruled at the commencement.

The trade of the country is now generally reviving, the leading branches of industry are active. *The demand for low woollens is unusually large, and at present very profitable.* The cotton trade has greatly improved both as to demand and the prospects of supply of the raw material, which has now fallen to a reasonable price. Money continues very cheap, and the price of food is moderate.

There is *constant and full employment* for the working classes at a high rate of remuneration, and we can now well afford to smile at the delusion entertained at the earlier introduction of machinery, when it was thought it would supersede human labour, whereas it has proved to be the most active stimulant to its regular employment.

May we hope that, although two of our best European customers must be found, at the close of this fearful war, greatly impoverished by it, especially France, still the excitement to industry, and the general reduction of stocks of goods and yarns in those countries, will leave a void to fill-up that will give animation to our trade, and that we may experience in the year we are entering upon a rebound from the severe depression that has weighed down our markets for the last two years.

The remarks made as to the state of our trade in both wool and yarn apply with only trifling variation to pieces, although, as a whole, our manufacturers have been better and more remuneratively employed than our spinners.

The gradual fall in the price of cotton warps during 1870, and the fact that weft might be purchased from the spinner at almost cost price (or in some cases even lower), has enabled the manufacturers to meet the demands of the time without suffering so much as other branches of the worsted trade.

The year 1870 is also memorable in the annals of manufacturing, as having largely extended a comparatively *new branch of manufacture* in our district.

Introduced about two years ago, the manufacture of goods from *Botany yarn* has advanced with rapid strides, and since the commencement of the continental war, and the consequent stoppage of looms in France, has attained large proportions. As the field of supply of raw material for these yarns is large, there is a great stability in their price, and we may look forward to an important and increasing trade in goods made from them.

Of the heavy worsted goods made in the district, a large proportion find their way to China and the East. The state, therefore, of these markets has materially affected us during the last twelve months.

For some time back they have been in a most unsatisfactory state alike to both merchant and manufacturer.

The speculative shipments made have steadily overloaded them, and whilst the demand has been almost *nil*, supplies have been constantly maintained.

To this cause may be added the recent outrage at Tien-Tsin, which has produced a great feeling of insecurity amongst the mercantile community, and until this feeling is allayed we cannot look for much improvement.

In consequence, prices have declined on the other side to a point which leaves the importer with a loss, whilst on this side any sales which might be effected would be at a reduction on their cost.

Therefore, a steady reduction both in stocks in China and shipments hence must take place, and the trade once more placed on a sound basis with a supply equalled by the demand.

The total exports during 1870 of worsted show a considerable falling off, but this has occurred chiefly during the latter month of the year, so that the effect in China has not yet been noticed.

The following table gives an approximate idea of the shipments during the last four years, and prices during the last twelve months, of China goods:—

		Camlets. pieces.	Stuffs. pieces.
Total shipped during	1870	67,000	389,000
— —	1869	85,000	473,000
— —	1868	80,000	423,000
— —	1867	79,000	638,000

QUOTATIONS.

	Jan.	April.	July.	Oct.	Dec.
Standard S.S. Camlets	49 ...	47 ...	46 ...	45 ...	47
Lastings, 6 reed	49 ...	47 ...	45 ...	45 ...	45

The furniture and damask branch commenced with a sluggish demand, but this has gradually improved, until now we can report a fair demand for all classes of these goods. This improvement has been much accelerated by the Franco-German war, which has largely increased the demand for low damasks, which in ordinary times are made extensively on the continent.

Prices of furniture goods have remained almost stationary during the year, but may now be said to have an upward tendency.

For the *home market* a large trade has been done during 1870, and manufacturers have not to complain of want of orders, but rather of the unremunerative character of their results.

In conclusion, we may state that the year 1871 commences with a fair demand for ordinary fabrics, whilst the moderate price of both warp and weft would lead us to believe that we shall not see lower values for goods during the next twelve months. We trust, therefore, we may have a steady trade, but we cannot expect a brilliant one.

SHEFFIELD TRADE IN 1870.

Throughout 1870 many of the staple trades of this town have been subject to much fluctuation, and almost every branch of local industry has been improved or depressed by special circumstances. General orders for hardware or cutlery came so freely to hand towards the close of 1869 that manufacturers were somewhat sanguine of at least moderate activity during the earlier months of the year; but the completion of orders then in hand was followed by a very small quantity of spring orders both for the home and export trades. There was, however, an improved summer demand for cutlery, files, scissors, and edge tools, and the outbreak of hostilities on the continent prejudicially affected commerce for a brief period; and it was believed that the demand for Sheffield manufactures would increase in some branches if the war continued for any length of time. Circumstances have, to some extent, verified this belief; but it is generally admitted that, except in the commonest kinds of pocket and table cutlery, the disorganisation of German manufacturers has *not* improved the staple trades of this town. The *home trade* has been quite equal to the average of several years past, though the finer qualities of table cutlery have been in limited request. The pen and pocket branches have undoubtedly been the most prosperous of the cutlery trades. Since the Franco-Prussian war began unusually large orders have been executed by the surgical instrument manufacturers. The *heavy branches* have been brisk throughout the year, and there can be no doubt that they form the chief source of the present and future prosperity of the town. Events of much importance have taken place within the past twelve months in connection with the steel trade of this district, in the partial settlement of the dispute between the exporters and the American revenue officials, and the reduction of Mr Bessemer's royalties from 40s and 20s to 2s 6d per ton. Increased duties upon spring steel, which take effect with the new year, will undoubtedly *militate against English houses*. Orders for *Bessemer steel*, upon which the royalties were reduced in February, have been excessive during the year, and the local production has not been equal to the consumption of our manufacturers of railway and other material to which it is applied. The demand for *rails, wheels, tyres, and other kinds of railway works*, has increased rapidly, and the mills have been worked incessantly. Russia and America have each given extensive orders, and the home companies have issued large contracts; and in addition to orders for spring delivery, others stand over, with which to proceed after the holidays. The war gave a great impetus to our trade in *war material*, and during the last five months ceaseless activity has prevailed at all the works where armour plates, gun blocks, projectiles, and steel rifle barrels are produced. The orders have been principally for the *home Government*, and we understand that the manufacturers of rifle barrels have an unlimited order. Altogether, the iron and steel trades have been exceptionally good. The *puddling and converting furnaces* have been fully employed. Merchant iron has been in brisk demand, and large export orders for sheets, rods, and bars have been executed, and in the same departments there has been a satisfactory home trade. At the *rolling mills* there has been no dulness, and heavy forge and foundry work has been in demand. Machine castings have been in request, but in the stove and grate and ornamental fencing departments there has been less activity. The wire trades are being rapidly extended in this town, and extensive contracts for telegraphic and fencing purposes have been completed during the last few months. The railway spring trade has been exceedingly prosperous. As to the future almost everything depends upon the turn continental affairs may take, and there can be no doubt that the success or failure of the Free-trade party in America will greatly influence our commercial intercourse with that country. Those best capable of forming an opinion are not very sanguine that any important revival in the staple trade is imminent, though the prospects are not discouraging. Manufacturers of *railway material* are sure of a season of prosperity, and they have now orders in hand which will take several months to complete. Bessemer steel orders are also heavy, and there is certainly no probability of any increased demand. Firms engaged in the production of war material have an abundance of work, which will be pushed forward vigorously during the new year. We may, therefore, conclude that the trade of the district *is in a very healthy state*, and unless circumstances should arise to overthrow present appearance, 1871 will compare favourably with 1870.

IX.—RAILWAY TRAFFIC (UNITED KINGDOM) 1870, AND SIX PRECEDING YEARS.

We obtain, as usual, from *Herapath's Railway Journal* the following summary:—

TRAFFIC RETURNS of RAILWAYS in the UNITED KINGDOM, for Seven Years ending 31st December, 1870.

TOTAL RECEIPTS.

	January to April.	April to July.	July to October.	October to December.	Total for the Year.
	£	£	£	£	£
1870	9,621,093	10,926,287	11,749,411	10,829,814	43,126,605
1869	9,216,983	10,216,806	11,177,351	10,414,521	41,025,661
1868	8,635,455	9,841,274	10,770,402	9,976,137	39,223,268
1867	8,305,151	9,686,383	10,642,214	9,685,781	38,319,540
1866	8,223,581	9,333,635	10,044,330	9,324,381	36,925,927
1865	7,550,052	8,809,962	9,746,891	8,878,433	34,985,338
1864	7,199,403	8,263,447	9,184,304	8,220,543	32,867,697

AVERAGE TRAFFIC per Mile per Week.

	January to April.	April to July.	July to October.	October to December.	Total for the Year.
	£	£	£	£	£
1870	703	794	847	783	3,127
1869	687	754	823	765	3,029
1868	657	745	811	747	2,960
1867	652	757	824	737	2,970
1866	664	750	802	730	2,948
1865	636	740	798	718	2,892
1864	642	732	801	702	2,877

MILEAGE over which the TRAFFIC was Carried.

	January to April.	April to July.	July to October.	October to December.
1870	13,712	13,772	13,815	13,846
1869	13,542	13,551	13,631	13,644
1868	13,203	13,268	13,314	13,340
1867	12,790	12,875	12,971	13,172
1866	12,385	12,450	12,670	12,760
1865	11,893	12,013	12,284	12,352
1864	11,230	11,353	11,631	11,818

The above table exhibits the *aggregate weekly* returns of railways in the United Kingdom, published in 1870 and in the six preceding years. Notwithstanding the alleged depression of trade during 1870, the traffic receipts increased on some of the railways in a most satisfactory manner. The *increase* in the total traffic of 1870 over that of 1869 was 2,100,000*l*, which must be considered very satisfactory. For 1870 the total weekly receipts amounted to 43,126,604*l*, and for the year 1869 to 41,025,661*l*, showing an *increase* of 2,100,944*l*. The increase of the traffic receipts in 1869 over those of the preceding year 1868 amounted to 1,802,395*l*, making in two years nearly 4,000,000*l*. It is true that the increase in the receipts of 1868 over those of 1867 only amounted to 903,728*l*, being less than half the increase of the two past years, yet 3,800,000*l* increase in railway traffic for three such years cannot be considered otherwise than hopeful and gratifying.

The increase in the receipts of 1867 over those of 1866 was 1,389,613*l*; the increase in the receipts of 1866 over those of 1865, 1,944,589*l*; the increase in the receipts for the year 1865 over those of the year 1864, 2,117,641*l*; and the increase in the receipts for the year 1864 over those of 1863 was 2,913,736*l*. So that in the past seven years the published weekly traffic receipts on railways in the United Kingdom showed an *aggregate increase* of 12,172,600*l*, or an average annual increase of 1,738,943*l*. Another gratifying fact is that the increase of *capital outlay* has been considerably *less* during the past three years than previously, and the result is an improvement in the percentage of net profits on the capital expended. If the outlay on capital account could be kept within the reasonable limits of providing the requisite accommodation and rolling stock for the increased traffic on the existing lines—say to the amount of 3,000,000*l* or 4,000,000*l* a year—the good result of such a limited outlay would in a very few years become apparent to ordinary shareholders in the shape of increased dividends. It is the continual expenditure of large amounts of *capital* on new and on more or less competing lines that chiefly keeps down the ordinary dividends on railway property. The interest on debentures and debenture stock, the dividends on guaranteed and preference stocks and shares, must be paid, and the remainder of the actual profits of working go, or ought to go, to the ordinary shareholders. In the present state of railway property, unprofitable outlay of capital must be considered as an evidence of incompetent management. It is to be hoped that the days o[f]

rapid increase of capital expenditure on railways are past, and that the natural increase of traffic receipts will be allowed to accumulate in a higher ratio than heretofore, and that the increase of capital outlay will be restricted to productive works, and in providing the necessary additional rolling stock and other matters required to accommodate the increasing traffic. If it were possible to induce some pause in the onward construction of railways, a consideration of past proceedings in Parliament and otherwise, with a view to improvement, and by which a considerable waste of money and of skilled labour might be saved in future, some thoughts might be bestowed on the probable invention and adoption of a greatly improved *rolling stock*, of much lighter description and more managable for passenger traffic, to replace at least some of the existing lumbering vehicles. It might become a necessity to provide separate lines for the goods traffic and sidings so as to be quite independent of the fast traffic without perhaps very seriously increasing the cost of maintenance, as compared with the present system of very fast passenger and very fast goods traffic. When it is considered that the very fast passenger trains are usually very light, and the very fast goods trains on the same line are very heavy, the cost of maintenance is proportionably increased, not because the heavy goods traffic—coals and minerals—require to go at 40 or 50 miles an hour, but because they must do so to the great detriment of the road and rolling stock to get out of the way of the comparatively light and fast passenger trains.

Then, again, much might be done by the *tramway system* in approaching towns, in accommodating populous districts, where property is valuable, and it would be ruinous to purchase property for the making of railways on the ordinary system. Engines of peculiar and effective construction might supersede horse-power on some of the road tramways. There are several reasons for abstaining from a headlong system of constructing railways on the ordinary principle. We should rather endeavour to improve what we have got, to reduce the expenditure on working the traffic, and to obtain better machinery and better means of accommodating the passenger traffic. There are only very few companies who entertain a thought of accommodating passenger traffic beyond what is called the second-class. Every contrivance is resorted to by traffic managers to bar the travelling of the third-class passengers. The *third-class* question will, sooner or later, have to be dealt with. It is probable that the old prejudices against accommodating third-class passengers will die out, and that the subject will, at a future time, be dealt with by superior men in a reasonable manner. There must have been some foundation for third-class passengers, because, in every Railway Act, provision as to fares for third-class passengers is provided; and therefore, first, second, and third-class passengers should be accommodated on every railway in a liberal and proper manner. At all events, the first and second-class passengers can never be properly provided for until the third-class passengers can travel from place to place in as direct a manner as the second and first-class passengers. If the plan of running third-class passengers on their journey into sidings for hours, before they can proceed to their destination, why not run second-class passengers into sidings, and only take them on portions of the journey, and make them wait for second-class trains as the third-class are obliged to do? Parliament should rectify this anomaly, and give the public and the railway shareholders the advantages of accommodating third-class passengers in a just and equitable manner. It would be very amusing to get the traffic managers to explain to a Royal Commission the time-books, and the modes resorted to on nearly all the great railways for excluding third-class passengers from the privilege of travelling in the same direct manner as the first and second-class passengers can. A great deal of third-class traffic must be lost to railway companies by those unjust contrivances; and, in fact, it is well known to many outside the exclusive circle that many do not travel at all simply because the cost is beyond their means, and the delays thrown in the way of travelling third-class from one place to another beyond endurance. There must be a vast number of honest and industrious persons in this country who are debarred from travelling third-class in consequence of the obstructions thrown in their way. In all probability there are two or three times the number of third-class persons in the country than the returns show, and if so, there are elements of additional receipts for passenger traffic.

The following table shows the gross traffic receipts of the fourteen great railways for the years—

Company.	1870. £	1869. £	Increase. £	Miles.
Caledonian	2,076,792	1,988,723	88,069	0.6½
Great Eastern	2,193,897	1,980,083	51,814	748½
Great Northern	2,206,549	2,114,480	92,069	487
Great Southern and Western	571,979	552,938	19,041	419½
Great Western	4,211,987	4,087,500	124,487	1,387
Lancashire and Yorkshire	2,618,443	2,513,062	105,381	123
London and North-Western	6,891,306	6,569,405	321,901	1,504½
London and South-Western	1,[illegible]	1,[illegible]	13,984	560½
London, Brighton, & Sth. Coast	1,[illegible]	1,[illegible]	7,117	385½
Manchester, Sheff., & Lincoln	1,[illegible]	1,[illegible]	*	249
Midland	3,749,004	3,444,940	299,064	831½

North-Eastern	4,506,711	4,075,522	431,189	1,281½
South-Eastern	1,415,775	1,438,107	†	346
Total	35,751,882	34,216,203	1,681,137	10,070
Deduct (* 23,126*l*) (†22,332*l*) decrease			45,458	
Net increase			1,535,679	

Of the 43,127,605*l* received on railways in the United Kingdom last year, the fourteen companies above mentioned received 35,751,882*l* on 10,070 miles of railway, against 34,216,203*l* on 9,770 miles, showing an increase of 1,535,679*l*; leaving 7,374,723*l* for the other lines, against 6,809,458*l* in 1869, showing an increase of 565,265*l*, the total increase being 2,100,944*l*.

In addition to the receipts of 43,126,605*l* there have been receipts on *inferior lines*, the traffic on which was neither published weekly nor monthly, and which, as far as could be ascertained or estimated, amounted to 500,000*l* on 762 miles, the capital cost being about 8,700,000*l*; this, added to the 495,681,000*l* expended on railways, of which the weekly returns appear in the first table, make the total expenditure on the whole of the railways to 504,381,000*l*, the total traffic receipts being 43,626,605*l* and the mileage in operation 14,610 miles.

The following table speaks for itself, and exhibits at a glance the total expenditure and other particulars of those great and useful undertakings in the United Kingdom for the past twenty-nine years:—

Year.	Capital Expended on Railways open for Traffic. £	Average Cost per Mile. £	Total Traffic Receipts £	Average Receipts per Mile for the Year. £
1842	54,380,100	33,362	4,470,700	2,743
1843	60,637,100	34,929	5,022,650	2,895

X.—ENGLISH AND FRENCH MONEY MARKETS IN 1870.

There were ten changes in the Bank of England rates in 1870. The year opened with 3 per cent. as fixed 4 November, 1869, rose to 6 per cent. on 4 August, and fell to 2½ per cent. on 29 September, at which point it remains (Feb., 1871). The following are the details :—

BANK of ENGLAND—*Minimum* Rates of Discount, 1869-70—Leading Items of Bank Accounts at each Alteration.—(0,000's omitted—thus, 17,22 = 17,220,000*l.*)

1 Dates.	2 Bank of England Minimum Rates.	3 Total Bullion.	4 Bankg. Reserve.	5 Circulation, including Bank Post Bills.	6 Private Securities.	7 Consols.

At the commencement of 1870 it was not supposed there would be any great advance in the official *minimum*, except through the improvement in trade, or the disposition to encourage investments. In July the terms of the Bank were advanced from 3 to 3½ per cent., owing to the increased inquiry for accommodation. The rate then went quickly from 3½ to 4 per cent., and eventually from 4 to 5 per cent. At this period the market was suffering greatly from panic, through the fluctuations occasioned by the outbreak of hostilities, and the frightful failures at the Stock Exchange. In August the rate advanced from 5 to 6 per cent., *and on the 12th the Bank of France, after struggling for a week, suspended specie payments.* Subsequently a reaction as rapid as the previous advance took place, the quotations having descended between that date and the 29th of September to 2½ per cent. The large number of *foreign loans* introduced, and their success, has been a matter of surprise to most people. Still it must be admitted that the manner in which they are dealt with is vastly different to what it was in the olden time. It is true that the amount is subscribed, and the market quotation is obtained in regular course, but if it were not for the "confederation of capitalists," otherwise termed a *syndicate*, the issue would be scarcely so encouraging. The stock is, however, arranged for, the market fed when necessary, and the public get supplied, even at higher prices than if they had originally sought allotments. This system has obtained great eminence in France and Germany, and it has since been transferred here.

FOREIGN LOANS, 1870.

Loan.	Issue price.	Amount. £	Paid-up. £
Alabama, $2,000,000, 8 per cent.	94½	450,000	425,250
Buenos Ayres, 6 per cent.	88	1,034.700	910,536
Chilian, 5 per cent.	83	1,012,700	840,541
Egyptian, 7 per cent.	78½	7,142,860	5,607,098
French, 6 per cent.	85	10,000,000	4,000,000
Honduras, 10 per cent.	80	2,500,000	2,000,000
Massachusetts, 5 per cent.	87	619,800	539,226
Montevidean, 6 per cent.	80	3,000,000	750,000
Japan, 9 per cent.	98	1,000,000	980,000
North German, 5 per cent.	96½	7,500,000	2,200,000
Peruvian, 6 per cent.	82½	11,920,000	7,450,000
Roumanian, 7⅛ per cent.	72	600,000	432,000

Russian, 5 per cent.	80	12,000,000	9,600,000
Spanish (Quicksilver), 5 per cent.	80	2,318,100	1,854,480
Tasmanian, 6 per cent.	—	100,000	100,000
Totals		61,632,491	38,062,629

July opened quiet, with trade advancing—money continuing to flow in from all quarters—the new loans all standing at a good premium, and various other financial operations being talked of, owing to the great ease of the money market. But soon all was changed. In the very first week came the announcement of the candidature of Prince Frederick Charles of Hohenzollern for the Spanish crown; the action of France and the impassioned declaration that the election would be regarded by France as a *casus belli* as against Prussia, and a rapid decline on the Paris bourse, caused consternation, and trade and the Stock Exchange were at once unfavourably affected. Then came negotiations, and the official withdrawal of the candidature of Prince Frederick Charles. But this was not enough. France demanded that Prussia should give a guarantee that the candidature should never be renewed. This was declined, and it became pretty evident that the Government of France had determined to take the first opportunity of trying conclusions with Prussia, and on the 15th war was officially declared. Then came the question of the so-called *secret treaty* between Prussia and France for the annexation of Belgium, which added to the panic raging on all the bourses of Europe.

In this country commerce was for the moment paralysed, and a large number of failures took place. Throughout Europe money suddenly advanced in value. On the 15th the Bank of Prussia advanced its rate to 6 per cent. for bills and 7 per cent. for advances on goods, and on the 21st to 8 and 9 per cent. On the 18th the Bank of Brussels raised its rate for discount from 5 to 5½ per cent. On the same day the Bank of Holland advanced its rate from 3 to 4 per cent., on the 20th to 5 per cent., and on the 27th to 5½ per cent. On the 20th the Bank of France raised its rate from 3 to 3½ per cent., and on the 22nd to 4 per cent. During this time bullion was flowing from the Bank of England, but not to an extent to create alarm. The directors, however, feeling bound to follow the course of the continental movement, on the 21st advanced their rate from 3 per cent.—at which it had been fixed on the 4th November previous—to 3½ per cent., on the 23rd to 4 per cent., and on the 28th to 5 per cent., whilst in the open market great caution was exercised, and but little was done under the Bank rate, and in many instances ½ per cent. more was charged. On the *Stock Exchange*, on the declaration of the war, a *heavy panic prevailed*, which was followed on the settlement by a large number of failures, and although the brokers held out bravely to meet the obligations of their defaulting clients, a large number were forced to succumb. In the early part of the month the English funds were supported by purchases on account of the sinking fund and the easy state of the money market; but on the declaration of the war, the panic on the Stock Exchange, and the increased value in money, Consols gave way, although not closing quite at the lowest, and showed a decline of 3¼ per cent. on the month.

Foreign securities were especially affected, and showed a decline in the more speculative of from 12 to 18 per cent.—the heaviest fall being in Turkish, Egyptian, Italian, and Spanish, whilst in many instances the margin was so large as altogether to prevent dealings, and accounts were compelled to be closed, owing to the impossibility of raising money on the stocks at any price. On the *month* the Turkish 5 per Cents. showed a decline of 14, and the 6 per Cent. loans 10 to 18 per cent.; Egyptian, 7 to 15 per cent.; Danubian, 8 per cent.; Italian, 7 to 12 per cent.; Spanish 3 per Cents., 7; and the Quicksilver loan, 15 per cent.; Portuguese, 6; and Russian, 3 to 5 per cent. Even securities which could in no way be affected by a war in Europe gave way to a great extent. Thus *United States* were 8 to 10 per cent. lower; Guatemala, 8 per cent.; Honduras, 12 per cent.; Peru-

vian, 7½ per cent.; Argentine, Brazilian, and Buenos Ayres, 5; and Mexican, 3 per cent., whilst all the new loans went to a heavy discount. The *railway* market followed the foreign, and although the depression was not to quite so great an extent, it was very heavy; thus on the month North-Eastern showed a decline of 12, South-Eastern 10, Great-Western, Midland, and London and Brighton 9, Great Eastern, Great Northern, and Lancashire and Yorkshire 7, London and North-Western 6, Metropolitan District and Sheffield and Lincolnshire 5, and other stocks 2 to 4 per cent. *Bank* shares were not materially affected, owing to the good dividends declared, and the expectation that the increased rates of money would prove beneficial. On *telegraph* shares the decline ranged from 5 to 15 per cent., and, regarding the small amount paid, in some instances even more, Telegraph Construction declined 17½, and India Rubber and Telegraph Works 14 per cent. In *miscellaneous* all securities were more or less affected. Foreign and Colonial Government Trust gave way 8 per cent., Italian Irrigation bonds 10 per cent., Peninsular and Oriental Steam 2, and Royal Mail Steam 3 per share.

The suspensions of the year have not, of themselves, proved important. The failure of the *Crown Bank of Norwich* (Messrs Hudson's and Harvey), was more brought about by the speculation of Sir R. Harvey than any other cause; for the establishment was transacting a comparatively profitable business, had it not been for the involvements of the senior partner. Previously to the panic of July, it is understood that he had been in some respects successful, but just about that date, when the "nervous fidget" came on, he lost his courage, and the first great drop in prices through the war was sufficient, when he found he could not pay his losses, to induce him to attempt suicide. The rest is matter of history, and the bank is now in course of liquidation. A number of stoppages for small amounts have taken place in Liverpool, Manchester, and the manufacturing districts, through the exhaustion of resources in connection with the enfeebled condition of trade during the past four years. Many have been of such extreme insignificance that had it not been for the provincial press recording them, they would never have been known. Perhaps the only London houses of consequence which have been compelled to seek the indulgence of their creditors have been Messrs Lemon Hart and Son, and Messrs Parke Pittar and Co. For the end of the twelvemonth we have been singularly free from mercantile casualties, and, although there is no doubt that the prolonged hostilities between France and Prussia must eventually "tell its tale" associated with those interests, no startling results at present have been produced.

As regards the general results of 1870, so far as the course of *prices of the English and Foreign Government securities* are concerned, the results are favourable to the steady investor; for although there have been many instances of a heavy fluctuation in prices, the final result in the majority of cases, is a considerable increase in the present value over that at the close of 1869, as the following table will show:—

	31 Dec 1869.	Date.	Highst	Lowst.	Date.	30 Dec. 1870.
Consols	92¼	May 31	94⅛	88½	Aug. 5	91⅝

As regards *railway property*, there has been also a material advance in value to the benefit of the stockholder, as is shown in the subjoined table:—

	31 Dec. 1869.	Date.	Highst	Lowst.	Date.	30 Dec. 1870.
Caledonian	76¼	Dec. 14	87	69	Aug. 5	86¼

In 1870, more particularly in the early half of it, there was some revival of activity in the formation of Limited Companies, as the following abstract, prepared for the *Times* by Messrs Spackman and Co., will show:—

Companies.	No.	Capital. Authorised. £	Capital. Offered. £	Deposit. £
Telegraph	12	4,280,000	4,280,000	1,213,500
Manufac. & trading	19	3,862,000	3,299,500	1,264,375
Railways	6	2,757,500	2,115,000	296,250
Mining	34	2,270,600	1,891,100	891,100
Insurance	5	1,100,000	1,100,000	215,000

The average rate of discount at London, Brussels, Frankfort, Paris, Amsterdam, Berlin, and Vienna was as follows in 1870, month by month:—January, 3.82; February, 3.77; March, 3.50; April, 3.46; May, 3.43; June, 3.38; July, 4.70; August, 5.75; September, 4.87; October, 4.47; November, 4.43; December, 4.28. The average for the whole of 1870 was 4.16 per cent.

The average for the year at London was 3.10; at Brussels, 3.33; at Frankfort, 3.97; at Paris, 3.99; at Amsterdam, 4.62; at Berlin, 4.92; and at Vienna, 5.46 per cent.

The rate of discount will be seen to have gradually fallen in the first six months of last year. In July and August, when war had broken out between the Germans and the French, and and when the issue of the struggle was deemed uncertain, there was a rapid advance; but after the great capitulation at Sedan it was seen that the conflict would be localised in France, and there was a gradual return of confidence, the fall in the average discount rate between August and December having been no less than 1.47 per cent. The first crisis of the war may thus be said to be at an end.

The following is a summary of the capital of the various joint-stock banks, industrial undertakings, railways, &c., of *Austria* for the year 1870, with a table showing the dividends paid in that year by some of the companies. The present exchange at London on Vienna is 12.75 florins = £, so that a division of (say) 13 is required to reduce the following sums into sterling:—

The capital of thirty-nine banks was 382,805,000 florins; of thirty-eight railways, 833,770,237 florins; and of fifty-three other industrial undertakings, 156,920,000 florins; making a total of 1,373,425,237 florins—104 millions sterling. Of this amount, 1,109,673,298 florins has been paid up. This does not, however, include the money invested in debentures or mortgages, which, particularly in the case of railways and similar undertakings, represent the large total of about 650 million florins, whilst the mortgages of the banks are computed at about 130 millions of florins.

The following were the dividends, for 1870, of eighteen banks, paying over 5 per cent., the remaining twenty being under that percentage:—

	Per Cent.
Anglo-Austrian Bank	50·0
Boden Credit Anstalt	44·6
Franco-Austrian Bank	35·8
Nieder-Oesterreichischen *Discount* Company	22·5
Credit Anstalt fur Handel and Geworbe	21·8
Vereins Bank	21·0
Galizische Hypotheken Bank	19·5
Oesterreichische Hypotheken Bank	17·8
Wiener Wechselstuben Gesellschaft	16·9
Bohmische *Discount* Bank	13·7
Hypothekar Credit	12·8
Austro-Egyptian Bank	11·1
Anglo-Hungarian Bank	10·5
Wioner Handels Bank	10.1
Allegemeine Hungarische Credit Bank	9·1
Oesterreichische National Bank	8·4
Verkehrs Bank	6·8
Volks Bank	5·7

The returns of the industrial companies may be averaged at from 8 to 10 per cent.; but two of these gave a dividend respectively of 21 and 20 per cent., viz., the Prager Iron Industrial Company and the Inneberger Hauptgewerkschaft.

The dividends of thirteen railway companies, and other companies for the conveyance of passengers and merchandise, were:—

	Per Cent.
Kaiser Ferdinands North Railway	17·2
Oesterreichische Lloyd Steamship Company	15·7
Buschtichrader Railway	10·5
Aussig-Tœplitzer Railway	10·4
Southern Railway	10·0
State Railway	9·9
Bohmische Northern Railway	9·0
Sud Norddeutsche Verbindungen	8·1
Karl-Ludwig Verbindungen	8·1
Danube Steamship Company	8·0
Bohemische West Railway	7·6

The smallest dividend was that of the Vienna Tramway Company, which was 4 per cent. Some other railways declared small dividends, which were supplemented by the guarantee of the Austrian Government.

Edward F. Satterthwaite and Co. (London) report:—

During 1870 *American securities* have commanded a full share of attention on the London Stock Exchange, and almost universally show a marked improvement in quotations at the close of the year.

United States Government bonds have grown in public estimation, and are now much more generally held for investment than at any previous time; this fact has, however, naturally tended to diminish the operations in them, as the bonds now floating on the market have been gradually absorbed, and there is little room for large speculative transactions between this country and America, such as were commenced at the early period which succeeded the American War; the fluctuations now, excepting in so far as all securities are influenced by political events, and are mainly dependent on the alterations in the premium on gold in New York. From 86⅝, the price at which they stood on the 1st January, the quotation steadily advanced to 91⅛, the highest attained during the year. The continued increase in value was temporarily interrupted by the outbreak of the war in Europe, and on heavy continental sales they receded to 78; but the rally from this point was rapid, and at the close of the year they stood at 89⅞. The other descriptions of Six per Cent. bonds have risen in the same proportion. The Five per Cent. 10-40 bonds have found much favour, as although the income on investment is considerably smaller than on the Six per Cent. bonds, many parties have selected them, anticipating that, in view of the extraordinary rapidity with which the United States debt is being reduced, the time may shortly arrive when the Secretary of the Treasury will have it in his power to reduce the interest on the Six per Cents. to 5 per cent. The quotation 88, on 31st December, compares against 83½ at the opening of this year.

The admirable management of the *Illinois Central Company's* affairs gives a steady increase of confidence in the shares, which have advanced from 102, at which they stood on the 5th January, 1870, to 114. The funds in the hands of the directors will, we believe, warrant them in paying the dividend due 1st February in gold, and we expect to find that the accumulation from land sales will largely increase the sum set apart and invested for the redemption of the debt due in 1875, thus bringing the bonded debt of the company down to a very limited amount. We have here an instance of what results can be obtained in American enterprise when honestly carried out.

Erie shares have been largely dealt in, and the action taken by the Shareholders' Protection Committee having proved efficacious in putting a stop to the disgraceful proceedings of the directors in the continuous issue of shares, they gradually improved to 22. During the panic in July, however, there was a reaction, and they receded to 13¾, the lowest point ever touched since the reorganisation of the company about ten years back. In common with other stocks, from this low point there was a rapid rally; and, although the efforts of the committee in the law courts of America have so far, to a great extent, been frustrated by the nefarious contrivances of the "clique," and the bias of the judges in its favour, the shares now stand nearly three dollars higher than a year ago. We have from time to time called attention to the large purchases of this company's shares made on American account; these, in the aggregate, amount to many thousands.

Sound railroad bonds have been steadily taken by investors, and, as a rule, show an improvement in value.

Illinois Central Redemption are so well held as a permanent investment, and so rarely come to market, that the fluctuations are reduced to a minimum; even during the panic the price was not affected.

The confidence inspired in the *Pennsylvania Railroad* by the able and upright way in which the affairs of the company are conducted, together with the prosperous state of the undertaking, has caused considerable inquiry for the General Mortgage bonds, so that from 86½ they have advanced to 90½.

The United Canal and Railway of New Jersey have also elicited inquiry, and an advance of 2 per cent. is well maintained.

Central Pacific bonds have been taken to a considerable extent, the earnings of the road are far beyond the expectations formed of the amount of net earnings which would be realised so soon after the completion of the road. The receipts appear to be steadily on the increase; and already, after ample allowance for working expenses, are greatly in excess of the requirements for payment of interest on the First Mortgage bonds; the demand for them has been both home and continental, and but for the war would probably have been larger on the latter account.

With regard to the *Atlantic and Great Western bonds and debentures*, the agreement entered into with Messrs Bischoffsheim and Co. to receive the various securities in trust, has received the adhesion of a very large proportion of holders, and it was hoped that the arrangements made for the foreclosure would have been completed before the end of the year; but, so far, we have no intelligence of the result of the pending suit.

In new loans, we have had during the year an issue of 619,800*l* *Massachusetts Five per Cent. sterling bonds* at 87, offered by Messrs Baring Brothers. The high esteem in which the securities of this State have always deservedly been held secured an ample subscription of a first-class character.

Messrs J. S. Morgan and Co. in April offered for subscription 800,000*l* sterling Seven per Cent. bonds of the *Illinois and St Louis Bridge Company*, redeemable at par in thirty years; the bonds were well subscribed for, but although the most favourable accounts are transmitted as to the progress of the works, they have not maintained their issuing price.

The State of *Alabama* has, through Messrs J. Henry Schröder and Co., brought out a loan for the State of Alabama, 2,000,000 dollars Eight per Cent. Gold bonds, at 94½ per cent. Interest payable at 4s 6d per dollar.

NOTE ON THE TABLES SUBJOINED.

Table *A.*—*Wholesale Prices of Commodities*—1845-50, 1851-69, and 1870.—We have followed in this table the arrangement and method adopted by Mr Tooke and Mr Newmarch in the History of Prices (V. and VI.), and continued by the latter in the *Statistical Journal* for 1859-60 and 1861. The average prices of the six years 1845-50 were first given by the same gentleman in the *Statistical Journal* for March, 1860, and were then described as compiled from the weekly prices given in the ECONOMIST. All the other prices in (*A*) are obtained from the same source. The table, therefore, possesses at least the advantage of being derived from first to last from the same authority.

Table *C.*—*Wholesale Prices—Proportionate Results.*—The construction of this table is explained in the note which is given at the foot of it. It is formed upon the example first given by Mr Newmarch in the *Statistical Journal* of 1859, and since followed by Mr Jevons in his very able pamphlet on the Effects of the New Gold.

After July, 1870, the rate on Paris became very irregular, but short 25.75 was quoted.

The Foreign Exchanges of the five years 1851-55 were so constantly disturbed by the operations arising out of the Russian war, that it is necessary to exclude them from a comparison of the rates of exchange before and subsequent to 1850. The comparison would then be made between the ten years 1841-50, and the fifteen years 1856-70, and the following are the figures:—

Years.	Paris.	Hamburg.	Amsterdam.	Calcutta on London.	Standard Silver.
1841–50	25.76	13.12¼	12.4½	23	59½
1856–70	,, .49	,, .8⅓	11.19	24½	61
Difference	.27	.3¾	.5½	1½	1½
Equal per cent.	1	2	3	6	3

The Indian Mutiny and the Cotton Famine have of course largely affected the Calcutta rate and the price of Silver.

(C) WHOLESALE PRICES, 1845-70.—PROPORTIONATE RESULTS,

The construction is as follows:—The basis of 100 represents the average prices of the six years 1845-50, and all the subsequent figures are calculated from that Datum line. Thus, as regards *Coffee* (Col. 1), the price of 1st July, 1857, was equal to 151, or 5 per cent. above the average prices of 1845-50. In order to ascertain the *percentage* rise or fall between one date and another—as for example *Coffee*—comparing 1st July, 1857, when the figure was 151, with 1st January, 1866, when the figure was 179, or a difference of 28, the rise per cent. has to be measured with the quantity 151, and gives of course a result of 19 per cent. as the real advance. In the course of so long a period of years as 1845-70, some variations have inevitably arisen in the mode of quoting prices in the usual Prices Current. In all such cases, the nearest approach possible has been made to an *uniform* quotation throughout the Table. In *Raw Cotton* especially there have been considerable change of *qualities*, introduced by the large use of Indian, &c., kinds.

[The col. "*Total Index No.*" is the total for each date of all the percentage columns except that of the Bank Note Circulation The "*Total Index No.*" does not of course present a full and accurate representation of the variations of prices, inasmuch as it cannot allow for the relative importance of the different articles. *Wheat*, for example, reckons for no more in the "*Total Index No.*" than *Indigo*. Still the Total Index No., read with the needful qualifications, may afford important inferences. It will not escape attention that the figures representing the *Total Bank Note Circulation of Great Britain* remain almost stationary in the face of the incessant and wide fluctuations in the prices of Commodities.]

(D.) BANK OF ENGLAND—Weekly Return.

Pursuant to the Act 7th and 8th Victoria, c. 32 (1844), for Wednesday in each week during 1870.
[0,000's omitted; for example, £33,20 represents £33,200,000.]

(K) COMMERCIAL AND FINANCIAL EVENTS, 1870

Subjoined is a summary of the principal events of the year 1870 bearing upon commercial and financial interests, from the *Times*:—

JANUARY—1870.

1st.—Consols, 92⅛; French *rentes*, 72f 87c; Bank of England bullion, 19,196,622*l*; Bank of France bullion, 49,488,000*l*; rate of discount, 3 per cent.; gold at New York, 120½. The new Bankruptcy Law came into operation. On the two days preceding, 526 deeds were presented for registration on behalf of parties desirous to come in under the old system.

3rd.—British Australian Telegraph Company introduced, for a line from Singapore, *via* the Dutch Settlements, to Queensland; to be completed in 1871. Capital, 660,000*l*, promptly subscribed.

4th.—Constitutional French Ministry formed under M. Emile Ollivier; great buoyancy in French *rentes*. Prospectus of

Australian Telegraph Company (Singapore to Queensland), 660,000*l*.

7th.—Telegram from Pekin of the conclusion of a Treaty with the Chinese Government, on the 11th of November, by Sir Rutherford Alcock.

10th.—Reconstruction of Spanish Ministry after the crisis caused by the refusal of the Duke of Genoa to accept the throne.

11th.—Tenders received for 1,518,400*l* Five per Cent. debentures of the colony of Victoria. The *minimum* price was fixed at 100¼, and the whole amount was taken at terms ranging from 101*l* to 101*l* 15s 6d.

17th.—Loan of 800,000*l*. City of Boston Five per Cent. bonds, introduced by Messrs Baring at 87.

26th.—Russian Five per Cent. loan for twelve millions stock of 80 (or 79*l* 3s, reckoning allowances), introduced by Messrs Rothschild, in London, Paris, Frankfort, Amsterdam, and Berlin. Immediately quoted at 2 prem., and applications received for an unprecedented amount.

31st.—Chilian Five per Cent. loan of 1,012,700*l* stock, at 83, introduced by Messrs J. S. Morgan and Co. Immediately quoted at 1¼ prem., and applications received for seven or eight times the amount.

FEBRUARY.

5th.—Telegraph system commenced under Government, 5,715,048*l* having been paid as compensation to the various companies.

26th.—Subscription opened by Messrs Baring for 619,000*l* Massachusetts Five per Cents., at 87.

MARCH.

26th.—Opening of the British-Indian Submarine Telegraph.

APRIL.

1st.—Subscriptions invited by Messrs J. S. Morgan and Co. for 800,000*l* Seven per Cent. First Mortgage bonds, at 90, of the Illinois and St Louis Bridge Company, for uniting the railway systems of the United States east and west of the Mississippi. The whole amount taken.

6th.—Alabama Eight per Cent. loan for 450,000*l*, introduced by Messrs J. H. Schröder and Co., at 94½.

11th.—Capture and subsequent murder of three Englishmen and the Italian Secretary of Legation by brigands, near Athens. Budget of Mr Lowe, Chancellor of the Exchequer, showing estimated revenue for 1870-71 of 71,450,000*l*, and expenditure 67,113,000*l*, and consequent surplus of 4,337,000*l*; and proposing reduction of sugar duties to one-half, the abolition of various small licenses, the substitution of a tax of 1 per cent. on gross receipts of railway companies for the existing 3 per cent. tax on passengers (subsequently abandoned), and the introduction of a halfpenny postage-stamp for all newspapers under 6 oz in weight; likewise a reduction of the income tax from 5d to 4d—the result of all these measures being an ultimate probable surplus of 331,000*l*.

12th.—News of defeat and death of Lopez, the Dictator of Paraguay, by the Brazilian forces, and final termination of the war commenced by Brazil, the Argentine Republic, and Uruguay, against Paraguay in the autumn of 1864.

25th.—Japanese Nine per Cent. loan of 1,000,000*l*, introduced by Messrs J. H. Schröder and Co., at 98, secured by Customs' dues and by revenue of railways, for the construction of which the loan was created.

26th.—Egyptian (Daira) loan of 7,142,860*l* Seven per Cent. bonds, at 78½ (or with allowances 77⅝), introduced in London and Paris by Messrs Bischoffsheim and Goldschmidt, redeemable at par in twenty years; followed by a protest addressed by the Turkish Ambassador to Lord Clarendon.

28th.—Tasmanian Six per Cent. loan for 100,000*l*, taken by tender at the price of 107*l* 0s 6d and upwards.

MAY.

8th.—The *Plébiscite* at Paris for the new Constitution and the Imperial dynasty—7,257,379 ayes, 1,530,909 noes.

23rd.—Pronunciamiento at Lisbon, under Marshal Saldanha, and change of Ministry. Fenian raid upon Canada, and immediate defeat and flight.

31st.—Spanish Five per Cent. loan for 2,318,100*l*, at 80, introduced by Messrs Rothschild, on security of Almaden Silver Mines.

JUNE.

4th.—Peruvian Railway Six per Cent. loan for 11,920,000*l* (nominal), introduced by Messrs J. H. Schröder and Co., at 81¼, reckoning allowances, secured by railways, hypothecation of Customs' duties, and guano receipts after 1st July, 1879.

11th.—Subscriptions invited by Messrs Devaux and Co. for 434,381*l* Seven per Cent. bonds of the Roumanian Government Iron Bridges Annuity, at 86.

20th.—Subscriptions invited by Messrs Murrieta and Co. for a Six per Cent. Buenos Ayres loan of 1,034,700*l*, at 88 (or 87½, reckoning allowances). Subscriptions invited by London and County Bank for an Honduras Ten per Cent. loan of 2,500,000*l*, at 80 (or 78, reckoning allowances).

23rd.—Tenders received for 367,600*l* guaranteed Jamaica Four per Cents. A sum of 300,000*l* was taken at 104 and upwards, and the balance was subsequently allotted at the same price. Bank of France bullion, 52,737,000*l*, being the highest total ever reached.

JULY.

4th.—Subscriptions invited by Messrs Baring for 800,000*l* Sterling Six per Cent. bonds of the Baltimore and Ohio Railway Company, at 92½.

6th.—Fall of 1½ per cent. in the French funds, on the announcement of the Spanish throne having been accepted by Prince Leopold of Hohenzollern, and declaration of the Duke de Gramont, Foreign Minister of France, to the Legislative Body, that it would be a question of peace or war with Prussia.

11th.—Continuance of panic on the Stock Exchange, and further average fall of between 5 and 10 per cent. in foreign securities, especially Spanish, Italian, and Turkish. French *rentes*, 68f 40c; Consols, 91⅞.

13th.—Renunciation of Spanish Crown on the part of Prince Leopold of Hohenzollern.

15th.—Declaration of war by France against Prussia, on the refusal of Prussia to guarantee that Prince Leopold of Hohenzollern should never, at any future time, accept the Crown of Spain.

18th.—Suicide of Sir Robert Harvey, and failure of the Norwich Crown Bank (Harvey's and Hudson) for 1,000,000*l*, owing to extensive Stock Exchange speculations by Sir Robert Harvey. Increased panic in the Stock Exchange. Consols, 89½; and foreign and other securities almost unsaleable.

19th.—Increase of panic on Stock Exchange; Consols, 89.

21st.—Bank of England rate raised from 3 to 3½ per cent.

23rd.—Bank of England rate raised to 4 per cent.

25th.—Draft Treaty between France and Prussia against Belgium published in the *Times*. Further fall in the prices of all securities.

28th.—Bank of England rate raised to 5 per cent.

29th.—Proclamation of the Emperor Napoleon to his army, stating that "the war now commencing will be a long and severe one."

30th.—Bank of France rate raised to 5 per cent.

AUGUST.

2nd.—First engagement of the war. Attack on Saarbruck by the French, and evacuation of the place by the Prussians.

4th.—Bank of England rate raised to 6 per cent.

5th.—News of Prussian victory at Wissenbourg, followed by others, in which Marshal M'Mahon was defeated at Woerth, and General Frossard at Forbach. Retreat of the French army upon Metz.

9th.—Fall of the Ollivier Ministry at Paris. Count de Palikao appointed.

10th.—Bank of France rate raised to 6 per cent.

11th.—Bank of England rate reduced to 5½ per cent.

12th.—Suspension of specie payments by the Bank of France, with limit of issue of notes fixed at 72,000,000*l*, and three days later increased to 96,000,000*l*.

13th.—Thirty days' suspension of legal proceedings against debtors granted. War credit increased from 20,000,000*l* to 40,000,000*l*.

14th.—Battle before Metz during retreat of French army upon Verdun. Success claimed on each side.

18th.—Battle of Resonville. Marshal Bazaine intercepted in his retreat to Chalons, and driven back to Metz. Bank of England rate reduced to 4½ per cent.

22nd.—French loan for 30,000,000*l* sterling announced at Paris at 60f 60c (or about 60f, reckoning allowances).

SEPTEMBER.

1st.—Bank rate of discount reduced to 3½ per cent.

3rd.—News of the surrender of the Emperor Napoleon and the entire army of Marshal M'Mahon to the King of Prussia at Sedan.

4th.—Flight of the Empress of the French from the Louvre, and subsequent escape to the Isle of Wight in yacht of Sir J. Burgoyne.

6th.—Foundering of the turret-ship Captain off Cape Finisterre, with between 500 and 600 men, of whom only fourteen were saved.

16th.—Bank of England rate of discount reduced to 3 per cent.

17th.—Postal and telegraphic communication with Paris totally suspended.

20th.—Occupation of Rome by the Italian army.

23rd.—Surrender of Toul to the Prussians.

24th.—Failure of negotiations for an armistice.

29th.—Surrender of Strasburg. Balloon post established from Paris. Bank of England rate reduced to 2½ per cent.

OCTOBER.

11th.—Monte Videan Six per Cent. loan for 3,000,000*l*, at 80 (or 77⅓, reckoning allowances) introduced by Messrs Thomson, Bonar, and Co., but withdrawn a few days afterwards, on advices of political disturbances in that Republic.

18th.—Tenders received for New South Wales Government Five per Cent. loan for 578,000*l*. Adjudication made at prices ranging from 98*l* 3s 6d to 100½.

25th.—French Six per Cent. loan for 10,000,000*l*, at the price of 85 (or 84, reckoning allowances), introduced by Messrs J. S. Morgan and Co., the instalments extending to the 1st of February, 1871.

27th.—Capitulation of Metz.
29th.—Entry of German army into Metz.

NOVEMBER.

7th.—Failure announced of negotiations by M. Thiers for an armistice of twenty-five days.
14th.—Publication of Note from Prince Gortschakoff, disclaiming on the part of Russia the obligations of the Treaty of 1856; followed by a fall in Consols to 91⅞, and a fall of between 5 and 10 per cent. in Turkish, Egyptian, and other foreign securities, the railway and share markets being also proportionately influenced.
16th.—Election of the Duke of Aosta by the Spanish Cortes as King of Spain.
30th.—Repulse of the great sortie from Paris.

DECEMBER.

1st.—Defeat of the Army of the Loire, and capture of Orleans. Capture of Rouen.
8th.—Notification by the Prussian Government of alleged breach of neutrality by the Duchy of Luxembourg, and of the intention of Prussia to disregard in consequence the Treaty of 1867.
13th.—North German Five per Cent. loan for 3,000,000*l*, introduced by the London Joint Stock Bank, at 96½ (or 95*l* 8s, reckoning allowances), redeemable at par in five years.
28th.—Attempted assassination of Marshal Prim at Madrid.
30th.—Death of Marshal Prim.
31st.—Consols, 91¼. French *rentes*, about 52f 50c. Bank bullion, 22,703,536*l*. Rate of discount, 2½ per cent.

(L) LONDON JOINT STOCK BANKS—HALF-YEARLY REPORTS AT 31 DEC., 1870.

THE comparative Tables, as regards 31 Dec., 1870, and the three preceding half-years, are as under:—

(A) LONDON JOINT STOCK BANKS—Dec., 1870—Four Last Half-years, 1869-70—Deposits and Capital. (0,000's omitted—thus 21,98 = 21,980,000*l* and 10 = 100,000*l*.)

	73,10	65,39	67,16	65,08	11,04	11,04	11,07	11,07

Note.—The *London Joint Stock Bank* does not, like all the other Banks, separate *Acceptances* from Deposits. Hence the 17,310,000*l* above must be largely reduced to arrive at the Cash Deposits. In December, 1867, the Acceptances were given at 2,784,000*l*.

The Cash Deposits, exhibited above (A), are higher in the older Banks:—In the *London and Westminster* to the extent of 2⅓ millions, compared with 30 June, 1870; and in the *Union*, 1¼ millions. The mixing up of Acceptances and Deposits by the *London Joint Stock Bank* renders it impossible to make an exact comparison in their case. But the compound figure given, viz., 17,310,000*l*, is 4½ millions *more* than at 30 June last,—and it is impossible to suppose that more than a small part of this large increase is in Cash Deposits. The Deposits in the six younger Banks are scarcely up to the level of June. On the whole, the Table supports the general belief that there is in this country some considerable amount of funds, driven here from France and elsewhere by the war; but it is impossible to do more than guess at the actual extent of these funds. To say 10 millions might be as far from the truth as to say only 4 millions.

The Dividends are much the same as in June, but rather better than in December, 1869; and the Cash and Government Securities do not call for remark. The variations do not seem to be wider than would arise in the ordinary course of business. In the case of the four older Banks the Dividend is of course much assisted by the high proportion borne by the Cash Reserves to the Capital bearing dividend. In these four cases (see D below) the Reserves are 1,820,000*l*, or (say) 40 per cent. of the Paid-up Capital, 4,900,000*l*.

(C) LONDON JOINT STOCK BANKS—Dec., 1870—Acceptances—1868-70.

* The *London Joint Stock Bank* has made no return of its Acceptances since Dec., 1867, when the amount was given as 2,784,000*l*.

The Acceptances (C) are less at the *Union*, especially as compared with 1869; and still more conspicuously less at the *City* and *Consolidated*. As pointed out above, it is probable that they are considerably more at the *London Joint Stock*. But at the *London and County* they are higher than since Dec., 1868. We have often expressed the general opinion of cautious persons against the impolicy of Banks committing themselves to large amounts of Acceptances. The example of the *London and Westminster* is in this respect entitled to high praise. Credit cannot be used twice over with ultimate advantage. It cannot be made the basis of large Cash Deposits, and also of a disproportionate mass of Acceptances floating about the country, and subject in their treatment to the sensitive action of the money market from day to day.

In the next Table (D) we have put together such of the items of the several Bank returns as suffice to indicate with some precision the nature, and profit and loss results, of the several businesses. We begin with the Paid-up Capital and Cash Reserve, and we assume that upon these fixed funds the

managements may well make 4 per cent. per annum. Deducting therefore the produce of this 4 per cent. from the profits of the half-year, we obtain (col. 6) the amount of profit derived from the Banking business itself — that is to say, from the difference between the rates of interest paid on deposits and current accounts and received from discounts, advances, and commission on acceptances, &c.; and this profit admits of being expressed in the concise form of a Percentage (col. 7), the differences in which, comparing one Bank with another, show pretty plainly the varieties in the kinds of business transacted. In the last column (8) are given the Expenses of management, and if these expenses be compared with the banking profits (col. 6) the excess is of course the surplus provided by the business, and available for dividend, reserve, &c.

The following is the Table :—

(D) London Joint Stock Banks—Half-year ended 31 Dec., 1870—Profit Results. (In cols. 1 and 2 the 0,000's are omitted—thus, 2,00 = 2,000,000*l* and 9 = 90,000*l*.

1	2	3	4	5	6	7		8

1,00	50	London and County...	191,000	30,000	161,000	24	3	104000
8,60	1,94	Totals	936,900	220,600	718,300			

The profits in col. 4 are the figures which remain *after* providing for interest allowed and for rebate—but *before* setting aside expenses.

* The *London Joint Stock Bank* mix up Acceptances with Cash Deposits, and, therefore, render it impossible in this case to give the Percentage required in col. 7.

The Table may be read thus:—For example—The *London and Westminster Bank* have 2,000,000*l* Paid-up Capital and 1,000,000*l* Cash Reserve (cols. 1 and 2), together 3,000,000*l*, upon which 4 per cent. per annum provides (col. 5) 60,000*l* in the half-year. The Profits are 243,300*l* (col. 4), leaving 183,300*l* (col. 6) as the sum made upon the employment of 21,986,100*l* of Cash Deposits (Table A), or equal to 16s 7d per cent. for the six months, or 33s 2d per cent. *per annum*. The Expenses (col. 5) are 62,677*l*, which, deducted from 243,300*l*, gives 183,300*l* as the benefit derived from the *business* apart from the Paid-up Capital and Reserve.

The *London and Westminster* shows a Percentage in the half-year of 16s 7d on its Cash Deposits (making, say, 1*l* 13s 2d per cent. *per annum*). The *Union* result is 1*l* 8s 2d for the six months, and the *City* 1*l* 3s 3d. These higher figures, as compared with the *London and Westminster*, indicate, it may be assumed, the contributions to profit and loss of the large aggregate Commissions on Acceptances. The 18s 10d at the *Imperial* and the 17s 3d at the *Alliance* are nearer to the *London and Westminster* standard. The four younger Banks show percentages from 1*l* 3s to 1*l* 16s 6d on the half-year—to be explained, we imagine, by the very much higher rates they obtain by discounts and advances for classes of customers somewhat removed from the stream of the recognised money market. In the smaller Banks the high relative magnitude of the expenses to the banking profits (col. 8 compared with col. 6) proves very plainly the cardinal maxim of all Banking—mainly, that profits are in proportion to the extent to which a Bank can employ not its own money, but the money of other people. The *London and County* show a Percentage of 1*l* 4s 3d for the half-year on their 13½ millions of Deposits. Their very high expenses are accounted for by their numerous Branches. The Commission on their three millions of Acceptances doubtless assist the account.—(Economist, Feb., 1870.)

SCOTCH AND LONDON BANKS.

The Commercial, the National, and the Royal Bank of Scotland have recently held their general meetings, when dividends at the rates respectively of 14, 13, and 8 per cent. per annum were declared. Among commercial men in London there is but a vague idea of the position of these institutions, of their capital, profits, and general stability; and, though of late years several of them have established London branches, City men, who know all about the "Westminster," the "Union," the "County," and the "Joint Stock," are found to be far from well-informed when a Scotch bank is referred to. Yet these establishments are mostly of very long standing, and have obtained positions of great importance. We believe that, if they were better understood here, they would attract a far larger share of business.

The following list enumerates the eight largest Scotch banks, showing their capitals, reserves, dividends, and present market values :—

Bank.	Capital.	Reserve.	Dividend.	Amnt. of Share.	Markt Price.
	£	£	%		
Bank of Scotland	1,500,000	303,000	12	Stock	270
Royal Bank of Scotland.....	2,000,000	431,000	8	,,	180
Commercial Bank of Scotland	1,000,000	354,400	14	,,	285
British Linen Company	1,000,000	346,200	13	,,	265
National Bank of Scotland ...	1,000,000	341,000	13	,,	275
Union Bank of Scotland	1,000,000	313,800	11½	,,	245
Clydesdale Banking Company	900,000	287,900	11	,,	225
City of Glasgow Bank	870,000	273,100	8½	,,	190
	9,270,000	2,650,400			

Thus these eight companies possess 9,270,000*l* of capital, and over 2,650,000*l* of reserve. They pay handsome dividends, and the shares command high market values, ranging from 80 to 185 per cent. premium. Each of these banks, too, holds many millions of deposits, and of bills discounted or securities for loans. For instance, the balance-sheet of the National Bank of Scotland—the fifth on the list—states the amount of the deposits at 8,282,000*l*, besides acceptances; and the discounts, &c., amount to 7,903,000*l*, not to reckon other marketable securities to the extent of 2,905,000*l*.

To draw a contrast between our London banks and those of Scotland is not very practicable, owing to the difference in the constitution of these establishments. All the Scotch banking capitals are dealt in and transferable in the form of stock; while here we deal in *share* capital, a portion only of which is paid-up. For instance, the amount paid-up on the London and Westminster shares is 20*l* per share, or 2,000,000*l* in the aggregate, which is the same as that of the Royal Bank of Scotland; whereas neither the "Union," "London Joint Stock," nor "County" have so large a paid-up capital as the Bank of Scotland. But their *subscribed* capitals are very much larger, that of the "Westminster" being 10,000,000*l*; those of the "Union" and "Joint Stock," 4,000,000*l* each, and that of the "County," 2,500,000*l*. This large amount of uncalled capital it is never intended to utilise; and, as the Scotch establishments are not "limited," we will not in the following statement take into account the amount of the uncalled capitals. The list below comprises eight principal joint stock banks of London — excluding, however, the Bank of England, which has many of the attributes of a State institution. We have, for the purposes of comparison, converted the share capitals into stock; and, where the dividends for the past half-year have not yet been announced, those of last July are reckoned :—

Bank.	Capital Paid up.	Reserve and Surplus.	Dividend.	Amnt. of Share.	Markt Price. %
	£	£	%		(say)
London and Westminster	2,000,000	1,003,000	18	Stock	320
Joint Stock.....	1,200,000	427,800	16⅔	,,	230
Union	1,200,000	304,200	17½	,,	200
London and County	1,000,000	507,200	17	,,	250
Alliance	1,000,000	12,900	3	,,	52
Consolidated	800,000	56,100	7	,,	125
City.....	500,000	96,400	7	,,	115
Imperial	450,000	52,500	6	,,	90
	8,150,000	2,460,100			

Thus, neither the aggregate paid-up capitals nor the reserves, aided though these have been by premiums on new issues of shares, amount in the London banks to the totals for a similar number of the Scotch banks.—(*Financier.*)

(M) THE LONDON DISCOUNT COMPANIES—REPORTS AT 31 DECEMBER, 1870, AND FOR THE PREVIOUS THREE YEARS.

We continue our investigations of former years of the accounts presented by the three public Discount Companies in London—the *National Discount Company*, founded in 1856; the *General Credit and Discount, Limited*, founded in 1863 and reorganised in 1866-7; and the *United Discount Corporation, Limited*, founded in 1865. Besides these three public companies there are, as is familiar to practical persons, a considerable number of Private Discount Houses, some seven or eight of which, it is probable, are of a magnitude fully equal to the average of the three public institutions to be now discussed.

(A) London Discount Companies—1867-70—Capital *Paid up*, and Reserve Funds.

Dates.	National Disc'nt.		General Credit.		United Disc'nt.	
	Capital.	Reserve	Capital.	Reserve	Capital.	Reserve
	£	£	£	£	£	£
1867—31 Dec.....	797,000	497,000	1,500,000	180,000	134,000	—
1868 „	797,000	497,000	1,500,000	180,000	138,000	2,000
1869 „	797,000	497,000	1,500,000	215,000	140,000	2,000
1870—30 June.....	797,000	497,000	—	—	140,000	2,000
„ —31 Dec.....	797,000	497,000	1,500,000	40,000	140,000	4,000

The *Subscribed* Capitals are:—*National Discount*, 4,000,000*l*, in 25*l* shares, with 5*l* paid, selling at 12; *General Credit*, 2,000,000*l*, in 10*l* shares, with 7*l* 10s paid, selling at par; the *United Discount*, 375,000*l*, in 15*l* shares, with 6*l* paid, selling at par.

The diminution of the *Reserve* at the *General Credit* arises from the writing off in 1870 of the losses then ascertained on the South-Eastern of Portugal Railway and the London, Chatham, and Dover Railway for advances made in 1865-6.

The *General Credit* only publish their accounts at 31 December, holding a merely interim meeting in July.

This Table (A) presents but few changes. The Reserve of the *General Credit* is reduced in a manner more apparent than real, in order to adjust the accounts to the ultimate results of "lock-ups," which began in 1864-6.

The next Table (B) is of more interest, as showing the progress of the Deposits held by the companies:—

(B) London Discount Companies—1867-70—Deposits, and Cash and Government, &c., Securities.

Dates.	Deposits.			Cash and Gov. Securities.		
	National Discount.	General Credit.	United Discount.	National Discount.	General Credit.	United Disc'nt
	£	£	£	£	£	£
1867—31 Dec...	6,935,000	763,000	1,053,000	973,000	—	54,000
1868 „ ..	7,946,000	2,491,000	2,088,000	1,338,000	260,000	70,000
1869 „ ...	8,057,000	3,576,000	1,555,000	1,100,000	361,000	56,000
1870—30 June...	8,089,000	—	1,728,000	1,550,000	—	58,000
„ —31 Dec...	9,152,000	4,608,000	2,175,000	1,520,000	726,000	52,000

At 31 Dec., 1870, the *National Discount* return 1,263*l* of *Acceptances*; the *General Credit*, 125,000*l*; and the *United Discount*, nil.

The increase of the Deposits, of course obtained in the largest degree from country and London banks, in each of the three cases since 1867 is remarkable, and justifies the inference that during 1868, '69, and '70, and especially in 1870, there has been a progressive growth in the savings of the country available for purposes of floating capital in the hands of Bankers and Bill Brokers.

The paucity of Acceptances in these accounts is commendable. It was one of the grossest vices of Overend, Gurney, and Co. to have a large amount of outstanding Acceptances. If a prudent Banker will not accept, certainly a prudent Bill Broker will be still more reluctant to do so. It is his business to sit in judgment on the floating paper of other people, not to issue any of his own.

On former occasions we have endeavoured to construct, on the basis of the published accounts of the Discount Companies, *Estimates*, more or less plausible, regarding—first, the total amount of funds employed by Discount Brokers in London as distinguished from Bankers; second, the average unexpired usance of the Bills Discounted with such Brokers; and third, as an inference from the preceding data, the total amount of Bills Discounted by Brokers in London in the year, and the average amount of such Bills falling due in each of the 300 working days—this latter point being of interest, as connected with the fluctuations of the money market from time to time.

The following Table (C) reduces this process into figures:—

(C) London Discount Companies—1867-70.—Progress of Total Means held as Capital, Reserves, and Deposits—Three Companies, as above.

Description.	31 Dec., '70.	31 Dec., '69.	31 Dec., '68.	31 Dec., '67.
I.	£	£	£	£
Capital Paid-up	2,437,000	2,437,000	2,435,000	2,431,000
Reserves	541,000	714,000	679,000	677,000
	2,978,000	3,151,000	3,114,000	3,108,000
Deposits	15,935,000	13,188,000	12,475,000	8,751,000
Total Means	18,913,000	16,339,000	17,589,000	11,859,000
II.				
Average of 3 Companies ...	6,152,000	5,446,000	5,863,000	3,953,000
III.				
Estimate of (say) 7 more Discount concerns (in all 10) at same average	61,520,000	54,460,000	58,630,000	39,530,000
IV.	millions.	millions.	millions.	millions.
Equal at an average unexpired date of 50 days of the Bills Discounted to a *total Discount per annum* of (say)	430	380	410	280
V.				
Leaving to fall due at each of the 300 working days (say)	1,400,000	1,260,000	1,370,000	930,000

The Estimates of this Table (C) proceed, as in former years, on the assumption that the pretty high average of Total Means shown by the public companies applies to seven of the private concerns—making ten in all,—and also on the assumption that the average unexpired term of the Bills discounted by Brokers in London is 50 days. The "turn over" of (say) 1½ million per working day, which results from these data, is quite consistent with and confirmatory of the extreme sensitiveness of the London market to even small variations in the number of Bills offering, or in the money available to absorb them.

In the following Table (D) we bring together the items relating to the Profit and Loss of the Companies, and the proportions of profit arising from Capital, Reserves, and Deposits:—

(D) London Discount Companies—Year 1870—Profit and Loss Results. (In cols. 1 and 2 the 0,000's are omitted—thus, 80 = 800,000*l*, and 4 = 40,000*l*.

1	2	3	4	5	6	7	8		9
Paid-up.		Company.	Half-Year.	Profits, less Rebate.	Computed Results—				Expenses of Management
					Int. 4 % on Cap. & Res.	Yielded by Deposits.			
Cap.	Res.						Pr s	Ct. d	
Mlns	Mlns		1870	£	£	£			£
80	50	National Disc'nt.	June	74,000	26,000	48,000	12	–	10,227
		„	Dec.	77,000	26,000	51,000	11	–	9,927
				151,000	52,000	99,000	23	–	20,154
14	—	United Discount	June	11,100	2,800	8,300	9	6	4,348
		„	Dec.	12,400	2,800	9,600	8	9	3,831
				23,500	5,600	17,900	18	3	8,179
1,50	4	General Credit...	Year	119,000	61,600	57,400	24	10	15,158
2,44	54	Year's Totals ...		293,500	129,200	174,300	21	10	43,491

The Dividend in 1870, of 17 per cent per annum at *National Discount*, absorbs 136,000*l*; of 7 per cent. per annun at *United Discount* absorbs 9,000*l*; of 5 per cent. per annum at *General Credit* absorbs 75,000*l*.

The Profits in col. 5 are the results after allowing for Rebate on Bills in hand at the close of the accounts, but *before* deducting expenses.

We assume in this Table (D) that the managements make 4 per cent. per annum on the fixed funds arising from Capital paid up and from Cash Reserves, and accordingly cols. 7 and 8 give the Total and *Percentage* amounts derived from the Deposits. The average Percentage of the three companies for 1870 is 1*l* 1s 10d per cent. of profit on the Deposits, out of which, of course, expenses, &c., have to be taken before the Dividend Surplus is arrived at. The *National Discount* show a Percentage of 1*l* 3s, and a surplus of business profit over expenses of 79,000*l*; the *United Discount* show 18s 5d, and a similar surplus of 10,000*l*; the General Credit show 1*l* 4s 10d, and a business surplus of 42,000*l*. These Percentages are not very different from the corresponding figures shown last week for the Joint Stock Banks. Assuming the Discount Companies to turn over their deposits (say) seven times in the year, the average margin of profit at each turn over would be (say) 6s per cent.

The *General Credit* are weighted with an excessive paid-up Capital of 1½ million—nearly twice as large as that of the *National Discount*. The *General Credit* should repay half their capital for several reasons, not the least of which is that large paid-up Capitals in the hands of a Discount Company are constant temptations to admit advances of a "finance" character, and where financing begins prudent discounting ends. The *General Credit* have certainly not fallen into this fault, but their large paid-up Capital is a burden and a temptation, which should be lessened.

Finally, as regards the Dividends and Bonus Divisions, we have the following results :—

(E) London Discount Companies—1867-70—Dividends and Bonus per Cent. per Annum on Paid-up Capital.

Dates.	National Discount.	General Credit.	United Discount.
1867—31 Dec.	15	5	6
1868 —	15	5	6
1869 —	16½	5	6
1870—30 June	16	5	7
„ —31 Dec.	17	5	7

The Dividends are rather higher in 1870 than in the three previous years. The *General Credit* would have given better results but for its excessive capital.

It may be assumed with a good deal of confidence that the discount business of London has maintained in 1870 the prudent and safe character of the three previous years.—(Economist, Feb., 1870.)

(N) FINANCIAL AND COMMERCIAL PROGRESS IN 1870, AS SHOWN IN THE STATISTICS OF THE LONDON BANKERS' CLEARING-HOUSE.

(I.)

The *Money Market Review* gives the following excellent analysis :—

The returns issued by the London Bankers' Clearing-house are now complete for 1870, and it will be useful to notice the evidence they afford of the effect of the war on our home financial and commercial settlements. In the following table is given the *total amount of cheques and bills paid through the Clearing-house in each quarter* since that ending with September, 1867. We may thus trace the progress of financial activity and recovery during a period of three and a-half years—a period of more than ordinary interest in many respects :—

Quarter ending—	Cheques and Bills paid through Clearing-house. £	Variation as Compared with the previous Quarter. £
1867—30 Sept.	798,110	...
31 Dec.	800,371	Inc. 2,261
1868—31 March	846,665	Inc. 46,294
30 June	841,786	Dec. 4,879
30 Sept.	851,052	Inc. 9,266
30 Dec.	885,682	Inc. 34,630
1869—31 March	922,107	Inc. 36,425
30 June	890,423	Dec. 31,684
30 Sept.	894,108	Inc. 3,685
31 Dec.	919,758	Inc. 25,650
1870—31 March	1,006,932	Inc. 87,174
30 June	987,164	Dec. 19,768
30 Sept.	968,044	Dec. 19,120
31 Dec.	952,080	Dec. 15,964

Note.—The 000's omitted—thus 798,100 = 798,110,000*l*.

The influence of the war is distinctly indicated in the above figures, and yet it has not had any worse effect than that of checking the extraordinary progress which had been observable up to the spring of last year; thus, the amount cleared during the last three months, though the lowest of the year, exceeded that for any quarter in the preceding two and a-half years. Until the end of March, 1870, each quarter, except those ending with June, had shown an increase over the total clearings of the previous three months. The aggregate cleared in the March quarter of 1870 actually exceeded a thousand millions sterling. Here, indeed, was unmistakeable evidence, as far as figures can show it, that even the after-effects of the panic of 1866 had completely passed away. As in the two previous years, the June quarter showed some decline, amounting to nearly twenty millions. A similar reduction occurred in the September quarter; and again in the last, or December, quarter (which in the three previous years had always surpassed the September quarter) there has been a further reduction of close upon sixteen millions.

We will now draw out the *monthly totals* of 1870, and compare them with the corresponding figures for 1869, at the same time giving the variations :—

Month.	1870. £		1869. £		Variation in 1870. £
Jan.	350,456	against	314,879	Inc.	35,577
Feb.	307,224	„	291,723	„	15,501
March	349,252	„	315,505	„	33,747
April	325,270	„	315,868	„	9,402
May	327,368	„	284,007	„	43,361
June	334,526	„	290,548	„	43,978
July	369,295	„	328,223	„	41,072
Aug.	312,015	„	286,249	„	25,766
Sept.	286,734	„	279,636	„	7,098
Oct.	313,600	„	304,819	„	8,781
Nov.	310,593	„	294,688	„	15,905
Dec.	327,887	„	320,251	„	7,636
Total	3,914,220	„	3,626,396	„	287,824

Note.—The 000's omitted—thus 350,456 = 350,456,000*l*.

It will be observed that an *increase* has taken place in every instance, and that in May, June, and July last the excess over the corresponding months of 1869 was, in each month, more than 40 millions. In *July* the total clearings amounted to more than in any other month yet reported upon. Much of the immense business of the Clearing-house in that month must be attributed to the fact that the sudden outbreak of war caught people unawares, so that a very general closing of open engagements at once took place. In August the clearings were reduced by 57,281,000*l*, and in September they were again reduced by 25,281,000*l*. So serious a reduction as this, occurring in two months, has never before been recorded. It is, however, worthy of notice, as an indication of some recovery, that the paid clearings of the past month (December) have only been exceeded in five previous months—namely, four in 1870 and one in 1869.

The aggregate clearings of 1870 amounted to the enormous sum of 3,914,220,000*l*, being 217,824,000*l*, or nearly 8 per cent more than in 1869, and 481,035,000*l*, or 14¼ per cent. more than in 1868.

The total of cheques and bills paid through the Clearing-house on "*the fourths*," or *inland bills' days*, has amounted during the past year to 176,137,000*l*, as against 169,729,000*l* in 1869, and 155,068,000*l* in 1868, showing that there has, in each year, been an increase to a fair extent. The last six months of 1870, however, have not been so favourable to the home trades affected by these special clearings, there having been a decline in the amount as compared with the first half of the year, whereas in the two previous years the last six months had exceeded the first six months.

As regards *Stock Exchange business*, we find that the total amount of the clearings on the twenty-four settling days in stocks and shares has been for the past year 634,914,000*l*, against 654,935,000*l* in 1869, and 523,349,000*l* in 1868. The increase in 1870 over 1869 was 69,979,000*l*, and the latter year exceeded 1868 by 41,586,000*l*. We must point out, however, that nearly the whole of the increase in 1870 over 1869 occurred in the first half of the year, the decline in the last six months, as compared with the six months ending in June, 1870, having amounted to no less than 57,358,000*l*—that is to say, had there been no interruption to the progress of business on the Stock Exchange, the increase for the year on the settling days in stocks and shares would probably have amounted to more than one hundred and twenty millions.

(II.)

The three following tables relate to the business of the *Stock Exchange*. In the first place (A) we give the average *daily* amounts cleared on the fortnightly settling days in stocks and shares during each of the four quarters, as well as for the whole of the year just ended, as compared with the corresponding daily averages for the year 1869, and we also show the varia-

tions. The second (B) table gives similar information in connection with the second or next following day to each fortnightly settlement. These days are next in importance to the "account days." In fact, excluding the latter, we find that the highest day recorded in each year since these returns have been issued has been one of these "second" days. The third (C) table relates to the business of the *monthly settling days in Consols*:—

CLEARING-HOUSE STATISTICS RELATING to STOCK EXCHANGE SETTLING DAYS—000's omitted.

(A)

Quarter ending—	Average Daily Clearing on Settling Days in Stocks and Shares. 1870. £		1869. £	Average Daily Variation in 1870 as Compared with 1869. Decrease. £	Increase. £
March 31	27,674	against	24,604	—	3,070
June 30	30,015	„	23,067	—	6,948
Sept. 30	24,584	„	23,103	—	1,481
Dec. 31	23,545	„	23,382	—	163
Whole year	26,455	„	23,539	—	2,916

(B)

Quarter ending—	Average Daily Clearing on the Day Following each Fortnightly Account Day. 1870. £		1869. £	Average Daily Variation in 1870 as Compared with 1869. Decrease. £	Increase. £
March 31	15,375	against	15,427	52	...
June 30	14,473	„	12,304	—	2,169
Sept. 30	14,249	„	12,658	—	1,591
Dec. 31	14,500	„	13,699	—	801
Whole year	14,651	„	13,450	52	1,201

(C)

Quarter ending—	Average Daily Clearing on Settling Days in Consols. 1870. £		1869. £	Average Daily Variation in 1870 as Compared with 1869. Decrease. £	Increase. £
March 31	12,982	against	13,763	781	—
June 30	14,501	„	12,007	—	2,494
Sept. 30	12,976	„	11,132	—	1,844
Dec. 31	13,952	„	13,076	—	876
Whole year	13,602	„	12,494	781	1,108

These tables enable us to mark the decline or progress in the amount of business from quarter to quarter, as well as the variation compared with the same periods of the previous year. It will be seen that, during the last three months of 1869, the average daily clearings on the *fortnightly* "account days" were a little over 23¼ millions; in the next, or first quarter of the past year, the settlements on each "account day" increased to an average of more than 27½ millions; and in the succeeding three months, ending June 30, 1870, the average actually exceeded 30 millions. But although the two settlements in July last—the month marked by the declaration of war—averaged no less than 31,380,000*l*, the average amount during the next, or September, quarter declined 5½ millions; and this was followed by another reduction of a million in the quarter ending with December last, bringing that quarter's average down to 23,545,000*l*, or more than four millions per day less than the settlements in the first quarter of the year.

The contrast of the business of each quarter with the corresponding periods of 1869, presents some remarkable points. In the June quarter of 1870 the increase over 1869 was close upon seven millions, while in the last three months (ending Dec. 31, 1870) the increase over the last quarter of 1869 was only 163,000*l*.

Thus, although the average for each "account" during 1870 has exceeded by nearly three millions the figures of the previous year, it is yet clear that, in consequence of the war, and the generally unsettled state of foreign politics, a serious check has been given to the general extent of Stock Exchange business during the last few months.

The largest settling day in the past year was June 15th, when the amount was 33,952,000*l*, and this was the highest total ever yet recorded on any one day. The maximum amount in 1869 was 27,494,000*l* on Dec. 15; and in 1868, 27,198,000*l* on Oct. 30—or 6½ and 6¾ millions less respectively than the highest point in 1870. The lowest amount on the fortnightly "account days" of the past year was 18,741,000*l* on Sept. 15, against 19,440,000*l* on Oct. 29, 1869, and 18,213,000*l* on Aug. 28, 1868. The smallest amount ever yet recorded on a fortnightly "account day" was 14,371,000*l* on Sept. 13, 1867. The extreme fluctuation, as might have been expected, has been greatest in the past year, being no less than 15,211,000*l*, as against 8,054,000*l* in 1869, and 8,985,000*l* in 1868.

The table (B) giving the average amounts of clearings on the "second" days is also interesting. It will be observed that the amounts in the last quarter have been rather more than in either of the two preceding quarters, and that for the last half-year (ending Dec. 31, 1870), the increase on these "second" days, as compared with the corresponding period of 1869, has exceeded the actual increase on the "account days" (shown in the first table) for the same period.

The amount of business (C) at the Clearing-house on Consols' "account days" during the past year averaged 1,108,000*l* more each "account" than in the previous twelve months. But the comparison of these figures is not exactly accurate, owing to the fact that the "fourths" or inland bills' days sometimes occur on the same day. Apart, however, from such occasions, it seems clear that, relatively, more business has been transacted in the market for the English funds.

Our next tables (D and E) supply information with reference to the ordinary transactions of *trade and commerce*. We give the amounts for the "fourths" of the month, or *inland bills'* days, separately:—

CLEARING-HOUSE STATISTICS RELATING to GENERAL BUSINESS TRANSACTIONS—000's omitted.

(D)

Quarter ending—	Average Daily Clearing on "the Fourth" or Inland Bills' Days. 1870. £		1869. £	Average Daily Variation in 1870 as Compared with 1869. Decrease. £	Increase. £
March 31	14,582	against	14,336	—	246
June 30	15,272	„	13,409	—	1,863
Sept. 30	13,805	„	14,614	809	—
Dec. 31	15,053	„	14,218	—	835
Whole year	14,678	„	14,144	809	534

(E)

Quarter ending—	Average Daily Clearing on Ordinary Days. 1870. £		1869. £	Average Daily Variation in 1870 as Compared with 1869. Decrease. £	Increase. £
March 31	11,287	against	10,527	—	760
June 30	10,876	„	10,077	—	799
Sept. 30	10,775	„	9,873	—	902
Dec. 31	10,523	„	10,332	—	191
Whole year	10,860	„	10,202	—	658

These *bills' days* of 1870 have shown a fair increase in amount over those of the preceding twelve months. The first three months of 1870 gave an average improvement of 364,000*l* per day over the last quarter of 1869, and a still larger addition occurred in the June quarter. A heavy reduction followed in the September quarter, but this was nearly all recovered in the last three months of the year. These figures more particularly indicate the settlements in connection with our *internal trade*, including that classed as the Manchester or drapery business. There have been some important variations on these days during the past year. On May 4th, and December 3rd, 1870, the amounts were the highest yet recorded on such days, whilst the amount for April 4th was lower than any known since June, 1868. It was, however, mentioned at the time that the instances of default in providing for the bills maturing in April last year were exceptionally numerous. The figures for April 4th were 12,194,000*l*—the lowest "fourth" of the year; and on May 4th they were 18,081,000*l*—the highest of the year; but the latter day was also settling day in Consols.

We now come to the transactions *on ordinary days* (E)—that is to say, excluding *every* stock exchange settling day, and also the inland bills' days. The result is that, while each quarter gives an increase over the corresponding figures of the year 1869, there has been, on the average, a continued decline in each of the three last quarters of the past year *as compared with the preceding three months*. The reduction in the September quarter as compared with the June does not appear to have been very important; but this arises from the fact that in July, 1870, owing to the general desire to bring outstanding engagements to a close, so as to be prepared for contingencies, the average settlements on these ordinary days amounted to no less than 11,945,000*l*, being the highest average known in any previous or succeeding month, and more than a million in excess of the figures of either May or June. In August, however, the average daily sums cleared fell to 10,573,000*l*, and further declined to 9,895,000*l* in September. That is to say, so great was the shock caused by the outbreak of war, that, after closing open accounts, the average ordinary settlements were reduced as much as 2,050,000*l* per day in the course of two months.

Thus we find that, the same as with the business of the Stock Exchange, the general financial transactions of the country showed in 1870 a satisfactory increase as contrasted with 1869; but that, instead of a gradual and progressive improvement throughout the year, a distinct falling off occurred in the latter half. Up to the commencement of the war, the remarkable feature of these valuable statistics was the almost uninter-

rupted increase in the amount of business transacted at the Clearing-house.

(O) MATERIAL PROGRESS OF IRELAND IN 1870.

The *Times'* Dublin correspondent writes on 31 December, 1870 :—

At the close of a year in which Ireland has occupied a large share of Imperial attention, it may be interesting to review its material condition so far as it may be ascertained from authentic evidence. It will form, perhaps, a suitable appendix to the historical retrospect which is usually taken at this season. As to the political effects of the legislation of 1870, it would be premature to speculate. Two great measures which have signalised the last two Sessions of Parliament are as yet practically untried. In fact they will only come into force in 1871. No fruits can be expected from them for some time, except so far as the fact of their enactment may have sown the seeds of contentment or of dissatisfaction in the minds of the classes affected by them. The social circumstances of the country will no doubt be largely influenced by their operation, which it may be hoped will be altogether beneficial. At present we have some means of forming a judgment wholly independent of their probable effect.

The complete organisation of the *Poor Law system* affords the most accurate information as to the state of the country, and it is satisfactory to find in authentic records of the several Unions proofs of steady and progressive improvement. An abstract of official returns for the year ended September 29, 1870—six months later than the last annual report—gives the following statistics :—The *net annual value* of rateable property in Ireland at the latest date was 13,183,304*l*. At the same period in 1869 it was 13,153,499*l*, showing an increase of 29,805*l*. It may be observed that if there were a complete re-valuation of Ireland, as there is likely soon to be, it would probably exhibit a much higher value of property than at present appears. In Dublin especially there has been a great increase in the rental of houses —from 25 to 100 per cent., and even higher in some of the leading thoroughfares—although the register for rating purposes has for some years undergone comparatively little change. The provinces contribute the following proportions to the total value :—Ulster, 3,998,204*l* ; Munster, 3,336,455*l* ; Leinster, 4,498,377*l* ; and Connaught, 1,350,268*l*. The total amount of *poor rate* lodged for the year was 754,917*l*. In 1870 it was 815,480*l*, showing a decrease of 60,563*l*. The sum expended in maintenance and clothing was 383,273*l*. In 1869 it was 403,255*l*, being a decrease of 19,982*l*, or so much saved for the benefit of the ratepayers. The total cost of *out-door relief* was 59,727*l*. Last year it was 48,184*l*, showing an increase of 11,543*l*. Since the last amendment of the Poor Law Act there has been a gradual increase in out-door relief, which for many years was practically unknown in Ireland. The proportions expended by the four provinces were—Ulster, 7,395*l* ; Munster, 15,932*l* ; Leinster, 31,802*l* ; and Connaught, 4,398*l*. In the expenditure for *emigration*, from the workhouses there was a fractional increase of 157*l* over last year, the whole sum being 2,102*l*, of which 1,012*l* was given by Munster, 168*l* by Ulster, 516*l* by Leinster, and 406*l* by Connaught. Salaries and rations of Poor Law officers cost for the year 114,450*l*, a sum in excess of last year by 3,359*l*. All other Poor Law expenditure was 109,115*l*, which was less than last year by 2,294*l*. The total expenditure for poor relief was 668,667*l*. In 1869 it was 675,884*l*, showing a reduction to the amount of 7,217*l*. To this total must be added the expenses of the *Medical Charities Act*, 130,296*l*, an increase of 6,578*l* over last year ; cost of administering Act for Registration of Births and Deaths, 12,966*l*, which is 541*l* more than in 1869 ; expenses under Sanitary Act, 3,318*l*, which is only a fraction more than last year ; and expenses of Burial Grounds Act paid out of the Poor Rate, 2,977*l*, which is 518*l* more than last year. These additions raise the total expenditure from the poor rates of the year to 818,224*l*, which shows an increase of 452*l* over that for 1869. It is to be observed that the return of expenditure is made in anticipation of the official audit, but will be found to be a close approximation to the actual expenditure. It may be also thought an extraordinary financial feat, or a piece of improvidence, to expend 818,224*l*, although the total amount of poor rate lodged was only 754,717*l*, showing a deficit of 63,307*l* ; but the explanation is that, in addition to the collection of the poor rate, a sum of about 5,000*l* is raised by the Union from other sources, and about 70,000*l* received from the Parliamentary grant in aid of medical and educational expenditure.

The estimated *number of persons who were relieved* during the year ended the 29th of September, 1870, is 285,530, of whom 55,400 were out-door recipients, being 6,117 more than in 1869. In the total number there is a fractional increase of 152, but the number of paupers in the workhouses was 5,962 less. Pauperism may be said to have reached its normal condition. It has touched the minimum point. The number of *paupers in the workhouse* is the only accurate test of destitution. There may be occasional fluctuations in the extent of out-door relief, but the workhouse offers the only certain measure of distress. These are considerations which make the returns more satisfactory. *There are no able-bodied poor receiving relief.* It is limited to the aged and infirm. The labouring classes are employed, and need no doles from the public funds. The number of inmates in the workhouses, diminished as it is compared with former years, is greater than the actual number of paupers. It is to be remembered that many of the poorer classes enter the workhouses for the purpose of receiving the benefit of the excellent hospital treatment which is afforded in them. A certain proportion of destitution must be expected. Poverty is, in fact, the shadow of wealth. As social inequalities become more strongly marked as a country progresses in prosperity, we need be as little surprised at seeing poverty and wealth side by side as we should be to see the contrasts presented in the face of nature.

In a *mercantile point of view*, the year 1870 has been favourable for Ireland. The agricultural classes have been benefited by the high prices for all descriptions of live stock, and there is no want of money in the country ; credit is sound, and bankruptcies and insolvencies are comparately rare. *Railway traffic*, too, has increased in all directions, including the lines in the North, where the dulness in the linen trade was calculated to produce an adverse effect, and several projects for branches and extensions will come before Parliament in the ensuing Session. When some of these proposals shall have been carried out, and it is stated they are partly supported by the London and North-Western Company, there will be unbroken communication by rail between North, South, East, and West, as the principal lines will be then connected together on the north side of Dublin. The scheme of "The Dublin Trunk Connecting Railway Company," which was intended to do this, and to join all with the Dublin, Wicklow, and Wexford line by a tunnel under the River Liffey, will in effect be carried out, with the exception of the tunnel. It seems also worthy of remark that the port of Dublin is becoming every day more important, and the connection of the northern and southern lines of railway, now pushing their way down the river side, as has been long since done by the Midland Great Western, will add to its facilities and consequent value.

Extensive improvements to meet the increasing trade are in progress, and a contract has been just entered into for new works, at a cost of 71,000*l*, which will enable the boats of the City of Dublin and London and North-Western Companies to leave without interruption or delay at all times of the tide. In recent years Dublin has become a more important depot for foreign grain and flour, but the total imports of these articles in 1870 show some falling off as compared with 1869, the portion of the gross receipts, however, showing some increase in the cross-Channel direction. The shipments of grain to the other side of the Channel are principally composed of *oats*, and the exports of these, as well as oatmeal, exhibit a considerable diminution. As is well known, the live stock going to different parts of England and Scotland forms a very considerable portion of the carrying trade of the steam-vessels leaving Dublin and the shipments.

The exportation of *porter* has been well kept up in 1870, and the shipments from this port, which are much the same as in 1869—say, in round numbers, 270,000 hogsheads—show the continued prosperity of this branch of business. Equal strides have been making in the *whisky trade* also, the shipments of which alone are now more than five times greater than they were seven years ago, and, in addition to recent large extensions in the principal distilleries, one of the largest and most enterprising firms has made arrangements for plant capable of actually doubling their present production, which is now equal to about 1,000,000 gallons annually. Another satisfactory feature in respect to Irish industry of some notice is the gradual and large extension of the *Dublin tabbinet and poplin manufactures*, the large orders received having actually necessitated not long since the not very frequent expedient of getting hands from England.

The records of *crime* for 1870 will show a most gratifying improvement. There are still, however, some exceptional districts where the law continues to be set at defiance, and moral influence seems powerless to subdue the evil passions of the people.

(P) OVEREND, GURNEY, AND CO. (LIMITED).—FINAL RESULT OF LIQUIDATION.

The following report has been issued by the liquidators to the shareholders :—Herewith we beg to hand you a statement of the affairs of this company, showing the result of the liquidation at the 31st December, 1870, whereby it will be seen that the indebtedness has now been reduced to the sum of 162,504*l*. Notwithstanding our efforts to realise from the outstanding assets the amount required to meet the last instalment of the creditors' claims, we were unable to do so, and in June last we found ourselves under the necessity of either borrowing a large sum for that purpose, or of applying to the Court for another call. Being most desirous of averting any further demand on the shareholders, we succeeded in obtaining a loan of 200,000*l*, with which the claims of the creditors were finally satisfied. Although we have not to this date been able to repay the whole of the amount borrowed, we believe that we shall shortly be in a position to reduce very considerably the balance now owing. The assets and securities which have still to be realised comprise—bills receivable current, railway bonds, debentures, stocks, and shares, land in France and Sweden, reversionary interests,

debtor balances, and unpaid bills. In the following statement we have divided the estimated values into two classes (columns A and B), so as to distinguish between those which we have every reason to expect will realise the estimates put upon them, from those with reference to which it is impossible to form an opinion with any degree of certainty :—

Assets and Securities.	A	B
Bills receivable current	£25,928	£
Railway bonds, debentures, stocks, and shares	57,657	46,112
Land in France and Sweden, and sundries	26,244	68,280
Debtor balances and unpaid bills	118,096	252,371
Unpaid calls	5,000	
		366,763
		232,926
		599,689

It will be seen that from the former class we anticipate we shall receive about 230,000*l*; the latter should produce about 365,000*l*. Out of these assets, of course, the balance due in respect of the loan will have to be paid. It should be understood that, carefully as these estimates have been framed, the very nature of the assets is such as to preclude the possibility of arriving at a reliable estimate of the ultimate result of their realisation, and it is equally impossible for us to indicate the period within which such realisation is likely to be completed. We are fully aware of the desire which all parties interested must have to see this liquidation finally closed, and we shall continue to use our best endeavours to attain that end, and shall distribute the surplus from time to time as it may arise, commencing at the earliest moment we are in a position to make any return. The contributories (exclusive of the members of the old firm) hold in the aggregate 91,677 shares. The first call of 10*l* per share produced 843,787*l*. It has been paid in full on 82,041 shares, which are held by 1,941 persons, and partially paid on 7,258 shares, which are held by 174 persons. The second call of 10*l* per share produced 805,048*l*. It has been paid in full on 79,591 shares, which are held by 1,846 persons, and partially paid on 8,952 shares, which are held by 235 persons. The third call of 5*l* per share produced 393,225*l*. It has been paid in full on 78,491 shares, which are held by 1,778 persons, and partially paid on 558 shares, which are held by 39 persons. The total amount paid by contributories in respect of the three calls has been 2,042,061*l*, and it is probable that further payments to the extent of 5,000*l* may be obtained. To this date 49 persons on the list of contributories, holding in the aggregate 2,574 shares, have become bankrupts, or have executed trust deeds. Evidence of inability to pay in full has been furnished by 169 contributories, who hold in the aggregate 6,071 shares, and of these 160 have made proposals to compromise their liability. In 155 cases terms of compromise have been arranged, and there are five cases still under consideration. The number of contributories whose addresses have not yet been ascertained is now reduced to twenty-two, and these persons hold in the aggregate 491 shares. It is probable that, in the result, the three calls will have been paid in full on 78,600 shares. It will doubtless be remembered that one of the assets of the estate of Messrs Overend, Gurney, and Co. was the interest of the partners in the goodwill of the Norwich Bank, which had been sold by them for an amount equivalent to the net profit to be earned in the four years subsequent to the sale, such sum when ascertained to be treated as payable at the time of the sale, and bearing interest at Bank rate with half-yearly rests. The deed transferring the business provided that the purchasers should take the assets and discharge the liabilities of the bank, the outgoing partners giving their guarantee against any deficiency, and in aid of such guarantee the purchasers were to retain the amount payable for the goodwill. At the date of the sale, and even for some time after the failure of the limited company, it was hoped that there would be a surplus over and above the value of the goodwill; but this unfortunately turns out not to be the case. In the early period of the liquidation, a sum of 200,000*l* was included in the estimates, as likely to be realised from this source, but subsequently circumstances occurred which induced us to exclude the amount altogether from the statement of affairs. At the time of the sale the bank held bills for a considerable amount, which had been taken from Overend, Gurney, and Co. (on which the limited company was not liable.) Against these bills securities were held, which have since been partially realised, and there is now no doubt that after the realisation of the whole, there will remain a deficit which the purchasers of the business will make good out of the price payable by them for the goodwill, and which may probably absorb the entire amount. A statement has been rendered to us by which the amount, which would otherwise have been payable with respect to the goodwill, appears to be about 198,000*l*. On our investigation of the books, for the purpose of testing the accuracy of this statement, differences of opinion arose as to the construction which ought to be put on some of the clauses of the deed, which relate to the manner in which the final account is to be made up, and by which, in our opinion, the amount payable is materially affected. These differences will probably have to be referred to arbitration, and until they are disposed of we shall not be in a position to state the result. In our last report, we informed the shareholders that a bill had been filed against the directors of the company, with the view of making them responsible for the losses incident to the purchase of the business which have been sustained by the shareholders. The bill was demurred to by the executors of the late Mr Gibb, and the demurrer was argued before Vice-Chancellor Malins, who overruled it, but on appeal to the Lord Chancellor, the decision of the Vice-Chancellor was reversed. This, in effect, would have put an end to the proceedings, but from the great importance of the case we considered it to be our duty to submit the judgment of the Lord Chancellor and the opinions of counsel thereon to the Vice-Chancellor, who thereupon directed an appeal to the House of Lords. This appeal is still pending, and we are advised that it is hardly possible it can come on for hearing during the next Session.

WM. TURQUAND, R. P. HARDING, } Liquidators.

London, 57½ Coleman street, E.C Jan., 11, 1871.

OVEREND, GURNEY, and CO. (Limited.)
Statement of Affairs, December 31, 1870.

		£
The liabilities at the date of the suspension of the company, on the 10th May, 1866, amounted to		18,727,915
And comprised—		
Amounts due to creditors, unsecured	£3,818,849	
Amounts due to creditors, holding security	6,018,835	
Amounts on acceptances	624,182	
Liabilities on bills rediscounted	8,266,048	
	18,725,915	
The interest allowed to creditors since the 10th May, 1866, has been		351,106
		19,079,021
This total has been reduced—		
By the realisation of securities held by, or applicable to, the claims of particular creditors, by sets-off, and by the payments of other parties liable on bills	£14,162,682	
By dividends, &c., paid to creditors	4,911,834	
		19,074,517
Leaving the present indebtdness of the company, in respect of unclaimed balances and dividends		4,504
And the balance of loan obtained to make up the amount required to meet the last instalment paid to the creditors	£178,000	
Less amount on deposits	20,000	
		158,000
		162,504

The assets comprise—	A	B
Cash	£2,070	—
Bills receivable, current	25,928	—
Sundry debtors, estimated to produce	9,720	60,556
Unpaid bills, estimated to produce	43,034	198,294
Suspenses and guarantee account, estimated to produce	112,950	105,132
Separate estates, estimated to produce	36,291	2,789
Unpaid calls, estimated to produce	5,000	—

(R) TREASURY MOVEMENT AT NEW YORK FOR EACH MONTH OF 1870, AS GIVEN BY THE NEW YORK *COMMERCIAL CHRONICLE.*

The general movement of Coin and Bullion at New York in each month of the year 1870, and the totals for the whole year, are shown in the table below. A brief explanation of the method in which these figures are compiled, and of the precise meaning of the several column headings will enable the most casual reader to understand them thoroughly, and to see at a glance how large an amount of information in regard to the specie movement is here brought together.

The first and last columns simply show the amount of specie in New York city banks and Sub-Treasury on the Saturday nearest the beginning of each month. It is necessary to take this date, as the bank statements are issued once a week only, on Saturday. The second column shows the receipts of all kinds of gold and silver from California, Oregon, Nevada, &c., as nearly as they can be ascertained. It is well known that the whole bullion movement from the mining districts of California and the other western country has changed since the opening of the *Pacific Railroad;* previous to that event nearly the whole production was reported at San Francisco, and was shipped thence by steamer to New York and other ports, whereas now, a very large proportion of the gold and silver obtained from the mines comes direct to New York overland without going to San Francisco. As no precise record of these numerous shipments is preserved, it is necessary to make an opproximate statement of them from the best information obtainable, and from the estimates of those parties connected with the specie movement, as transporters or receivers, whose opinions upon the subject are of most value. The overland shipments from San Francisco are definitely known; the total amount from all points west, during July and August, 1870, were accurately kept for us by the courtesy of the agent of Wells, Fargo, and Co.'s express, at Omaha, and with these *facts* and other information as to receipts by some prominent consignees in New York, and from the Express Companies, it may be assumed that the figures given below show very nearly the exact extent of the overland movement.

The columns of imports and exports are Custom house figures, the only authority on the subject.

The columns headed "From all other sources and hoards," on the one side, and "Returned inland and to hoards," on the other side, simply represent the result of the month's movement, showing what has been received on, or withdrawn from, our market that cannot be accounted for by the known receipts, exports, and balances. "Aggregate accessions," "Total supply," and "Total withdrawn," are merely additions of previous columns.

With these explanations the table is presented to our readers as the most complete exhibit of the New York specie movement anywhere published, and with the accompanying totals of pre-

vious years for comparison, an invaluable record in this department of finance :—

NEW YORK—BULLION and SPECIE—1859-70.—(In millions of $—thus, 112,5 = $112,500,000).

(8) — THE AMERICAN CENSUS OF 1870 — THE ALTERED COMPOSITION OF THE HOUSE OF REPRESENTATIVES.

So many important interests are vitally affected by the changes consequent on the Census of the United States, taken in 1870, that the following details are here given. It is the general expectation that the increase of power acquired by the Western and Southern at the expense of the New England and Atlantic States will speedily put an end to the Protective policy so long upheld by these older portions of the Union. The increased power of the South also will be felt in a variety of ways :—

SUMMARY.

1 States.	2 3 Numbers. 1870.	1860.	4 Increase. 1870 over 1860.	5 6 Proportions. 1870.	1860.
				Per Cnt.	Per Cnt.
New England	4.515	3.918	16 per cnt.	11.2	12.6
Atlantic	8.659	7.473	16 "	20.0	23.8
	13.174	11.391		31.2	36.4
West Centre	11.118	8.849	25 per cnt.	29.1	27.3
West	4.924	2.940	65 "	12.2	8.1
	16.042	11.789		41.3	35.4
South	10.497	8.905	18 per cnt.	27.0	28.1
Territories	236	172	37 "		
	10.733	9.077		0.5	0.1
Totals	38.535	31.445	22 per cnt.	100.0	100.0

The changes here indicated are of great moment. The old States have only increased 16 per cent., while the West has increased 25 and 65 per cent., and the South 18 per cent.

The proportion of members in the House of Representatives is adjusted after each Census on the basis of population. In 1860, the total number of 233 members gave 127,000 as the unit of population. In 1870, the same number of members would give 165,000, and on this basis the members would be apportioned as follows :—

States.	1870.	1860.
New England	25	31
Atlantic	50	60
	75	91
West Centre	66	69
West	29	23
South	63	50
	233	233

The real gain here is to the South. In fact the South gains 13 out of the 16 members lost by the old States, and if the calculation be worked out for each separate State, the effect of the change will be still more clearly seen.

The Senate is composed of two members for each State, without reference to its size or population, and the composition of that body is slowly but surely affected by the rising up of new Western States.

JAMES L. DENMAN,

WINE MERCHANT,

Importer and Introducer of GREEK and HUNGARIAN WINES, 20 Piccadilly, London, solicits a trial of the following PURE and UNBRANDED WINES, which for price and quality cannot be surpassed:—

SECRETARY—Alex. Sutherland, Esq.

FIRE DEPARTMENT.—MANAGER—E. Cozens Smith, Esq.

Moderate Rates of Premium, based on an equitable system of Assessment.
Claims liberally and promptly settled.
All Policies are issued Free of Duty, and no Fees or Stamps are charged.

LIFE DEPARTMENT.—ACTUARY AND MANAGER—W. P. Patterson, Esq.

NEW FEATURES.

SETTLEMENT POLICIES are issued under the Married Women's Property Act, 1870, and form a Family Trust Fund without the expense and difficulty attendant upon ordinary settlement.

LIMITED PAYMENT POLICIES are granted, which cannot be forfeited. When the premiums under Whole Life Policies are payable in ten payments, each Premium secures absolutely a Paid-up Policy for one-tenth of the sum assured.

SECURITY AND PRINCIPLES OF MANAGEMENT.

The Life Funds, exceeding £225,000, are held in special trust for Life Policy-holders, who have, in addition, the security of the Uncalled Capital of £2,250,000 and the General Assets of the Company, which exceeds £620,000.

The Expenses of Management are guaranteed by Deed of Settlement not to exceed 10 per cent. per annum on the Premium Income.

The rate of Mortality assumed at the Valuation in 1867 was the "Experience" Table, which requires a larger reserve to be made than any other Table in general use; the rate of interest assumed was only 3 per cent., thus leaving a large margin of profit; and the net or risk premiums were alone taken into account, leaving a further margin for expenses and profit.

The Bonus declared at the Division of Profits in 1867 exceeded on the average 42 per cent. per annum on the sum assured, or upwards of 65 per cent. on the Premiums paid.

THE

LEGAL & GENERAL LIFE ASSURANCE SOCIETY,

10 FLEET STREET, TEMPLE BAR (FOUNDED 1836),

Has taken a leading part in freeing Life Assurance Contracts from all needless restrictions.

The "Proposal Form" is most simple in its terms.

The Policies are "Indisputable"—that is, free from future challenge.

The Invested Funds bear an unusually high proportion to the Liabilities.

TRUSTEES.

THE RIGHT HON. THE LORD CHANCELLOR.
THE RIGHT HON. LORD CAIRNS.
THE RIGHT HON. SIR W. BOVILL, Lord Chief Justice, C.P.
THE RIGHT HON. SIR EDWARD VAUGHAN WILLIAMS.

ROBERT BAYLY FOLLETT, ESQ., Taxing Master in Chancery.

The Guaranteeing Share Capital of One Million (£160,000 paid up) is fully subscribed by 300 Members of the Legal Profession.

Nine-tenths of the Profits belong to the Assured.

Annual Accounts have always been published in full detail.

Settlement Policies in favour of Wife and Children now granted, in terms of the Married Women's Property Act, 1870.

Unreserved information on all points, on application to

E. A. NEWTON, Actuary and Manager.

ROYAL INSURANCE COMPANY,

Royal Insurance buildings, Lombard street, London, E.C., and Liverpool.

CHAIRMAN IN LONDON—WILLIAM WAINWRIGHT, ESQ.
CHAIRMAN IN LIVERPOOL—CHARLES TURNER, ESQ., M.P.

CAPITAL, £2,000,000.

FIRE REVENUE, £485,180. LIFE REVENUE, £259,500. ACCUMULATED FUNDS, £1,850,000.

SECURITY TO LIFE ASSURERS.

From a quinquennial valuation of the entire Life Liabilities made as at 31st December, 1869, by independent Actuaries, at 3 per cent. net premiums, the Life Assets showed a *surplus over Liabilities of* £249,956, enabling the Directors to declare a *Reversionary Bonus amounting to* £7 10s *per cent.* on each sum assured for five years, and to still hold in reserve all profits accrued on Annuities and Endowments.

EXTRACT FROM LAST ANNUAL REPORT.

After payment of Dividend and Bonuses, the FUNDS of the Company stand as follows:—

Capital paid up, £289,095.
Reserve Fund, and Profit and Loss Account, £286,925 10s.
Life Assurance Funds, £1,173,401 9s 1d.

FIRE DEPARTMENT.

In consequence of the entire abolition of Duty, the Company is now prepared to grant Insurances on the Buildings of PRIVATE DWELLINGS and their CONTENTS at the following scale of charges, showing the total Annual Expense for the same, viz:—

Furniture in Private Brick-built Dwellings.				Buildings of Private Brick-built Dwellings.			
£	s	d		£	s	d	
100	2	6		100	2	0	
150	3	0		150	2	6	
200	4	0		200	3	0	
300	6	0		300	4	6	

And in the same proportion for larger amounts.

JOHN H. McLAREN, MANAGER.
JOHN B. JOHNSTON, SECRETARY IN LONDON.

UNIVERSAL LIFE ASSURANCE SOCIETY

1 King William street, London, E.C.

At the THIRTY-SIXTH ANNUAL MEETING the Premium upon Policies, six years and upwards in force, was reduced 50 per cent.

The following are examples of the great economy thus secured in the Premiums charged to Policy-holders :—

Age in Policy.	Original Premium for £100.	Cash Bonus for the Year.	Net Premium for the Year.
	£ s d	£ s d	£ s d
20	1 18 8	0 19 4	0 19 4
30	2 8 10	1 4 5	1 4 5
35	2 14 11	1 7 5	1 7 6

Policies on lives either proceeding to or residing in India are granted on specially advantageous terms, at the Chief Office of this Society in London, or by any of its Committees in Calcutta, Madras, and Bombay.

FREDK. HENDRIKS, Actuary and Secretary.

Established 1840.

CHURCH OF ENGLAND ASSURANCE INSTITUTION,

9 AND 10 KING STREET, CHEAPSIDE, LONDON.

Empowered by Special Act of Parliament.

CAPITAL—ONE MILLION.

LIFE DEPARTMENT.

Very moderate rates of premium and exceptionally high bonuses. Sums assured made payable during life, thus forming a provision for old age.—Endowments for Children "*Free*" *Policies issued, which can never entirely lapse through non-payment of premium.*

COMBINED ASSURANCE AND INVESTMENT BRANCH.

A new method of provision, uniting all the facilities and resources of Savings' Banks to the benefits of Life Assurance.

FIRE DEPARTMENT.

Low Premiums, and the *convenience* of Assurers especially consulted.

Applications for Prospectuses, Forms of Proposal, and Agencies, should be addressed to STEPHENS H. EMMENS, D.C.L., Secretary.

N.B.—*Special grants are made from the Proprietors' Profits in aid of Life Assurances effected by Clergymen and Ministers, and by Schoolmasters, for the benefit of their families. A reduction of* £10 *per cent. is also made from the Premiums on Clerical and Scholastic Fire Assurances.*

QUEEN INSURANCE COMPANY.

TWELFTH ANNUAL REPORT.

The Report and Accounts for the year 1869, presented to the Shareholders at the Annual Meeting on Thursday, 19th May, 1870, at which Bernard Hall, Esq., presided, showed in the

LIFE BRANCH,

That the deaths were 20 per cent. under the expectation, and the total amount paid in satisfaction of claims 12 per cent. under the sum so expected, the result being an addition to the Life Fund of an amount equal to 57 per cent. of the Net Premiums received during the year, viz., £21,417;

and,

That notwithstanding the divisions arising out of two quinquennial valuations, and the payment of all Claims and expenses, the amount now at the credit of the Life Fund is over 50 per cent. of the entire net Premiums received, not only on Policies actually existing, but on every Policy issued since the formation of the Company.

In the FIRE BRANCH,

That the Premiums for 1869, after deducting re-insurances, amounted to £140,104, being an increase of £17,974 on the Income of 1868.

£17,800 of the balance at the disposal of the Shareholders was appropriated in payment of a Dividend of Ten per cent.

The Fire Reserve Fund was increased to £86,000 by the addition of £6,000, and the sum of £9,062 was carried forward to next year's Accounts.

The Income of the Company was shown to be £237,896, and the Funds in Hand, £467,772.

MEMO.—The Company has paid in satisfaction of Fire Claims over £600,000.

Thomas Devas, Esq.	S. William Silver, Esq.
Samuel Fisher, Esq.	W. Flexman Vowler, Esq.

Policies now in force	£7,100,000
Funds accumulated and invested in first-class securities upwards of.....	3,000,000
Policy claims paid	5,700,000

The Association employs no agents and pays no commission in any shape for the introduction of policies.

Its expenses are small, being about 2½ per cent. of its gross income.

An investigation of its affairs is made every year, and the surplus is applied solely to the reduction of the premiums, such reduction taking place immediately after the first seven payments.

During the last 30 years the reduction has increased, on an average, at the rate of about One per cent. per annum, and as the mortality among its Members continues to be much within the estimate (the claims by death in the last year having been £60,000 less than the expectation), and as the funds of the Society are invested to produce £9,000 more than is assumed in the valuations, it is expected that the Premiums may be still further reduced.

Premiums commenced before 1856 are this year reduced 91 per cent.

Premium commenced before 1861 are this year reduced 81 per cent.

Premiums commencing now are expected to be reduced about 70 per cent.

EDWARD DOCKER, Secretary.

THE LIVERPOOL AND LONDON AND GLOBE INSURANCE COMPANY,

1 Dale street, Liverpool; Cornhill and Charing cross, London.

Fire Insurances at current rates. Annuities on favourable terms. Life Assurances on liberal conditions. To the Assured who pay a Bonus Premium the

BONUSES ARE GUARANTEED,

And set forth on the Policy as part of the Contract.

Chapman and Hall, 193 Piccadilly.

Now ready, price 12s, cloth,

THE TWENTY-THIRD ANNUAL VOLUME OF

BRADSHAW'S RAILWAY MANUAL, SHAREHOLDERS' GUIDE, and OFFICIAL DIRECTORY for 1871.

"Year by year have we to welcome another volume of this carefully constructed publication. For a period of twenty-three years it has kept pace with the growth of systems, and followed each of them through the connections they had established, as well as noted the process of absorption by which they became merged one into the other. The details of revenue and capital are alike comprehensive and concise, while the unique directory gives to members of the railway executive in the three kingdoms a local habitation as well as name."—RAILWAY TIMES.

London: W. J. Adams, 59 Fleet street, E.C. Manchester: Bradshaw and Blacklock, Albert square.

LIFE ANNUITIES.—MANCHESTER CORPORATION WATERWORKS.—The Waterworks Committee of the Corporation of the City of Manchester is prepared to issue, free from all official charges, ANNUITIES for LIVES, jointly or separately, in such amounts as may suit investors, on security of the borough rates of the city, and the rates, rents, and other waterworks property.—Applications, personally or in writing, may be made or sent to the City Treasurer; or to Mr Berrey, Waterworks Offices, Town Hall, Manchester.—By order,

JOSEPH HERON, Town Clerk.

Town Hall, Manchester, March 6, 1871.

KINAHAN'S LL WHISKY.

This celebrated and most delicious old mellow spirit is the very

CREAM OF IRISH WHISKIES,

in quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy.

Note the words—

"KINAHAN'S LL WHISKY,"

on seal, label, and cork.

Wholesale Depôt, 6A Great Titchfield street, Oxford street, W.

DUNVILLE'S OLD IRISH WHISKY, BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for their SEASON-BREWED PALE ALE, in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent, and at the Branch Establishments.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Draught and Bottles, genuine, from all the most respectable Wine and Beer Merchants and Licensed Victuallers, on "S ALLSOPP'S PALE ALE" being specially asked for.

PARTRIDGE AND COOPER, WHOLESALE and EXPORT STATIONERS. Contractors with the principal Institutions, Banking Firms, Clubs, and Railway Companies in the Kingdom, 192 Fleet street, London, E.C. Carriage paid to any railway station in England upon orders over 20s.

The stock of Messrs P. and C. consists chiefly of first-class Envelopes, Paper, Account books, &c., but, if ordered, "cheap stationery" can be supplied at prices considerably lower than any other house, as P. and C. being paper makers' agents, purchasing "direct from the mills," are enabled to supply the public at "one profit only," a saving to the consumer of at least 30 per cent.

An illustrated catalogue, containing full description with prices of Inkstands, Stationery cabinets, Postage scales, Despatch boxes, Writing cases, &c., &c., post free. Established 1841.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d, postage, 1s 8d. Umbilical ditto, 42s and 52s 6d, postage, 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

German and French are constantly spken in his establishment, where the comforts of an English home are provided by an English lady (Mrs Thomas). The highest references given.—Apply to Herrn Director THOMAS Heer Strasse, Bon-on-the-Rhine.—Frequent escorts

EDUCATION.—"ONE YEAR'S

Good Schooling" at the English and Continental College, Harrow (close to the station).—A few ANNUAL VACANCIES.—Parents anxious to give their boys, before they put them into any business, a year's finishing instruction in a highly recommended boarding school, of limited number, near town, to be perfected (even if backward) in penmanship, commercial and polite correspondence, arithmetic, bookkeeping (or mathematics and drawing), French conversationally, and gentlemanly manners, are invited to address the Principal, who is assisted by efficient and hard-working masters. Younger boys, to be prepared for public schools, the professions, and competitive examinations, are received for a longer period. Dry playground, with a gymnasium and a splendid cricket field, close to the house, which latter is replete in all its appointments. Highest references as to liberal board, kind treatment, excellent health, and first-class progress of the pupils. Eight first-class masters are engaged to secure the success of thirty pupils. Terms—30 guineas under 12, 35 guineas under 14, and 40 guineas per annum under 15 years of age. 10s for laundress, 10s for books and stationery, and for tuition of dancing, drilling, singing and brass band instruments. 10s per quarter are the only extras. Established 1857. Address Dr VELLERE Harrow

GASELIERS in GLASS or METAL.—The increased and increasing use of Gas in private houses has induced WILLIAM S. BURTON to collect from the various Manufacturers in Metal and Glass all that is new and choice in Brackets, Pendants and Chandeliers, adapted to Offices, Passages, and Dwelling-rooms, as well as to have some designed expressly for him, which present, for novelty, variety, and purity of taste, an unequalled assortment. They are marked in plain figures, at prices proportionate with those which have tended to make his Establishment the largest and most remarkable in the kingdom, viz., from 12s 6d to £23. Brackets from 1s 9d.

DISH COVERS and HOT-WATER DISHES, in every variety, and of the newest and most recherché Patterns, are on SHOW. Block Tin Dish Covers, 16s the Set of Six; elegant modern Patterns, 35s 6d to 49s 6d the Set; Britannia Metal, with or without Silver-plated Handles, £3 2s to £6 8s the Set of Five; elec ro-plated, £9 to £26 the Set of Four; Block Tin Hot-Water Dishes, with wells for gravy, 12s to 30s; Britannia Metal, 21s to 80s; electro-plated on Britannia Metal, full size, £5 5s; ditto, on Nickel, full size, £10.

FENDERS, STOVES, KITCHEN RANGES, FIRE-IRONS, and CHIMNEY PIECES.—Buyers of the above are request d, before finally deciding, to visit the SHOW-ROOMS. They contain such an assortment of Fenders, Stoves, Ranges, Chimney-pieces, Fire-irons, and General Ironmongery as cannot be approached elsewhere, either for variety, novelty, beauty of design, exquisiteness of workmanship, or price. Black Register Stoves from 8s to £9 5s; Bright ditto, ormolu ornaments from £3 8s to £33 10s; Bronze Fenders from 3s 6d to £5 12s; Steel and Ormolu Fenders from £2 10s to £25; Chimney-pieces from £1 12s to £100; Fire-irons (the Set of Three) from 3s 3d to £4 10s.

REFRIGERATORS or PORTABLE ICE-HOUSES.

ABERDEEN TOWN AND COUNTY BANKING COMPANY.

At the forty-sixth annual general meeting of the company, held at Aberdeen, March 6, 1871, the following report was submitted to the shareholders:—

The annexed statement of the liabilities and assets of the bank shows that the net profits for the year ended January 31 last (including the sum of 496*l* 17s 6d brought forward from the previous year's profit and loss account), after deducting all charges of management, income tax, &c., and making provision for bad and doubtful debts, amount to 21,905*l* 8s 7d. The usual half-yearly dividend of five per cent. was paid to the partners in September last, and the directors have declared a further dividend at the same rate, payable on the 20th proximo—making a return of ten per cent., clear of income tax, on the paid-up capital of the bank for the past year. These dividends absorb 18,200*l* of the year's profits; 2,000*l* have been added to the guarantee fund—making that fund now 27,000*l*; the sum of 1,500*l* has been appropriated towards reduction of the cost of bank buildings at the head office and branches of the bank; and the balance of 205*l* 8s 7d has been carried forward to the profit and loss account of the current year. To meet the wishes of a numerous body of requisionists, the directors have opened a branch of the bank in Woodside. The house there in which the bank's business is conducted was purchased by the bank, and its cost has been charged to the bank buildings account. Annexed is a statement of liabilities and assets to January 31, 1871:—Liabilities—Dr. Amount due to the public—Deposit and current accounts, &c., including interest, 1,534,378*l* 3s 9d (no acceptances); notes in circulation, 169,146*l*; proprietors' accounts—Capital paid up, 182,000*l*; guarantee fund, 25,000*l*; net profits for the year, 21,905*l* 8s 7d (together, 228,905*l* 8s 7d)—total, 1,932,429*l* 12s 4d. Assets—Cr. Specie and notes of other banks on hand, and balances due by other banks, 239,110*l* 4s 9d; investments in Government stocks and other securities, 356,456*l* 14s 11d; loans, cash credits, bills discounted, and other advances, 1,298,444*l* 6s 10d; bank buildings, at head office and branches, 38,418*l* 5s 10d—total, 1,932,429*l* 12s 4d. Profit and loss account:—Dr. Dividends on paid-up capital—5 per cent. paid in September last, 9,100*l*; 5 per cent. payable March 20, 9,100*l*; guarantee fund (which will thus be increased to 27,000*l*), 2,000*l*; bank buildings in reduction of cost, 1,500*l*; balance carried to credit of profit and loss new account, 205*l* 8s 7d—total, 21,905*l* 8s 7d. Cr. Net profits for the year, as above, 21,905*l* 8s 7d.

ADELPHI BANK, LIMITED.

The annexed report is for the half-year ending December 31, 1870:—

The directors have to report an accession to the business of the bank, which to a great extent supplies the place of that lost by the failures in the provision trade last half-year. The banking business during the half-year has been satisfactory, and out of the profits the directors have declared a dividend at the rate of 2½ per cent. per annum, clear of income tax, payable at the bank on and after January 10, and carried forward a balance of 658*l* 13s 11d. In making up the amount of gross profit, the directors have not included interest on any account which is stationary, or in connection with which the bank has to rely on the sale of securities. The reserve fund still appears on the books as 33,000*l*, but the directors remind the shareholders that it is still subject to the heavy losses accrued and to accrue on the realisation of the real property securities held by the bank, and, in their opinion, the amount should not be regarded as an available asset. The directors hope so far to dispose of the remaining properties during the ensuing half-year as to enable them fully to deal with the reserve fund when they next meet the shareholders. The statement of accounts from June 30 to December 31, 1870, is as follows:—Liabilities—Subscribed capital, 260,220*l*; capital paid up, 130,110*l*; reserve fund, 33,000*l*; amount due by bank on current and other accounts, including interest on undue bills held by the bank, 186,382*l* 17s 11d; amount of dividend now due, and dividends unpaid, 1,642*l* 6s 1d; balance of profit carried forward to current half-year, 658*l* 13s 11d—total, 351,793*l* 17s 11d. Assets—Bills discounted, balances owing by customers, and other securities, 299,362*l* 17s 5d; freehold bank premises, Liverpool, 20,000*l*; safes, furniture, &c., Liverpool and Manchester, 2,095*l* 13s 8d; cash on hand and at call, 30,335*l* 6s 10d—total, 351,793*l* 17s 11d. Profit and loss:—Dr. General expenses, including cost of management, 2,696*l* 8s 8d; Interest on deposits, &c., including rebate on undue bills, 2,953*l* 2s; dividend now due, 1,626*l* 7s 6d; balance carried forward, 658*l* 13s 11d—total, 7,934*l* 12s 1d. Cr. Balance brought from previous half-year, 54*l* 17s 4d; balance of profit after providing for bad debts, 7,879*l* 14s 9d—total, 7,934*l* 12s 1d.

AGRA BANK, LIMITED.

The annual meeting of the shareholders was held April 4, at the City Terminus Hotel, Cannon street, when the following report was presented:—

The net profits of the bank at its several establishments in this country and India during the past twelve months, including the balance brought forward from 1869, amounted to the sum of 47,171*l* 0s 5d, as compared with 38,368*l* 8s 6d during the previous year. There has, however, been about 200,000*l* more capital employed in the business during a portion of the year, arising from the instalments of share capital which mature on Feb-

ruary 28 and May 31, 1870. In part of the profits, as now stated, namely 47,171*l* 0s 5d, an intermediate dividend was paid on October 8, free of income tax, which amounted to 13,380*l*, leaving now to be dealt with the sum of 33,791*l* 0s 5d, which, if all available for distribution among the shareholders, would provide a dividend on the paid-up capital for the half-year ended December 31 last at the rate of about 7 per cent. per annum. It will be in the remembrance of the shareholders that the directors in their half-yearly report, issued on September 23 last, referred to the effect which the war had produced upon the value of some of the principal staples of Indian produce in European markets. The decline which took place in the price of cotton has been almost unprecedented. Bombay cotton, which before the war was selling currently at Liverpool at 8½d to 9¼d per lb, has fallen to 5½d to 6¼d per lb, representing a depreciation of 30 per cent., and upon the season's imports from that Presidency a loss of several millions sterling. At the same time, from the same cause, the trade in raw silk (which is an important article of import into France and of extensive manufacture there) was for the time being in a condition of great depression, and caused serious embarrassment to many interested in and dependent upon the sale and consumption of that material. Under these circumstances, it was not be expected that the bank, considering the magnitude of its operations, could altogether escape loss arising from inability on the part of those engaged in these and other branches of trade which the war particularly affected, and whose bills it held, to meet their engagements. In every case where bills of exchange have not been duly paid, with the exception mentioned below, the bank has held the security of goods, and the loss will not exceed the difference between the amount of the bill and the proceeds of the shipments against which the bill was drawn. In every instance also the bank has an additional recourse, both against the drawer and acceptor of the bill, for the amount of such difference. The exceptional cases referred to consist of a few bills drawn against fraudulent bills of lading, and which the manager at Bombay was induced to purchase, having no reason to suspect deceit, or to doubt the honesty or characters, previously regarded as respectable, of the parties by whom they were drawn and endorsed. The bills in question were all accepted in due course by the parties in this country upon whom they were drawn, who likewise had no suspicion that the shipments were otherwise than regular and genuine. The directors find it difficult at present to form an accurate judgement of what the ultimate deficiency may be, seeing that most of the transactions in question are not yet closed, but they consider it desirable to reserve out of the profits realised the sum of 14,000*l*, as against this contingent liability, and which, accordingly, it will be observed, has been done in the profit and loss account appended to this report. After making this provision there will remain the sum of 19,791*l* 0s 5d, and the directors recommend that this amount be appropriated to the payment of a dividend, at the rate of four per cent. per annum, free of income tax, which will require 19,715*l* 8s, leaving a balance of 75*l* 12s 5d to be carried forward to credit of the present year. The branches of the old bank at Hong Kong and Shanghai, in China, have been reconstituted and reopened for business during the year, but they did not commence operations in time to admit of adequate financial arrangements being made for turning to profitable account the active shipping season at these ports, and thus to enable them fully to provide for the preliminary charges incident to their reorganisation. This will be covered during the current year, and the directors are sanguine that, under good management, both of these branches will prove profitable sources of revenue to the bank. It is a source of sincere regret to the directors that they should not see their way to the payment of a larger dividend than what they now recommend. The difficulties they have had to contend with in promoting the profitable working of the business during the past year have been very great. The abundance of money in India has fostered competition in that country—especially in exchange operations—to an extent which has absorbed almost all profit; and remunerative and sound local business at the several establishments of the bank, which it is the wish and endeavour of the directors to encourage, as the true and substantial basis of regular and safe profits, is of comparatively slow growth, and cannot be unduly forced without imprudence and risk of loss. The progress of the bank, however, during the year just closed, has been satisfactory and material, as evidenced by the balance sheet now submitted; and it is to be hoped that the improvement of trade, and the stimulus that will be given to commercial transactions of all kinds by the cessation of hostilities on the continent, will afford better opportunities than have recently been available of employing the bank's funds to advantage. The position of the estate of the late Agra and Masterman's Bank, it will be seen from the statements now rendered to December 31 last, exhibits recoveries from the assets during the past year, sufficient to reduce the present bank's advance to the sum of 140*l* 11s 7d. In addition to these, however, there is to be taken into account, proceeds of indigo on hand at the end of last but not realised till the beginning of this year, which, with receipts from other sources, enables the directors to pay on account of return capital, represented by the old shares, the sum of 1*l* 5s per share, and which will be disbursed accordingly to the registered holders of scrip certificates on application to the bank on and after April 10. It is necessary that the scrip certificates should be presented when the money is applied for, in order that the payment may be registered thereon. The progress made in the realisation of the remaining assets of the old bank has fallen short of the expectation of the directors, so far as respects the assets in India. This has arisen from the two last indigo seasons in that country having been unpropitious and unproductive, especially in those districts where the still unsold indigo factories of the old bank are situated; and the effect has been to deter purchasers hitherto from coming forward. At present the prospects of Indian properties are more encouraging; and as all those in which the old bank is interested have been carefully maintained in good condition, they ought to command a fair price when the demand for this class of investment revives. The directors are gratified to report that all outstanding matters in connection with the official liquidation have now been finally closed. Balance sheet, December 31, 1870—Liabilities—Capital—amount paid up, 978,239*l* 19s 9d; reserve fund, 6,000*l*; deposits—current accounts, 512,953*l* 8s 4d; fixed deposits, 1,719,841*l* 17s 9d—2,232,795*l* 6s 1d; exchange with branches—bills payable, 1,796,601*l* 9s 7d; profit and loss—balance from December 31, 1869, 690*l* 19s 5d; surplus for 1870, 46,480*l* 1s; less deducted to meet contingent liabilities, 14,000*l*—33,171*l* 0s 5d—total, 5,046,807*l* 15s 10d. Assets—Cash in hand, 506,558*l* 18s 9d; house property, 142,995*l* 6s; investments (Government securities, 862,044*l* 1s 8d; discounts, loans, credits, 1,140,607*l* 12s), 2,002,651*l* 13s 8d; exchange with branches (bills receivable, 2,069,986*l* 18s 2d; amount current in exchange operations, 324,614*l* 19s 3d), 2,394,601*l* 17s 5d—total, 5,046,807*l* 15s 10d. Profit and loss account:—Dividend paid for the half-year ended June 30, 1870, free of income tax, at 3 per cent. per annum, 13,380*l*; ditto recommended to be declared for the half-year ended December 31, 1870, free of income tax, at 4 per cent. per annum, 19,715*l* 8s—33,095*l* 8s; balance carried forward, 75*l* 12s 5d—together, 33,171*l* 0s 5d. Balance brought forward from December 31, 1869, 690*l* 19s 5d; profits—amount realised for the year 1870, 183,949*l* 14s 6d; deduct interest allowed on deposit and current accounts, 87,676*l* 15s 6d; expenditure for management, &c., and income tax, 49,792*l* 17s—137,469*l* 13s 6d; less deducted, as per balance sheet, to meet contingent liabilities, 14,000*l*, 32,480*l* 1s—together, 33,171*l* 0s 5d. Annexed is a statement of receipts and payments by the Agra Bank, Limited, on account of the Agra and Masterman's Bank, Limited, for the year 1870, at head office and branches:—Receipts—Assets—Amount realised, including return on account of indigo and other advances on outstanding assets for the past season, 243,576*l* 16s. Payments—Cash balance, brought down, due to the Agra Bank, Limited, December 31, 1869, 130,587*l* 10s 3d; advances to maintain indigo factories, tea and coffee estates, and in connection with other assets and interest on loan account, &c., 88,947*l* 5s 4d; creditors—claims paid, 20,423*l* 16s 3d; law charges, 3,477*l* 12s 7d; Agra Bank, Limited—cash balance due, 140*l* 11s 7d—total, 243,576*l* 16s.

ALLIANCE BANK, LIMITED.

At a general meeting, held at the City Terminus Hotel, Cannon street, January 19, 1871, the following report was presented to the shareholders:—

The directors have to report that the net profits of the bank for the last half-year (after making the necessary deductions for interest on current and deposit accounts, current expenses, bad debts, and rebate on bills not yet due) amount to 15,417*l* 15s 4d, which, with 3,557*l* 7s 7d, balance from the previous half-year, makes a total of 18,975*l* 2s 11d now to be disposed of. The directors, therefore, recommend that a dividend for the last six months of 7s 6d per share, or 3*l* per cent. per annum, free of income tax, be now declared, which will absorb 14,559*l* 15s, and that 336*l* 11s 10d be written off building and furniture accounts; leaving 4,078*l* 16s 1d to be carried forward to profit and loss new account.

BANK OF AUSTRALASIA.

The thirty-seventh annual meeting of the shareholders was held March 20, at the offices, Threadneedle street, when the following report was presented:—

The directors have the pleasure of presenting to the shareholders the usual accounts, showing the operations of the bank for the year ending October 10, 1870. It will be observed that there is a falling off in the profit available for distribution. This was not anticipated by the directors at the time of the last annual meeting. At that time there were symptoms of activity in colonial industry, and of an improvement in the value of colonial property. But the result has not corresponded with their expectations. Mining operations were attended throughout the year with less than average success, and in consequence of the continued low price of wools, the pastoral interest did not sustain the recovery of which there was some evidence twelve months ago. This state of things has not been favourable to banking operations, and as regards this bank, the losses, either sustained or anticipated, have entailed an unusually heavy charge upon the profit of the business. As to the future, the directors see no cause for distrust or apprehension. They take encouragement from the fact that gold mining already shows signs of renewed activity, and that through the termination of the war, continental buyers will resume their place in the markets for colonial produce. The directors have much pleasure in renewing their assurance that the business is conducted with ability and prudence by the superintendent, and that he enjoys their full confidence. The distribution of profit for the half-year will be at the rate of 10 per cent. per annum, viz., a dividend at the rate of 6 per cent. per annum, and a bonus at the rate of 4 per cent. per annum, being together 2*l* per share, and payable, free of income tax, on and after April 4. Profit account from October 11, 1869, to October 10, 1870:—Undivided profit, October 11, 1869, 120,880*l* 14s 1d; less dividends—in April, 1870, 60,000*l*; October, 1870, 60,000*l* — 120,000*l*; leaving 880*l* 14s 1d; profit for the year to October 10,1870, after making provisions for bad and doubtful debts, 196,745*l* 6s 9d; less—1. Charges of management: Colonial—salaries and allowances to the colonial staff, including the superintendent's department, and 40 branches and agencies, 61,435*l* 1s 10d; general expenses, including repairs, taxes, stationery, travelling, &c., 20,284*l* 19s 1d; London—salaries, 9,078*l* 1s; general expenses, 2,72[illegible]*l* 3s; 2. Income tax, 2,397*l* 4s 5d, 100,821*l* 17s 5d—undivided profit, October 10, 1870, 101,702*l* 11s 6d. Balance sheet, October 10, 1870:— Liabilities — Dr. Circulation, 295,435*l*; deposits, 2,953,179*l* 2s 8d; bills payable and other liabilities, 819,494*l* 3s 5d; together, 4,068,108*l* 6s 1d; capital, 1,200,000*l*; guarantee fund, 210,247*l* 12s; profit account, undivided balance, 101,702*l* 11s 6d; together, 1,511,950*l* 3s 6d—total, 5,580,058*l* 9s 7d. Assets—Cr. Specie, bullion, and cash at bankers, 695,880*l* 7s 6d; Government securities and loans, 123,284*l* 5s; bills receivable, securities for advances, and other assets, 4,370,208*l* 18s 5d; bank premises in Australia, New Zealand, and London, 180,440*l* 6s 8d; guarantee fund, 210,247*l* 12s (in vested asunder: 96,836*l* 8s 5d Consols, purchased at 90⅜, 87,537*l* 10d; 71,031*l* 13s 10d reduced Three per Cent. at 88½, 62,747*l* 12s; 27,000*l* New South Wales bonds, 25,900*l*; 24,800*l* Geelong ditto, guaranteed by Colonial Government, 24,800*l*; 9,500*l* New Zealand Consolidated Five per Cent., 9,262*l* 10s—210,247*l* 12s)—total, 5,580,051*l* 9s 7d.

BANK OF BRITISH COLUMBIA.

At the general meeting, held at the London Tavern, April 11, 1871, the following report was submitted to the proprietors:—

In presenting to the shareholders the half-yearly statements of accounts for the six months ending December 31 last, the directors have to report that after paying all charges and deducting rebate of interest on bills not due, the balance at credit of profit and loss account at that date was 19,544*l* 4s. The directors recommend that a dividend for the half-year ended December last be declared at the rate of five per cent. per annum, and that a bonus at the rate of one per cent. per annum be further paid, together absorbing the sum of 8,940*l*; leaving a balance of 10,605*l* 4s to be disposed of. In the report of October, 1868, the directors specially referred to the extent of collateral security in land and plant at Victoria which the bank had then held for some time. They consider that the present satisfactory financial position of the bank warrants them in now dealing with these accounts, which up to the present time have absorbed a considerable amount of the bank's working capital, and with this view the directors have decided to avail themselves of the accumulation of profits which has taken place by applying the sum of 10,000*l* to their reduction. Although the directors are sanguine that an improvement in the value of real estate is to be expected consequent on the public works to be undertaken by the Dominion of Canada shortly after the entry of British Columbia into the Confederation, yet bearing in mind that these securities were taken by the bank at a time of great inflation in the value of landed property (although considered amply sufficient to cover the advances when made), they feel assured they have adopted the most prudent course in dealing with the abovementioned accounts, and look for the cordial approval and support of the shareholders. Statement of liabilities and assets at head office and branches, December 31, 1870:—Liabilities—Capital paid up, 298,000*l*; deposits, notes in circulation, bills payable, and other liabilities, 235,028*l* 10s 6d; balance of profit and loss on December 31, 1870, 19,545*l* 4s—total, 552,573*l* 14s 6d. Assets—Specie and bullion in hand, and cash at bankers, 97,406*l* 17s 9d; bills discounted, bills receivable, and other securities, 443,224*l* 4s 3d; bank premises, furniture, and other property, 11,942*l* 12s 6d—total, 552,573*l* 14s 6d. Profit and loss account, December 31, 1870:—Dividend paid October 18, 1870, 7,450*l*; charges to December 31, 1870, including rent, salaries, and other expenses at head office and branches, 8,012*l* 15s 9d; amount written off assay plant, 314*l* 1s 4d; directors' fees, 500*l*; balance of profit, December 31, 1870, 19,545*l* 4s—total, 35,822*l* 1s 1d. Balance of profit and loss account, brought from June 30, 1870, 14,840*l* 11s 1d; profit for six months ended December 31, 1870, after deducting rebate of interest on bills not due, 20,981*l* 10s—total, 35,822*l* 1s 1d. Balance, 19,545*l* 4s.

BANK OF BRITISH NORTH AMERICA.

Annexed is a statement of accounts to December 31, 1870:—Liabilities—Capital, 1,000,000*l*; circulation, 405,747*l* 13s 1d; deposits, 1,114,160*l* 6s 4d; bills payable and other liabilities, 1,719,223*l* 11s 5d; reserve for Christmas dividend, 30,000*l*; undivided net profit, 155,008*l* 1s 2d—total, 4,424,139*l* 12s. Assets—Specie and cash at bankers, 493,117*l* 3s 4d; bills receivable and other securities, 3,875,022*l* 8s 8d; bank premises, 56,000*l*—total, 4,424,139*l* 12s. Profit and loss account to December 31, 1870:—Dividends declared as follows:—At Midsummer, 1870, payable July, 1870, 30,000*l*; at Christmas, 1870, payable January, 1871, 30,000*l*; balance in hand, being undivided net profit to December 31, 1870, 155,008*l* 1s 2d—total, 215,008*l* 1s 2d. Balance of undivided net profit to Dec. 31, 1869, 148,779*l* 4s 6d; from which deduct bonus of 10s per share, paid July 5, 1870, 10,000*l*; net profit for the year 1870, after deduction of all current charges and income tax, and providing for bad and doubtful debts, 76,228*l* 16s 8d—total, 215,008*l* 1s 2d.

BANK OF EGYPT.

At the fifteenth annual general meeting of shareholders, held February 1, at the City Terminus Hotel, Cannon street, the report of the directors stated that the net profits, after providing for rebate on bills not yet due, income tax, &c., amounted to 20,914*l* 14s 9d. This, added to 9,615*l* 3s 4d, the balance of undivided profits brought forward from the previous half-year, made a disposable total of 30,529*l* 18s 1d. The directors recommended that the usual dividend be declared at the rate of 10 per cent. per annum for the half-year (12,500*l*), and a bonus of 1*l* 10s per share (15,000*l*), together, 27,500*l*, both free of income tax, leaving a balance of 3,029*l* 18s 1d to be carried forward to the next account. The annexed balance sheet is to December 31, 1870:—Liabilities--Capital paid up, 250,000*l*; reserve fund, 100,000*l*; bills payable, 48,053*l* 7s 3d; current and other accounts, 246,317*l* 10s; profit and loss, as below, 30,529*l* 18s 1d — total, 674,900*l* 15s 4d. Assets — Cash, 140,405*l* 8s 11d; bills receivable, 56,802*l* 9s 5d; Government securities (Egyptian), 357,276*l* 9s 10d; other securities, 120,416*l* 7s 2d—total, 674,900*l* 15s 4d. Profit and loss account, Dec. 31, 1870:—Dr. Dividend at the rate of 10 per cent. per annum for the half-year, payable on February 4, 12,500*l*; bonus of 1*l* 10s per share, 15,000*l*; balance carried to next account, 3,029*l* 18s 1d—total, 30,529*l* 18s 1d. Cr. Balance of undivided profits, June 30, 1870, 9,615*l* 3s 4d; net profits for the last six months, after providing for rebate of interest, current expenses in London and Egypt, income tax, and directors' remuneration, 20,914*l* 14s 9d—total, 30,529*l* 18s 1d.

BANK OF ENGLAND.

The ordinary half-yearly court of the proprietors of the Bank of England was held on March 16, in the Court Room of the Bank, for the purpose of declaring a dividend. Mr Robert Wigram Crawford, M.P., governor, occupied the chair. The secretary (Mr Hammond Chubb) having read the minutes of the last court,

The Governor said—Gentlemen, I beg to acquaint you that this is one of the half-yearly general courts appointed by the twelfth bye-law for the making of dividends. The net profits for the half-year ending February 28 last were 659,994*l* 14s 3d, making the amount of rest on that day 3,667,626*l* 14s 7d, and after providing a dividend of 4*l* 10s per cent., the rest will be 3,012,741*l* 14s 7d. The court of directors therefore propose that a half-yearly dividend of interest and profit be made on April 5 next of 4*l* 10s per cent., without deduction on account of income tax.

Mr William Botley begged most respectfully to second the motion made by the worthy and honourable governor, and he did so with very much pleasure. He thought it was a matter of congratulation to the proprietors, looking to the war which had taken place on the continent, that the monetary state of the country had been in so sound and satisfactory a condition throughout the whole period. He thought they might congratulate themselves on the close of that war, and they might also congratulate themselves on the prospect of everything going well for some time to come in monetary and commercial affairs. He thought the soundness and strength of the bank had been shown certainly by the state of the last return, and the constant weekly returns, and also by the high prices which their stock had borne. Seldom had they seen their stock for so lengthy a period bear so good a price. This must be a great satisfaction to the proprietors. Again, there was more public confidence shown in the bank than there ever had been before. For the last two or three years they had had none of these self-constituted doctors of currency with their pamphlets. It was to be hoped they had grown wiser, and possibly these self-constituted doctors had thrown their pamphlets into the waste paper basket, and their self-written diplomas into the fire. He thought they had a great right to be proud of the position of the Bank. He also thought they had very great reason to be satisfied with their directors in general, and especially pleased should they be at having a governor in the House of Commons, who could put questions, answer questions, and who very often made most excellent remarks on anything connected with the commerce of the country, and the commercial interests were very much indebted to the governor for his very great attention, and for the part he had taken in the House of Commons; and the proprietors of this bank were very fortunate in having the benefit of the services of so excellent a gentleman. He had very much pleasure in seconding the declaration of this dividend.

The Rev. M. J. Taylor said that before the resolution was put to the vote, he would beg the indulgence of the meeting while he made some remarks in reference to a subject upon which he should be very glad to elicit some expression of opinion on the part of the court of directors and the meeting generally. From the enormous amount of the indemnity that had been imposed on France by her victor in the late war, it was very obvious that France would have to seek assistance to procure the means of paying her instalments as they become due, and this would very much perplex banking and other financial institutions to procure sufficient to meet the increased demand for money arising from such a very abnormal state of affairs. Now, while entertaining the profoundest respect for the ability with which the affairs of the corporation were conducted, yet nevertheless in one particular he thought the existing rules of the corporation might be rescinded with advantage—viz., that relating to the non-acceptance of money on deposit. It appeared to him that if this were allowed, if the same advantages were given by the Bank of England to its depositors as was given by the joint stock banks of the neighbourhood, a vast amount of idle capital would flow into the coffers of the Bank, and so afford increased means for the negotiation of loans, while the monetary perturbation of the period they were now entering upon would in all probability be considerably in advance of the demands for loans in the last year. This would be regarded by the public at large as a great boon, and he felt confident that the proprietors of Bank stock would be very glad to lay their savings by with the old lady of Threadneedle street.

Mr J. Gerstenberg thought the question of whether they should receive money on deposit was one of the questions for the directors themselves to determine; but he could not agree with the hon. proprietor when he said that, with a view to facilitate the present operations of the French loan, capital that was now idle or unemployed should be brought into the coffers of the Bank, and thus become available for such an operation. He perfectly agreed with him that such an operation would be very desirable, but he had by no means shown how it could be done. It seemed to his (Mr Gerstenberg's) mind that the very opposite would be the result. Because, supposing it was so, that the acceptance by the Bank of England of deposits would bring money to the coffers of the Bank, could it be taken out again for that purpose? At the present time financial and discount corporations did that very operation; but the Bank of England, if he was correctly informed, laboured under a specific rule, that foreign securities were absolutely excluded from advances thereon; and consequently, while at present money from the public went into this focus of financial institutions in London, and was spread in the way the hon. shareholder recommended, if the same thing were done by the Bank of England, far from promoting and developing such operations, it would have a tendency to stop them. He would, however, take the liberty of putting a question, or rather making a suggestion to the court. The hon. gentleman had stated how very much pleased he was with the mode and manner in which the Bank's affairs had been administered; and he (Mr Gerstenberg) was sure none of the proprietors would desire to suggest, much less to dictate to, the directors the manner in which they should deal with these moneys. They were all gentlemen of great practical experience, and they were the best judges of that; and he was far from suggesting that the Bank of England should take the liability or the obligation of making advances on foreign securities, yet he did say that in exceptional cases they should have the power, when they might think it judicious, to do so. They all knew cases where large houses had, in times of panic, been driven either to verge of stopping payment, or had actually stopped payment, when they had in hand a large surplus of assets, and simply because they were usually advances on foreign securities, which could not be made immediately convertible. All this might be averted if the Bank of England, in such times, would come forward with temporary advances. Similar rules to those adopted here were adopted by the continental banks. Take the case of the Bank at Berlin. When the war broke out discount went to 10 per cent., and consequently a very large quantity of American securities were thrown upon the London, Dutch, and American markets in order to meet contingencies that might arise. The result was that the Bank rate rose here to 6 per cent. But the Bank of Prussia saw the necessity of the moment, and they issued a notice to the effect that they would make temporary advances to the responsible parties, and to their own customers, on certain limited conditions, leaving of course a sufficient margin for the protection of their own interests, on 5-20 bonds. The effect was instantaneous. From 10 per cent. the rate of discount fell to 6 per cent., and public confidence was restored. Now it seemed to him (Mr Gerstenberg), looking at the fact that the amount of foreign loans raised was closely approaching the amount of the National Debt, that they should not utterly and entirely exclude—ostracise, if he might use the term—these securities from all participation and the benefits of advances by the Bank. He thought that the Bank of England might in exceptional cases make advances on foreign securities, when represented by responsible parties and customers, upon such terms and conditions as the Bank might prescribe. He thought the question was not whether the Bank of England should enter into any obligation or liability, or lay itself open to this class of business, but that it should be left to their own judgment and discretion whether it would not be desirable that the Bank of England should have the power, in case they considered it desirable and judicious, to make advances upon foreign securities if they deemed so fit. If the Bank of England were to entertain these views, he was persuaded they would be doing an act alike of justice and courtesy to the financial and commercial interests of the country, and at the same time they would be conducing very much to that international financial business which seemed at present assuming larger proportions than it ever had before.

Sir David Salomons, M.P., said he should be very sorry to see the Bank of England turned into a pawnshop for foreign securities. He took it that the Bank of England would be trespassing beyond its legitimate province if it were to adopt the suggestion that had been made. He took it that the Bank of England was established for the purpose of assisting the trade and commerce of the country, and for the purpose of giving facilities to trade and commerce by the discounting of bills. From his experience of the court of directors, and from his knowledge of the manner in which they had conducted the Bank's affairs, he did not think they required to be told by the proprietors how they should deal with the moneys at their disposal, or what they should lend upon. He felt sure in his own mind that it would damage very much the character of the Bank of England if their money was locked up in loans or foreign securities; and that when a time of peril or a time of trouble came, they found they had no money that they could lend to the merchants of this country when legitimate bills were brought to them, and by the aid of which the commerce of the country was carried on. He must confess that he should prefer that the large loanable capital of the country should be distributed among the joint stock and other banks. He would prefer its distribution in this way to its being concentrated at this house; and he should be very reluctant that this house should depart from those sound principles which had hitherto charaterised its management, and lock up its means in loans, whether upon 5-20 bonds or any other foreign stock whatever.

Mr Jones agreed in a very great measure with what had fallen from the last speaker. He thought it would be a very bad and unjust policy for the Bank to adopt the suggestion that had been made, and to allow its funds to go off for the employment of labour in foreign countries to the neglect of the labour of those people upon whom this country called in case of need to defend their lives and property; and he thought, therefore, that the whole population of the country had a claim upon the Bank of England, had a claim upon the funds of the Bank of England, had a claim upon the capital of the nation that that capital should not be employed in these foreign loans, as by so doing they were taking away from this country the means of paying for labour, and reducing the honest working man to a pauper. He utterly denied that the trade and commerce of this country was in the prosperous state indicated by the seconder of the resolution before the meeting; all the credit that he had given the court of directors, and all that he had said in this respect was

only so much fulsome flattery. They were not in that prosperous financial position; and if Mr Goschen, who had left the court of directors, had been present that day, he should have put to him one or two questions which would have borne out the truth of his assertion. Mr Jones made some further remarks, with respect to what he thought the policy of the Bank should be.

Mr W. Ray Smee asked permission to draw the attention of the court to one little matter. The Chancellor of the Exchequer stated in the House of Commons, a few days ago, that he was going to make an impression upon the National Debt when he brought forward his Budget. He stated that it was his intention to touch the National Debt; and he (Mr Smee) thought if at the same time he would turn his attention to allowing the authorities of the Bank of England to take cognisance of trust, he would be doing a very wise thing. He believed that the property in trust included in the National Debt could not be far short, in round numbers, of 200,000,000*l* sterling. Now, if the Bank of England could take cognisance of trust, and he saw no reason why they should not be authorised so to do, of course paying the expense, it would be a great blessing to the holders of the National Debt. He must express his regret at what was called the Bank Holiday Bill. By the Bill, the 1st of June and the 1st of August were given as holidays; now, he knew no reason why these two days should be specially named. He took it that the great object of a holiday was either the occasion of some great national rejoicing or festival in honour of our religion. But why the 1st of June and the 1st of August should be named passed his comprehension. He had been looking at an old holiday list of this establishment—that for the year 1824, and although thirty-one holidays were kept by the Bank in that year, he found that every one of them was in some way connected with a great national rejoicing or festival in honour of our religion. Now, if this question was to be brought forward and settled in the House of Commons, he thought it should be taken in its broad and not in its narrow view, and any day appointed as a holiday should be a day either glorious in the annals of this country, or a great festival in honour of our religion.

The Governor, in reply, said he took it that all questions and remarks made upon these occasions should have reference to the business of the Bank, and, therefore, as a great deal of what Mr Jones had said had no reference whatever to the Bank—his remarks as to labour and other matters of the same kind—he would, perhaps, excuse him if he declined to follow him in the mass of his observations. The question of allowing interest on balances left with the Bank was not at all a new one. It had been frequently considered; it was open to a great many objections, and for his part, he did not see any ground whatever of advantage upon which it could be successfully undertaken by the Bank. With regard to the question of foreign bonds raised by Mr Gerstenberg, he could only say that "sufficient for the day is the evil thereof." Whenever the time should come, and probably some day or other it would come, when difficulties in the City became numerous, and when panic set in—when that day should arrive, the funds of the Bank of England would be always ready to administer such relief as might be consistently given under its rules; and he did not think a single instance could be quoted where anyone applying to the Bank, and having the proper security to offer, had not met with that assistance. With regard to the observations made by Mr Smee, as to the Bank undertaking trusteeships, such a thing would be wholly foreign to their province as administrators of the public funds.

Mr W. Ray Smee—My suggestion was that the Bank should have the authority to take cognisance of trusts in connection with the National Debt.

The Governor, in continuation, said the Government thought it would be highly inexpedient that they should do so. The question might be argued, but in reference to the interests of the proprietors to undertake such a duty could not be justified. With regard to the Bank holidays, that was not perhaps the proper time to discuss the matter as to whether the 1st of June and the 1st of August should be the days. The matter was under discussion in the House of Commons, and he had no doubt that there was a sufficient number of gentlemen in that assembly acquainted with the feelings and wishes of the community, to be able satisfactorily to bring those wishes and feelings before the House. If Mr Smee entertained a different opinion, he would suggest that he should go and see those who have charge of the Bill, and no doubt they will receive him kindly, and listen to what he has to say upon the subject.

The resolution for the dividend was then carried unanimously; the governor announcing that the warrants would be delivered and paid on April 6.

Sir David Salomons, M.P., said he was sure it must be satisfactory to the proprietors, and to the court of directors especially, to know that everyone seemed satisfied with the manner in which the affairs of the Bank of England were administered. Let them go wherever they might—either among the commercial classes, or the monetary classes, or the banking classes,—everybody felt very satisfied that there was a spirit of common accord existing between the Bank of England and the various monetary classes of the city. There could be no doubt about this. They had all felt that the Bank of England would have been greatly tried by the late war, but, to their great surprise, the rate of interest had been particularly low. He had no doubt that great responsibility had fallen upon the Bank of England in attending to the monetary affairs of Europe, and any person must at once see that the affairs of the Bank had been most carefully administered during the trying period through which they had passed. He must be permitted, as the duties of the present governor were about to expire, to address himself for a moment to that gentleman. It had been his (Sir David's) pleasure on many previous occasions to propose votes of thanks to governors about to retire from that position, but for the present governor he must say that his position has been a more responsible one than perhaps that of any governor who had preceded him. Former governors had had the advantage of the support of several gentlemen who had acquired eminence in every respect as members of the House of Commons; and never was the City of London or the board of this corporation better represented in that assembly than in the last session. Since, however, Mr Crawford had held the post of governor, the responsibility of representing it in the House of Commons had fallen entirely upon him, and never was that responsibility better discharged than it had been by him. Everyone will admit the good sense, the good taste, the good temper he had at all times displayed, and he was sure everyone, whether Members of Parliament who had heard Mr Crawford, or those who were outside that assembly, had read the reports of the proceedings, must admit that Mr Crawford had most ably discharged his duty both as a Member of Parliament and as the governor of this bank. He had very great pleasure in proposing a cordial vote of thanks to the governor, the deputy-governor, and the directors generally for the able manner in which they had conducted the Bank's affairs.

The Rev. M. James Taylor seconded, and the resolution was carried with acclamation.

The Governor said he wished to assure the court that he felt very sensibly the manner in which the proposition, made in such complimentary terms by his friend, Sir David Salomons, had been received. The post of governor of the Bank of England was the highest position to which the ambition of any man engaged in commerce in the City of London could aspire. It was a post of great labour, fatigue, anxiety, and responsibility, and nothing could be more gratifying to anyone who had passed it, as it had been his good fortune to, to find that at the expiration of his term of office, the services that he had rendered to the establishment were received by the proprietors in the manner in which they had ackowledged them that day. Happily his term of office had not been marked, as the terms of office of some of his predecessors had been, by periods of disaster in the commercial world, and this had enabled them to direct their attention more than usual to matters of a domestic nature. He meant in regard to the internal arrangement of their house, both the building in which they met for their business, and the establishment by which the business was carried on. He had referred to the labour and fatigue which the governor underwent, but there were some considerations which made them comparatively slight. First, he had ready access to those who had preceded him in that chair. In the next place, he had, or ought to have—and he believed he had had—the confidence of the court of directors; in the next place he had at all times the most able and experienced legal advice—advice which had never been able to fail the Bank at any time—which was of the greatest importance. He had also a most able and competent establishment, which he ventured to say was not to be surpassed by any public or private establishment in the whole kingdom. Lastly, and it is not an unimportant consideration, the business of the Bank of England was now governed and conducted upon principles, and carried out in practice upon rules, which were thoroughly well understood by the community at large, and he ventured to hope that so long as these principles were recognised, and were so carried out and practised, the Bank of England would never lose one atom of the prestige which belonged to it, or of its power of being possessed of such authority in the affairs of the country, or its capability of taking its proper part in times when the community looked to the Bank of England for its advice, counsel, and assistance.

The court then adjourned.

BANK OF LEEDS, LIMITED.

At the sixth ordinary general meeting, held February 1, 1871, the following report was presented to the shareholders:—

In submitting their annual statement of accounts, the directors have the pleasure to report that after paying the current expenses of the year, making full provision for all bad and doubtful debts, allowing interest upon the reserve fund and rebate upon undue bills, there remains a net profit of 11,877*l* 16s 2d. Adding to this, the sum of 2,453*l* 1s 2d brought forward from last year, the disposable balance becomes 14,330*l* 17s 4d. Out of this amount, the directors have appropriated 4,400*l* as an addition to the reserve fund, which (including the interest added) will thus be increased from 15,000*l* to 20,000*l*; and they now recommend the declaration of a dividend of 25s per share (being at the

rate of 5 per cent. per annum), free of income tax, to be payable on February 7. This will absorb 7,565*l*, leaving a balance of 2,365*l* 17s 4d to be carried forward to profit and loss new account. The annexed balance sheet is to December 31, 1870:—Liabilities—Dr. To capital (25*l* per share on 6,052 shares), 151,300*l*; reserve fund—previous amount, 15,000*l*; interest at 4 per cent., 600*l*; amount due on current, deposit, and other accounts, 193,386*l* 10s 3d; drafts current, and liability on acceptances, 158,601*l* 3s 11d; balance of profit and loss, viz.:—balance, Dec. 31, 1869, 2,453*l* 1s 2d; net profit for the year, 11,877*l* 16s 2d—total, 533,218*l* 11s 6d. Assets—Cr. Bills receivable, advances to customers, and loans, 496,150*l* 17s 4d; cash on hand and with agents, 27,011*l* 9s 6d; stamps on hand, 56*l* 4s 8d; bank premises, 10,000*l*—total, 533,218*l* 11s 6d. Profit and loss account: Dr. Current expenses, including salaries, stationery, rates, taxes, &c., 2,752*l* 4s 5d; rebate, carried to new account, 1,850*l* 6s 6d; balance, 14,330*l* 17s 4d, viz.: dividend at 5 per cent., 7,565*l*; carried to reserve fund, 4,400*l*; profit and loss new account, 2,365*l* 17s 4d—total, 18,933*l* 8s 3d. Cr. Balance, December 31, 1869, 2,453*l* 1s 2d; rebate, 1,419*l* 13s 10d; gross profit for the year, after providing for bad and doubtful debts, 18,827*l* 8s 10d; less interest allowed to customers, 3,766*l* 15s 7d; leaving 15,060*l* 13s 3d—total, 18,933*l* 8s 3d.

BANK OF NEW SOUTH WALES.

The annexed fortieth report was presented to the proprietors at the general meeting, held October 26, 1870:—

In laying before the proprietors the half-yearly statement of the liabilities and assets of the bank, certified by the auditors, the directors regret that their report on this occasion is not so favourable as usual. The protracted state of extreme depression which has injuriously affected the pastoral and other important industrial pursuits of the colonies has reduced the ordinary earnings of the bank, whilst at the same time the losses from bad debts have been unusually large. Besides this the bank has sufferred considerable losses of an exceptional character through the neglect and misconduct of some of its officers in New Zealand. Towards covering these, the directors, acting in accordance with the deed of settlement, have had recourse to the reserve fund, provided expressly with a view to meet contingencies of this kind; that fund, however, after satisfying the claims thus made upon it, still amounts to the large sum of three hundred thousand pounds. Having taken this course for the purpose of wiping out these losses and all such debts as are of a doubtful character, the directors are in a position to assure the proprietors of the soundness of the bank's affairs. After deducting rebate on current bills, interest on deposits, providing for bad and doubtful debts, reducing valuation of bank premises, and paying taxes on note circulation, there remained at the credit of profit and loss account on the 30th ult., 52,431*l* 0s 10d, which the directors recommend to be appropriated as follows:—Payment of dividend at the rate of 10 per cent. per annum, 50,000*l*; balance carried to "profit and loss," new account, 2,431*l* 0s 10d. During the past half-year an agency has been opened at the Ravenswood gold fields, in the colony of Queensland. The aggregate balance sheet to September 30, 1870 (including London branch to June 30, 1870, and New Zealand branches to September 5, 1870), is as follows:—Dr. Bank stock, 1,000,000*l*; reserve fund, 300,000*l*; notes in circulation, 574,090*l*; bills payable, 1,373,025*l* 0s 7d; deposits and other liabilities, 5,025,187*l* 15s 7d; profit and loss, 70,524*l* 17s 8d—total, 8,342,827*l* 13s 10d. Cr. Coin and cash balances, 1,426,660*l* 17s 2d; bullion in hand, and in transit to London, 808,505*l* 5s 11d; Government securities, 8,856*l* 18s; notes of other banks, 15,818*l*; bank premises, 172,994*l* 16s 2d; bills receivable, bills discounted, and other debts due to the bank, 5,906,952*l* 17s 6d; insurance account, 3,008*l* 19s 1d—total, 8,342,827*l* 13s 10d. Profit and loss, September 30, 1870:—Dr. Sept. 30, 1870. Rebate (at current rates) on bills discounted, not due at this date, 18,093*l* 16s 10d; dividend at the rate of 10 per cent. per annum, 50,000*l*; balance carried to "profit and loss," new account, 2,431*l* 0s 10d—total, 70,524*l* 17s 8d. Cr. March 31, 1870—Amount from last account, 4,856*l* 5s 10d; Sept. 30, 1870 balance of half-year's profits after providing for bad and doubtful debts, and including recoveries from debts previously written off as bad, 65,669*l* 11s 10d—total, 70,524*l* 17s 8d. Reserve fund, September 30, 1870:—Dr. Sept. 30, 1870—Amount written off to meet contingent losses, 33,333*l* 6s 8d; balance, 300,000*l*—together, 333,233*l* 6s 8d. Cr. March 31, 1870—Balance, 333,333*l* 6s 8d.

BANK OF NEW ZEALAND.

At the half-yearly general meeting of the proprietors, held at Auckland, October 26, 1870, the following report was adopted:—

The directors have the satisfaction of placing before shareholders the result of another half-year's operations. The net profit at September 30, after making liberal provision for all debts known to be bad or doubtful, and also the usual appropriations in reductions of bank premises and furniture accounts, amounts to 37,232*l* 2s 8d, to which has to be added balance of undivided profit at March 31 last, 8,013*l* 8s 11d, leaving now available for division 45,245*l* 11s 7d, of which the following appropriation is now recommended:—Payment of dividend at the rate of 10 per cent. per annum, 25,000*l*; bonus of 5s per share, equal to 5 per cent. per annum, 12,500*l*; balance carried to profit and loss new account, 7,745*l* 11s 7d. The dividend and bonus will be payable at head office on October 27, and at branches on receipt of advice. Since the last half-yearly meeting, a general meeting of the proprietors authorised the extension of the bank's capital, and 10,000 of the new shares were on the 1st instant allotted to the shareholders. The directors have much pleasure in stating that, as far as advices at present reach, the whole of the allotted shares have been readily taken up at the reserved price. The annexed shows the aggregate balance sheet at September 30, 1870, including London office balances at June 30, 1870:—Dr. Bank stock, 500,000*l*; reserve fund, 150,000*l*; notes in circulation, 283,974*l*; bills in circulation, 917,294*l* 16s 1d; deposits and other liabilities, 1,635,453*l* 3s; balance of profit and loss account at March 31, 1870, 8,013*l* 8s 11d; net profit for half-year, 37,232*l* 2s 8d—total, 3,531,967*l* 10s 8d. Cr. Coin and cash balances, 312,281*l* 11s 7d; bullion on hand and in transitu, 362,707*l* 0s 9d; Government securities, 180,700*l*; notes and bills of other banks, 3,527*l* 18s; landed property, 22,283*l* 8s 4d; bank premises, furniture, and stationery, 88,553*l* 15s 10d; insurance account, 3,754*l* 0s 8d; bills receivable, bills discounted, and other debts due to the bank, 2,558,159*l* 15s 6d—total, 3,531,967*l* 10s 8d. Profit and loss account:—Dvidend at the rate of 10 per cent. per annum, 25,000*l*; bonus of 5s per share, 12,500*l*; balance carried to profit and loss new account, 7,745*l* 11s 7d—total, 45,245*l* 11s 7d. Balance of profit at March 31, 1870, 8,013*l* 8s 11d; net profit for half-year, after writing off bad debts, 37,232*l* 2s 8d—total, 45,245*l* 11s 7d. Reserve fund: Balance, 150,000*l*.

BANK OF SCOTLAND.

At the meeting of the proprietors, held March 28, 1871, the subjoined report of the directors was submitted to the shareholders:—

The directors submit their annual report to the proprietors, accompanied by the usual statement of the assets and liabilities of the bank at the close of its financial year, upon February 28 last. The last annual report exhibited a balance at the credit of the profit and loss account of 3,776*l* 5s 7d; the net profits for the past year, after providing for the expense of management, and making provision for the bad and doubtful debts, amount to 132,340*l* 18s 6d; together, 136,117*l* 4s 1d. From this has to be deducted the half-yearly dividend, paid in October, at the rate of 12 per cent. per annum, 60,000*l*; leaving the sum of 76,117*l* 4s 1d. The directors have to recommend that a dividend at the rate of 12 per cent. per annum, under deduction of income tax, be now declared, amounting to 60,000*l*, leaving 16,117*l* 4s 1d. The directors have applied 5,000*l* in reduction of the cost of the hereditable property in the occupation of the bank. After deducting this sum, there remains a balance of 11,117*l* 4s 1d to be carried forward at the credit of the profit and loss account. The undivided profits, including the rest, amount to 311,117*l* 4s 1d. The amount at the debit of the bank premises account has been considerably increased during the last four years by the cost of the improvements upon the head office, the erection of new premises in Glasgow, and the purchase of the bank offices formerly belonging to the Central Bank. There are now 50 places at which the business of the bank is carried on in premises erected for that purpose. The directors have satisfaction in stating that the general transactions of the bank have exhibited a steady increase during the past as compared with the previous year. The continued low value of money, and the absence of any decided revival in the trade of the country, have, however, interfered with the realisation of more than a moderate amount of banking profit. The following is an abstract balance sheet as at February 28, 1871:—Liabilities—Paid-up capital, 1,000,000*l*; deposits, 8,260,688*l* 13s 6d; note circulation, 651,902*l* 2s; drafts issued, payable within fourteen days, 224,742*l* 1s 4d; acceptances to banking and other customers, 1,187,354*l* 18s 10d; half-yearly dividend, payable April 11, 1871, 60,000*l*; reserve fund, 300,000*l*; balance of profits carried forward, 11;117*l* 4s 1d—total liabilities, 11,695,804*l* 19s 9d. Assets—Gold and silver coin, and notes of other banks, 587,337*l* 15s 2d; Government securities, cash with London bankers, and short loans in London, 2,433,726*l* 15s 3d; Indian Government, Railway debenture stocks, and other similar securities, 215,357*l* 19s 11d; bank premises at Edinburgh and branches, 188,779*l* 10s 5d; bills discounted, cash accounts, and other advances, 8,270,602*l* 19s—total assets, 11,695,804*l* 19s 9d.

BANK OF SOUTH AUSTRALIA.

The following supplementary report was presented to the shareholders at the half-yearly meeting held January 12, 1871:—

In submitting for the information of the proprietors the half-yearly accounts to June 30 last, the court of directors have to report that the assets are in a sound condition, and that a due regard to economy is observed at all the branch establishments of the bank. The business in South Australia is conducted on safe and vigorous principles, commanding the increasing confidence of the court. Subjoined is the balance sheet for the half-year ending June 30, 1870 (profit and loss and reserved fund

being only to December 31, 1869) :--Liabilities--Promissory notes in circulation not bearing interest, 54,972*l*; bills of exchange in circulation not bearing interest, 139,632*l* 2s; balances due to other banks, 17,044*l* 3s; cash deposited not bearing interest, 151,682*l* 9s 4d; cash deposited bearing interest, 529,867*l* 14s 11d; total due to the public, 893,198*l* 9s 3d; capital paid up, 500,000*l*; reserved fund, 117,458*l*; profit and loss, 52,162*l* 9s 1d; due to shareholders, 669,620*l* 9s 1d—total, 1,562,818*l* 18s 4d. Assets—Coin and bullion, 96,793*l* 4s 7d; balances due from other banks, 59,454*l*; together, 156,247*l* 4s 7d; promissory notes or bills of other banks, 2,073*l* 11s 10d; Government securities, 156,679*l* 4s; landed and other property of the corporation, 33,352*l* 14s 9d; notes and bills discounted, or other debts due to the corporation not included under the foregoing heads, 1,214,466*l* 3s 2d—total, 1,562,818*l* 18s 4d.

BANK OF VICTORIA.

At the half-yearly general meeting, held at the Bank, Melbourne, February 7, 1871, the following thirty-sixth report of the directors was read :—

The board of management of the Bank of Victoria have now to submit their thirty-sixth half-yearly report to the proprietors of the bank stock, together with the balance sheet for the same period, duly certified by the auditors. Balance of undivided profits from June 30, 1870, 22,053*l* 2s 7d; net profits for past half-year, after providing for bad and doubtful debts, 31,167*l* 5s 1d; together, 53,220*l* 7s 8d, which the directors propose to apportion as follows, viz. :—Dividend at 10 per cent. per annum, 25,000*l*; bank premises, 2,500*l*; leaving, 25,720*l* 7s 8d, being balance of undivided profits carried forward. Aggregate balance sheet to December 31, 1870 :—Dr. Proprietors' capital, 500,000*l*; notes in circulation, 273,383*l*; bills in circulation, 653,989*l* 8s 3d; deposits (including interest accrued), 2,366,228*l* 9s 4d; due to other banks, 43,204*l* 6s 2d; reserve fund, 125,000*l*; profit and loss, 53,220*l* 7s 8d—total, 4,015,025*l* 11s 5d. Cr. Coin, bullion, and cash balances, 601,796*l* 3s 6d; bullion in transitu to London, 283,900*l*; due from other banks, 46,283*l* 4s 1d; bills receivable and other advances, 2,949,198*l* 5s 1d; policies of insurance, 1,315*l* 3s 6d; bank premises, 197,532*l* 15s 3d; less written off, 65,000*l*; leaving, 132,532*l* 15s 3d—total, 4,015,025*l* 11s 5d. Profit and loss : Dr. Current expenses, head office and 29 branches, with 11 sub-branches, 31,546*l* 10s 4d; balance, 53,220*l* 7s 8d—together, 84,766*l* 18s. Cr. Balance from June 30, 1870, 22,053*l* 2s 7d; gross profits for half-year (after deducting all interest paid or due to customers, and providing for bad and doubtful debts), 62,713*l* 15s 5d—together, 84,766*l* 18s. Dr. Dividend account at 10 per cent. per annum, 25,000*l*; bank premises, 2,500*l*; balance carried forward to next half-year, 25,720*l* 7s 8d—together, 53,220*l* 7s 8d. Cr. Balance, 53,220*l* 7s 8d. Reserve fund :—Dr. Balance, 125,000*l*. Cr. Balance from June 30, 1870, 125,000*l*.

BANK OF WHITEHAVEN, LIMITED.

The subjoined report of the directors was presented to the shareholders at the thirty-fourth annual meeting, held February 7, 1871 :—

The directors have to report that the net profits of the year ending December 31 last, after payment of income tax, and making provision for bad and doubtful debts, are as follows :—For the half-year ending June 30, 1870, 6,681*l* 9s 3d; for the half-year ending December 31, 1870, 6,498*l* 6s 8d; balance brought from December 31, 1869, 553*l* 10s 9d—total, 13,733*l* 6s 8d. The interim dividend paid in August at the rate of 15 per cent. per annum amounted to 5,509*l* 10s, and the directors now recommend a dividend for the last half-year at the rate of 17½ per cent. per annum, which will absorb a further sum of 6,427*l* 15s. They also recommend that the sum of 1,000*l* be transferred to the supplementary reserve, or contingent fund, and the sum of 250*l* to the bank buildings redemption fund, leaving a balance of 546*l* 1s 8d to be carried to the next account of profit and loss. Subjoined is the balance sheet to December 31, 1870 :—Assets—Cash in bank and with London and Westminster Bank, 79,950*l* 0s 1d; public bonds, Government stocks and other investments, bankers' acceptances, cash at fourteen days, and other securities, 176,115*l* 12s; bills of exchange, advances on current accounts, and special loans, 358,538*l* 2s 4d; bank property at Whitehaven and branches, 10,626*l* 18s 10d—total, 625,230*l* 13s 3d. Liabilities—Subscribed capital (7,346 shares at 10*l* per share), 220,380*l*. Capital paid up (7,346 shares at 10*l* per share), 73,460*l*; reserved surplus fund, 30,000*l*; supplementary reserve fund, 6,331*l* 16s 2d; bank buildings redemption fund, 1,750*l*; notes in circulation, 24,695*l*; short-dated drafts on London, 29,286*l* 15s 3d; amounts due on deposit, current, and other accounts, 451,483*l* 5s 2d; balance of profit and loss account, 8,223*l* 16s 8d—total, 625,230*l* 13s 3d. Profit and loss account, for the half-year ended December 31, 1870 :—Current expenses and salaries at head office and branches, and directors' remuneration, 1,685*l* 11s 5d; rebate on bills not yet due, and interest due on outstanding deposit receipts, 4,088*l* 7s 9d; balance of profit at June 30, 1870, 1,725*l* 10s; net profit for half-year ending December 31, 1870, 6,498*l* 6s 8d; balance of profit and loss account, as above, 8,223*l* 16s 8d—total, 13,997*l* 15s 10d. Balance of profit and loss from June 30, 1870, 1,725*l* 10s; gross profit during the half-year ended December 31, 1870, after payment of income tax, and making provision for bad and doubtful debts, 12,272*l* 5s 10d—total, 13,997*l* 15s 10d. Appropriation account :—Interim dividend of 15*l* per cent. per annum, paid on Aug. 6, 1870, 5,509*l* 10s; proposed dividend at the rate of 17*l* 10s per cent. per annum, 6,427*l* 15s; supplementary reserve fund, 1,000*l*; bank buildings redemption fund, 250*l*; balance to next account, 546*l* 1s 8d—total, 13,733*l* 6s 8d. Balance of profit brought from December 31, 1869, 553*l* 10s 9d; net profit for half-year ended June 30, 1870, 6 681*l* 9s 3d; net profit for half-year ended December 31, 1870, 6,498*l* 6s 8d—total, 13,733*l* 6s 8d.

BARNSLEY BANKING COMPANY.

At the thirty-ninth annual general meeting of the shareholders, held at Barnsley, February 9, 1871, the following report of the directors was presented to the shareholders :—

The bank accounts having been audited, it is found that the net profits during the past year, after deducting the working expenses, amount to the sum of 8,284*l* 19s 11d. Considering the depression of trade in the district, and the low rate of interest which has prevailed during the year, the directors are well satisfied with the amount of business done and the amount realised. The directors propose to appropriate it as follows :—Income tax, 136*l* 6s 8d; one-eighth to the reserved surplus fund (which will then amount to 29,560*l* 15s 7d), 1,035*l* 12s 6d; dividend at 16 per cent., 6,312*l*; board of directors, 500*l*; building fund, 150*l*; balance carried forward to next account, 151*l* 0s 9d—total, 8,284*l* 19s 11d.

BILSTON DISTRICT BANKING COMPANY.

The annexed thirty-fourth annual report is dated February 7, 1871 :—

Your directors have audited the accounts of the bank to December 31 last, and they have pleasure in submitting the following statements :—Liabilities—Paid-up capital, 60,000*l*; guarantee fund, 23,477*l* 3s 3d; deposits, credit accounts, notes and bills in circulation, rebate interest, &c., 296,433*l* 13s; proposed dividend and bonus, 4,500*l*—total, 384,410*l* 16s 3d. Assets—Government securities, debentures, preference shares, and guaranteed stock, 36,456*l* 17s 6d; bank premises and furniture, 4,000*l*; bills discounted, loans to customers, and other securities, 282,001*l* 15s 10d; cash and balance at London bankers, 61,952*l* 2s 11d—total, 384,410*l* 16s 3d. Profit—Dividend for the half-year ending June 30, 1870, 3,000*l*; proposed dividend and bonus, 4,500*l*; surplus to carry to guarantee fund after a grant to the officers of the establishment of 10 per cent. upon their salaries, 2,093*l* 17s 1d—total, 9,593*l* 17s 1d. Guarantee fund—Amount of this fund at last report, 20,081*l* 14s 4d; interest at 3 per cent., 602*l* 9s 4d; surplus profit, 2,093*l* 17s 1d; unclaimed dividends, 699*l* 2s 6d—present guarantee fund, 23,477*l* 3s 3d. All bad and doubtful debts have been amply provided for.

BIRMINGHAM JOINT STOCK BANK, LIMITED.

At the ninth annual general meeting, held at Birmingham, February 6, 1871, the following report was read :—

The directors have the satisfaction to report the continued prosperity of the bank, and to submit to the shareholders a duly audited statement of its affairs to December 31, 1870. All bad debts have been written off, and ample provision made for all doubtful debts. After deducting rebate of interest on bills discounted not yet due, and payment of all charges and expenses, the accounts show a net profit of 43,779*l* 14s 8d. An interim dividend at the rate of 20 per cent. per annum (free of income tax), amounting to 20,390*l*, was paid for the half-year ending June 30 last, and it is now proposed to make a similar distribution, to add 100*l*, as usual, to the bank premises redemption fund, and to carry the balance of 2,899*l* 14s 8d to the reserved surplus fund. The directors are pleased to observe a steady improvement in the general trade of the town. Annexed is a statement of liabilities and assets to December 31, 1870 :—Liabilities—Proprietors' capital, 203,900*l*; due to the public on deposit, current, and other accounts, 1,225,233*l* 14s 10d; bank premises redemption fund, 644*l* 12s 1d; reserved funds—(Guarantee fund invested as follows, viz. :—In Consols, 68,190*l* 5s; New Three per Cents., 10,000*l*; Indian Government Five per Cent. Debentures, 7,000*l*; India Four per Cent. stock, 1,000*l*; Indian railway debentures, &c., guaranteed by the Government of India as follows : East India Railway, 1,000*l*; Madras, 5,500*l*; Great Indian Peninsula, 4,800*l*; Bombay and Baroda, 1,000*l*; East India Railway Five per Cent. debentures converted into extension shares, 7,409*l* 15s; London and North-Western Railway debentures, 11,100*l*; London and South-Western ditto, 10,000*l*; North-Eastern ditto, 12,000*l*; Midland ditto, 10,000*l*; Lancashire and Yorkshire ditto, 10,000*l*; Great Western ditto, 3,000*l*; Great Eastern ditto, 10,000*l*; Great Northern ditto, 10,000*l*; London, Brighton, and South Coast ditto, 8,000*l*; Chester and Holyhead ditto, 5,000; Corporation of Birmingham bonds, 5,000*l*; total invested, 200,000*l*; reserved surplus fund uninvested, 15,548*l* 2s 11d)—213,548*l* 2s 11d—total, 1,645,326*l* 9s 10d. Assets—Government securities, railway debentures, &c., 225,788*l* 7s 1d; bills of exchange, 641,907*l* 3s 1d; promissory notes to the bank, 25,805*l*;

advances and loans on security, 634,862*l* 8s 6d; bank premises, being freehold in New street and leasehold in Temple row West, 19,424*l* 12s 5d; cash in hand and at agents, 97,538*l* 18s 9d—total, 1,645,326*l* 9s 10d.

BRADFORD BANKING COMPANY.

The following report of the directors was submitted to the shareholders on January 27, 1871:—

The directors have to report that after a thorough examination of the accounts of the company, and after making provision for all bad and doubtful debts, rebating the interest on bills not due, and paying the income tax, the net profit of the past year amounts to 48,321*l* 10s 11d; which, added to the surplus brought from the year 1869, 3,747*l* 1s 10d, makes a total of 52,068*l* 12s 9d. The directors recommend the appropriation of this sum as follows, viz.:—Payment of the usual dividend of 9*l* per share on 5,500 shares, 49,500*l*; guarantee fund, making this fund equal to the paid-up capital, viz., 220,000*l*, 1,880*l*; and the surplus, 688*l* 12s 9d, carried to the credit of profit and loss for the current year. Annexed is the statement of accounts as at December 31, 1870:—Liabilities—Paid-up capital, 220,000*l*; guarantee fund, 218,120*l*; contingent fund, 10,000*l*; own notes in circulation, 43,135*l*; deposits and credit balances, 1,280,055*l* 11s 7d; rebate of discount on bills, 4,181*l*; income tax, 857*l* 8s; profit and loss—surplus from 1869, 3,747*l* 1s 10d; net profit for 1870, 48,321*l* 10s 11d—total, 1,828,417*l* 12s 4d. Assets—Cash and bills on hand, 877,043*l* 12s 5d; ditto with London agents, 71,719*l* 8s 5d; advances on current accounts, 874,654*l* 11s 6d; bank premises, 5,000*l*—total, 1,828,417*l* 12s 4d. Profit and loss: Dr. Dividend of 9*l* per share on 5,500 shares, 49,500*l*; surplus, 2,568*l* 12s 9d—total, 52,068*l* 12s 9d. Cr. Balance brought down, 52,068*l* 12s 9d. Surplus account:—Dr. Guarantee fund, making this fund equal to the paid-up capital, viz., 220,000*l*, 1,880*l*; surplus carried to the credit of profit and loss for 1871, 688*l* 12s 9d—total, 2,568*l* 12s 9d. Cr. Balance brought down, 2,568*l* 12s 9d. Paid-up capital, 220,000*l*; guarantee fund, 220,000*l*; contingent or surplus fund, 10,000*l*; surplus to profit and loss for 1871, 688*l* 12s 9d.

BRADFORD COMMERCIAL JOINT STOCK BANK.

At the annual general meeting, held February 6, a dividend of 17½ per cent., or 3*l* 10s per share, for the year 1870, upon the capital stock was declared. The following is the general balance sheet to December 31, 1870:—Dr. Paid-up capital, 165,000*l*; guarantee fund, 120,000*l*; deposits, notes issued, &c., 308,375*l* 5s 7d; balance of profit and loss account, viz., surplus from 1869, 3,114*l* 3s 3d; net profit for 1870, 28,230*l* 12s 4d—total, 624,720*l* 1s 2d. Cr. Bills, notes, cash on hand, and advances on current accounts, 606,720*l* 1s 2d; bank premises, 18,000*l*—total, 624,720*l* 1s 2d. Profit and loss:—Dr. Dividend of 17½ per cent., 28,875*l*; surplus, carried to the credit of profit and loss for 1871, 2,469*l* 15s 7d—total, 31,344*l* 15s 7d. Cr. Balance brought down, 31,344*l* 15s 7d.

BRADFORD DISTRICT BANK, LIMITED.

At the eighteenth ordinary general meeting, held in Bradford, February 1, 1871, the following report was presented to the shareholders:—

In submitting to the members the half-yearly statement of accounts (as certified by the auditor), the directors have to report that the position and prospects of the business continue to be satisfactory. The net profits, after providing for bad and doubtful debts, amount to 11,629*l* 17s 4d; which, with the balance of 630*l* 19s 7d brought from the last account, makes a total of 12,260*l* 16s 11d to be appropriated. The directors propose adding 5,000*l* to the reserved fund, which will then be increased to 62,000*l*, to pay a dividend of six per cent. per annum, free of income tax, which will absorb 5,850*l*, to apply 637*l* 13s 3d in reduction of property and furnishing account, thereby reducing that account to 6,762*l* 3s 6d, and to carry forward 773*l* 3s 8d to profit and loss account for the present half-year. Balance sheet, December 31, 1870:—Liabilities—Capital called up, viz., 30*l* per share on 6,500 shares of 100*l* each, 195,000*l*; reserved fund, 57,000*l*; amount due to customers on current, deposit, and other accounts, 334,757*l* 5s 6d; unclaimed dividends, 189*l*; profit and loss, balance of this account, 12,260*l* 16s 11d—total, 599,207*l* 2s 5d. Assets—Cash and bills on hand, balances owing by customers and with bankers, 591,722*l* 15s 3d; bank premises and furnishings, 7,399*l* 16s 9d; stamps on hand, 84*l* 10s 5d—total, 599,207*l* 2s 5d. Profit and loss account:—Current expenses, viz., salaries, income tax on profits, stationery, directors' remuneration, &c., &c., Bradford and Keighley, 2,644*l* 5s; dividend account for payment of dividend of 18s per share, 5,850*l*; reserved fund, 5,000*l*; bank premises and furnishings, 637*l* 13s 3d; balance carried to profit and loss new account, 773*l* 3s 8d—total, 14,905*l* 1s 11d. Balance on June 30 last, 630*l* 19s 7d; interest, commission, &c., balance after deducting rebate of interest on bills discounted not yet due, and making provision for bad and doubtful debts, 14,274*l* 2s 4d—total, 14,905*l* 1s 11d.

BRADFORD OLD BANK, LIMITED.

The following report of the directors was presented to the proprietors at the half-yearly ordinary meeting, held January 30, 1871:—

The directors have much pleasure in presenting the shareholders with the balance sheet for the past half-year. The profits, after providing for bad and doubtful debts, amount to 21,395*l* 10s 1d, and this with the balance of 3,028*l* 9s 5d brought forward from last account, makes a total of 24,423*l* 19s 6d, which, after the deduction of 357*l* 4s 8d for income tax, will give a sum of 24,066*l* 14s 10d to be dealt with by this meeting. The directors recommend that a dividend of 1*l* 2s 6d per share, clear of income tax, be paid, which will absorb 21,695*l* 1s 3d, leaving a balance of 2,371*l* 13s 7d to be carried forward to the credit of the next half-year's account. The branch at Ilkely has been opened since September 1, and the branch at Bingley will be opened so soon as the necessary alterations in the premises have been made. Balance sheet, December 31, 1870:—Liabilities—Capital stock, 386,440*l*; less calls in arrear, 50*l*; leaving 386,390*l*; reserved fund, 125,000*l*; deposits, credit balances, &c., 732,496*l* 5s 11d; unpaid dividends, 62*l* 10s; rebate on bills, 3,275*l* 3s 1d; profit and loss—balance from last half-year, 3,028*l* 9s 5d; profit this half-year, 21,395*l* 10s 1d; together, 24,423*l* 19s 6d; less income tax, 357*l* 4s 8d; leaving 24,066*l* 14s 10d—total liabilities, 1,271,290*l* 13s 10d. Assets—Bills of exchange, 528,197*l* 7s 2d; cash in bank and at call, 79,510*l* 10s 8d; loans on stock and other securities, 101,244*l* 17s; investments, 16,703*l* 4s; advances on current accounts, 525,419*l* 11s; stamps on hand, 215*l* 4s; bank premises and furniture, 20,000*l*—total assets, 1,271,290*l* 13s 10d.

BUCKS AND OXON UNION BANK, LIMITED.

At the sixth ordinary general meeting, held at Buckingham, January 27, 1871, the following report was presented to the shareholders:—

The directors have the pleasure to report that, after having made full provision for rebate of bills, all other expenses, and contingencies, and setting aside 1,000*l* towards additions and improvements of the bank premises at several of the branches, the profits of the company for the year ending December 31, 1870, amount to 14,746*l* 8s 6d. To this must be added 1,043*l* 3s 11d, the amount carried forward to the credit of profit and loss in January, 1870. The directors recommend that 2,000*l* be added to the reserve fund, which will then amount to 9,000*l*, and that, in addition to the usual dividend of 7s 6d per share, a bonus of 1s 6d per share be declared, making, with the dividend of 7s 6d declared in July, a total distribution for the year at the rate of 16½ per cent. The balance, 589*l* 12s 5d, they recommend to be carried to the credit of profit and loss new account. Annexed is the balance sheet:—Dr. Capital, viz., 5*l* per share on 16,000 shares, 80,000*l*; amount due by the bank on deposits and current accounts, 522,198*l* 11s 9d; reserve fund, 7,000*l*; profit and loss, 9,789*l* 12s 5d—total, 618,988*l* 4s 2d. Cr. Cash in hand at branches and at agents, bills, bonds, advances to customers, investments in public stocks, &c., 607,038*l* 4s 2d; freehold premises, 11,950*l*—total, 618,988*l* 4s 2d. Profit and loss:—Dividend in July, 1870, 6,000*l*; balance, December 31, 1870, 9,789*l* 12s 5d, proposed to be distributed as under:—Dividend of 7s 6d per share, 6,000*l*; bonus of 1s 6d, 1,200*l*; reserve fund, 2,000*l*; balance to be carried to profit and loss new account, 589*l* 12s 5d; together, 9,789*l* 12s 5d—total, 15,789*l* 12s 5d. Balance brought forward January, 1870, 1,043*l* 3s 11d; profit for the year ending December 31, 1870, 14,746*l* 8s 6d—total, 15,789*l* 12s 5d.

CARLISLE CITY AND DISTRICT BANKING COMPANY.

The thirty-fourth annual general meeting of this company was held at Carlisle, February 14, 1871, when the following report of the directors was submitted to the shareholders, and unanimously adopted:—

In submitting the annual statement of the affairs of the bank, the directors have the satisfaction of reporting that the net profits for the year ending December 31 last amount to 16,802*l* 1s 4d. A dividend of 10 per cent. having been paid for the half-year ending June 30 last, and 348*l* 9s 6d added to the auxiliary fund, your directors now recommend a similar dividend of 10 per cent. for the half-year ending December 31 last, and that the balance, 421*l* 1s 10d, remaining after making these payments, be carried forward to the next account of profit and loss. Your directors have to report that bad debts amounting to 161*l* 10s 8d have been written off the auxiliary fund. The balance in favour of that fund, after these deductions have been made, amounts to 9,260*l* 7s 9d. A further bad debt may probably arise from the bankruptcy of Mr John Brockbank, but has the securities held by the bank have not all been realised, the directors cannot at present say what the loss, if any, may be. The guarantee fund remains at 71,009*l* 10s. A dividend of 10 per cent. was declared for the half-year, free of income tax. Annexed is an abstract of the balance sheet of this company for the half-year ending December 31, 1870:—Liabilities—Capital stock, 80,162*l* 10s; deposits, balances of account, and

notes in circulation, 408,471*l* 14s 6d; guarantee fund, 71,009*l* 10s; auxiliary fund, 9,717*l* 12s 7d; net profits for the half-year, 8,437*l* 6s 10d—total, 577,798*l* 13s 11d. Assets—Bank premises at Carlisle and the branches, 4,986*l* 13s 5d; cash and bills in the bank, advances on securities, &c., 572,812*l* 0s 6d—total, 577,798*l* 13s 11d. Profit and loss and auxiliary fund:—Dr. Property and income tax paid, 543*l* 17s 8d; dividend to June 30, 1870, 8,016*l* 5s; dividend to December 31, 1870, 8,016*l* 5s; bad debts written off, 161*l* 10s 8d; surplus profits, December, 1870, carried to profit and loss account for 1871, 421*l* 1s 10d; balance to auxiliary fund, 9,260*l* 7s 9d—total, 26,419*l* 7s 11d. Cr. Balance of auxiliary fund on February 8, 1870, 9,586*l* 7s 3d; net profits, June 30, 1870, 8,364*l* 14s 6d; net profits, December 31, 1870, 8,437*l* 6s 10d; transfer fees, 28*l* 1s; dividend on bad debt previously written off, 2*l* 18s 4d—total, 26,419*l* 7s 11d.

CARLISLE AND CUMBERLAND BANKING COMPANY.

At the thirty-fourth annual general meeting, held February 1, 1871, the following report of the directors was submitted to the proprietors:—

The directors, in submitting to the shareholders the annual balance sheet certified by the auditors, have to report that, after payment of all expenses, making provision for bad and doubtful debts, and paying the income tax, the net profits for the year 1870 amount to 13,714*l* 1s 5d. A dividend of 10 per cent. for the half-year ending June 30 last having been paid leaves now disposable the sum of 8,521*l* 11s 5d. The directors propose to declare a further dividend of 10 per cent. on the paid-up capital, payable on and after February 6. After making these payments there will remain a balance of 3,329*l* 1s 5d to be placed to the credit of contingent fund, which will then amount to 13,617*l* 2s 5d. The reserve surplus fund remains at 30,000*l*. Subjoined is the general balance sheet for year ending Dec. 31, 1870:—Liabilities—Capital stock paid up, 51,925*l*; circulation, deposits, and other liabilities, 424,246*l* 9s 2d; reserve surplus fund, 30,000*l*; contingent fund, 10,288*l* 1s; net profits for the year, 13,714*l* 1s 5d—total, 530,173*l* 11s 7d. Assets—Cash and bills in the bank and other available securities, 514,981*l* 1s 7d; real property at Carlisle, Appleby, Penrith, and Keswick, 10,000*l*; half-year's dividend paid, 5,192*l* 10s—total, 530,173*l* 11s 7d. Balance of profits, 8,521*l* 11s 5d.

CENTRAL BANK OF LONDON, LIMITED.

At the fourteenth ordinary general meeting, held at the London Tavern, January 19, 1871, the following report was submitted to the proprietors by the directors:—

The directors submit the result of the operations of the bank for the half-year ending December 31, 1870. The accounts show a gross profit, including the sum brought forward from last half-year, of 12,695*l* 17s 7d, and deducting from this the charges at head office and branches, directors' remuneration for the past half-year, and interest to customers, and writing off an adequate sum from the amount expended on bank premises, there remains a balance (including rebate) of 5,008*l* 10s. The directors therefore recommend the payment of a dividend at the rate of 5 per cent. per annum, free of income tax, and that the balance be carried forward to profit and loss new account. General balance sheet, December 31, 1870:—Capital and liabilities—Dr. (Capital—authorised, 1,000,000*l*; issued, in 20,000 shares of 10*l* each, 200,000*l*.) Amount of capital paid up, viz., 5*l* per share on 20,000 shares, 100,000*l*; amount due on current and deposit accounts, 467,412*l* 6s 6d; reserve fund, 5,000*l*; rebate of interest on current bills, 851*l* 8s 7d; profit and loss account—net profit, as per statement, 4,157*l* 1s 5d—total, 577,420*l* 16s 6d. Assets—Cr. Cash at Bank of England, in hand, and at call, 133,100*l* 13s 1d; bills discounted, loans, &c., 337,927*l* 8s 5d; bank premises, fittings, and furniture, 36,536*l* 1s 4d; investments at cost (market value at December 31, 1870, 68,559*l* 7s 6d), 69,856*l* 13s 8d—total, 577,420*l* 16s 6d. Profit and loss account for the half-year ending December 31, 1870:—Dr. General charges at head office and branches, including directors' fees for the past half-year, 4,960*l* 7s 5d; amount written off bank premises account for depreciation of leasehold premises, furniture, &c., 693*l* 6s 11d; interest paid and due on current and deposit accounts, 2,033*l* 13s 3d; rebate of interest on current bills, 851*l* 8s 7d; balance, being net profit to December 31, 1870, 4,157*l* 1s 5d—total, 12,695*l* 17s 7d. Cr. Balance at June 30, 1870, 2,604*l* 1s; deduct amount of thirteenth dividend paid at the rate of 5 per cent. per annum, 2,500*l*; leaving, 104*l* 1s; balance of profit for the half-year ending December 31, 1870, after providing for estimated loss by bad and doubtful debts, 12,591*l* 16s 7d—total, 12,695*l* 17s 7d.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

The annexed directors' report was presented at the seventeenth ordinary general meeting, held April 19, 1871:—

The directors, in submitting to the shareholders the balance sheet of the bank for the year ended December 31, 1870, regret that they are unable to recommend the payment of a dividend. In their circular, dated October 5, the directors informed the shareholders that provision would have to be made for losses, then estimated at 72,000*l*, viz., 22,000*l* caused by a fraud committed at Shanghai, and 50,000*l* arising from depreciation in the value of securities held in connection with overdue bills and advances. The severe depression in the markets experienced last autumn was aggravated during the remainder of the year by the continuance of the war; but notwithstanding these unfavourable circumstances, the whole of the produce held by the bank, with the exception of a small quantity (valued at 8,300*l*), has been realised. The result is that after taking credit for the profits of the year and the amounts held in reserve, a sum of 59,022*l* 9s 11d has to be carried forward as a deficiency to be met by future earnings; but that sum, representing 7½ per cent. of the capital, is fully believed to be a most ample provision for all losses known or apprehended, and does not justify the recent depreciation of the shares. It will be observed that the profits for the past twelve months are considerably below the average of previous years. The directors deem it important, therefore, to state that this falling off arose not only from the exceptional causes referred to in their last circular, but in a still greater degree from the disturbances of the exchanges, more especially in China, on the sudden outbreak of the war in Europe; and from the restrictions which the directors, as a measure of precaution, then imposed upon the transactions of the various agencies. Although these restrictions necessarily curtailed the profits of the bank, their effect has been to maintain the business on a perfectly sound footing; and judging from the advices already received, the operations of the agencies during the present year are of a satisfactory character. The shareholders are assured that the directors are more than ever alive to the necessity of enforcing at all the establishments of the bank the strictest economy consistent with efficient management. In consequence of the continuous decline during the last few years in the value of money in the East, the rates of interest allowed on deposits both at home and abroad, have been reduced.

CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

The following thirteenth annual report of the court of directors to the shareholders is dated April 4, 1871:—

The directors now present the audited annual balance sheet, profit and loss, and reserve fund accounts for the year ending December 31 last. The profit for the year, after deducting charges, amounts to 49,479*l* 14s 3d. Out of this sum a dividend of 4 per cent., amounting to 30,000*l*, was paid on July 1, 1870, and a further dividend of 2 per cent., amounting to 15,000*l*, is now declared, leaving a balance of 4,479*l* 14s 3d carried to reserve fund. The dividend warrants are in preparation, and will be transmitted to the shareholders in a few days. As announced at the last interim meeting, provision is now made for the final extinction of the bad and doubtful debts of previous years, to which have been added those appertaining to 1870. The sum of 117,411*l* 13s 11d, representing the aggregate amount of those losses, has been debited to the reserve fund account, which, after crediting it with the above sum of 4,479*l* 14s 3d, will then stand at 37,068*l* 0s 4d. The directors regret on this occasion being obliged to reduce the dividend. The year, as a whole, has been the most unfavourable for Eastern exchange operations within the experience of the bank. On the other hand, it is matter of congratulation that in the midst of such trying difficulties the losses of the year have been comparatively small. The business of the bank at its several branches for the current half-year is more satisfactory and encouraging than for some time past, and leads the directors to believe in a better result than they have lately been able to show. Annexed is the general balance for the year ending December 31, 1870:—Liabilities—Dr. Capital paid up, 750,000*l*; current and fixed deposits, 3,368,649*l* 19s 10d; bills payable, notes in circulation, and other sums due to the public, 4,802,872*l* 1s 8d; reserve fund, 37,068*l* 0s 4d; profit for the year ending December 31, 1870, as below, 49,479*l* 14s 3d; less—dividend for half-year ending June 30, 1870, 30,000*l*; carried to reserve fund, 4,479*l* 14s 3d; together, 34,479*l* 14s 3d; leaving, 15,000*l*—total,

8,973,590*l* 1s 10d. Assets—Cr. Coin and bullion, 1,863,440*l* 0s 5d; cash with bankers and money at call, 477,344*l* 6s 4d; Government securities, 912,917*l* 12s 5d; landed and house property at head office and branches, 224,806*l* 8s 2d; bills receivable, in hand, and on deposit, loans, and other debts, &c., due to the corporation, 5,495,081*l* 14s 6d—total, 8,973,590*l* 1s 10d. Profit and loss account:—Expenses of management at head office, ten branches, and six sub-agencies, for the year, 103,633*l* 16s 6d; balance, 49,479*l* 14s 3d—together, 153,113*l* 10s 9d. Gross profit for the year ending December 31, 1870, after deduction of income tax, 153,113*l* 10s 9d. Balance brought down, profit for the year, 49,479*l* 14s 3d. Reserve fund:—Amount written off for bad and doubtful debts up to December 31, 1870, including the old outstanding accounts referred to in the auditors' certificates of former years, 117,411*l* 13s 11d; balance carried down, 37,068*l* 0s 4d—together, 154,479*l* 14s 3d. Balance on December 31, 1869, 150,000*l*; amount transferred from profit and loss account, 4,479*l* 14s 3d—together, 154,479*l* 14s 3d. Balance brought down, 37,068*l* 0s 4d.

CITY BANK, LONDON.

At a general meeting of the shareholders, held at the London Tavern, January 17, 1871, the following thirtieth report was read and adopted:—

The accounts of liabilities and assets and of profit and loss, presented herewith, show that, after providing for interest on current and deposit accounts and for bad and doubtful debts, the gross profits for the six months ending December 31 last amount to 44,282*l* 17s 3d, to which is added the balance from last half-year of 1,443*l* 8s. Due provision having been made for current expenses and rebate of interest on bills discounted not yet due, the directors declare a dividend at the rate of 7*l* per cent. per annum, free of income tax, and 5,000*l* to the reserved fund, which thereby amounts to 100,000*l*, and carry forward a balance of 1,585*l* 14s 8d to the credit of the present half-year.

CLYDESDALE BANKING COMPANY.

At the thirty-third general meeting of the partners, held within the Bank, February 1, 1871, the following report was read and unanimously adopted:—

In submitting the annual statement of the affairs of the bank, the directors have the satisfaction of reporting that the net profits for the year ending December 31 last, after all necessary deductions have been made, amount to 121,769*l* 2s 3d; the balance brought from the previous year was 12,948*l* 4s 11d; making together, 134,717*l* 7s 2d for disposal at this time. The directors, while hesitating on this occasion to recommend an increase in the dividend, are of opinion that the above figures justify them in proposing that, in addition to the same dividend as last year—viz., 11 per cent.—there should be paid a bonus of 1 per cent. That this bonus and the first half of the dividend be paid on Tuesday, February 7, and the second half of the dividend —viz., 5*l* 10s per cent.—on Tuesday, August 1 next. These payments to be made without deduction of income tax. The directors have for several years been convinced of the propriety of removing the head office of the bank nearer to the centre of business in the City; and having acquired an eligible site in St Vincent place; the plans for the erection of a new building are now in course of preparation by the architects. The cost of the ground and buildings will necessarily be considerable, and as the directors think it undesirable to add materially to the bank buildings account, they recommend that 10,000*l* should now be laid aside from the profits of last year towards the erection of the new bank. The directors anticipate that they will be able to dispose of the present buildings on advantageous terms. The directors further recommend that the sum of 5,000*l* be now added to the reserved surplus fund, which will then amount to 280,000*l*, and that the balance of 9,917*l* 7s 2d be carried forward to next year's account. Proposed distribution of profits:—Dividend and bonus with income tax, 109,800*l*; new building, 10,000*l*; carried to reserved surplus fund, 5,000*l*; carried forward to next year's account, 9,917*l* 7s 2d—total, 134,717*l* 7s 2d. Annexed is an abstract of the balance sheet to December 31, 1870:—Liabilities—Capital of the bank, 1,000,000*l*; unissued stock, 100,000*l*; leaving, 900,000*l*; reserved surplus fund, 275,000*l*; circulation, 483,815*l*; deposits, 5,293,148*l* 17s 5d; acceptances, 172,257*l* 13s 9d; surplus profits, 134,717*l* 7s 2d—total, 7,258,938*l* 18s 4d. Assets—Bills discounted, 4,129,283*l* 19s 7d; credit accounts, 1,337,744*l* 18s 4d; bank buildings, and heritable property connected therewith, 116,500*l* 13s 5d; investments in Consols and other securities, and short loans on stock, 1,042,821*l* 12s; gold and silver coin and notes of other banks, and cash balances with London and country bankers, 632,587*l* 15s—total, 7,258,938*l* 18s 4d.

COLONIAL BANK.

The following report of the directors was submitted to the proprietors assembled at the sixty-sixth half-yearly general meeting, held at the London Tavern, January 5, 1871:—

The directors submit to the proprietors, in pursuance of the requisitions of the charter, the following statement of the debts and assets of the corporation on June 30, 1870, and of the net profit made during the half-year ending at that period, viz.:—Debts—Circulation, 356,422*l* 15s; deposits, bills payable, and other liabilities, 2,426,626*l* 19s 6d; paid-up capital, 500,000*l*; reserved fund, 148,000*l*; balance of profit from last half-year, 2,647*l* 16s 4d; net profit for the half-year, 44,184*l* 16s 1d—total, 3,477,882*l* 6s 11d. Assets—Specie, 171,621*l* 15s 4d; due to the bank in the colonies on bills discounted and purchased (including those past due), &c., 1,492,769*l* 17s 9d; due to the bank in the colonies, on current accounts, 23,036*l* 19s 8d; due to the bank in London on bills remitted, cash at bankers, &c., 1,781,696*l* 17s 7d; bank premises and furniture in London and in the colonies, 8,758*l* 16s 7d—total, 3,477,882*l* 6s 11d. The directors have again the pleasure of presenting a favourable statement, which enables them to recommend the payment of the same dividend as at the last half-yearly meeting. They consequently propose that out of the net profit, as declared above, which after providing for bad and doubtful debts and income tax amounts to 44,184*l* 16s 1d, an ordinary dividend of 6 per cent. and an extraordinary dividend of 2 per cent., being at the rate of 16 per cent. per annum, on the paid-up capital of the corporation, be made for the half-year ending on June 30, 1870, which will require 40,000*l*, leaving 4,184*l* 16s 1d; add balance brought forward from last half-year, 2,647*l* 16s 4d, making 6,832*l* 12s 5d, of which it is proposed to carry 5,000*l* to the reserve fund, increasing it to 153,000*l*, and the balance of 1,832*l* 12s 5d forward to the next half-year. The directors have pleasure in reporting that at the date of their last advices from the branches, the business was going on satisfactorily.

COLONIAL BANK OF AUSTRALASIA.

The following is the twenty-eighth report of the directors, presented to the shareholders at the half-yearly meeting, held at the Bank, October 18, 1870:—

The directors beg to submit to the proprietors the accompanying statement of the affairs of the bank as on September 30 last. The net profits, after deducting expenses of management, repairs to premises, rebate on bills current, and allowance for bad and doubtful debts, amount to, including the balance from last half-year, 26,873*l* 19s 8d, which the directors propose to apportion as follows, viz.:—Dividend at the rate of 8 per cent. per annum, 17,500*l*; reserve fund, 2,000*l*; balance carried to profit and loss new account, 7,373*l* 19s 8d. During the half-year a branch has been opened at Prahran with every prospect of success. The branch at Bacchus Marsh, having been found unprofitable, has been withdrawn. Annexed is the balance sheet for the half-year ending September 30, 1870:—Dr. Capital, 437,500*l*; bills in circulation, 211,301*l* 11s 4d; notes in circulation, 75,549*l*; deposits, 997,421*l* 15s 6d; balances due to other banks, 1,029*l* 4s 9d; reserve fund, 53,000*l*; profit and loss, net balance, 26,873*l* 19s 8d—total, 1,802,675*l* 11s 3d. Cr. Coin and bullion, 222,796*l* 15s 1d; foreign bills in transitu, 136,142*l* 19s 10d; balances due from other banks, 95,796*l* 15s 11d; bills receivable and other advances, 1,294,274*l* 6s 8d; bank premises, 53,664*l* 13s 9d—total, 1,802,675*l* 11s 3d. Profit and loss:—Current expenses, including salaries, rents, repairs, stationery, &c., 14,583*l* 6s 3d; dividend at 8 per cent. per annum, 17,500*l*; reserve fund, 2,000*l*; rebate on bills current, 9,679*l* 19s 6d; balance to profit and loss new account, 7,373*l* 19s 8d—total, 51,137*l* 5s 5d. Gross profit for the half-year, after providing for bad and doubtful debts 42,667*l* 1s 11d; amount brought forward from last half-year, 8,470*l* 3s 6d—total,

51,137*l* 5s 5d. Reserve fund:—Balance, 55,000*l*. Balance at March 31 last, 53,000*l*; transfer from profit and loss, 2,000*l*—total, 55,000*l*.

COMMERCIAL BANK OF SCOTLAND.

The following abstract of the balance sheet was laid before the annual general meeting of the proprietors, held at Edinburgh, December 17, 1870:—

Liabilities--Paid-up capital, 1,000*l*; deposits, 7,553,246*l* 17s 5d; acceptances by the bank and its London agents, and drafts outstanding, 332,955*l* 10s 8d; notes in circulation, 709,212*l*; rest or surplus fund at November 1, after providing for dividend and bonus payable in January, and 2,000*l* in reduction of the cost of bank's buildings, 361,609*l* 19s 2d; set apart to pay dvidend in January, 1870, 60,000*l*; ditto to pay extra dividend or bonus out of year's profits, 20,000*l*; ditto to be applied in reduction of the cost of bank's buildings, 5,000*l*—total, 10,022,024*l* 7s 3d. Assets — Bills discounted and advances on accounts 7,090,526*l* 0s 3d; bank's buildings at Edinburgh and the branches, 116,334*l* 1s 4d; Government stocks, short loans, and cash balances with London correspondents, 1,477,376*l* 19s 4d; Bank of England stocks, the bank's stocks, debentures, and other investments, 725,663*l* 7s 11d; gold and silver coin and notes of other banks, 612,123*l* 18s 5d—total, 10,022,024*l* 7s 3d. Statement of profits—Net profits for the year, after deducting the expenses of management, and providing for all bad and doubtful debts, 152,168*l* 3s 9d, which is thus disposed of—dividend paid in July last, 60,000*l*; set apart for dividend to be paid on January 3, 1871, 60,000*l*; ditto for extra dividend or bonus out of year's profits, 20,000*l*; ditto to be applied in reduction of the cost of bank's buildings, 5,000*l*; balance to rest or surplus fund, 7,168*l* 3s 9d. The dividend was declared at the rate of 12*l* per cent. per annum, without deduction of income tax; and in addition thereto an extra dividend or bonus of 2*l* per cent. out of the profits of the year was made payable, also free of income tax, along with the half-year's dividend on January 3. The free rest, after applying 5,000*l* in reduction of the cost of properties, and providing for the half-year's dividend and bonus above mentioned, amounted to 361,609*l* 19s 2d, being 7,168*l* 3s 9d in excess of the amount at the corresponding period last year.

COMMERCIAL BANKING COMPANY OF SYDNEY.

The following forty-fifth report was presented to the shareholders at a general meeting, held at the Banking house, Sydney, January 20, 1871:—

The directors beg to place before the shareholders a statement of the assets and liabilities of the bank on Dec. 31, 1870. The profits for the half-year, after deducting rebate on current bills, paying note-tax, and making provision for bad and doubtful debts, &c., &c., including the undivided balance from last half-year, amount to 48,633*l* 12s, which the directors appropriate thus—dividend for the half-year at the rate of 15 per cent. per annum, 30,000*l*; bonus of 5s per share, 4,000*l*; reserve fund, 10,000*l*; undivided balance, 4,633*l* 12s. The reserve fund has now reached 130,000*l*.

CONSOLIDATED BANK, LIMITED.

At the half-yearly meeting, held January 19, 1871, the following report was presented and unanimously adopted:—

In submitting the accounts and balance sheet for the half-year ending December 31 last, the directors congratulate the shareholders upon the steadily advancing prosperity of the bank. The accounts show that after payment of all expenses, and making provision for bad and doubtful debts, there remains a net profit for the half-year of 31,667*l* 13s 10d, to which has to be added the balance from June 30, 1870, viz., 6,120*l* 4s 5d, making a total available for distribution of 37,787*l* 18s 3d. This sum the directors propose to appropriate as follows:—To the payment of a dividend at the rate of 7 per cent. per annum, free of income tax, 28,000*l*; to carry to reserved surplus fund (making with the interest added 5,000*l* for the half-year), 4,250*l*; to carry forward to next account, 5,537*l* 18s 3d. With the above appropriation, and including interest allowed thereon for the past six months, the reserved surplus fund will amount to 55,000*l*.

CUMBERLAND UNION BANKING COMPANY, LIMITED.

The following report was read at the forty-second ordinary general meeting of the company, held at Carlisle, February 6, 1871:—

The directors have the pleasure to submit their report for the year ending December 31, 1870. The books and accounts have been audited by Messrs Quilter, Ball, and Co., and a copy of the statement of accounts certified by them is annexed hereto. The net balance at the credit of profit and loss account for the year, after making provision for bad and doubtful debts, is 29,741*l* 1s 11d, out of which a dividend of 15s per share was paid in July last. The directors have now the satisfaction of recommending a further dividend of 15s per share, making together 1*l* 10s for the year 1870, to be payable at the head office and branches, free of income tax, on February 7. These two dividends, together with income tax, and directors' remuneration, absorb 28,134*l* 6s 6d, leaving the balance of 1,606*l* 15s 5d to be carried forward to next account. General balance sheet, December 31, 1870:—Capital paid up, 225,000*l*; reserve or guarantee fund, 65,000*l*; deposits on receipt and current account balances, 1,119,649*l* 1s 6d; notes in circulation, 34,915*l*; balance of profit and loss account, 15,106*l* 15s 5d—total, 1,459,670*l* 16s 11d. Cash on hand at head office and branches, 67,422*l* 5s; ditto at call, and on security at short notice, 266,525*l* 1s 8d; bills discounted, customers' balances, &c., 1,024,786*l* 19s 3d; investment of reserve fund, in Consols and other investments, 65,094*l* 15s; bank property at Carlisle and branches, 35,331*l* 18s 1d; bills and other stamps on hand, 509*l* 17s 11d—total, 1,459,670*l* 16s 11d. Profit and loss account for the year ending December 31, 1870:—Expenses at head office and branches, &c., 10,984*l* 4s 11d; interest on deposits and credit balances, and rebate on bills, 19,689*l* 15s 3d; balance, being net profit, 29,741*l* 1s 11d—total, 60,415*l* 2s 1d. Balance brought forward from December 31, 1869, 1,222*l* 17s 11d; gross income at head office and branches during the year, after making provision for bad and doubtful debts, 59,192*l* 4s 2d—total, 60,415*l* 2s 1d. Interim dividend to June 30, 1870, 13,500*l*; income tax, 609*l* 6s 6d; directors' remuneration for the year 1870, 525*l*; balance available, 15,106*l* 15s 5d—total, 29,741*l* 1s 11d. Net profit brought down, 29,741*l* 1s 11d.

DEVON AND CORNWALL BANKING COMPANY.

The following report of the directors was read at the thirty-ninth annual meeting of the proprietors, held at Plymouth, February 17, 1871:—

The directors have pleasure in meeting the shareholders again, on this the thirty-ninth anniversary of the bank. After making ample provision for all bad and doubtful debts, and giving gratuities to managers and clerks, &c., the balance of the profit and loss account amounts to 17,968*l* 5s 8d. The directors recommend the payment of the usual dividend of 2*l* per share, in addition to the 2*l* per share paid on Sept. 1 last, being 12½ per cent. per annum, free of income tax. This will leave a balance of 1,968*l* 5s 8d to be transferred to "accumulating fund account," which, with the balance of 2,533*l* 14s 11d brought forward last year, makes this account Cr. 4,502*l* 0s 7d. From this fund the directors have taken 3,000*l*, to be appropriated in the following manner:—2,000*l* to be added to the "guarantee fund," and 1,000*l* to be paid the shareholders as a bonus of 5s per share,

in addition to, and at the same time as, the half-year's dividend, leaving the "accumulating fund account" Cr. 1,502*l* 0s 7d. In conclusion the directors have satisfaction in stating, that after a careful inspection as usual of each branch, they believe the bank to be in a flourishing and healthy condition. The company consists of 388 shareholders, holding 4,000 shares. Annexed is a statement of accounts to December 31, 1870:—Dr. Subscribed capital, 4,000 shares, 32*l* paid, 128,000*l*; deposits on current accounts, interest notes, &c., 1,319,985*l* 14s 11d; guarantee fund, 1869, 62,000*l*; added to guarantee fund, 1870, 2,000*l*; accumulating fund, 1869, 2,533*l* 14s 11d; added to accumulating fund, 1870, 1,968*l* 5s 8d; together, 4,502*l* 0s 7d; transferred to guarantee fund, 2,000*l*; reserved for bonus of 5s per share, 1,000*l*; together, 3,000*l*; leaving 1,502*l* 0s 7d—total, 1,513,487*l* 15s 6d. Cr. Advances on securities, current accounts, bills of exchange, estate, bank notes, and gold at Plymouth and the branches, 1,513,487*l* 15s 6d. Profit and loss account:—Paid—Interest on deposits, expenses of establishment, appropriated loss, income tax, &c., 49,829*l* 5s 4d; dividend paid September 1, 1870, 8,000*l*; reserved for dividend, 8,000*l*; carried to accumulating fund, 1,968*l* 5s 8d—total, 67,797*l* 11s. Received—Interest, commission, and discount, 67,797*l* 11s.

DUDLEY AND WEST BROMWICH BANKING COMPANY, LIMITED.

The following report was submitted to the shareholders at the thirty-seventh annual meeting, held at the Bank, Dudley, February 7, 1871:—

The annexed balance sheet, made up to Dec. 31, 1870, having been duly examined and certified as correct by the auditors, the directors recommend to the shareholders a dividend of 5s per share for the past half-year, payable, free of income tax, on March 1. Taken altogether, the results of the past year may be regarded as satisfactory, the trade of the district having shared in the gradual improvement so long looked for, and the business of the bank continuing on a safe and steady basis. But for the war, which has raged on the continent for the last six months, still more marked progress might have been exhibited. It is a source of gratification to the directors to be enabled to state that there has been no loss whatever sustained by the bank during the past twelve months. Such a state of things must, however, be regarded as quite exceptional, as banks, no matter how carefully their affairs may be administered, must incur the risk of occasional bad debts, in common with all commercial undertakings. The shareholders will also be glad to learn that the entire debt of William Haden and Son has been expunged from the books, and that one of the works held as security by the bank is let, while negotiations are in active progress for letting another of the properties held in like manner. Balance sheet, Dec. 31, 1870:—Liabilities—Sundry proprietors, holding 8,520 shares for amount of paid-up capital, 85,200*l*; notes in circulation, 34,925*l*; sundry persons, for amount due on current and deposit accounts, including interest thereon, 524,010*l* 10s 9d; suspense account, 1,160*l* 2s 11d; unclaimed dividends, 240*l*; discount on bills not arrived at maturity, 700*l*; bad debt reserve, 5,801*l* 10s 2d; profit and loss account, being the present unappropriated balance to pay dividend of March 1, 1871 (making the annual dividend 4,260*l*), 2,130*l*—total, 654,167*l* 3s 10d. Assets—Cash in hand, bills discounted, advances in accounts, and other securities, 534,966*l* 18s; 90,000*l* New Three per Cents., 84,343*l* 15s; 30,000*l* Consolidated Three per Cents., 28,277*l* 3s; bank buildings, 6,579*l* 7s 10d—total, 654,167*l* 3s 10d.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

At the thirty-fifth ordinary meeting, held January 31, 1871, the following report was adopted:—

The directors have to lay before the proprietors the usual summary of accounts made up at the branches to September 30, and in London to December 31 last, showing an available balance, after writing off bad and doubtful debts, as estimated by the managers, of 25,425*l* 8s 1d. This amount, it will be observed, shows a more favourable result than for several preceding half-years. It should, however, be explained that a portion of these profits strictly belonged to the previous half-year. The directors have not concealed their anxiety as to some of the station securities held by the bank; and it is with much satisfaction that they are able to announce that—with one exception, which gives them no concern—all these properties have been disposed of. The accounts are not yet completely adjusted, but the directors are in a position to say that the reserved fund is more than sufficient to provide for all the losses. It is satisfactory to know that when the accounts alluded to have been finally closed, the whole of the bank's capital will again become productive, and increased profits from its employment may confidently be anticipated. It was expected that a considerable improvement would have taken place in the value of pastoral properties: to some extent this has been realised, and it would have been more decided but for the continuance of the war. From the latest colonial advices in the possession of the directors, they gather that the prospects of the present season are very encouraging, both for the agricultural and pastoral interests. The directors propose that out of the balance of 25,425*l* 8s 1d a dividend be paid at the rate of seven per cent. per annum, free of income tax, on 600,000*l*, the paid-up capital of the bank, which will require 21,000*l*; that the premises and furniture accounts be further reduced by 1,000*l*, and that 3,425*l* 8s 1d be carried forward to the current half-year. Liabilities—Paid-up capital, 600,000*l*; deposits, 764,757*l* 5s 9d; bills payable and other liabilities, 255,011*l* 11s 2d; circulation, 91,670*l*; reserved fund, 40,000*l*; balance of profit from last half-year, 520*l* 12s 4d; amount carried to profit and loss account, 40,272*l* 0s 3d—total, 1,792,231*l* 9s 6d. Assets—Bills receivable, (including the estimated value of those overdue) loans on security, cash at bankers &c., 1,529,474*l* 8s 1d; specie and bullion, 203,271*l* 12s 8d; bank premises and furniture, 86,347*l* 2s 6d; less written off, 26,861*l* 13s 9d; leaving 59,485*l* 8s 9d—total, 1,792,231*l* 9s 6d. Profit and loss account:—Current expenses in Adelaide, Melbourne, Sydney, and sub-branches, 12,664*l* 10s 4d; ditto in London, including directors' remuneration and income tax, 2,702*l* 14s 2d; balance, 25,425*l* 8s 1d—total, 40,792*l* 12s 7d. Balance from last half-year, 520*l* 12s 4d; amount brought down, 40,272*l* 0s 3d—total, 40,792*l* 12s 7d.

EXCHANGE AND DISCOUNT BANK, LIMITED.

The annexed report is dated Leeds, December 31, 1870:—

In submitting the ninth report to the shareholders, your directors recommend that the usual dividend, at the rate of 6 per cent. per annum, be declared for the past half-year, and that the balance, 1,620*l* 1s 7d, also 6 per cent interest, 201*l* 7s 3d, together amounting to 1,821*l* 8s 10d, be added to the reserve fund, thereby increasing it to 8,532*l* 17s 5d. Your directors append a tabular statement showing the progress of the reserve fund, which furnishes a complete key to the progressive career of the bank, the dividends upon the shares never having been less than 6 per cent. After payment of a dividend, the reserve fund amounted, on December 31, 1866, to 595*l* 3s; on June 30, 1867, to 1,002*l* 18s 10d; on December 31, 1867, to 1,510*l* 12s 8d; on June 30, 1868, to 2,304*l* 18s 7d; on December 31, 1868, to 3,020*l* 13s 7d; on June 30, 1869, to 4,105*l* 3s; on December 31, 1869, to 5,253*l* 14s 2d; on June 30, 1870, to 6,711*l* 8s 7d; on December, 31, 1870, to 8,532*l* 17s 5d. General balance, December 31, 1870:—Dr. Bills and cash in hand and at call, and country cheques in transit, 62,343*l* 8s 10d; current accounts, 40,060*l* 13s 2d; rents (bank chambers) due December 31, 168*l* 14s; bank furniture, 276*l* 15s 6d; trade expenses, salaries, &c., 1,191*l* 18s; rates and taxes, 84*l* 9s 8d; rebate on bills discounted not yet due, 199*l* 9s 9d; bank premises and chambers, 9,000*l*; purchase of business — J. J. Cousins' shares, 16,666*l* 13s 4d; H. Allen's shares, 8,333*l* 6s 8d; interest paid, 2,850*l* 15s 7d; commission paid London and Westminster Bank, Irish and Scotch banks, &c., 388*l* 14s 10d; duty on drafts, 48*l* 17s 5d—total, 141,613*l* 16s 9d. Cr. Paid on shares 50,000*l*; deposit accounts, 18,117*l* 3s 3d; current accounts, 32,426*l* 2s 10d; customers' deposited bills left for discount, 5,215*l* 11s 4d; reserve fund—balance from June 30, 1870, 6,711*l* 8s 7d; 6 month's interest to date at 6 per cent, 201*l* 7s 3d; bills and cheques left for collection, &c., 248*l* 3s 11d; balance of undue interest, 184*l* 3s 2d; drafts in circulation, 20,527*l* 16s 9d; rents, 235*l* 19s 8d; transfer fees, 15*s*; rebate on drafts, 15*l* 6s 7d; interest received, 5,643*l* 3s 9d; commission received, 2,086*l* 14s 8d—total, 141,613*l* 16s 9d. Bills of exchange account:—Bills under discount and deposited with the bank for discount, 191,501*l* 5*s*. Bills re-discounted, 151,790*l* 5s 4d; bills not re-discounted, 39,710*l* 19s 8d—total, 191,501*l* 5s. Profit and loss account:—Trade expenses, salaries, postage, &c., 1,191*l* 18s; rates and taxes, 84*l* 9s 8d; rebate on undue bills, 199*l* 9s 9d; interest paid, 2,850*l* 15s 7d; commission paid London and Westminster Bank and Irish and Scotch banks, 388*l* 14s 10d; draft duty, 48*l* 17s 5d; bad and doubtful debts, 142*l* 3s; balance down, 3,120*l* 1s 7d—total, 8,026*l* 9s 10d. Rents, 235*l* 19s 8d; transfers fees, 15s; rebate on undue drafts, 15*l* 6s 7d; interest received, 5,643*l* 3s 9d; commission ditto, 2,086*l* 14s 8d; sundry items, 44*l* 10s 2d—total, 8,026*l* 9s 10d. Dividend at 6 per cent., 1,500*l*; balance to reserve fund, 1,620*l* 1s 7d—total, 3,120*l* 1s 7d. Balance, being net profit for the half-year, 3,120*l* 1s 7d. Reserve fund:—Balance, 8,532*l* 17s 5d. Balance June 30, 1870, 6,711*l* 8s 7d; 6 months' interest thereon, at 6 per cent., to December 31, 1870, 201*l* 7s 3d; balance (profit and loss) December 31, 1870, 1,620*l* 1s 7d—total, 8,532*l* 17s 5d.

GLAMORGANSHIRE BANKING COMPANY.

At the half-yearly meeting of the proprietors, held at Neath, February 7, 1871, the following report was presented and read, and also summaries of the liabilities and assets of the company as they stood on December 31, 1870:—

The directors and managers have pleasure in submitting to the proprietors summaries of the liabilities and assets of the bank as they stood on December 31, 1870, and they have to report that, after making due provision for bad and doubtful debts, they are enabled to recommend that a dividend out of the profits, at the rate of 10 per cent. per annum, and free from income tax, be declared upon the paid-up capital of 180,000*l*

that the guarantee fund be increased to 70,000*l*; and that the sum of 1,374*l* 2s 5d be carried on till next half-year.

HALIFAX JOINT STOCK BANKING COMPANY.

The following report was presented by the directors to the proprietors at their annual general meeting, held January 25, 1871:—

The directors have pleasure in meeting the shareholders on this the forty-first annual general meeting, and have to present to them the following report of the operations of the bank for the past year. The directors have to report that (after making provision for bad and doubtful debts) the net profits of the year (including 481*l* 16s 2d brought forward from the preceding year) amount to 24,046*l* 2s 4d. The directors propose that this sum should be appropriated as follows, namely:—That 11,250*l*, the dividend and bonus for the first half-year (7½ per cent.) be confirmed; 11,250*l* be now divided, being dividend and bonus of 7½ per cent., and with previous dividend making 15 per cent. for the year, clear of income tax; 395*l* 11s 8d for income tax; and 1,150*l* 10s 8d be carried to next account. The reserve fund remains at 105,000*l*, and the bank premises free.

HONG KONG AND SHANGHAI BANKING CORPORATION.

The annexed eleventh report of the court of directors was read at the ordinary general meeting of shareholders, held at Hong Kong, February 15, 1871:—

The directors have now to submit to you a general statement of the affairs of the corporation, and balance sheet for the half-year ending on December 31 last. The net profits for that period, including $99,398.33 brought forward from last account, after paying all charges and deducting interest paid and due, amount to $465,968.82, of which, after taking out rebate on bills not yet due, and remuneration to directors, there remains for appropriation $451,141.46. From this sum the directors recommend the distribution of a dividend of $5 per share on the paid-up shares, and of $3 per share on the new shares, being equivalent to four per cent. for the half-year; this will absorb $160,000, and of the balance the directors propose retaining $268,587.13 to meet eventual losses on present outstandings, carrying the balance of $22,554.33 to the credit of new profit and loss account. If this appropriation of profits be confirmed by the meeting, the shareholders will have received as dividend for the year 1870, the sum of $370,000 (ten per cent. on the paid-up capital), all bad and doubtful assets will be amply provided for, and undivided profits of $22,554.33 will be carried forward. The directors regret that the depreciation on previous valuations of some of the bank's securities, together with the position of some transactions entered into during the six months under review, compel them to recommend the retention of such a large sum as $268,587.13 out of the half-year's earnings, and in consequence to reduce the usual dividend of six per cent. for the half-year to four per cent.; but they deem it best for the interest of the shareholders to make full provision for all doubtful outstandings, and at the same time to leave the reserve fund intact. Although the dividend for the six months is not so favourable for shareholders as in previous half-years, still the directors think the general result is extremely satisfactory, if proprietors will bear in mind the stagnation in trade, the depreciation of securities, and the unremunerative turn taken by exchanges in consequence of the Franco-German war. The proprietors may be congratulated on the strong position held by the bank at all places where its business is carried on. Its resources have increased materially during the past year; the deposits alone showing an increase of $3,400,000, and in every way the bank's business has most successfully progressed in proportion with the increase of the paid-up capital. A new agency has been established at Saigon and is working satisfactorily. The fourth call of $25 per share on the new shares in the capital of the corporation will fall due on July 1 next, and the fifth and final call of the same amount on July 1, 1872.

HULL BANKING COMPANY.

The 37th annual general meeting of the proprietors was held at the Vittoria Hotel, February 16, 1871, when the report of the directors was unanimously adopted; a dividend and bonus was declared, making, with the interim dividend of 20s paid in September last, 16 per cent. per annum; a sum of 3,000*l* was added to the reserve fund, making the amount of that fund 58,739*l*, and 2,000*l* carried to the credit of the building fund.

IMPERIAL BANK, LIMITED.

At the seventeenth ordinary general meeting of the shareholders held at the City Terminus Hotel, Cannon street, January 17, 1871, the following report was taken as read:—

The directors beg to report on the operations of the bank for the half-year ending December 31, 1870. By the annexed balance sheet and profit and loss account, it will be seen that the profits, including 3,543*l* 5s 1d brought forward from the last account, amount to 30,694*l* 9s 1d. After payment of current expenses, making provision for bad and doubtful debts, allowing rebate of interest on bills discounted not yet due, there remains an available balance of 17,177*l* 11s 5d. Out of this amount the directors recommend a dividend at the rate of 6 per cent. per annum, which will absorb 13,500*l*, leaving to be carried to profit and loss new account, 3,677*l* 11s 5d.

LEICESTERSHIRE BANKING COMPANY.

At the forty-first annual general meeting of the shareholders, held at Leicester, February 8, 1871, the following report was submitted by the directors:—

The directors have pleasure in submitting to the proprietors the balance sheets for the half-years ending June 30 and December 31 last. After making provision for bad and doubtful debts, and paying the income tax, the net profit of the bank for the past year amounts to 24,132*l* 11s 4d. This sum, added to 2,131*l* 10s 10d, the unappropriated balance of the preceding year, makes a total of 26,264*l* 2s 2d, in which amount is included 1,912*l* 11s 4d for interest on the guarantee fund. The directors paid a dividend of 1*l* 15s per share for the half-year ending June 30, amounting to 8,750*l*; and they now recommend that the dividend for the half-year ending December 31 last be 1*l* 15s per share, being 10 per cent. on the paid-up capital. After the payment of these dividends and the appropriation of the interest on the guarantee fund, as above, a balance of profit, amounting to 6,851*l* 10s 10d, will remain; out of this amount the directors further recommend the payment of a bonus of 1*l* per share; and that the balance of 1,851*l* 10s 10d be carried forward to the current year. The profit and loss account will then stand thus:—

Dr. Dividend paid to the shareholders for the half-year ending June 30, 1870, 8,750*l*; ditto, ending December 31, 1870, 8,750*l*; bonus of 1*l* per share, 5,000*l*; interest on the guarantee fund,

1,912*l* 11s 4d; balance to be carried forward, 1,851*l* 10s 10d—total, 26,264*l* 2s 2d. Cr. Net profit for the year 1870, 24,132*l* 11s 4d; balance of profit, 1869, 2,131*l* 10s 10d—total, 26,264*l* 2s 2d. And the guarantee fund thus:—Balance, January 1, 1870, 65,229*l* 10s; one year's interest at three per cent., 1,912*l* 11s 4d—total, 67,142*l* 1s 4d. Paid-up capital, 175,000*l*; guarantee fund, 67,142*l* 1s 4d—total, 242,142*l* 1s 4d.

LIVERPOOL COMMERCIAL BANKING COMPANY, LIMITED.

The thirty-eighth annual general meeting of the proprietors was held at Liverpool in January last, when the following report was read:—

The net banking profits for the year 1870, including a balance of 3,192*l* 9s 11d, brought forward from profit and loss account 1869, after payment of income tax, rebate of interest on bills at 5 per cent. per annum, also expenses of management, and providing for all bad and doubtful debts, amounted to 35,905*l* 19s 11d; out of this sum have been paid two half-yearly dividends of 5 per cent. each on the paid-up capital of 350,000*l*, amounting to 35,000*l*, leaving a balance at credit of profit and loss account of 905*l* 19s 11d. The following is an abstract of the affairs of the bank as they stood on December 31, 1870:—Dr. Capital subscribed, 35,000 shares of 20*l* each, 10*l* paid up, 350,000*l*; reserved surplus fund, 200,000*l*; profit and loss credit balance, 905*l* 19s 11d; deposits bearing interest, including current accounts, 722,737*l* 4s 1d; ditto not bearing interest, 23,093*l* 7s 8d; seven-day and other bills, 36,697*l* 10s 4d—total, 1,333,434*l* 2s. Cr. Bills of exchange, 673,252*l* 13s 8d; less foreign bills sold, 5,698*l* 19s 11d; cash on hand and at bankers, 205,757*l* 4s 4d; loans in account, with and without security, 309,419*l* 2s 9d; bank premises and freehold property, 150,000*l*; other securities, 704*l* 1s 2d—total, 1,333,434*l* 2s. After the depression which marked 1869, the year that has just expired opened with a fair prospect of returning prosperity which unfortunately was not realised, the last six months being marked by a panic of unusual severity, during which most articles of produce were so reduced in value as to cause numerous embarrassments and many failures. At the same time, owing to the abundance of unemployed capital, an unusually low rate of interest has ruled almost throughout the year, thereby necessarily curtailing the profits of the bank. Political complications abroad have also tended to unsettle business, and increase for a time the deposits of foreign money in this country. There are, however, symptoms of an early revival of trade, which, with returning peace, cannot fail to issue in an increased and healthy demand for money, and consequent enhancement of its value.

LIVERPOOL UNION BANK.

At the thirty-sixth annual meeting, held February 1, 1871, the directors submitted to the proprietors the following annual report of their operations:—

The paid-up capital is 450,000*l*, and the number of proprietors 158. On December 31, 1869, the reserved surplus fund was 210,724*l* 16s 5d, add net profits for the year, after fully providing for all bad and doubtful debts, 70,308*l* 11s 3d; together, 281,033*l* 7s 8d, from which deduct two half-yearly dividends of 5 per cent. each, 45,000*l*; carried to new building account, 9,000*l*; income tax paid by the bank, 1,194*l* 0s 5d; leaving the present reserved surplus fund 225,839*l* 7s 3d. Annexed is the general balance sheet:—Liabilities—Capital account, 450,000*l*; reserved surplus fund, 225,839*l* 7s 3d; deposit and current accounts, 1,506,694*l* 18s 8d; acceptances, 258,197*l* 14s 5d; rebate of interest on bills on hand at 5 per cent., 12,021*l* 19s 8d—total 2,452,754*l*. Assets—Bills of exchange, 1,646,166*l* 12s 11d; cash on hand, in Bank of England, London bankers, and brokers at call, 255,842*l* 15s 1d; temporary loans, 515,375*l* 17s 6d; property in Brunswick street and Fenwick street, 35,368*l* 14s 6d—total, 2,452,754*l*. Several circumstances have combined to retard the progress of the new building which, however, it is expected will be ready for occupation in a short time. As shown in the foregoing statement, the further sum of 9,000*l* has been taken from the profits of the year, which will in all probability quite provide for its completion. The directors will continue to pay their best attention to the interests of the bank, and trust that they will continue to receive the support of their fellow shareholders.

LLOYD'S BANKING COMPANY.

At the meeting of shareholders, held Feb. 9, 1871, at the Exchange rooms, Birmingham, the report of the directors stated that the available balance of profit and loss for the past half-year (including the amount brought forward from the previous half-year) after payment of all charges and expenses, carrying forward rebate of bills, and making provision for bad debts and contingencies, is 25,038*l* 17s 3d. The directors recommended that out of this sum 19,035*l* be appropriated to the payment of a dividend at the rate of 12½ per cent. per annum; that 5,000*l* be added to the reserved fund, which will then stand at 85,000*l*; and that the balance, being 1,003*l* 17s 3d, be carried forward to the credit of profit and loss for the next half-year.

LONDON AND BRAZILIAN BANK, LIMITED.

The following report was presented to the eighth annual general meeting of shareholders, held at the Terminus Hotel, Cannon street, January 24, 1871:—

The directors submit herewith to the proprietors the usual annual report, and the balance sheet of Sept. 30, duly audited. The accounts show a net profit for the past six months (after providing for the bad and doubtful debts of that period) of 18,769*l* 12s 1d, which, added to the 3,219*l* 4s 6d brought forward, makes a total of 21,988*l* 16s 7d to the credit of profit and loss. This sum, however, includes 7,424*l* 0s 6d, representing the interest accrued during the half-year on the capital locked up at Rio, which has been charged and credited in the usual manner, as before explained. The period fixed for the payment of the large outstanding debt, in respect of which the greater part of the above interest has accrued, expired in September last, and as it was not then paid, the directors have determined, pending its liquidation, to carry any future interest to the credit of interest in suspense. In view of the general depression in business during the latter portion of the half-year, consequent on the European war, the directors consider the above results as upon the whole satisfactory, especially as the accounts show a fair profit on the capital employed at all the branches except that at Rio, which is still suffering from the lock up of capital in former years. Had the reconstruction scheme, advocated by the directors, and supported by the large majority of proprietors, been carried out, the probable losses would have been placed in suspense, and a dividend could have been paid on the actual working capital of the bank. The directors have to announce that the manager, Mr Beaton, proceeded to Rio de Janeiro at the end of August last, for the purpose of endeavouring to effect an arrangement of the large outstanding debts referred to in previous reports, and they have much pleasure in stating that the realisation of the unavailable capital has made some progress during the half-year. Balance sheet, London, September 30, 1870:—Dr. Capital paid up, 750,000*l*; deposits, 554,307*l* 3s; bills payable and other liabilities, 499,875*l* 10s; profit and loss, 35,229*l* 9s—total, 1,839,412*l* 2s. Cr. Specie or cash in hand or at bankers, 263,116*l* 12s 5d; bills receivable, loans and advances on securities, 1,529,225*l* 11s 1d; bank premises and furniture, 15,454*l* 6s 1d; unallotted shares, 18,375*l*; amount set aside to meet charges, 13,240*l* 12s 5d—total, 1,839,412*l* 2s. Profit and loss account:—Dr. Charges in London, 2,643*l* 0s 8d; Brazil, 8,596*l* 1s 6d; Portugal, 2,001*l* 10s 3d; balance, 21,988*l* 16s 7d—total, 35,229*l* 9s. Cr. Balance brought forward, 3,219*l* 4s 6d; profit to September 30, after deducting rebate of interest on bills discounted not due, and interest on deposits, 32,010*l* 4s 6d—total, 35,229*l* 9s.

LONDON BANK OF MEXICO AND SOUTH AMERICA, LIMITED.

At the ordinary general meeting of shareholders, held at the company's offices, 144 Leadenhall street, London, E.C., March 21, 1871, the following report was presented:—

The directors, in submitting to the shareholders the accompanying audited balance sheet and profit and loss account for the half-year ending December 31 last, have the satisfaction to report that, after paying charges, deducting rebate, and making provision for bad and doubtful debts, there remains an available balance of 17,419*l* 14s 11d, including 2,612*l* 11s 10d brought forward from last half-year. The directors recommend that the above sum of 17,419*l* 14s 11d should be appropriated as follows: Dividend for the half-year at the rate of 8 per cent. per annum, sixteen shillings per share, free of income tax, 14,409*l* 12s, leaving a balance of 3,010*l* 2s 11d to be carried forward to the next half-year, subject to reduction by the payment of income tax.

LONDON AND COUNTY BANKING COMPANY.

At the annual general meeting of the proprietors, held Feb. 2, 1871, at the City Terminus Hotel, Cannon street station, the following report for the year ending Dec. 31, 1870, was read by the secretary :—

The directors, in submitting to the proprietors the balance-sheet of the bank for the half-year ending Dec. 31 last, have the satisfaction to report that, after paying interest to customers and all charges, allowing for rebate and making provision for bad and doubtful debts, the net profits amount to 87,167*l* 16s 4d. This sum added 7,181*l* 4s 4d brought from the last account produces a total of 94,349*l* 0s 8d. The usual dividend of 6 per cent. for the half-year is recommended, together with a bonus of 3 per cent., both free of income tax, which will absorb 90,000*l*, and leave 4,349*l* 0s 8d to be carried forward to profit and loss new account. The present dividend and bonus, added to the June payment, will be 17½ per cent. for the year 1370.

LONDON JOINT STOCK BANK.

Annexed is the sixty-seventh report of this bank :—

The directors have much pleasure in submitting to the shareholders the annexed statement of the liabilities and assets of the bank, and of the profit and loss account for the half-year ending the December 31, by which it will be seen that after providing for rebate of interest on bills discounted not yet due, and crediting the guarantee fund with the usual interest, a net profit has been realised of 110,293*l* 1s, including 4,560*l* 0s 10d brought forward from June 30. Of this amount the directors have appropriated the sum of 110,000*l* for payment of the usual dividend at the rate of 12½ per cent. per annum on 1,200,000*l*, the present paid-up capital of the bank, with a bonus of 8s 9d per share, together 1*l* 7s 6d per share. The balance of 293*l* 1s has been carried to the credit of the guarantee fund, which, with the accrued interest of 6,417*l* 8s 6d for the half-year, now stands at 434,540*l* 3s 8d.

LONDON AND RIVER PLATE BANK, LIMITED.

At the eighth annual general meeting, held at the City Terminus Hotel, Cannon street, December 23, 1870, the following report and statement of accounts were submitted to the shareholders :—

The directors, in presenting their eighth annual report to the shareholders, have the satisfaction to state that, although civil wars have existed this year both in the Argentine and Uruguay Republics, together with the continued depression in the price of wool, and the low rate of interest current at Buenos Ayres, the regular business of the bank has not suffered any diminution. Considering it necessary to make ample provision for certain bad and doubtful debts, originated under the late management, the directors cannot propose the distribution of any bonus on the present occasion ; they, therefore, recommend the ordinary dividend of 5 per cent. for the half-year ending September 30 last, making, with the interim dividend of 5 per cent. paid in June, a distribution of 10 per cent. for the past year, carrying forward the sum of 2,679*l* 17s 4d to profit and loss new account. In the early part of this year the directors deemed it advisable to send Mr Smithers to the River Plate, as their special representative, to hand over the business of the Buenos Ayres branch from the late to the present management, and also to confer with the managers of the other branches on all matters tending to promote the general interests of the bank. The shareholders will notice that two managers have been appointed at Buenos Ayres, the principal branch, an arrangement which the directors trust will be attended with beneficial results, and will enable one of the managers to make periodical visits to the other branches. The annexed balance sheet is made up to September 30, 1870 : —Capital and liabilities—Dr. Capital called up to date, 600,000*l* ; reserve fund, 155,000*l* ; bills payable at head office and branches, 460,936*l* 8s 1d ; notes in circulation at branches, 146,355*l* 14s 1d ; deposits and amounts due on current accounts, &c., 2,221,635*l* 15s 1d ; profit and loss account, for balance from last year, 5,283*l* 5s 6d ; net profit for year ending September 30, 1870, 79,256*l* 15s 3d—total, 3,668,467*l* 18s. Property and assets—Cr. Cash on hand, at branches, at bankers', and on deposit, 593,179*l* 8s 2d ; local bills discounted, bills receivable, current accounts, and other securities, 2,991,772*l* 10s 5d ; premises in Calle Piedad, Buenos Ayres, 21,400*l* 4s 5d ; premises in Calle del Cerrito, Montevideo, 21,033*l* 5s 8d ; bank furniture account, 12,267*l* 15s 9d ; less amount written off for depreciation, 1,185*l* 6s 5d ; leaving 11,082*l* 9s 4d ; interim dividend declared in June, 1870, being 5 per cent. for six months ending March 31, 1870, 30,000*l*—total, 3,668,467*l* 18s. Profit and loss account of the London office and branches, September 30, 1870 :—Dr. September 30, 1870—Charges, including rent, taxes, salaries, directors' remuneration, and all other expenses at London office and branches for 12 months, 42,620*l* 6s 10d ; amount written off bank furniture account for depreciation, 1,185*l* 6s 5d ; balance, viz., amount brought forward from last account, 5,283*l* 5s 6d ; net profit for year ending September 30, 1870, 79,256*l* 15s 3d—total, 128,345*l* 14s. Cr. October 1, 1869—Balance from last account, 5,283*l* 5s 6d ; September 30, 1870—Gross profit for year, after making provision for bad and doubtful debts, 123,062*l* 8s 6d—total, 128,345*l* 14s. Appropriation :—Interim dividend, paid in June, 1870, being 5 per cent. for six months ending March 31, 1870, 30,000*l* ; amount carried to profit and loss new account, being rebate of interest on bills not due September 30, 1870, 21,860*l* 3s 5d ; amount proposed to be distributed as dividend of 5 per cent., making in all 10 per cent. for the year ending September 30, 1870, 30,000*l* ; balance to be carried forward to profit and loss new account, 2,679*l* 17s 4d—total, 84,540*l* 0s 9d. Balance of profit and loss account, as above, 84,540*l* 0s 9d.

LONDON AND SOUTH AFRICAN BANK.

At the tenth ordinary annual general meeting held, at the City Terminus Hotel, Cannon street, May 4, 1871, the directors submitted the annexed report to the shareholders :—

The directors beg to submit to the shareholders the annual balance sheet and profit and loss account to December 31, 1870. After carrying 6,000*l* from the profits of the year to the amount held against losses, there remains 8,566*l*, and the directors recommend that a dividend of 8s per share be made to the registered proprietors, in addition to the interim payment of 7s per share made in November last, carrying forward 566*l* to the next account. Prior to the recent calamitous war between Germany and France, the business of the Cape Colony had decidedly improved, and had it not been for the outbreak of hostilities, which checked the advance, a more favourable result might have been attained. The price of wool, the great staple of the Cape Colony, improved at the last sales, and it is believed that

when continental affairs are finally settled, a more decided improvement will be apparent. Since the last meeting of shareholders, the proposed reduction of capital from 500,000*l* to 400,000*l* has been successfully carried out in accordance with the resolutions of the shareholders, and the directors are convinced that the bank will derive substantial benefit therefrom. The following is a statement of liabilities and assets, London office and branches, December 31, 1870:—Liabilities—Dr. Capital paid up, 500,000*l*; circulation—notes and bank post bills, 11,637*l* 3s; deposits, 128,635*l* 12s 9d; bills payable, and other liabilities, 53,024*l* 11s 11d; balance of profit and loss, 17,316*l*; less payment on account of dividend to June 30, 1870, paid October 31, 1870, 8,750*l*; leaving 8,566*l*—total, 701,863*l* 7s 8d. Assets—Cr. Specie on hand and cash balances, 60,978*l* 18s 3d; bank premises, furniture, fittings, and other property, 20,871*l* 5s 8d; local bills discounted, bills receivable, Government and other securities, 553,391*l* 18s 10d; bills overdue, less partial payments, 94,060*l* 3s 11d; together, 647,452*l* 2s 9d; less reserves, 27,438*l* 19s; leaving 620,013*l* 3s 9d—total, 701,863*l* 7s 8d. Profit and loss account, London office and branches, for the year ending December 31, 1870:—Dr. Interest, commission, and exchange paid, 7,179*l* 9s 11d; charges for the year, including rent, taxes, and all other expenses, at head office and branches, 14,936*l* 10s 4d: rebate on bills not due, 1,846*l* 5s 6d; payment on account of dividend for six months ending June 30, 1870 (paid October 31, 1870, free of income tax), 8,750*l*; balance down, 8,566*l*—total, 41,278*l* 5s 9d. Cr. Balance brought forward from December 31, 1869, 146*l* 4s 10d; rebate on bills not due December 31, 1869, brought forward, 1,980*l* 5s 10d; gross profits for the year ending December 31, 1870, 45,151*l* 15s 1d; together, 47,132*l* 0s 11d; less, amount reserved against losses, June 30, 1870, 2,500*l*; ditto December 31, 1870, 3,500*l*; leaving 41,132*l* 0s 11d—total, 41,578*l* 5s 9d.

LONDON AND WESTMINSTER BANK.

At the annual general meeting, held at the Bank in Lothbury, January 18, 1871, the following report was presented to the proprietors:—

The directors have to report that, after making provision for all bad and doubtful debts, paying the income tax, setting apart 2,000*l* towards the buildings of the bank, and presenting a gratuity of 10 per cent. on their salaries to the officers of the establishment, the net profits for the last half-year amount to 178,597*l* 19s 2d. This sum, added to 3,032*l* 6s 2d, the unappropriated balance of the preceding half-year, will amount to 181,630*l* 5s 4d. The directors now declare a dividend to the shareholders at the rate of 6 per cent. per annum, and by way of further dividend out of the profits, a bonus of 6 per cent. upon the paid-up capital of 2,000,000*l*. After these payments are made, there will remain 1,630*l* 5s 4d, which the directors have carried to profit and loss account for the current half-year.

MANCHESTER AND COUNTY BANK, LIMITED.

The following report was made to the shareholders at the half-yearly ordinary general meeting, held January 27, 1871:—

The directors have pleasure in presenting to the shareholders the annexed statement of accounts for the half-year ending December 31, 1870, on reference to which it will be seen that, including the balance of 3,295*l* 11s 7d., brought forward from the previous half-year, there is now a net profit of 45,239*l* 0s 5d to be appropriated. Of this amount the directors propose to add 10,000*l* to the reserve fund, which will thus be raised to 210,000*l*; to pay a dividend at the rate of 10 per cent. per annum (absorbing, with provision for income tax, 30,572*l* 2s 7d); to apply 1,500 in reduction of property account; and to carry forward 3,166*l* 17s 10d to the profit and loss account of the present half-year. The annexed balance sheet is to Dec. 31, 1870:—Dr. Capital, being 15*l* per share on 40,000 shares, 600,000*l*; reserve fund, 200,000*l*; lodgements on current and deposit accounts, &c., 2,963,275*l* 2s 10d; balance of profit and loss account from June 30, 1870, 3,295*l* 11s 7d; gross profit for the half-year (as below), after making provision for bad and doubtful debts, 67,849*l* 1s 4d; together, 71,144*l* 12s 11d; less expenses, 13,131*l* 6s 4d; leaving 58,013*l* 6s 7d—total, 3,821,288*l* 9s 5d. Cr. Bills of exchange, loans, credits, cash on hand, and with bankers, &c., 3,786,889*l* 12s 5d; bank property, 34,398*l* 17s—total, 3,821,288*l* 9s 5d. Profit and loss account, June 30, 1870, to December 31, 1870:—Expenses at head office and branches, directors' and auditors' remuneration, and bonus to officers and clerks, 13,131*l* 6s 4d; dividend of 15s per share and provision for income tax, 30,572*l* 2s 7d; reserve fund, 10,000*l*; bank property account, 1,500*l*; balance carried forward, 3,166*l* 17s 10d—total, 58,370*l* 6s 9d. Balance, June 30, 1870, 3,295*l* 11s 7d; gross profit (as above) after making provision for bad and doubtful debts, 67,849*l* 1s 4d; less rebate of bills on hand, 12,774*l* 6s 2d; leaving 55,074*l* 15s 2d—total, 58,370*l* 6s 9d.

MANCHESTER AND SALFORD BANK.

At the annual general meeting of the proprietors, held in the Board room, in Mosley street, February 8, 1871, the following report was presented by the directors:—

On reviewing the past eventful year, it is evident that the breaking out of war on the continent of Europe produced a great disturbance in the course of business, and that it checked the extension of trade, of which there were palpable indications in the first half of the year 1870. With the exception of a short spell following the commencement of hostilities between France and Germany, interest has ruled at very moderate rates; the Bank of Englands' minimum rate of discount having been throughout the first half-year 3 per cent., and since the end of September as low as 2½ per cent. The net profits of 1870 (after allowing for rebate of interest upon bills in hand, and deducting bad debts, charges, salaries, &c.,) amount to 44,738*l* 18s 6d. The directors have added to the reserved surplus fund, 3,000*l*; they have also applied in reduction of the cost of buildings a sum of 1,000*l*; and have made a further addition to the capital stock of the bank by the declaration of a bonus of 1s 8d per share, 5,000*l*; leaving a balance of 35,738*l* 18s 6d, plus a balance in profit and loss account of 312*l* 19s 9d, wherewith to pay the usual dividend of 8 per cent. per annum and income tax. The paid-up capital therefore stands at 440,000*l*, or 60,000 shares at 7*l* 6s 8d per share. The reserved surplus fund is 120,000*l*, while the surplus value in guarantee account is, by estimation, not less than 50,000*l*. There is no material change to report in the business of the branches. A certificate of incorporation under the Companies' Act of 1862 was issued to this bank on January 13, 1871, claimed in pursuance of the resolution adopted and confirmed at the special general meetings held on Oct. 27 and Nov. 10, 1870, respectively. As was then explained to the proprietors, no change in the constitution of the bank or in the responsibility of the shareholders is caused by this measure; but it enables the bank to conduct all proceedings and hold property in its own right without the intervention of trustees and of public registered officers.

METROPOLITAN BANK, LIMITED.

The annexed report of the directors, with statement of accounts, was presented to the shareholders, at the seventh ordinary general meeting, held at the London Tavern, Bishopsgate street, January 20, 1871:—

The directors have pleasure in presenting to the proprietors a statement of the accounts for the half-year ending December 31 last. After payment of all charges, including interest paid to customers, making provision for bad and doubtful debts and rebate, the net profits realised by the bank during the past six months, including the balance of 4,004*l* 16s 3d brought forward from last account, amount to 10,944*l* 9s. The directors recommend that a dividend at the rate of 5 per cent. per annum (free of income tax) be declared, and that 5,000*l* be placed to a reserve fund, leaving 944*l* 9s to be carried to the credit of profit and loss new account, exclusive of rebate, 1,386*l* 13s 2d. Balance sheet, December 31, 1870:—Liabilities—Dr. Proprietors' capital, 200,000*l*; reserve fund, 10,000*l*; current, deposit, and other accounts, and loans on securities, per contra, 542,999*l* 17s 5d; acceptances and bills negotiated, 70,954*l* 14s 7d; rebate on bills discounted, not yet due, 1,386*l* 13s 2d; balance of profit and loss, 10,944*l* 9s—total, 836,285*l* 14s 2d. Assets—Cr. Cash in hand, at Bank of England, and at call, 94,168*l* 5s 4d; East India Debentures and City Bonds, 40,609*l* 12s 9d; bills discounted, loans, current and other accounts, 613,480*l* 7s 9d; stamps, 434*l* 7s 9d; bank premises (head office and branches), 16,638*l* 6s; securities against acceptances and bills negotiated, per contra, 70,954*l* 14s 7d—total, 836,285*l* 14s 2d. Profit and loss account, December 31, 1870:—Dr. Current expenses (head office and branches) including directors' fees, salaries, and all other expenses, 5,088*l* 10s; proposed dividend at 5 per cent. per annum, for the half-year, 5,000*l*; amount transferred to reserve fund, 5,000*l*; rebate on bills discounted not yet due, carried to profit and loss new account, 1,386*l* 13s 2d; balance of

profit and loss carried to new account, 944*l* 9s — total, 17,419*l* 12s 2d. Cr. Balance brought forward, July, 1870, 9,004*l* 16s 3d; less dividend 5 per cent. to June 30, 1870, 5,000*l*; leaving 4,004*l* 16s 3d; balance of gross profits for the half-year, after provision for bad and doubtful debts, and payment of interest, 13,414*l* 15s 11d—total, 17,419*l* 12s 2d. Reserve fund account brought down, 15,000*l*.

MERCHANT BANKING COMPANY OF LONDON, LIMITED.

At their eighth ordinary general meeting, held at the offices of the Company, 112 Cannon street, March 23, 1871, the annexed report was presented to the shareholders:—

The directors have pleasure in submitting to the proprietors the annexed balance sheet and profit and loss account of the transactions of the company for the year ending December 31 last. They have to report that, after making provision for bad and doubtful debts, and adding the sum of 2,049*l* 16s 9d, brought forward from 1869, the profits amount to 56,286*l* 8s 5d. This amount the directors appropriate as follows, viz.:—Current expenses, 8,567*l* 12s 6d; directors' remuneration, auditors' fees, and income tax, 3,807*l* 6s 8d; rebate on bills not due, 1,971*l* 3s 11d; dividend, June 30, at 5 per cent. per annum, 9,319*l* 7s 6d; dividend now declared at 6 per cent. per annum, 11,183*l* 5s; amalgamation account, 20,000*l*; balance carried forward, 1,437*l* 12s 10d. The shareholders will notice with satisfaction that the results of the past year have enabled the directors to extinguish the amalgamation account, and to increase the dividend. Balance sheet, December 31, 1870:—Dr. Capital paid up, viz., 25*l* per share upon 15,000 shares, 375,000*l*; less calls unpaid, 1,335*l*; leaving 373,665*l*; acceptances against credits and securities, and amounts due to customers on current and deposit accounts, 1,640,368*l* 10s 9d; reserve fund, 5,000*l*; balance transferred to profit and loss account, 56,286*l* 8s 5d; less balance of amalgamation account written off, 20,000*l*; leaving 36,286*l* 8s 5d—total, 2,055,319*l* 19s 2d. Cr. Cash in hand, at bankers, and at call, 118,820*l* 16s 6d; bills receivable, loans, securities, &c., 1,915,016*l* 15s 4d; office furniture, fixtures, &c., 1,482*l* 7s 4d; building and premises, 112 Cannon street, 20,000*l* —total, 2,055,319*l* 19s 2d. Profit and loss account for the year ending December 31, 1870:— Dr. Current expenses, 8,567*l* 12s 6d; directors' remuneration, auditors' fees, and income tax, 3,807*l* 6s 8d; rebate of interest on bills discounted and not yet due, 1,971*l* 3s 11d; dividends, viz., dividend to June 30, at 5 per cent. per annum, 9,319*l* 7s 6d; dividend now declared at 6 per cent. per annum, 11,183*l* 5s; amalgamation account balance written off, 20,000*l*; balance carried forward, 1,437*l* 12s 10d—total, 56,286*l* 8s 5d. Cr. Balance brought down, viz.:—Undivided profits in 1869, 2,049*l* 16s 9d; profits in 1870, after providing for bad and doubtful debts, 54,236*l* 11s 8d —total, 56,286*l* 8s 5d.

MIDLAND BANKING COMPANY, LIMITED.

At the fifteenth ordinary general meeting, held January 27, 1871, the following report was presented to the shareholders:—

The directors have great pleasure in presenting to the shareholders the accompanying balance sheet and statement of profit and loss for the half-year ended December 31, 1870, examined and certified by the auditors, showing the progress of the company since their last report. The gross profits for the half-year, after making provision for bad and doubtful debts, were 36,404*l* 2s 7d, including balance brought from last account; and after deducting therefrom interest paid or due to customers, and all the current expenses of the bank, there remained a disposable balance of 14,085*l* 19s 8d. After due consideration, being of opinion that it is not desirable to increase the dividend on this occasion, the directors have resolved to appropriate 6,000*l* of the above sum to the extinction of the purchase of business account; they propose to declare a dividend for the half-year at the rate of 6 per cent. per annum, free of income tax, which will absorb 4,776*l* 6s; and to carry forward to profit and loss new account the balance of 8,309*l* 13s 8d, which includes 2,171*l* 15s 5d rebate on bills discounted and not due. It affords the directors much satisfaction to be thus enabled to clear off entirely the charges connected with the establishment of the bank and the purchase of business, and they feel assured that the course adopted will be regarded as most conducive to the prosperity of the company. These items having now been fully provided for, the directors anticipate that from the future earnings of the bank they will be able to declare increased dividends.

MUNSTER BANK, LIMITED.

At the twelfth ordinary general meeting, held at the Imperial Hotel, Cork, January 26, 1871, the following report was presented:—

The directors have to report that the gross profits of the bank for the half-year ending December 31 last are 41,394*l* 5s. After providing for interest on deposit and public accounts, charges, salaries, rebate on bills not at maturity, a balance remains of 14,180*l* 15s; to this is to be added 12,280*l* 8s 1d, undivided profits from last account, and 37,500*l*, being premium on issue of new shares, making an available total of 63,961*l* 3s 1d. The directors propose to pay a dividend for the half-year at the rate of 8 per cent. per annum (free of income tax), which with interest on new capital will amount to 7,658*l* 12s 8d; to add 40,000*l* to the reserve fund, making it 70,000*l*; to transfer to the credit of bad debt account 1,500*l*, and to the credit of purchase of business 12,500*l* (being the sum paid Messrs D. La Touche and Co., of Dublin, for the goodwill of their business), leaving a balance of 2,302*l* 10s 5d to the credit of profit and loss, to be carried to next account. The directors have to report that the business of the bank is progressing in a steady and satisfactory manner.

La Touche and Co.'s business, 12,500*l*; dividend at 8 per cent. and interest at 5 per cent. on new shares, 7,658*l* 12s 8d; reserve fund, 40,000*l*; (making it 70,000*l*), balance to new account, 2,302*l* 10s 5d—total, 91,174*l* 13s 1d. Cr. Balance from former account, 12,280*l* 8s 1d; gross profits for six months ending December 31, 1870, 41,394*l* 5s; premium on shares, 37,500*l*—total, 91,174*l* 13s 1d.

NATIONAL BANK.

The subjoined statement of assets and liabilities is dated January 17, 1871:—Assets, December 31, 1870—Gold and silver coin at branches, 878,568*l* 15s 1d; cash on hand at the Bank of England and at call, 495,618*l* 11s 1d; advances on securities at call and at short notice, 815,255*l* 7s; Government stock, Exchequer bills, Exchequer bonds, and debentures, 411,214*l* 16s 5d; ditto advanced on Parliamentary and other deposits, 48,060*l*; Government of Canada and other bonds, 165,299*l* 13s 9d; advances on securities at sundry dates, and current accounts, including balances due by country bankers, 2,011,714*l* 8s 1d; bills discounted, 3,465,629*l* 9s 3d; bankers'

guarantee and securities held against acceptances, per contra, 5,233*l* 18s 1d; bank premises in London, Dublin, and branches, freehold and leasehold, 223,527*l* 7s 6d—total, 8,520,122*l* 6s 3d. Liabilities—Notes in circulation, 1,360,777*l* 10s; due by the bank on deposits and current accounts, 5,540,543*l* 8s 6d; acceptances to bankers' drafts and on security, 5,233*l* 18s 1d; capital paid up, 1,500,000*l*; reserve fund, 56,592*l* 8s 4d; balance of profit and loss, 56,975*l* 1s 4d—total, 8,520,122*l* 6s 3d. Profit and loss, December 31, 1870:—June, 1870—Amount transferred to reserve fund, 5,000*l*; July—half-year's dividend to June 30, 1870, 52,500*l*; total expenditure at the head office and all the branches, including rent, taxes, salaries, &c., &c., 55,463*l* 14s 4d; balance to profit and loss new account, applicable to payment of dividend to December 31, 1870, 56,975*l* 1s 4d—total, 169,938*l* 15s 8d. Balance at June 30, 1870, 59,532*l* 3s 1d; gross profits for the half-year ending December 31, 1870, after payment of interest, income tax, duty on circulation, and providing for all bad and doubtful debts, 120,768*l* 12s 7d; less rebate of interest on bills not due, 10,362*l*; leaving 110,406*l* 12s 7d—total, 169,938*l* 15s 8d.

NATIONAL BANK OF INDIA, LIMITED.

The following report was presented to the shareholders at the eighth ordinary general meeting of the company, held April 4, 1871:—

The shareholders are doubtless aware that the past six months have been very unfavourable to the earning of profits on exchange operations with the East. The stagnation in rates, the disappearance of a profitable margin between the terms at which the banks could buy and sell, and the uncertainty arising out of the state of affairs on the continent of Europe, have all combined to make the above-named period quite exceptional in its character, and in a singular degree perplexing and trying. These difficulties were aggravated, the directors regret to say, by the transactions of the late manager at Hong Kong, which interfered generally with the successful conduct of the bank's operations. This gentleman, who was selected by the board after mature consideration, as being eminently qualified for the management of that branch both by character and experience, displayed the most reckless disregard of his instructions, and of the most ordinary rules of banking; a course of conduct which rendered his immediate removal necessary. By his indiscretion, a sum of about 60,000*l* has been placed in jeopardy; but the directors hope that by the favourable realisation of securities, part of that amount may be recovered. The sum of 22,000*l* has been transferred from reserve fund to provide for ascertained losses, and to wipe off the balance at debit of profit and loss account. Under these circumstances the directors are precluded from recommending a dividend. It is a matter of deep regret to the directors to have to lay before the shareholders a report of this nature. Nothing will be wanting on the part of the board in furthering the interests of the bank, and they ask the shareholders to second their efforts by giving the bank the benefit of their direct support and influence. The accompanying balance sheet, if unsatisfactory in some respects, is highly satisfactory in this, that it shows the bank to be in a very strong position, and the directors feel confident that the present exceptional losses will be speedily retrieved. Annexed is the general balance sheet, as at December 31, 1870:—Liabilities—Dr. Capital, consisting of 37,096 shares, of 25*l* each, having 12*l* 10s paid up, 463,700*l*; 12 share of 500 rs each, having 250 rs paid up, 300*l*; reserve fund, invested in Government securities, 19,000*l*; amount due on current and fixed deposit accounts, 1,375,368*l* 6s 7d; bills payable, 768,360*l* 0s 10d; sundry accounts, 32,685*l* 8s 4d—total, 2,659,413*l* 15s 9d. Assets—Cr. Cash in hand, and at bankers, and bullion, 530,806*l* 19s 11d; Government securities, 523,589*l* 17s 6d; house property, furniture, and stamps, 40,280*l* 5s 7d; bills of exchange, 1,146,153*l* 5s 2d; loans on Government paper, and other securities, 200,077*l* 15s; cash credits on ditto, 206,907*l* 0s 6d; sundry accounts, 11,648*l* 12s 1d—total, 2,659,413*l* 15s 9d. Profit and loss account for the half-year ending December 31, 1870:—Sept. 26, 1870—Dividend at 5 per cent. per annum, 11,600*l*; Dec. 31, 1870—losses ascertained written off, 17,265*l* 0s 5d—total, 28,865*l* 0s 5d. June 30, 1870—Balance, 6,865*l* 0s 5d; Dec. 31, 1870—Amount transferred from reserve fund, 22,000*l*—total, 28,865*l* 0s 5d.

NATIONAL BANK OF LIVERPOOL, LIMITED.

Annexed is the twelfth report of the directors submitted to the proprietors at an ordinary general meeting, held in Liverpool, January 26, 1871:—

The directors of the National Bank of Liverpool, Limited, beg to present to the proprietors their twelfth report for the half-year ending December 31, 1870. The following are the duly audited accounts of the bank:—Assets—Cash in hand and at bankers, 81,824*l* 5s 8d; due to the bank on bills discounted, loans to customers, &c., 738,763*l* 6s 8d; bank premises, 21,000*l* —total assets, 841,587*l* 12s 4d. Liabilities—Due by the bank on deposit and current accounts, &c., 295,383*l* 15s 9d; acceptances, 27,407*l* 16s; total liabilities to public, 322,791*l* 11s 9d; capital paid up, 449,415*l*; reserve fund, 55,000*l*; rebate at 2½ per cent., 1,787*l*; profit and loss, 12,594*l* 0s 7d; together, 518,796*l* 0s 7d—total, 841,587*l* 12s 4d. Profit and loss account:—Profit for half-year ending December 31, 1870, including 5,269*l* 9s 6d brought forward from last account, 23,145*l* 8s 1d; less rebate at 2½ per cent on bills current, 1,787*l*; leaving 21,358*l* 8s 1d; transferred from reserve fund, 20,000*l*; together, 41,358*l* 8s 1d; estimated losses by bad and doubtful debts, 28,764*l* 7s 6d; leaving 12,594*l* 0s 7d. The directors much regret the result shown by the above accounts. This has mainly arisen from the disorganisation of trade in Liverpool, consequent on the unexpected continental war, and from frauds of customers, against which, in the ordinary course of the conduct of the business, no foresight could have guarded. Looking at the very large number of shareholders, and the amount of the reserve fund, the directors, under the power of clause 115 of the articles of association, and after mature deliberation, have decided upon transferring from that fund a sum of 20,000*l* to meet what they consider the exceptional losses referred to, and they recommend that a dividend be declared of 7s 6d per share, free of income tax, for the past half-year, which will absorb 11,250*l*, and leave 1,344*l* 0s 7d to the credit of profit and loss new account.

NATIONAL BANK OF SCOTLAND.

At the forty-fifth annual meeting, held at Edinburgh, Dec. 21, 1870, the profits of the official year ending Nov. 1, after making ample provision for all bad or doubtful debts, bank's property, or other contingencies, were stated to amount to 140,817*l* 0s 3d, out of which it was resolved to pay a dividend of 13 per cent., free of income tax. Of the balance of 10,817*l* 0s 3d on the profits of the year, there was added to the rest 8,279*l* 13s 10d, and there was carried forward to next account 2,537*l* 6s 5d, making the amount carried forward now 11,037*l* 6s 5d. The rest, after laying aside, in a separate account, the sums necessary to pay the entire dividend of 13 per cent., now amounts to 330,000*l*. The following is the statement of the bank's liabilities and assets read to the meeting:—Liabilities—Capital stock of the bank, 1,000,000*l*; rest, after deducting dividends payable in January and July, 1871, 330,000*l*; dividend of 13 per cent., above referred to, 130,000*l*; circulation, 628,875*l*; deposits, current balances, &c., 8,281,908*l* 5s 4d; letters of credit, drafts, and acceptances outstanding, 1,118,979*l* 12s 1d; undivided profits carried forward, 11,037*l* 6s 5d—total, 11,500,800*l* 3s 10*d*. Assets—Bills discounted, cash and current accounts, &c., 7,903,218*l* 14s 2d; Bank of England, the bank's and other stocks, bonds, &c., 841,330*l* 10s 7d; Government stocks, cash with London bankers, and other available funds, 2,063,920*l* 15s 3d; gold and silver coin and notes of other banks, 564,605*l* 3s 10d; bank buildings at head office, London office, and branches, 127,725*l*—total, 11,500,800*l* 3s 10d. The bank's profits and rest accounts were stated to be as follows:—Balance of profits carried forward at November 1, 1869, 8,500*l*; bank's rest at that date, 321,720*l* 6s 2d; net profits for the year ending November 1, 1870, after providing for all bad or doubtful debts, &c., &c., 145,927*l* 9s 10d; deduct carried off against property, 5,110*l* 9s 7d; leaving 140,817*l* 0s 3d—total, 471,037*l* 6s 5d: appropriated thus—set aside for dividends due in January and July, 1871, 139,000*l*; leaving the bank's free rest, at Nov. 1, 1870, 330,000*l*; balance of profits carried forward to next account, 11,037*l* 6s 5d.

NATIONAL PROVINCIAL BANK OF ENGLAND.

Annexed is the thirty-eighth annual report:—

The directors now present to the proprietors their thirty-eighth annual report. It is with much satisfaction that they refer to the summary of accounts for the past year, and state that the operations of the bank for that period enable them to recommend that the dividend now to be declared should be the same as for the three previous years, namely, at the rate of four per cent., and a bonus of seven per cent. for the half-year, making, with the dividend paid in July last, twenty-one per cent. per annum. It will be observed from the accounts that a sum of £40,000, which includes £25,000 mentioned in last year's report, is carried forward as undivided profits, and the directors advise that this amount be kept unappropriated until the working of the new capital be more fully realised. It is not considered necessary on this occasion to increase the reserve fund, which, from the payment of premiums on new shares in July next, will stand at 501,840*l* 8s 5d, an amount which the directors believe will be very satisfactory to the proprietors. The directors also report that the new capital has been very readily subscribed by the shareholders. Out of the 22,500 20*l* shares, agreed to be issued at the last annual meeting, only 224 have not been taken up, and have consequently been forfeited. These it is proposed to sell at the market price of the day, and to invest the profit derived therefrom in the names of the bank's trustees to form a fund, the interest of which should be applied to the relief of distressed widows and orphan children of the officers of the establishment. The nucleus of an independent fund will thus be formed, to which it is contemplated a considerable accession will be eventually made by the surplus arising from the Officers' Guarantee Scheme. Both home the trade of the country, and the agricultural interests in some districts, have been more prosperous than for

some years past, but the value of money in London has been very low, owing to the war on the continent, which caused a large amount of capital to be sent to England for temporary investment. There were ten changes in the Bank of England rate of discount, the average for the year being 3*l* 1s 11d, against 3*l* 3s in 1869. The business of the bank has continued to increase; about 2,300 additional current accounts have been opened during the year, and it is with much pleasure the directors submit the following statement of accounts, prepared in the usual form:—

	£	s	d
1870. Jan. 1.—Rest or undivided profits at December 31, 1869, as exhibited at the annual meeting in May, 1870, viz.	352,440	8	5
Bonus declared and paid in cash in July, 1870	75,600	0	0
Leaving	276,840	8	5
1870. Dec. 31.—Net profits of 1870, after making allowance for bad and doubtful debts, and bonus of 10 per cent. to officers	246,750	0	0
Making	523,590	8	5
Add undivided profits from 1869	25,000	0	0
Total	548,590	8	5
Deduct dividend on company's stock, paid July, 1870 £43,200 0 0			
Ditto January, 1871 45,000 0 0			
Bonus of 6 per cent., paid January, 1871	64,800	0	0
Undivided profits to next year	40,000	0	0
	193,000	0	0
Leaving	355,590	8	5
Out of these profits the directors propose to declare, in addition to the foregoing dividends and bonus paid to proprietors, as above stated, a further bonus of 7 per cent. in July next, making a division of profits in 1870 in all 21 per cent. upon the paid-up capital, free of income tax, amounting to	78,750	0	0
	276,840	8	5
Add premium on new shares received up to October 21, 1870	111,175	0	0
Leaving reserve invested in Government securities	388,015	8	5

NATIONAL PROVINCIAL BANK OF ENGLAND—December 31, 1870.

NORTH KENT BANK, LIMITED.

The following report is dated Blackheath, January 27, 1871:—

The directors have the pleasure of again meeting the shareholders, and of laying before them the accounts of the bank. The accompanying statement will show that the gross profit for the half-year ending December 31, 1870, including the balance brought forward from the previous half-year, amounts to 3,711*l* 6s 4d, and that after paying interest to customers on current and deposit accounts, and all current expenses, including rent, taxes, salaries, and stationery, the net profit or balance available for disposal amounts to 1,803*l* 4s 1d. The directors have considered it expedient, in order to provide for certain bad debts, to appropriate 1,250*l* to the reserve fund; and they recommend that a dividend at the rate of 8*l* per cent. per annum, free of income tax, amounting to 865*l* 4s, be now declared; that the sum of 100*l* be written off the premises account; that the balance, amounting to 838*l* 0s 1d, be carried forward to a new profit and loss account. Balance sheet for the half-year ending December 31, 1870:—Liabilities—Dr. Subscribed capital, 65,500*l*; capital paid up, 21,730*l*; reserve fund, 1,000*l*; current, deposit and other accounts, 78,415*l* 8s 10d; net profit, 1,803*l* 4s 1d—total, 102,948*l* 12s 11d. Assets—Cr. Bills discounted, loans, &c, 90,206*l* 18s 4d; leaseholds at Blackheath and Greenwich, furniture, &c, 2,800*l*; invested in Russian stock, 2,805*l*; cash in hand and at Barclay, Bevan, Tritton, Twells, and Co., 7,136*l* 14s 7d—total, 102,948*l* 12s 11d. Profit and loss account:—Dr. Expenditure, including interest paid to customers on current and deposit accounts, rent, taxes, salaries, and stationery, 1,908*l* 2s 3d; balance, 1,803*l* 4s 1d—total, 3,711*l* 6s 4d. Cr. Gross profit for the six months, 3,081*l* 0s 7d; balance from last half-year, 630*l* 5s 9d—total, 3,711*l* 6s 4d.

NORTH OF SCOTLAND BANKING COMPANY.

Report by the directors at the thirty-fourth annual general meeting of shareholders, held in Aberdeen, November 4, 1870, the following report was submitted:—

The directors submit to the meeting the usual statement of the affairs of the bank, and they have pleasure in reporting that the business of the year has been satisfactory. Notwithstanding the great rise in the value of money in July, the return during twelve months has not exceeded that of the previous year, during which there was little fluctuation in the rates of interest. After adequate provision has been made for all bad and doubtful debts, the clear profits of the year ending September 30 last, including 2,005*l* 2s 2d, the balance from the previous year's account, are 36,584*l* 12s 2d, out of which the May dividend, free of income tax, was paid, 16,000*l*, leaving 20,584*l* 12s 2d, which the directors now apply—to half-year's dividend, at the rate of ten per cent. per annum, free of income tax, payable Nov. 4 next, 16,000*l*; to increase the reserve fund, 2,500*l*; the remainder, 2,084*l* 12s 2d being carried forward to the profit and loss account of the present year. The reserved fund now amounts to 55,000*l*. The recent opening of a branch at No. 226 Union street, Aberdeen, for the convenience of the shareholders and customers resident in the Western parts of the city and suburbs, has fully met the expectations of the directors. Liabilities—Paid-up capital, 320,000*l*; reserved fund, invested, per contra, 52,500*l*; notes in circulation, 276,412*l*; lodged with the bank on accounts current and deposit receipts, with interest added, 1,862,171*l* 16s; surplus, being balance of profit and loss account, 36,584*l* 12s 2d; less dividend paid in May, 16,000*l*; leaving 20,584*l* 12s 2d—total, 2,531,668*l* 8s 2d. Assets—Gold and silver coin, and notes of and balances due by other banks, 268,496*l* 14s 6d; Government and other stocks, 448,187*l* 7s 8d; investment of reserved fund—34,700*l* stock in the 3 per Cent. Consols, 10,000*l* stock of the Bank of England, 52,500*l*; bills of exchange, local and country bills, advances on cash credits and other accounts and securities, 1,741,634*l* 15s 5d; banking houses and ground at Aberdeen, Aboyne, Alford, Auchinblae, Banchory, Banff, Cullen, Elgin, Fraserburgh, Huntly, Inverurie, Keith, Lumsden, Macduff, Montrose, Old Deer, Peterhead, Portree, and Stonehaven, cost 52,712*l* 6s 9d; written off as formerly reported, 31,862*l* 16s 2d; leaving 20,849*l* 10s 7d—total, 2,531,668*l* 8s 2d. Statement of surplus funds:—Reserved fund, September 30, 1869, 52,500*l*; balance of profit and loss account, September 30, 1870, 36,584*l* 12s 2d; together, 89,084*l* 12s 2d. Dividend paid on May 6, 1870, 16,000*l*; dividend payable on November 4, 1870, 16,000*l*; reserved fund, September 30, 1870, 55,000*l*; carried to profit and loss in new account, 2,084*l* 12s 2d.

NORTH-WESTERN BANK, LIMITED.

The following report of the directors was submitted to the proprietors at the seventh ordinary general meeting of the company, held at Liverpool, January 24, 1871:—

The directors, in presenting their report for the year 1870, congratulate the shareholders on the steady and successful progress of the business of the bank, notwithstanding the long continuance of a very low rate of interest, and the numerous commercial failures of the last six months. The following statement shows the result of the operations of the bank for the past year. The net profits of the year, added to the balance of 873*l* 19s 2d, brought forward from the previous year, amount to 36,979*l* 14s; from which, deducting the dividend paid in July, 10,125*l*, and income tax, 404*l* 1s, there remains a balance now available of 26,450*l* 13s, which your directors propose to appropriate as follows, viz.:—Dividend for six months, at the rate of 6 per cent. per annum (free of income tax) 4s 6d per share, 12,150*l*; reserve fund (thereby increasing the amount to 50,000*l*), 10,000*l*; directors' remuneration, 2,000*l*; profit and loss account, 1871, balance carried forward, 2,300*l* 13s. Annexed is the general balance sheet as at December 31, 1870:—Dr. Capital called up on 54,000 shares at 7*l* 10s per share, 405,000*l*; reserve fund, 40,000*l*; amount due to customers on current, deposit, and other accounts, 601,668*l* 8s 11d; liabilities on bills in circulation, 51,035*l* 2s 5d; acceptances, credits, drafts, &c., 61,956*l* 13s 1d; rebate on bills, 2,066*l* 7s 8d; profit and loss account—balance as below, 26,450*l* 13s—total, 1,188,177*l* 5s 1d. Cr. Cash on hand and at call, 114,266*l* 8s 6d; bills discounted, loans to customers on securities, &c., 927,919*l* 1s 1d; bills in circulation, acceptances, credits, drafts, &c., per contra, 112,991*l* 15s 6d; bank premises and furniture, 33,000*l*—total, 1,188,177*l* 5s 1d. Profit and loss account:—Dr. Interim dividend for six months at 5 per cent. per annum, paid July, 10,125*l*; income tax, 404*l* 1s; balance, 26,450*l* 13s—total, 36,979*l* 14s. Cr. Balance brought forward from profit and loss account, 1869, 873*l* 19s 2d; net profits for the year ending December 31, 1870, after making provision for bad and doubtful debts, and rebate on bills at 2½ per cent. per annum, 36,105*l* 14s 10d—total, 36,979*l* 14s.

NORTHAMPTONSHIRE BANKING COMPANY.

The annexed report is dated Northampton, April 19, 1871:—

The directors have to report to the proprietors that the net profit of the half-year ending March 31 last amounts to 3,575*l* 19s 11d, which has been appropriated as follows:—Dividend at the rate of 7 per cent. per annum on 78,000*l*, the capital of the company, 2,730*l*; income tax, 124*l* 17s 10d; balance carried forward to next half-year, 721*l* 2s 1d. Paid-up capital on 15,600 shares of 20*l* each (5*l* paid up), held by 307 proprietors, 78,000*l*; reserve fund, 11,163*l* 0s 11d.

NOTTINGHAM JOINT STOCK BANK, LIMITED.

At the sixth ordinary general meeting of shareholders, held at Nottingham, Jan. 18, 1871, the following report was adopted:—

The directors have pleasure in presenting to the shareholders the annexed duly audited statement of accounts to December 31, 1870. It will be seen that after deducting all expenses, and interest paid and due, and making provision for bad and doubtful debts, the net profits of the year, including the balance of

640*l* 17s 7d brought forward from the previous year's accounts, amount to 8,665*l* 4s 1d. The interim dividend, at the rate of 5 per cent. per annum, for the half-year ending June 30 last, absorbed 1,977*l* 10s, and the dividend for the half-year ending December 31, at the same rate, will require a similar amount. Of the residue the directors propose to add 4,000*l* to the reserve fund, which will thus be increased to 14,000*l*, and to carry forward the balance of 710*l* 4s 1d to the profit and loss account for the present year. The directors have much pleasure in reporting that the business of the bank, both at the head office and branches, continues steadily and satisfactorily to progress. The annexed balance sheet is to December 31, 1870:—Dr. Capital, being 10*l* per share on 7,910 shares, 79,100*l*; reserve fund, 10,000*l*; amount due by the bank on current, deposit, and other accounts, 472,003*l* 19s 6d; profit and loss account, being the net profits for the year ending December 31, 1870, 8,665*l* 4s 1d; less interim dividend at the rate of 5 per cent. per annum for half-year ending June 30, 1870, 1,977*l* 10s; leaving 6,687*l* 14s 1d—total, 567,791*l* 13s 7d. Cr. Bills of exchange, current accounts, cash on hand, and with bankers, &c., 561,941*l* 13s 7d; freehold premises, Low Pavement, Nottingham, freehold land in Victoria street, furniture, fittings, and fixtures, 5,850*l*—total, 567,791*l* 13s 7d. Profit and loss account, December 31, 1870:—Dr. Expenses at head office and branches, including directors' remuneration, salaries, income tax, &c., 2,736*l* 15s 7d; interim dividend at the rate of 5 per cent. per annum for half-year ending June 30, 1870, 1,977*l* 10s; dividend at the rate of 5 per cent. per annum for half-year ending December 31, 1870, 1,977*l* 10s; reserve fund, 4,000*l*: balance carried forward, 710*l* 4s 1d—total, 11,401*l* 19s 8d. Cr. Balance, December 31, 1869, 640*l* 17s 7d; gross profits for the year ending December 31, 1870, after deducting all interest paid and due, and making provision for bad and doubtful debts, &c., 10,761*l* 2s 1d—total, 11,401*l* 19s 8d.

ORIENTAL BANK CORPORATION.

Annexed is the twentieth annual report of the court of directors to the shareholders, dated April 13, 1871:—

The directors have the pleasure of presenting the annual report of their proceedings to the proprietors, and of congratulating them on the continued prosperity of the corporation. The accounts now laid before the meeting comprise the transactions of the corporation for the year 1870; and these accounts have been audited as usual, and show a net profit, including 7,962*l* 5s 1d brought forward, of 190,096*l* 0s 9d. An interim dividend of 90,000*l* was paid in November last, and it is now proposed to pay for the half-year ended Dec. 31, 1870, a like dividend of 90,000*l*, being 12 per cent. for the year. The dividend will be paid, free of income tax, on the 1st proximo, and a distribution having been made as above, there will remain 10,096*l* 0s 9d to be carried to the credit of the next account. The following is the general statement and balance sheet for the year ending December 31, 1870:—Liabilities—Promissory notes in circulation not bearing interest, 479,431*l* 16s 6d; bills of exchange ditto, 5,689,961*l* 16s 2d; balances due to other banks, 111,555*l* 15s 2d; cash deposited not bearing interest, 5,268,453*l* 3s 7d; cash deposits bearing interest, 6,356,078*l* 10s 10d; total due to the public, 17,905,481*l* 2s 3d; capital paid up, 1,500,000*l*; reserved surplus fund, 444,000*l*; insurance fund, 50,000*l*; dividends remaining unpaid, 1,943*l* 15s; balance of profit and loss after defraying all current charges, 100,096*l* 0s 9d; due to shareholders, 2,096,039*l* 15s 9d—total, 20,001,520*l* 18s. Assets—Coin and bullion, 4,010,044*l* 2s 2d; balances due from other banks, 711,864*l* 8s 2d; promissory notes or bills of other banks, 9,268*l* 0s 6d; Government securities, 1,596,286*l* 13s 10d; landed or other property of the corporation, 248,579*l* 15s 2d; debts secured by landed or other property, 90,561*l* 19s 6d; notes and bills discounted, or other debts due to the corporation, not included under the foregoing heads, and exclusive of debts abandoned as bad, 13,243,915*l* 18s 8d—total, 20,001,520*l* 18s. Profit and loss account:—Amount paid as interim dividend for the half-year ended June 30, 1870, 90,000*l*; balance, 100,096*l* 0s 9d—total, 190,096*l* 0s 9d. Balance undivided at December 31, 1869, 7,962*l* 5s 1d; amount of net profit for the year ending December 31, 1870, after defraying current charges, and providing for bad and doubtful debts, 182,133*l* 15s 8d—total, 190,096*l* 0s 9d.

PARES'S LEICESTERSHIRE BANKING COMPANY.

At the thirty-fifth general annual meeting of proprietors, held at Leicester, February 1, 1871, the directors presented the following report:—

The directors have the satisfaction of again meeting the shareholders under favourable circumstances, the business of the year just terminated having proved more remunerative than might have been expected, considering the low rate of interest which has ruled (with but little exception) during the whole of that period. This has mainly arisen from the steady expansion of the trade and manufactures of the town and neighbourhood, which has brought a further accession of business to the bank. The profit of the year, after deducting the expenses and losses, and making full provision for doubtful debts, amounts to the sum of 38,663*l* 14s 7d, to which has to be added 4,372*l* 12s 1d brought over from the previous year, making altogether 43,036*l* 6s 8d at the disposal of the meeting. The directors recommend the payment of the ordinary dividend of fifteen shillings per share, being at the rate of 6*l* per cent. for the half-year, and an extra dividend of five shillings per share, being at the rate of 2*l* per cent. for the half-year, to be paid on the whole of the shares, making the dividend 14*l* per cent. for the year, free of income tax. They further recommend that 4,000*l* be added to the reserved fund, and 4,311*l* 6s 8d to be carried to the credit of profit and loss for the present year. The amount will then stand as follows:—Dividend paid in August last, 14,025*l*; ditto now recommended, 20,000*l*; allowance for income tax, 700*l*; reserved fund, 4,000*l*; profit and loss for 1871, 4,311*l* 6s 8d—total, 43,036*l* 6s 8d. The paid-up capital of the bank is now 250,000*l*, in 20,000 shares of 12*l* 10s each, all fully paid-up, and the reserved fund, with the above addition, will amount to 100,000*l*.

PARR'S BANKING COMPANY, LIMITED.

At the sixth ordinary general meeting of the company, held at Warrington, January 27, 1871, the following report was submitted to the proprietors:—

The directors, in submitting to the shareholders the annual balance sheet, certified by the auditor, have to report that the position and prospects of the business continue to be in every way satisfactory. A branch has been opened at Altrincham. Including 6,978*l* 10s 7d brought from the previous account, the net profits, after payment of all charges, providing amply for bad and doubtful debts, and rebating the current bills at 5 per cent., are 39,650*l* 11s 6d, from which have been paid during the year the fifth annual instalment of purchase price to Messrs Parr and Co., 12,950*l* 9s 2d, and the interim half-yearly dividend at 8 per cent. per annum, 4,000*l*, leaving to be now dealt with a net balance of 22,700*l* 2s 4d. This the directors propose should be applied as shown in the balance sheet, viz.:—To pay a dividend for the last half-year at the rate of 8 per cent. per annum, free of income tax, 4,000*l*; to increase the reserve fund to 38,000*l*, 12,000*l*; to be carried forward to next account, including provision for one-half of the next instalment due to Messrs Parr and Co., 6,700*l* 2s 4d. Annexed is the general balance to December 31, 1870:—Liabilities—(Capital, 10,000 shares of 100*l* each, 1,000,000*l*)—Amount paid up, viz., 10*l* per share, 100,000*l*; reserve fund at December 31, 1869, specially invested in Consols, 26,000*l*; to be now added, 12,000*l*; due by bank on current and deposit accounts, and deposit receipts, with interest accrued, 1,064,711*l* 9s 3d; drafts current (payable within 21 days), customers' acceptances, advised, &c., 26,553*l* 4s 8d; endorsements paid away to customers for remittance, 2,098*l* 1s 10d; balance of purchase account, payable to Messrs Parr and Co., with interest, in 5 annual instalments, 56,068*l* 13s 10d; rebate of discount on bills at 5 per cent., 2,967*l* 2s 10d; dividend to be now paid, 4,000*l*; balance of profit and loss, carried forward, 6,700*l* 2s 4d—total, 1,301,098*l* 14s 9d. Assets—Investment of reserve fund—28,888*l* 17s 9d Consols at 90, 26,000*l*; 55,924*l* 19s 2d Consols at 90, 50,332*l* 9s 2d; cash on hand, money at call and at notice with company's bankers, &c., 230,843*l* 16s; bills of exchange, 450,788*l* 10s 3d; advances to customers, 478,935*l* 13s 8d; endorsements paid away to customers for remittance, as per contra, 2,098*l* 1s 10d; bank premises and furniture, 5,577*l* 4s; stamps on hand, 454*l* 6s; purchase account, Parr and Co., as per contra, 56,068*l* 13s 10d—total, 1,301,098*l* 14s 9d. Profit and loss account for the year ending December 31, 1870:—Dr. Current expenses, including salaries, directors' and auditor's fees, stationery, and all other charges, 12,348*l* 8s 7d; rebate of discount on bills at 5 per cent., 2,967*l* 2s 10d; balance of profit, appropriated as follows:—Messrs Parr and Co., 5th instalment and interest paid July 1, 1870, 12,950*l* 9s 2d; interim dividend at June 30, 1870, 4,000*l*; dividend for past half-year to be now paid, at 8 per cent. per annum, 4,000*l*; addition to reserve fund, 12,000*l*; balance carried forward, 6,700*l* 2s 4d—total, 54,966*l* 2s 11d. Cr. Balance at December 31, 1869, 6,978*l* 10s 7d; rebate of discount on bills from last account, 3,465*l* 19s 8d; gross profits for twelve months, after providing amply for bad and doubtful debts, 44,521*l* 12s 8d—total, 54,966*l* 2s 11d.

ROYAL BANK OF SCOTLAND.

Annexed is an abstract state of affairs as at September 23, 1870:—Liabilities—Deposits, 8,394,160*l* 6s 8d; drafts payable within 14 days, 291,454*l* 19s 9d; acceptances, 198,039*l* 14s 1d; notes in circulation, 672,763*l*—total liabilities, 9,556,418*l* 0s 6d: capital, 2,000,000*l*; rest at September 23, 1870, after providing for the dividend in January, 1871, 400,000*l*; sum set apart to pay half-yearly dividend in January, 1871, 80,000*l*; balance of profits carried forward, 37,236*l* 4s 10d—total capital, 2,517,236*l* 4s 10d—total capital and liabilities, 12,073,654*l* 5s 4d. Assets—Bills discounted, cash accounts, and other advances, 8,486,477*l* 19s 2d; bank buildings, Edinburgh, and branches, 113,193*l* 13s 2d; Government stocks and cash with London bankers, 1,863,145*l* 16s 3d; gold and silver coin, and notes of other banks, 766,231*l* 7s 3d; Bank of England, and other stocks, bonds, and other securities, 844,605*l* 9s 6d—total assets, 12,073,654*l* 5s 4d. Statement of profits:—Balance brought from last year's account, 20,279*l* 4s 5d: net profits for the year,

after deducting expenses of management, and providing for all bad and doubtful debts, 175,623*l* 13s 9d; together, 195,902*l* 18s 2d; deduct dividend paid in July last, 78,666*l* 13s 4d; ditto to be paid in January, 1871, (without deduction of income tax), 80,000*l*; together, 158,666*l* 13s 4d—leaving 37,206*l* 4s 10d balance to be carried to next account.

SHEFFIELD BANKING COMPANY.

At the thirty-ninth annual meeting of the shareholders, held on January 27, 1871, the following report was read and adopted:—

Notwithstanding the continued depression of trade which has characterised the past year, the business of the bank has increased both in the number of accounts and in general extent; but the value of money has ruled even lower than in 1869, and has affected the profits. The profit and loss account shows a clear gain of 38,082*l* 7s 2d, which enables the directors to declare a dividend of 12½ per cent. on the paid-up capital of the company, paying the income tax of the shareholders, and transferring the sum of 950*l* 6s 1d to the surplus fund. The usual warrants for this dividend, deducting the amount paid in anticipation, as authorised by the last general meeting of the shareholders, will be issued through the Post Office, payable February 3. The losses sustained by the bank during the year from bad debts amount to the sum of 865*l* 13s 1d, from which is to be deducted 102*l* 4s 4d, recovered from supposed losses of previous years, making the charge to the surplus fund on this account, 763*l* 8s 9d. This fund now amounts to 97,187*l* 13s 5d, having been increased from the operations of the year by the sum of 186*l* 17s 4d, and from the allotment of shares by the sum of 989*l*. The directors, after mature and anxious consideration, proceeded in April last to fill up the vacancy occasioned by the death of Mr Bailey, by the appointment of Mr M. F. Mills, of Duckmanton lodge, near Chesterfield, whose local knowledge and large acquaintance with monetary affairs will in their opinion materially promote the interests of the bank. This appointment requires the confirmation of the shareholders. The branch banks at Rotherham and Chesterfield continue to prosper. At the latter place, the death of Mr Robinson, the senior partner in the firm of J. and C. Robinson and Co., presented the opportunity of uniting their business to that of this company, thus materially increasing the operations of the branch. The directors have the satisfaction to announce that they have concluded a re-engagement with the manager, and they avail themselves of this opportunity to express their sense of the ability and diligence with which he has conducted the affairs of the bank. The officers of the bank and of the branches continue to afford general satisfaction to the directors. The directors received, in November last, a memorial, signed by a number of shareholders, requesting them to consider the propriety of reducing the nominal value of the company's shares. As in duty bound, the directors carefully considered the views and wishes therein expressed; but after duly weighing the subject in all its various bearing upon the position of the bank, they feel compelled in the interest of the shareholders to differ from the views of the memorialists. Annexed is a statement of accounts at December 31, 1870:—Dr. Paid-up capital of 140*l* per share, on 1,500 shares, 210,000*l*; paid-up capital of 35*l* per share, on 2,336 shares, 81,760*l*; surplus fund, 97,187*l* 13s 5d; balances of accounts due to customers, deposits, and notes in circulation, 1,096,897*l* 3s; balance of profit and loss account, 36,470*l*—total, 1,522,314*l* 16s 5d. Cr. Bills, notes, and cash in hand, and balances owing to the company, 1,501,281*l*; stamps on hand, 283*l* 16s 5d; bank properties and furniture at Sheffield, Rotherham, and Chesterfield, 20,750*l*—total, 1,522,314*l* 16s 5d.

SHEFFIELD AND ROTHERHAM BANK.

The following report of the directors was presented to the shareholders at the thirty-fifth ordinary general meeting of proprietors, held at Sheffield, February 1, 1871:—

It is with feelings of deep regret that your directors have to announce the death of their esteemed colleague George Hounsfield, Esq., which took place soon after the last annual meeting. He had been a director for nearly 29 years, and chairman 9 years; he took a great interest in, and devoted much time and attention to, the affairs of the bank. The profit and loss account, after payment of all the expenses of management and income tax, and presenting a gratuity of 10 per cent. on their salaries to all the officers of the bank, shows a net gain of 31,192*l* 18s. Out of this sum your directors have written off for losses 575*l* 15s 11d, and they now declare a dividend out of profits for the year ending December 31, 1870, after the rate of 12½ per cent. per annum, together with a bonus of 5 per cent. The proprietors in August last received on account and in anticipation of this dividend an instalment of 5 per cent.; the balance, together with the bonus, will be payable at the banks of the company, on and after February 8. The sum of 2,493*l* 18s 1d has been passed to the credit of the reserved fund. During the year your directors have disposed of the remaining shares held by the bank at a profit of 1,941*l* 7s 6d, which has been transferred to the reserved fund, as per clause 7 in the deed of settlement. The reserved fund at the close of 1869 amounted to 75,214*l* 3s; profit on sale of shares, 1,941*l* 7s 6d; amount transferred, as above, 2,493*l* 18s 1d; total, 79,649*l* 8s 7d; deduct vote to directors at the last annual meeting, 700*l*—total, Dec. 31, 1870, 78,949*l* 8s 7d. Annexed is the general balance sheet to December 31, 1870:—Liabilities—Paid-up capital, 160,704*l*; reserved fund, 78,949*l* 8s 7d; balances owing by the company, deposits, and notes in circulation, 993,086*l* 1s 2d; dividend and bonus, 28,123*l* 4s—total, 1,260,862*l* 13s 9d. Assets—Balances owing to the company, bills, and cash in hand, 1,245,940*l* 2s 5d; bank premises and furniture; 14,922*l* 11s 4d—total, 1,260,862*l* 13s 9d.

STAFFORDSHIRE JOINT STOCK BANK, LIMITED

The annexed report was presented to the shareholders at the seventh annual meeting, held at Walsall, February 7, 1871:—

The directors in submitting to the proprietors the balance sheet of the bank for the year ending December 31, 1870, have the pleasure to report that after payment of interest on current and deposit accounts, and current expenses, making reduction on account of premises, and providing for bad debts, the net profits have been 21,514*l* 18s 4d, exclusive of 2,935*l* 6s 10d balance brought forward from last year, making a total of 24,450*l* 5s 2d, which they propose to deal with as follows:—The directors declared for the half-year ending June 30, 1870, a dividend of 15s per share, 6,558*l* 15s; they propose to pay for the half-year ending December 31, 1870, a dividend of 15s per share, 6,558*l* 15s; to carry to reserve fund (raising this fund to 42,000*l*), 7,000*l*; to purchase of business account, 1,200*l*; to new account rebate of interest on bills not due, 2,352*l*; leaving a balance to be carried to profit and loss account for the current year of 780*l* 15s 2d. The year's business shows an improvement, which the directors believe will be satisfactory to the shareholders. The following is the balance sheet to December 31, 1870:—Liabilities—Proprietors' capital, 173,875*l*; reserve fund, 35,000*l*; due to customers on current and deposit accounts, 406,624*l* 19s 9d; drafts upon London agents, 25,679*l* 5s 11d; profit and loss account, 24,450*l* 5s 2d—total, 665,629*l* 10s 10d. Assets—Amount due to the bank, advances to customers, and loans on securities, 271,499*l* 13s 10d; bills in hand, 317,694*l* 18s 11d; Consols (15,000*l*), 13,821*l* 17s 6d; cash in hand, at bankers, and at call, 47,685*l* 18s 3d; interim dividend account, 6,558*l* 14s; bank premises, furniture, and stamps, 3,818*l* 7s 4d; preliminary expenses, 300*l*; purchase of business account, 4,250*l*—total, 665,629*l* 10s 10d. Profit and loss account:—Interim dividend of 15s per share to June 30, 1870, 6,558*l* 15s; proposed dividend of 15s per share for the half-year ending December 31, 1870, 6,558*l* 15s; reserve fund (raising this fund to 42,000*l*), 7,000*l*; purchase of business account, 1,200*l*; rebate of interest on bills not due, 2,352*l*; carried forward to next year's account, 780*l* 15s 2d—total, 24,450*l* 5s 2d. Balance from last year, 2,935*l* 6s 10d; net profits for the year 1870, 21,514*l* 18s 4d—total, 24,450*l* 5s 2d.

STAMFORD, SPALDING, AND BOSTON BANKING COMPANY.

At the thirty-ninth annual general meeting of the shareholders, held Feb. 9, 1871, the directors presented the following report:—

The net profits of the year 1870, after providing for all bad and doubtful debts, are 22,557*l*, which the directors propose to appropriate thus—dividend of 15*l* per cent., 15,750*l*; leaving a surplus of 6,807*l*; to which must be added the unappropriated profits from last year, viz., 4,637*l*; making a total of 11,444*l*, out of which it is proposed to add to the reserved surplus fund 8,000*l*, and carry 3,444*l* forward. The directors have found it necessary to substitute for the deed of settlement dated 1832, with its supplement of 1836, both of which were in many respects obsolete and inadequate, a new and amended deed, based on the original deed, but so revised and enlarged as to meet the present requirements of the bank and of the law. This substitution was submitted to and approved by the shareholders at a meeting specially called on Oct. 13, 1870, and confirmed by them at a subsequent meeting on Oct. 28, 1870. By virtue of the new deed, the directors have been enabled to increase the authorised capital of the bank from 150,000*l* to 300,000*l*, and by means of a call, paid on Jan. 2, 1871, to raise the paid-up capital from 105,000*l* to 150,000*l*. Also, with a view to give greater facilities for acquiring shares, and thereby extending the connection of the bank, the deed provides for the reduction of the nominal value of a share from 100*l* to 20*l*. As a step towards restoring the proportion to be maintained between the paid-up capital and the reserve, which proportion has been altered by the increase of capital, a larger sum than usual, viz., 8,000*l*, is this year proposed to be added to the reserved surplus fund, which, thus increased, and with the dividends added, will be 64,626*l* 9s specially invested in 69,574*l* 8s 10d stock in Three per Cent. Consols. It will be observed by the balance sheet that, irrespective of the above special investment in Consols, an amount larger than the paid-up capital of 150,000*l* is invested in Government and similarly available securities. The business at Market Harborough having greatly improved, it is the intention of the directors, on July 1 next, to convert their agency there into a branch, a step which they believe will establish the

position which the bank has gained in that town and its neighbourhood. The directors think the present a fitting opportunity for conforming with the custom of most joint stock banks to publish with their report the balance sheet. This has hitherto only been exhibited at the shareholders' meeting, but the directors feel assured that the statement it shows cannot fail to be as satisfactory to the customers of the bank and to the public as it is to themselves. General balance sheet, Dec. 31, 1870:—Deposits and balances due to customers, 836,531*l* 11s 8d; notes in circulation, 49,230*l*; capital paid-up, 105,000*l*; reserved surplus fund, 55,743*l* 4s 7d; unappropriated profits, 4,637*l* 6s 5d; net profits of 1870, 22,557*l* 10s 6d—total, 1,073,699*l* 13s 2d. Cash in hand, at London bankers, and at short date, 194,838*l* 14s 11d; special investment of reserved surplus fund in Three per Cent. Consols, 55,743*l* 4s 7d; Government securities, 45,629*l* 4s 8d; Indian Government, and other securities, debentures, &c., 116,693*l* 15s 2d; advances to customers and bills discounted, 644,503*l* 19s 2d; freehold bank premises, furniture, and stamps on hand, 16,290*l* 14s 8d—total, 1,073,699*l* 13s 2d.

STANDARD BANK OF BRITISH SOUTH AFRICA.

The following report of the directors was presented to the fifteenth ordinary meeting of proprietors, held April 21, 1871:—

The directors now submit to the proprietors the accounts of the company for the half-year ending December 31, 1870, from which it will be seen that the available profits, after payment of charges, appropriation to bad and doubtful debts, and inclusive of the balance of 427*l* 14s 4d brought from the previous account, amount to 15,201*l* 15s 8d, which they recommend should be disposed of as follows, viz.:—Rebate on bills discounted, not yet due, 6,743*l* 4s 9d; dividend of 10s per share on 14,606 shares, 25*l* paid, and of 4s per share on 4,320 shares, 10*l* paid, 8,167*l*; balance carried forward to profit and loss new account, 291*l* 10s 11d. In previous reports the proprietors have been made aware that the realisation of landed and other property, taken over against debts belonging to former disastrous years, would gradually be effected as favourable opportunities offered. A large portion of these estates has been realised during the past half-year, and provision has been made for the losses thereon out of current profits, and the appropriation of 14,000*l* from the reserve fund. The gradual reduction of the assets to a perfectly healthy state has been steadily going on, while no fresh bad or doubtful debt of any consequence has been incurred during the last three years. In what remains to be accomplished the bank will be materially assisted by its increasing profits, and the rising value of all descriptions of Cape property. Annexed is the balance sheet as at December 31, 1870:—Dr. Capital, 408,350*l*; circulation, 117,416*l* 13s 2d; liabilities on deposit and current accounts, 504,138*l* 5s 6d; bills payable and other liabilities, 494,813*l* 5s 4d; reserve fund, 6,000*l*; profit and loss, viz.—balance, June 30, 1870, 427*l* 14s 4d; net profit for half-year ending December 31, 1870, after appropriation to bad and doubtful debts, 8,030*l* 16s 7d; rebate on bills discounted and not yet due, 6,743*l* 4s 9d—total, 1,545,919*l* 19s 8d. Cr. Cash with bankers and at branches, 129,419*l* 7s 7d; bills discounted, remittances from branches, advances on securities, &c., 1,370,010*l* 16s 7d; freehold premises in London, 22,746*l* 5s 2d; bank premises, furniture, fittings, &c., in South Africa, 23,710*l* 10s 4d; unpaid calls and premium, 33*l*—total, 1,545,919*l* 19s 8d. Profit and loss account for the half-year ending December 31, 1870:—Charges, including rent, salaries, taxes, remuneration to directors and auditors, and all other expenses at head office and branches, 12,544*l* 5s 4d; balance carried down, 15,201*l* 15s 8d—total, 27,746*l* 1s. Gross profits (including balance of 427*l* 14s 4d brought forward from half-year ending June 30, 1870), after deducting interest on deposit and current accounts, and appropriation to bad and doubtful debts, 27,746*l* 1s. Appropriation:—Rebate on bills discounted and not yet due, 6,743*l* 4s 9d; dividend of 10s per share on old shares, 25*l* paid, and 4s per share on new shares, 10*l* paid, being at the rate of 4*l* per cent. per annum, 8,167*l*; balance carried forward to profit and loss new account, 291*l* 10s 11d—total, 15,201*l* 15s 8d. Balance brought down, 15,201*l* 15s 8d. Reserve fund:—Losses on realisation of landed property, 14,000*l*; balance, 6,000*l*—total, 20,000*l*. Balance June 30, 1870, 20,000*l*.

THREE TOWNS BANKING COMPANY, LIMITED.

At the ordinary general meeting of the shareholders, held February 2, 1871, the following report of the directors was read:—

In presenting the balance sheet for the year 1870, the directors have to congratulate the shareholders and themselves on the fact that the business done has been larger and more profitable than that of the year 1869. The balance of profit available, after payment of management expenses, income tax, depositors' interest, and all other sums fairly chargeable against the year's business, is 4,949*l* 14s 6d. Of this sum the directors recommend that 2,432*l* 12s 2d be appropriated as rebate of discount, and 2,500*l* be paid as dividend at 5 per cent. per annum, leaving a balance of 17*l* 2s 4d to be carried forward to the credit of the current year. Mr J. P. Mann having resigned his position as manager, the directors have elected Mr F. S. Bayly to fill that office, and they have every reason to believe that he will carry out its duties in an efficient manner. Since his appointment the deposits have steadily increased. This is no doubt partly due to the appeal made by the directors to the shareholders, but it also affords satisfactory evidence that the public have confidence in the management. The resignation of Dr Row and of Mr Bayly reduced the number of directors to five. The vacancies have not been filled up, and the directors advise that no addition should be made to that number. The annexed balance sheet is to December 31, 1870:—Dr. To capital account, viz., 2,000 shares at 25*l*, 50,000*l*; deposit, current, and other accounts, 47,579*l* 15s 9d; balance of profit and loss account, 4,949*l* 14s 6d—total, 102,529*l* 10s 3d. Cr. Borrowers' accounts, secured by bonds, mortgages, &c., 83,336*l* 19s 7d; amount due upon bond of customer for whom Mr E. W. Cole and others are sureties, 460*l* 14s 4d; amount due from Mr N. E. Tremills, fully secured, 231*l* 10s 3d; freehold and other investments, 5,251*l* 0s 11d; dividend advance account, 1,250*l*; formation account, 133*l* 0s 3d; furniture account, 154*l* 12s; bills in hand, 9,777*l* 16s; cash in hand and at call, 1,933*l* 16s 11d—total, 102,529*l* 10s 3d. Profit and loss account:—Dr. Rebate of discount, December 31, 1869, 3,050*l* 5s 1d; dividend, 2,500*l*; suspense account, 193*l* 7s 1d—total, 5,743*l* 12s 2d. Cr. Balance, as per last account, 5,743*l* 12s 2d. Dr. Interest on deposits, balances, &c., 2,117*l* 12s 1d; directors, auditors, and salaries, 1,297*l* 4s 5d; miscellaneous, viz., rent, law costs, charges, commission, printing, stamps, stationery, income tax, surveying, &c., 959*l* 1s 1d; balance, 4,949*l* 14s 6d—total, 9,323*l* 12s 1d. Cr. Rebate of discount, December 31, 1869, transferred, 3,050*l* 5s 1d; gross profits from interest, discount, and commission, &c., 6,273*l* 7s—total, 9,323*l* 12s 1d.

UNION BANK OF AUSTRALIA.

The following supplementary report of the directors was presented to the proprietors at the special general meeting, held January 9, 1871:—

The directors have pleasure in now submitting to the proprietors a statement of accounts which, notwithstanding the continued dulness in mercantile affairs, and depression in the value of pastoral property throughout the colonies, enables them to announce a dividend equal to that declared last half-year, viz., 6 per cent., or at the rate of 12 per cent. per annum. This favourable result has been arrived at after a most careful revision of all the accounts, and after making a very ample allowance for every bad and doubtful debt. The annexed statement of accounts presents a net profit of 79,329*l* 4s available for division, of which the dividend for the half-year, free of income tax, will absorb 75,000*l*, being at the rate of 1*l* 10s per share.

STATEMENT OF LIABILITIES AND ASSETS, at the branches, on June 30, and at the London Office, on December 31, 1870.

UNION BANK OF LONDON.

At the half-yearly meeting of the proprietors, held at the City Terminus Hotel, Cannon street, January 11, 1871, the following report was read by the secretary:—

The directors have to report that the net profits of the bank for the six months ending December 31 last, after payment of all charges (including the sum of 73,462*l* 3s 10d for interest paid and due to customers on their current and deposit accounts), and making full provision for all bad and doubtful debts, are

115,888*l* 1s 7d, which, with 4,237*l* 7s 8d brought forward from June 30 last, amount to 120,125*l* 9s 3d. The directors now declare a dividend for the last six months at the rate of 15 per cent. per annum on the paid-up capital, clear of income tax. After payment of the dividend, amounting to 90,000*l*, there will remain an unappropriated balance of 30,125*l* 9s 3d to be carried forward for appropriation at the end of the financial year in July next. Business at the Holborn circus branch was commenced in the new building on December 26, 1870.

GENERAL BALANCE for the Half-year ending December 31, 1870.

UNION BANK OF SCOTLAND.

Annexed is the forty-first annual report, dated Glasgow, May 11, 1871:—

The directors have again the pleasure to meet the proprietors for the purpose of submitting the annual abstract statement of the bank's affairs. The profit and loss account for the year ending April 1 last, shows a balance of 132,362*l* 18s 11d, to which has to be added the sum of 13,803*l* 6s 4d brought forward from the previous year, making a total of 146,166*l* 5s 3d, after making provision for the bad and doubtful debts. Out of this sum the directors have applied 5,000*l* in reduction of the cost of bank offices, leaving an available balance of 141,166*l* 5s 3d, which it is proposed to apply as follows:—1st. In payment, on June 1 and December 1 next, of a dividend to the proprietors at the rate of twelve per cent. per annum, free of income tax, 120,000*l*; 2nd. By transferring to rest account, 7,000*l*; 3rd. By carrying forward to credit of profit and loss account for the current year the balance of 14,166*l* 5s 3d. The bank's rest or surplus profits at April 1 last will thus stand at 307,000*l*, exclusive of the provision for the whole year's dividend, and the sum carried forward in profit and loss account, which together amount to 134,166*l* 5s 3d additional.

WAKEFIELD AND BARNSLEY UNION BANK.

The annexed report for the year ending December 31, 1870, was adopted on January 30, 1871:—

The directors of the Wakefield and Barnsley Union Bank have pleasure in submitting to the shareholders the following results of the bank's operations during the past year:—After making provision for bad and doubtful debts the gross profits of the year are 22,859*l* 9s 3d; the working expenses are 4,926*l* 18s 4d; leaving 17,932*l* 10s 11d; to which must now be added the balance carried forward at the last general meeting, 527*l* 10s 5d; leaving for present distribution 18,460*l* 1s 4d. This sum the directors propose to divide in the following manner:—Dividend at the rate of 10 per cent. per annum, paid August last, 4,566*l* 13s; dividend at the rate of 10 per cent. per annum now declared, payable February 13, 4,566*l* 13s; bonus for the last six months, at the rate of 10 per cent. per annum, payable February 13, 4,566*l* 13s; 10s a share added to capital, making the paid-up value of the shares 12*l*, on which future dividends will be paid; and raising the paid-up capital of the company to 95,420*l*, 4,000*l*; carried to next account, 760*l* 2s 4d. The amount invested in Consols, 30,000*l*, remains as last announced.

WEST LONDON COMMERCIAL BANK, LIMITED.

The following report of the directors was adopted by the annual general meeting of shareholders, held February 9, 1871:

The year 1870, being the fourth complete year of the operations of this bank, has presented very few points to call for remark on this occasion; having been a season of steady growth, rather than one of large or rapid expansion of business. The operations of the past year show a considerable increase in the number of current accounts, in the amount of transactions thereon, and in the balances remaining in the hands of the bank at the close of the year; and close examination of the operations presents satisfactory evidence of the improving character of the business transacted. The increased caution which has been imposed upon the directors by the circumstances of the times has led them, as in the preceding year, to restrain some of the branches of busines which might swell the gross profits, and to be content with the smaller returns of the safest business rather than the larger profits of that of more speculative character; yet the gross profits are larger than in the preceding year; and notwithstanding an increase of 212*l* 19s 1d in the amount of dividends as compared with 1869, and the appropriation of 174*l* 4s 5d out of the profits of the year in reduction of preliminary expenses, and additional investments towards the premises redemption fund, there still remains a balance of 1,624*l* 9s 7d to carry forward to 1871, after payment of an interim dividend for the 6 months to June, 1870, at the former rate of 7½ per cent. per annum. Of this balance, 251*l* 7s 7d is carried forward to the profit and loss account of 1871 for rebate upon bills current at the close of the year; 100*l* will be applied, as before, to the preliminary expenses, and the premises redemption accounts; and a dividend for the last half-year at the usual rate of 7½ per cent. per annum (clear of income tax) will absorb 624*l* 13s 10d. These charges, with the appropriation as before of 10 per cent. upon the amount of dividend as a bonus to the official staff, will leave 585*l* 18s 10d to carry forward. The capital account shows at the close of the year 3,884 shares, or 38,840*l* subscribed and 16,770*l* paid up.

WILTS AND DORSET BANKING COMPANY.

At the annual meeting of the shareholders, held at Salisbury, February 6, 1871, the following report was presented:—

Your directors have again the pleasure of meeting the shareholders, and submitting to them the thirty-fifth annual report of the affairs of the company. The business of the company has continued throughout the year in its former flourishing state, and notwithstanding an unfavourable harvest, which has seriously affected the farmers' balances, the credits from other sources have been such that your directors are enabled to report an amount of deposits at about the same figures as last year—being slightly in excess of two millions. The losses of the bank from bad debts during the year have been of very trifling amount, in addition to which the new branches, which were at one time a charge upon the head office, are now not only self-supporting, but yielding a good profit to the company. These facts, combined with the successful manner in which the funds of the bank have been employed, enable your directors to report an increase of profit of 2,030*l* over last year. On referring to the accompanying balance sheet it will be seen that after payment of current expenses, directors' fees, reduction of cost of new premises, income tax, &c., the balance to the credit of profit and loss amounts to 45,105*l* 9s, which has been appropriated as follows, viz.:—Midsummer and Christmas dividends and bonuses at the rate of 22 per cent. per annum, amounting to 44,000*l*, have been paid to the shareholders, leaving a balance of 1,105*l* 9s, which has been carried to the surplus fund, making the total of that account 104,218*l* 3s 3d. The annexed balance sheet is for the year ending December 31, 1870:—Liabilities—Capital, 200,000*l*; surplus fund, 103,112*l* 14s 3d; circulation in notes and drafts, 73,367*l* 17s 1d; deposits on current and other accounts, 2,025,268*l* 5s 3d; interest due to depositors, 20,859*l* 8s 4d; bills for collection, 58,228*l* 10s 1d; net profits for the year, 45,105*l* 9s —total, 2,526,942*l* 4s. Assets—Investments in Government securities, Bank of England stock, and East Indian debentures, 512,396*l*; investments in bonds, debentures, preference stocks, and other securities, 633,370*l* 14s 5d; bills discounted, loans, overdrawn accounts, &c., 1,111,098*l* 1s 8d; freehold and leasehold premises at head office and branches, 36,000*l*; cash in hand, and in hands of London bankers and agents, 234,077*l* 7s 11d—total, 2,526,942*l* 4s. Profit and loss:—Expenditure of the thirty-nine establishments, including rent, taxes, licenses, stamps, salaries and London bankers' commission, postages, stationery, &c.,

24,361*l* 10s 4d; directors' fees, 1,000*l*; dividends—Midsummer and Christmas at the rate of 10 per cent. per annum, 20,000*l*; bonus—Midsummer at 4 per cent., 8,000*l*; ditto Christmas at 8 per cent., 16,000*l*; balance carried to surplus fund, 1,105*l* 9s—total, 70,466*l* 19s 4d. Gross profit for the year ending Dec. 31, 1870, after payment of income tax, and making provision for bad and doubtful debts, &c., 70,466*l* 19s 4d. Surplus fund account:—Balance of unappropriated profits or surplus fund, 104,218*l* 3s 3d. Balance of undivided profits last year, 103,112*l* 14s 3d; amount of undivided profits now added, 1,105*l* 9s—total, 104,218*l* 3s 3d.

WOLVERHAMPTON AND STAFFORDSHIRE BANKING COMPANY.

The following report was presented to the shareholders at the thirty-ninth annual meeting, held February 6, 1871:—

The directors of the Wolverhampton and Staffordshire Bank have the satisfaction of reporting to the shareholders the continued prosperity of the bank. At the last annual meeting the closed accounts of 1857 stood at 25,176*l* 8s 9d, which amount has been further reduced by 4,786*l* 19s 1d, received during the year 1870, leaving a balance of 20,389*l* 9s 8d now due. The assets of the bank have been examined, and the accounts audited, and found to be correct. After providing for all ascertained bad debts, the profits of the year, including 15*l* 17s 9d, balance brought forward from last year's accounts, amount to 10,409*l* 7s 9d, out of which a dividend of 2,500*l* was paid to the shareholders in September last, and it is recommended that a dividend of 2,500*l*, with a bonus of 2s 6d per share, be paid in March next, and that the balance of 4,159*l* 7s 9d be added to the guarantee fund, which will then amount to 25,159*l* 7s 9d. Annexed are the liabilities and assets at December 31, 1870:—Dr. Capital, 100,000*l*; amount due by bank, 610,143*l* 16s 8d; notes in circulation, 22,240*l*; dividend and bonus, payable March 1, 1871, 3,750*l*; guarantee fund at December 31, 1869, 21,000*l*; profit added to guarantee fund, December 31, 1870, 4,159*l* 7s 9d—total, 761,293*l* 4s 5d. Cr. Cash loans, bills, and Government securities, 715,546*l* 5s 8d; closed accounts, 20,389*l* 9s 8d; unpaid calls on shares, 100*l*; bank premises, 4,000*l*; Bank of England notes and gold in the house, 21,257*l* 9s 1d—total, 761,293*l* 4s 5d. Profit and loss:—Dr. Dividend, paid September 1, 1870, 2,500*l*; ditto and bonus, payable March 1, 1871, 3,750*l*; carried to guarantee fund, 4,159*l* 7s 9d—total, 10,409*l* 7s 9d. Cr. Balance from last year, 15*l* 17s 9d; net profits for the year ending December 31, 1870, 10,393*l* 10s—total, 10,409*l* 7s 9d.

WORCESTER CITY AND COUNTY BANKING COMPANY, LIMITED.

The annexed balance sheet is to December 31, 1870:—

Liabilities—Capital paid up (20,000 shares, 12*l* 10s per share), 250,000*l*; amount due to the public on deposit, current, and other accounts, 761,231*l* 11s 8d; notes and drafts in circulation, 23,377*l* 5s 8d; interest due on deposit receipts and rebate on bills of exchange current, 9,243*l* 11s 11d; reserve fund, 100,000*l*; profit and loss, surplus profits after providing for bad debts, 19,337*l* 1s 2d—total, 1,163,189*l* 10s 5d. Assets—Cash in hand and at agents, 124,396*l* 12s 2d; Government securities (Consols, 60,000*l*), 54,484*l* 10s 10d; bills of exchange, advances on current accounts, loans, and securities, 956,099*l* 10s 4d; bank premises (freeholds) at Worcester, Kidderminster, Ludlow, Leominster, Tenbury, Bromsgrove, and Evesham, 28,208*l* 17s 1d—total assets, 1,163,189*l* 10s 5d. Profit and loss account for the half-year ending Dec. 31, 1870:—General charges for the half-year, including salaries, rents, taxes, directors' remuneration, and auditor's fee, with all other expenses at head office and branches, 6,376*l* 12s 5d; payment of dividend at the rate of 10 per cent. per annum to Dec. 31, 1870, free of income tax, 12,500*l*; amount to be written off bank premises to Dec. 31, 1870, 250*l*; balance carried forward to profit and loss new account, 6,587*l* 1s 2d—total, 25,713*l* 13s 7d. Balance of profit and loss, June 30, 1870, and amount of reserve fund No. 2, brought forward in accordance with resolution passed at the last annual general meeting, 6,263*l* 6s 5d; gross profits of the half-year after providing for bad debts, 19,450*l* 7s 2d—total, 25,713*l* 13s 7d.

WEST OF ENGLAND AND SOUTH WALES DISTRICT BANK.

At the thirty-sixth annual general meeting of the proprietors, held at Bristol, Jan. 20, 1871, the following report was read:—

In presenting the thirty-sixth annual report of the bank to the proprietors, the directors trust that the results of the past year will be considered on the whole satisfactory. There has been some improvement in the trade of the district, and a corresponding increase in the business of the bank, both at the head office and the various branches; but the profits have been still kept down by the low rate of discount prevailing throughout the year. The statement of accounts is also affected unfavourably by a loss in the month of July, through an embezzlement in the Hereford branch by the manager and cashier. A large portion of the loss was, however, recouped, after the conviction, by the payment of the bonds which had been entered into for the delinquents. It will be seen, notwithstanding this unfortunate event, the directors are able to declare the usual dividend, to write off the sum of 1,500*l* on the bank buildings, and to carry to the reserved fund an amount exceeding that of recent years. At the close of the half-year ending June 30, a dividend at the rate of 8 per cent. per annum, free of income tax, was paid; and the directors now declare a dividend at the same rate for the half-year ending December 31, also free of income tax, carrying to the reserved fund the sum of 3,632*l* 8s 9d. The statement of account is as follows—December 31, 1870:—Amount due by the bank on deposits, notes in circulation, and all other liabilities, 2,725,597*l* 8s 5d; proprietors: for capital, 750,000*l*; reserve fund, 105,006*l* 4s 4d; unpaid dividends, 765*l* 0s 3d; Christmas dividend, now declared, 30,000*l*—total, 3,611,368*l* 13s. Government securities, 307,947*l* 17s 6d; cash on hand at head office and branches, 229,452*l* 7s 7d; cash at bankers, 76,708*l* 13s 9d; bank premises at Bristol, Aberdare, Axbridge, Bath, Bideford, Bridgewater, Cardiff, Chepstow, Clifton, Exeter, Gloucester, Kingsbridge, Merthyr, Newport, Newton Abbot, Pontypool, Pontypridd, Southmolton, Swansea, Taunton, Torquay, Torrington, Tredegar, and Weston-super-Mare, 85,351*l* 0s 8d; other securities, including bills discounted, loans to customers, &c., 2,911,909*l* 13s 6d—total, 3,611,368*l* 13s. Profit and loss:—Total expenditure at head office and the thirty-two branch banks, including rent, taxes, salaries, &c., 45,907*l* 2s; amount of dividend at the rate of 8*l* per cent. per annum, free of income tax, for the half-year ended June 30, 1870, 30,000*l*; amount of dividend at the same rate for the half-year ended December 31, 1870, 30,000*l*; amount written off the bank premises account in reduction thereof, 1,500*l*; balance carried to reserve fund, 3,632*l* 8s 9d—total, 111,039*l* 10s 9d. Gross profits of the year, after payment of the income tax, and making due provision for bad and doubtful debts, 111,039*l* 10s 9d. Reserve fund at December 31, 1869, 101,373*l* 15s 7d; balance of profit and loss, 3,632*l* 8s 9d—reserve fund as at December 31, 1870, 105,006*l* 4s 4d.

YORKSHIRE BANKING COMPANY.

At the fifty-fifth half-yearly meeting of the shareholders of this company, held at Leeds, February 1, 1871, the following report of the directors was read by the general manager, and unanimously adopted:—

The business of the bank for the last half-year has maintained the steady progress which has characterised its operations for some years past, and it only remains for your directors to report the result. The profits to December 31 last were 32,626*l* 8s 10d, being 1,239*l* 7s 8d in excess of those of the preceding six months, and out of these profits it is proposed to pay a dividend of 25s per share, free of income tax, amounted to 25,000*l*; to make a further addition to the reserved surplus fund of 6,000*l*; carrying to the credit of the bad and doubtful debt fund the balance of 1,626*l* 8s 10d. The following is the statement of liabilities and assets:—Liabilities—Shareholders, for capital stock, 250,000*l*; shareholders for unpaid dividends, 136*l* 1s; deposits and credit balances, 1,623,185*l* 11s 9d; interest on deposit receipts and rebate of discount, 13,242*l* 1s 11d; notes in circulation, 109,580*l*; bad and doubtful debt fund, 2,913*l* 10s 1d; reserved surplus fund, 56,000*l*; profit and loss account, 32,626*l* 8s 10d—total, 2,087,683*l* 13s 7d. Assets—Bills, securities, and cash on hand, 590,319*l* 11s 7d; amount invested in Consols, 100,000*l*; advanced on current accounts and in bankers' hands, 1,357,170*l* 8s 6d; freehold property and furnishings, 39,636*l* 10s 11d; stamps on hand, 557*l* 2s 7d—total, 2,087,683*l* 13s 7d.

YORK CITY AND COUNTY BANK.

The following report of the directors to the proprietors was read at their annual general meeting, held January 26, 1871:—

The directors have the satisfaction to state in this their forty-first annual report that, after making provision for bad and doubtful debts, and crediting the reserve surplus fund with 1,432*l* 10s 3d (interest at 2½ per cent.) there remains a profit for the year 1870 of 20,190*l* 3s 9d, from which they recommend a dividend of 8 per cent., and a bonus of 30s per share, or 6 per cent. (together 17,500*l*), free from income tax; and that the balance of 2,690*l* 3s 9d be carried to the reserved surplus fund, which will then amount to 61,423*l* 6s 3d.

YORK UNION BANKING COMPANY.

The annexed thirty-seventh annual report of the directors was presented to the meeting of proprietors, held in the De Grey Rooms, February 2, 1871, and adopted:—

Your directors have the pleasure to report that, after making provision for bad and doubtful debts, the net profits of the bank for the year ending December 31, 1870, amount to the sum of 20,149*l* 14s 7d, exclusive of 2,667*l* 3s 1d, the interest derived from the guarantee fund. The usual interim dividend of 5 per cent. was paid to the shareholders in August last, and your directors now declare a further dividend of 5 per cent., with a bonus of 5 per cent. (all free from income tax), leaving a surplus of 5,299*l* 14s 7d to be placed to the guarantee fund, making, with the interest thereon, an addition of 7,966*l* 17s 8d, and raising that fund to the sum of 76,237*l* 11s 2d.

ADELPHI BANK, LIMITED.

The following report is for the half-year ending June 30, 1871:—

The directors have the pleasure of reporting that during the past half-year there has been a steady and satisfactory increase in the business of the bank. The half-year's operations have resulted in a net profit of 4,458*l* 0s 8d (including the balance brought forward of 658*l* 13s 11d), after providing for losses incurred in the ordinary business of the bank; and out of this sum the directors have declared a dividend at the rate of 2½ per cent. per annum clear of income tax, added 2,000*l* to the reserve fund, and carried a balance forward of 831*l* 13s 2d in favour of the current half-year. In accordance with the intimation given in the last report, the directors have appropriated the amount of the reserve fund, including the abovenamed 2,000*l*, to provide for deficiencies in the realisation of securities. Considerable progress has been made during the half-year in settling the property held by the bank, and your directors are fully alive to the importance of disposing of the remainder as speedily, and yet as prudently as possible, in order to have all the resources of the bank employed only in legitimate banking business. The statement of accounts, from December 31, 1870, to June 30, 1871, is as follows:—Liabilities—Dr. Subscribed capital, 260,220*l*; capital paid up, 130,110*l*; amount due by the bank on current and other accounts, including interest on undue bills held by the bank, 240,866*l* 14s 4d; amount of dividend now due, and dividends unpaid, 1,660*l* 1s 10d; balance of profit carried forward to current half-year, 831*l* 13s 2d—total, 373,468*l* 9s 4d. Assets—Cr. Bills discounted, balances owing by customers, and other securities, 313,665*l* 0s 3d; freehold bank premises, Liverpool, 20,000*l*; safes, furniture, &c., Liverpool and Manchester, 2,037*l* 15s 3d; cash on hand and at call, 37,765*l* 13s 10d—total, 373,468*l* 9s 4d. Profit and loss:—Dr. General expenses, including cost of management, 2,260*l* 12s 6d; interest on deposits, &c., including rebate on undue bills, 2,818*l* 10s 5d; dividend now due, 1,626*l* 7s 6d; appropriated to meet deficiencies in securities, 2,000*l*; balance carried forward, 831*l* 13s 2d—total, 9,537*l* 3s 7d. Cr. Balance brought from previous half-year, 658*l* 13s 11d; balance of profit after providing for ordinary bad debts, 8,878*l* 9s 8d—total, 9,537*l* 3s 7d.

ALLIANCE BANK, LIMITED.

At a general meeting of the shareholders, held at the City Terminus Hotel, Cannon street, July 20, 1871, the following report and balance sheet was presented:—

The directors have pleasure in meeting the shareholders for the first time since the reconstruction of the bank, in accordance with the resolutions unanimously passed. It is of course too early yet to speak with absolute certainty of the permanent effects of that measure, but the opening of new accounts and the enhanced value of the shares in the market have so far confirmed the favourable expectation formed of it. After making the necessary deductions for current expenses, rebate on bills not yet due, and interest to customers on deposit and current accounts there is, on the accounts of the old and re-constructed companies, a balance of profit for the half-year of 20,031*l* 5s 8d, which, with 4,078*l* 16s 1d brought forward on the December 31 last, makes a total of 24,110*l* 1s 9d now to be disposed of. Out of this the directors recommend that a dividend of 5s per share, or at the rate of 5*l* per cent. per annum on the new capital, be now declared, which will absorb 19,417*l* 10s, and that the remainder, 4,692*l* 11s 9d, be carried to profit and loss new account. The balance of 5*l* per share on the 38,826 (issued) shares of the old bank, amounting to 194,130*l*, has been transferred, as was proposed, to a contingent fund, "to be set off against the excessive rent of the London offices, and against any deficiencies which may appear on liquidation of the business of the old bank." This has been debited with 4,237*l* 16s for buildings and furniture in London and Manchester, so finally closing those accounts, and 50,653*l* 5s added to the old reserved fund, making it now 60,000*l*, which will be increased from time to time as the securities held against old outstanding debts are released. By the falling in of life policies since the accounts for the half-year were made up, and by dividends on failed estates declared and to be received during the current half-year, substantial progress will be made in this respect before the next meeting.

ANGLO-AUSTRIAN BANK.

Annexed is an abstract of the report of the directors on the operations of the bank during 1870:—

In presenting to the shareholders the report of the past year, thedirectors beg to observe that, whilst the state of political affairs in the latter half of the year has necessarily interfered with the progress which otherwise might have been anticipated in the business of the bank, they are of opinion that the actual results attained will be considered satisfactory. The construction of the third section of the Kronprinz Rudolf-Bahn, referred to in the last report, is now progressing satisfactorily. The works on the Kaschau Oderberg Railway are being rapidly proceeded with, and their completion may be expected before the time fixed in the concession. The contract for the construction of the Hungarian Nord-Ost Bahn, which had been in the hands of Dr Strousberg, has been transferred to the Union Bank of Vienna, which during the construction of the railway guarantees the interest on the bonds. The financial part of this undertaking remains in our hands, and we trust to derive further benefits from this business. The Railway Laibach Tarvis was opened at the end of last year, and the balance of profits on our share in this operation is included in the annexed balance sheet. The disposal of the remainder of the stock for the Graz-Raab and Stuhlweissenburg Railway will probably take place in the course of this year, and yield a good profit. In regard to the Turkish railways, the proceeds of the issue of 750,000 lottery bonds, together with the other existing resources of the railway company, suffice to provide funds for the construction of about 1,000 kilometers of railway, and thus give two years time to watch a favourable moment for a further issue of Turkish lottery bonds, as well as the conversion of other available sources of capital. A small section between Constantinople and Kutschuck-Tschekmedje has been opened already, and the section Novi Banjaluka, which is now under construction, will, when completed, connect the Ottoman Railways with those of Austria and Hungary. Of the enterprises and undertakings—commercial and industrial—with which this bank has been connected, the directors make mention of the following, viz.:—The Prag-Dux Railway (a part of the profit arising from which is in the present balance sheet), the Donau-Drau Railway, the Hungarian Nord-West Railway, the Unghvar-Csap-Nyiregyhasa (a section of the Hungarian Nord-Ost Railway), the Union Bank of Vienna, and the Oesterreichische Allgemeine Bank. The Wechselhaus Ad. Zinner has been transferred to us, and the experience of past years justifies us in expecting favourable results. Mr Zinner, one of our directors since the formation of the bank, has retired from our board. On the discovery of some very extensive and rich kali (salt) mines in Kalusz-Galicia, we have formed the Kali Bergbau und Salinen Betriebsgesellschaft "Kalusz," with a capital of four-and-a-half million florins, of which most is placed. This article (muriate of potash), which is largely exported to England and America, has given such importance to the manufacturing town of Stassfurt, in Prussia, whence it has become a staple article of export, that similar and even larger results may be safely anticipated for Austria. It will doubtless become very important for English manufacture. The participations in the North German Confederation loan, the 4½ per Cent. Bavarian State loan, and the Syndicate of the Odessa Railway shares, have given satisfactory results. Notwithstanding the disastrous war between Germany and France, which paralysed communications between those countries, the commission business of the bank has been profitable. Transactions have amounted to 900,000,000 fl, against 1,075,000,000 fl in 1869. Interest and exchange operations have not proved so good, it having been deemed prudent to keep an exceptionally large capital in reserve. The cash turn-over reached 827,000,000 fl, against 1,233,000,000 fl in 1869. The Lemberg branch has been liquidated in consequence of the generally unsatisfactory state of business in Galicia; a considerable loss, occasioned through advances by the branch, has been written off. The profit, including the balance of profit brought forward from last year, after deducting all expenses, amounts in Austrian currency to 4,337,675.20 fl; from this, in accordance with Art. 54 of the statutes, 6 per cent. interest on the average amount of paid-up capital in 1870 of 14,000,000 fl (1,400,000*l*) is to be deducted: of this amount, 5 per cent., or 70,000*l*, has already been divided, on January 1, 1871, leaving 1 per cent., or 14,000*l*, making together 84,000*l*, at the exchange of December 31, 1870, 125·08, 1,050,672 fl; together, 3,287,003.20 fl; deducting from this the balance of profit carried forward from 1869, 1,511,980.23 fl; there remains, 1,775,022.97 fl (representing the available amount of profit over and above the 6 per cent. interest); from this amount, as Tantième, to be divided among the members of the council, 177,502.29 fl; leaving 1,597,520.68 fl: in order to arrive at the amount available for dividend, it is necessary to add to the above the balance of profit brought forward from 1869, 1,511,980.23 fl; and the 1 per cent. interest not yet divided, 14,000*l*, at the exchange of 125·08, 175,112 fl; together, 1,687,092.23 fl; making a total of 3,284,612.91 fl; deducting from this as special reserve fund 1,533,492.91 fl, there remains 1,751,120 fl; which, at the exchange of 125·08, is equal to 140,000*l*, constituting a dividend of 1*l* per share. The shareholders are aware that the bank's claims against sundry Belgian companies now in liquidation amount to a large sum. Although the bank holds important securities against these advances, it has been deemed advisable, pending their realisation, to form the above special reserve fund of 1,533,492.91 fl.

ANGLO-EGYPTIAN BANKING COMPANY.

The half-yearly ordinary general meeting of the shareholders was held at the City Terminus Hotel, Cannon street, May 25, when the following report was taken as read:—

The directors have great pleasure in acquainting the shareholders that the business of the bank continues to be very satisfactory, and the profits are such as to fully warrant them in declaring an interim dividend at the rate of 10 per cent. per annum on the capital of the company, for the six months ending February 28 last, equal to 1*l* per share, free of income tax, being the extreme amount which the directors are authorised by the articles of association to declare as an interim dividend.

BANK OF ADELAIDE.

At the annual general meeting of the shareholders, held at Adelaide, South Australia, February 13, the following report was adopted:—

The directors in submitting this their fifth yearly report, feel that they have reason to congratulate the shareholders on the continued prosperity of the bank. The dulness of trade, and the scarcity and dearness of money during the past year, might fairly have led to the expectation of a reduction of profit. They are, however, happy to be able to inform the shareholders, that after making sufficient allowance for bad and doubtful debts, and charging to current expenses a considerable sum for enlarging the bank's offices in Adelaide, the balance of net profit, 22,642*l* 4s 4d, is rather greater than last year's. In accordance with your resolution at the special general meeting held on March 9 last, your directors paid an interim half-yearly dividend in August, at the rate of 7s per share for the year, amounting to 8,750*l*; there is, therefore, left for disposal now 13,892*l* 4s 4d. This they propose should be appropriated to the payment of a half-yearly dividend at the same rate, and the balance, 5,142*l* 4s 4d, to the increase of the reserved fund, which will then amount to 20,522*l* 14s 1d. Some difference of opinion having arisen between the board and Mr Henry Rymill, one of your auditors, as to the proper mode of conducting the ordinary audit under clause 94 of the deed of settlement, the directors have judged it expedient to propose to the shareholders to alter clauses 94 and 97 of the deed of settlement, so as more perfectly to define the duties of the auditors in ordinary and in special audits, and to assimilate the provisions of the deed to the usual practice of this and of other banks. For this purpose they have, by advertisement, duly convened a special general meeting for Monday, February 13, at which meeting these alterations will be submitted for approval. Annexed is the balance sheet for the year ending December 24, 1870:—Dr. Capital, 200,000*l*; notes in circulation, 26,935*l*; deposits not bearing interest, 73,681*l* 4s 5d; bearing interest, 90,240*l* 9s 5d; bills in circulation, 460*l* 15s 4d; balances due to other banks, 20,876*l* 17s 2d; interest due on fixed deposits and rebate on bills, 2,686*l* 1s 5d; profit and loss, net amount for the year, 22,642*l* 4s 4d; less interim dividend paid August 10, 8,750*l*; reserve fund, 15,380*l* 9s 9d—total, 444,153*l* 1s 10d. Cr. Specie on hand, 46,096*l* 1s 11d; notes and bills of other banks, 82*l*; bills receivable and all other advances, 390,748*l* 11s 11d; balances due from other banks, 1,116*l* 4s 6d; bank premises, furniture, stationery, &c., 4,734*l* 7s 3d; remittances in transitu, 1,375*l* 16s 3d—total, 444,153*l* 1s 10d. Profit and loss account:—Dr. Current expenses, including salaries, rent, stationery, &c., 8,517*l* 5s 2d; rebate on bills discounted, and interest due on fixed deposits, 2,686*l* 1s 5d; net profit for the year, 22,642*l* 4s 4d—total, 33,845*l* 10s 11d. Cr. Gross profit for the year, after providing for bad and doubtful debts, as estimated by the

directors and manager, 33,845*l* 10s 11d. Reserved fund:—Dr. Balance, 15,380*l* 9s 9d. Cr. Balance per last balance sheet, 10,379*l* 15s; transfer from profit and loss, 5,000*l* 14s 9d—total, 15,380*l* 9s 9d.

BANK OF AUSTRALASIA.

The following statement of the directors to the proprietors was read at the half-yearly meeting, held August 14, 1871:—

The directors have the pleasure of informing the shareholders, that since the annual report was presented in March last, a favourable change has taken place in the prospects of business in Australia and New Zealand. In the interval, the principal part of the wool-clip in 1870 has been disposed of, and the great rise in prices with which the market opened was fully maintained till the close of the sales. The effect of this buoyancy in the wool market will not be confined to the pastoral interest, but will extend to all branches of trade and industry, and will strengthen the value of securities. Monetary institutions will be relieved of the embarrassment which has more or less attended their operations for some years, and will be able to afford to enterprise a larger measure of support than has lately been thought consistent with prudence and security. As regards the prospects of this bank the directors are able to speak hopefully. A recurrence of such losses as have charged the profits of recent years is not probable, and the bank is in a good position to avail itself of new business. The dividend will be at the rate of 4 per cent. for the half-year, or 1*l* 12s per share will be payable, free of income tax, on and after Tuesday, October 10. This will make a total appropriation of 108,000*l* to dividend during the current year, which is 9 per cent. per annum on the paid-up capital. On reference to the account presented in March last, it will be found that the whole amount of undivided profit on October 10, 1870, was 101,700*l*. Of this, 60,000*l* was distributed in April last, leaving an unappropriated balance of 41,700*l*. The effect thereof of appropriating 48,000*l* to the second dividend of the year will be to take 6,300*l* from subsequent profit as yet not presented in account, a step which is at variance with the usual practice of this bank, but is under present circumstances free from objection.

BANK OF BRITISH COLUMBIA.

At the general meeting, held at the London Tavern, October 10, 1871, the following report was adopted:—

The directors in submitting to the shareholders the statement of accounts for the half-year ended June 30 last, have to report that, after paying all charges and deducting rebate of interest on bills not due, the balance at credit of profit and loss account at that date was 11,404*l* 7s 11d. The directors recommend that a dividend for the half-year be declared at the rate of five per cent. per annum, which would absorb 7,450*l*, and that 3,954*l* 7s 11d be carried forward. Annexed is a statement of liabilities and assets at head office and branches, at June 30, 1871:—Liabilities—Capital paid up, 298,000*l*; deposits, notes in circulation, bills payable, and other liabilities, 216,666*l* 15s 3d; balance of profit and loss on June 30, 1871, 11,404*l* 7s 11d—total, 526,071*l* 3s 2d. Assets—Specie and bullion in hand, and cash at bankers, 102,911*l* 12s 5d; bills discounted, bills receivable, and other securities, 411,953*l*; bank premises, furniture, and other property, 11,206*l* 10s 9d—total, 526,071*l* 3s 2d. Profit and loss account on June 30, 1871:—Dividend paid April 18, 1871, 8,940*l*; amount transferred to land account, as per statement at last general meeting, 10,000*l*; charges to June 30, 1871, including rent, salaries, and other expenses at head office and branches, 7,375*l* 6s 8d; amount written off assay plant, 310*l* 16s 6d; directors' fees, 500*l*; balance of profit, June 30, 1871, 11,404*l* 7s 11d—total, 38,530*l* 11s 1d. Balance of profit and loss account, brought from December 31, 1870, 19,545*l* 4s; profit for six months ended June 30, 1871, after deducting rebate of interest on bills not due, 18,985*l* 7s 1d—total, 38,530*l* 11s 1d. Balance, 11,404 7s 11d.

BANK OF BRITISH NORTH AMERICA.

At the thirty-fifth yearly general meeting, held June 6, 1871, the following report was read:—

With reference to the circular letter issued by order of the court of directors to the proprietors on March 31 last, together with a balance sheet and a statement of profit and loss account, as on December 31, 1870, the directors have now to report that they are enabled to confirm the same, and to declare a dividend at the rate of 6 per cent. per annum, with a bonus of 1½ per cent., amounting together to 45s per share, payable, free of income tax, on July 5, and for which warrants will be remitted to the proprietors as usual.

BANK OF EGYPT.

The annexed report was presented to the shareholders at an extraordinary general meeting, held July 21, 1871:—

The directors of the Bank of Egypt have the pleasure to lay before the shareholders the annexed balance sheet and profit and loss statement for the half-year which ended on June 30. The profits available for appropriation, after providing for bad and doubtful debts and rebate on bills not yet due, &c., amount to 25,906*l* 2s 11d. This added to 3,029*l* 18s 1d, the balance of undivided profits brought forward from the previous half-year, makes a total of 28,936*l* 1s. The directors recommend that the usual interim dividend be declared at the rate of 10 per cent. per annum for the half-year (12,500*l*), and a bonus of 15s per share (7,500*l*), together, 20,000*l*, both free of income tax, leaving a balance of 8,936*l* 1s to be carried forward to the next account. The subjoined statements of accounts is to June 30, 1871:—Liabilities—Capital paid up, 250,000*l*; reserve fund, 100,000*l*; bills payable, 91,449*l* 13s 7d; current and other accounts, 134,874*l* 16s 7d; profit and loss, as below, 28,936*l* 1s—total, 605,260*l* 11s 2d. Assets—Cash, 115,399*l* 7s 8d; bills receivable, 75,616*l* 15s 7d; Government securities (Egyptian), 307,509*l* 5s 4d; other securities, 106,735*l* 2s 7d—total, 605,260*l* 11s 2d. Profit and loss, June 30, 1871:—Dr. Dividend at the rate of 10 per cent. per annum for the half-year, payable on July 28, 12,500*l*; bonus of 15s per share, 7,500*l*; balance carried to next account, 8,936*l* 1s—total, 28,936*l* 1s. Cr. Balance of undivided profits, December 31, 1870, 3,029*l* 18s 1d; net profits for the last six months, after providing for bad and doubtful debts, rebate of interest, current expenses in London and Egypt, and directors' remuneration, &c., 25,906*l* 2s 11d—total, 28,936*l* 1s.

BANK OF ENGLAND.

The half-yearly court of the proprietors of the Bank of England was held in the Bank Parlour on September 14, Mr George Lyall, Governor, in the chair. The secretary (Mr Hammond Chubb) read the minutes of the last court, which were confirmed.

The Governor said—I have to acquaint the court that this is one of the quarterly courts appointed by the charter, and it is also one of the half-yearly general courts appointed under the 12th bye-law for the making of dividends. The net profits for the half-year of August 31 were 621,214*l* 11s 4d, making the amount of rest on that day, 3,633,964*l* 5s 8d, and after providing a dividend of 4*l* 5s per cent. the rest will be 3,015,461*l* 15s 8d. The court of directors therefore propose that a half-year's dividend of interest and profits be made on October 5 of 4*l* 5s per cent., with deduction on account of income tax. I will therefore, with your leave, put the question, that this court do order that a dividend of interest and profits be made on October 5 of 4¼ per cent., without any deduction on account of income tax.

Mr W. Botley said he begged most cordially to second the adoption of the dividend, and in doing so he thought he might say they would be unanimous on that point on this occasion. He remembered that when on the last occasion the dividend was 4½ per cent., some gentleman proposed that it should be only 4¼ per cent.. Now, therefore, he did not apprehend any division on the subject whatever. Taking all the circumstances into consideration, he thought they might congratulate themselves upon the dividend, though it was rather smaller than upon the last occasion; but looking to the peaceable state of the continent of Europe, and the improved state of accounts from India, he thought they had good reason to congratulate themselves, and he had much pleasure in seconding the adoption of the resolution that had been proposed. Before the termination of the proceedings he desired to give notice of his intention to bring forward a question at the next court, but he did not invite any discussion upon it at present, and he begged leave to second the adoption of the dividend.

Mr Jones said one director followed the other in the place of Governor—he did not know by what law—but they all preserved the same traditional silence of giving the proprietors no information about the affairs of the Bank. The clause and the bye-law which called them together told them that they were assembled for the purpose of taking into consideration the state and condition of the Bank; but he presumed it would be difficult to take into consideration that of which one new nothing. He ventured to take that opportunity of urging upon the Governor and the court of directors a question which he thought important. If this Bank were merely a dividend-making machine he should have thought it out of place, but this was the great court of control of one of the chief forces of society—the currency of the world; and whatever affected the commerce of the world, so far as related to the currency, bore upon the affairs of this corporation. He remembered being told by one of the late governors of the Bank that these non-official speeches indicated great personal vanity; but as they must have all gone through that before they entered upon official life, he need make no apology in their presence. The question he wished to submit to them was the propriety of their urging the Government to make the florin assimilate in value to the rupee. The whole of their Indian trade depended upon the rupee; the whole of their Indian finances was measured by the rupee. 70,000,000*l* might be said to be the average estimate of the quantity of traffic between England and India; and the manager of the East Indian

Railway Company had stated that the valley of the Ganges alone would absorb the whole of the manufactures of this country for many years if adequately worked. This corporation alone had to deal with something like ten millions derived from the revenue of India, in the shape of the distribution of dividends on stock, dividends on the debt, dividends on railways, and payments on behalf of the Home Government of India for the army. Altogether, Indian affairs are one of the greatest affairs of our foreign trade. Compared with France it was far more beneficial, though the figures approached to pretty much the same magnitude—inasmuch as we exported to France raw material, in return we receive it accomplished; and we exported to India labour and received back raw material, which was far more advantageous to this country. But this whole Indian trade was obstructed by the coinage of the two countries. In addition to the extraordinary fluctuations which resulted from changes of seasons, there were the fluctuations dependent upon the varying standard value of money, rising from 5 to 10 per cent. That was dependent somewhat upon natural and upon somewhat artificial causes. He recollected reading in a work of one of their co-directors (Mr Goschen), who from floating foreign loans had now turned his attention to stranding Her Majesty's ships, that one of the most perplexing difficulties they had to deal with was the various denominations of coins. Passing on to the immediate subject upon which he desired to address them, he would repeat that the whole trade of India was obstructed by the difference in value of the rupee and the florin. The difference was a minute one, but its effect was important. The florin contained 174½ grains of silver, the rupee 180 grains of silver, so that the florin was two pennyweights better in the pound troy than the rupee. The actual difference was thus one-third of a penny, and for the sake of one-third of a penny in the value of these two coins the whole of the magnitude of Indian trade was exposed to fluctuations from 2 to 10 per cent. He thought, therefore, it would be important that this corporation should address itself to the question of assimilating the florin with the rupee. Lately, the court had been in communication with the Government, and had analysed and re-condensed all the laws connected with the coinage; and he thought it was quite within their province to take up this question, which so greatly concerned the whole of the kingdom. With regard to the dividend of 4½ per cent., he was perfectly satisfied with it; but he was reminded of the words of Lord Derby, who had said that there was an enormous field for the employment of the Bank's resources in increasing the products of the soil of the country, while they were lending, at small rates, to jobbers who added nothing to the wealth of the country; they might, with the most perfect ease obtain a very much greater percentage by employing it in multiplying the products of the land.

The Governor—I will only observe, with regard to what Mr Jones has said upon the subject of the assimilation of the florin and the rupee, that is a question, which of course the Bank in its capacity was not likely to interfere with, unless it was called upon in any way by the Government to express an opinion on the subject. That subject has not, that I have heard, been discussed recently anywhere, and why Mr Jones should have brought it forward on this occasion I do not know. He may have done so for reasons with which I am not acquainted. I do not know that he has touched upon any other matter of interest to us to-day, and I will therefore proceed to put the question.

The question of the dividend was then put and carried unanimously.

The Chairman—I have now to announce that the dividend will be paid on October 6.

Mr Jones then moved a resolution, in effect a recommendation from the proprietors, that the court should take into consideration the propriety of assimilating the florin with the rupee; but this not being seconded, fell to the ground.

Mr W. Botley then gave notice of his intention at the next court to call the attention of the governor, deputy-governor, and court of directors, to the subject of "Decimal Money, and a common International Unit;" and remarked, that seeing the discussion the subject had undergone at several congresses held on the continent, especially at that recently held in Germany, and considering that the subject had the adhesion of the greatest bankers, merchants, financiers, and men of science in particular, as well as the Statistical Society, the British Association, the Chamber of Commerce, and the Chamber of Agriculture—when such great authorities were advocating and zealously supporting the principle, it could not, he presumed, be out of place to ask the governor and directors, at the next general court, whether the subject had been considered, or was then under the consideration of the court.

On the motion of Sir David Salomons, M.P., a cordial vote of thanks was accorded the governor, deputy-governor, and court of directors, for their attention to the interests of the Bank.

The Governor thanked the court for its kind acknowledgement of their services, and they might be assured they would gladly endeavour to do the best in their power, at all times, to promote the interests of that great corporation.

The court then adjourned.

BANK OF IRELAND.

Capital, 3,000,000*l*; rest fund, 1,074,215*l*. Dividend, 10½ per cent., for year ending June 30 last.

BANK OF NEW SOUTH WALES.

At the half-yearly general meeting of the proprietors, held at Sydney, April 26, 1871, the following forty-first report was presented:—

The directors submit herewith a statement of the assets and liabilities of the bank on March 31, with the auditors' usual report and declaration. The net profits for the half-year, after deducting rebate on current bills, interest on deposits, providing for bad and doubtful debts, reducing valuation of bank premises, and paying taxes on note circulation, amount to 53,691*l* 17s 3d, to which is to be added undivided balance from last half-year, 2,431*l* 0s 10d, giving for distribution, 56,122*l* 18s 1d; which the directors recommend to be appropriated as follows:—Payment of dividend at the rate of 10 per cent. per annum, 50,000*l*; addition to reserve fund, 3,000*l*; balance carried to profit and loss new account, 3,122*l* 18s 1d. With the above addition to the reserve, made in accordance with the deed of settlement, that fund will amount to 303,000*l*. The business of the bank during the past half-year has been satisfactory. The directors, however, have considered it prudent, after carefully revising their old securities, to devote a part of the profits made to further provision for possible contingencies. Agencies of the bank have been established at the gold fields at Gulgong, in this colony, and Ahaura, in New Zealand, and the Newstead and Spring Creek agencies in Victoria, have been withdrawn. Subjoined is the aggregate balance sheet to March 31, 1871 (including London branch to December 31, 1870, and New Zealand branches to March 6, 1871):—Dr. Bank stock, 1,000,000*l*; reserve fund, 300,000*l*; notes in circulation, 588,340*l*; bills payable, 1,519,747*l* 11s 1d; deposit and other liabilities, 5,037,036*l* 8s 10d; profit and loss, 75,534*l* 1s 3d—total, 8,520,658*l* 1s 2d. Cr. Coin and cash balances, 1,842,904*l* 15s 10d; bullion in hand, and in transit to London, 864,873*l* 0s 2d; Government securities, 7,934*l*; notes of other banks, 16,147*l*; bank premises, 175,519*l* 4s; bills receivable, bills discounted, and other debts due to the bank, 5,609,576*l* 17s 1d; insurance account, 3,703*l* 4s 1d—total, 8,520,658*l* 1s 2d. Profit and loss, March 31, 1871:—Dr. Rebate (at current rates) on bills discounted, not due at this date, 19,411*l* 3s 2d; amount appropriated in augmentation of the reserve fund, 3,000*l*; dividend at the rate of 10 per cent. per annum, 50,000*l*; balance carried to profit and loss new account, 3,122*l* 18s 1d—total, 75,534*l* 1s 3d. Cr. September 30, 1870—Amount from last account, 2,431*l* 0s 10d; March 31, 1871—balance of half-year's profits after providing for bad and doubtful debts, and including recoveries from debts previously written off as bad, 73,103*l* 0s 5d—total, 75,534*l* 1s 3d.

BANK OF NEW ZEALAND.

At the half-yearly general meeting of the proprietors, held at Auckland, April 26, 1871, the subjoined nineteenth report of the directors was read:—

The operations of the past half-year enable the directors again to meet the shareholders with a favourable report. The net profit at March 31, including 30,000*l* premium on the new issue of shares, after making due provision for every bad or doubtful dependency, and for appropriations in reduction of bank premises and furniture accounts, amount to 74,643*l* 10s 3d: to which has to be added—balance of undivided profit at September 30, 1870, 7,745*l* 11s 7d; giving a balance available for division of 82,389*l* 1s 10d. The following appropriation of which is now recommended:—To addition to reserve fund, 30,000*l*; payment of dividend at the rate of 10 per cent. per annum, 30,000*l*; bonus of 5s per share, equal to 5 per cent. per annum, 15,000*l*; balance carried to profit and loss new account, 7,389*l* 1s 10d—82,389*l* 1s 10d. The aggregate balance sheet at March 31, 1871, including London office balances at December 31, 1870, is as follows:—Dr. Bank stock, 600,000*l*; reserve fund, 150,000*l*; notes in circulation, 286,443*l* 10s; bills in circulation, 888,716*l* 14s 4d; deposits and other liabilities, 1,760,582*l* 1s 4d; balance of profit and loss account at September 30, 1870, 7,745*l* 11s 7d; net profit for half-year, 74,643*l* 10s 3d—total, 3,768,131*l* 7s 6d. Cr. Coin and cash balances, 381,764*l* 1s 2d; bullion on hand and in transitu, 573,586*l* 11s 8d; Government securities, 204,400*l*; notes and bills of other banks, 2,776*l*; landed property, 22,286*l* 8s 4d; bank premises, furniture, and stationery, 83,259*l* 18s 1d; insurance account, 5,612*l* 16s 4d; bills receivable, bills discounted, and other debts due to the bank, 2,494,445*l* 11s 11d—total, 3,768,131*l* 7s 6d. Profit and loss account:—Addition to reserve fund, 30,000*l*; dividend at the rate of 10 per cent. per annum, 30,000*l*; bonus of 5s per share, 15,000*l*; balance carried to profit and loss new account, 7,389*l* 1s 10d—total, 82,389*l* 1s 10d. Balance of profit at September 30, 1870, 7,745*l* 11s 7d; net profit for half-year, after writing off bad debts, 74,643*l* 10s 3d—total, 82,389*l* 1s 10d. Reserve fund—Balance, 180,000*l*. Balance from last statement

150,000*l*; amount transferred from profits of past half-year, 30,000*l*—total, 180,000*l*.

BANK OF OTAGO, LIMITED.

The annexed eighth report was presented to the shareholders, at the ordinary general meeting, held at the London Tavern, Bishopsgate street, July 21, 1871 :—

The directors beg to submit the annual report and balance sheet for the year ending March 31, 1871. The accounts have been duly audited, and show a profit of 11,441*l* 5s 10d, now to be disposed of. The sum of 1,800*l*, reserved on September 30 last, has been nearly all required to meet losses, amounting to 1,657*l* 16s 2d. The severe depression and stagnation of trade, mentioned in the circular of January 11 last, have prevailed in New Zealand throughout the year, and have had the effect of preventing that increase of business and profits which might otherwise have been expected; but although the result of the year's operations has not realised expectations, the chief colonial manager reports, in his latest advices, that he feels better satisfied with the position of the bank's affairs than he has ever been. The recent improvement in the price of wool in this market, together with the increasing production of preserved meat and tallow, will doubtless tend to promote the prosperity of New Zealand, and thereby add to the business of the bank. The shareholders will observe an addition to the amount at debit of bank premises and furniture account. This arises from some repairs and alterations in the premises at Dunedin, as well as from the completion of the new premises at Oamaru and Winton branches, which Mr Larnach thought advisable. It has not been considered necessary to write off anything from this account for the present year. Mr Larnach has lately reported that the sum of 4,650*l* 1s 11d may eventually have to be provided for, principally for advances previous to his management not fully covered; but as these accounts have not yet been brought to a close, the directors prefer to postpone writing off anything as deficiencies until they are positively found to be so. The directors recommend that 1,036*l* 0s 7d out of the above amount of 11,441*l* 5s 10d be employed in extinguishing the "suspense account," and that the balance of 405*l* 5s 3d be carried forward to the credit of profit and loss new account. The directors think it right to mention that some proposals have been made for a change in the constitution of the bank, and if considered desirable they will be submitted to the shareholders for approval at the proper time. The following balance sheet is to March 31, 1871 :—Dr. Capital—10*l* per share on 23,252 shares, 232,520*l*; less calls in arrear, 893*l* 8s; leaving 231,626*l* 12s; notes in circulation, 1,031*l*; deposits, current accounts, and other liabilities, 46,170*l* 6s 4d; net profit for year, 11,441*l* 5s 10d—total, 288,269*l* 4s 2d. Cr. Cash in hand and at bankers, 41,180*l* 14s 2d; bills receivable, bills discounted, and other advances, 129,081*l* 18s 6d; current accounts and other assets, 15,928*l* 14s 10d; bank premises and furniture, 48,944*l* 13s; as written off to date, 15,402*l* 16s 11d; leaving 33,541*l* 16s 1d; suspense account, 11,036*l* 0s 7d; preliminary expenses, 3,500*l*—total 528,269*l* 4s 2d. Profit and loss account :—Charges in London, 1,856*l* 14s 1d; charges in New Zealand, 13,733*l* 2s 6d; balance, being net profit, 11,441*l* 5s 10d—total, 27,031*l* 2s 5d. Gross profits, 27,031*l* 2s 5d. Balance down, 11,441*l* 5s 10d.

BANK OF SOUTH AUSTRALIA.

The annexed report of the court of directors was presented to the general meeting of shareholders, June 27, 1871 :—

The court of directors have to report that during a portion of the past year, South Australia continued to suffer from depression of trade and low prices of produce, the tendency being in some measure to diminish profits. This is apparent in the result of the year's business, although the annual accounts in other respects show the position of the bank to be most satisfactory. South Australia has since been favoured with an abundant harvest, which has already caused an improvement in the value of landed properties, and will most probably lead to increased commercial activity. The townships of Goolwa Strathalbyn, and Tanunda, having declined in prosperity, the directors, with a view to reduced expenditure, have closed the branches in those places. This measure has been effected without interfering with the general efficiency of the bank. The court recommend a dividend of 10 per cent. per annum, free of income tax, the reserved fund remaining as at present, at 117,458*l*. Balance sheet, Dec. 31, 1870 :—Liabilities—Promissory notes in circulation not bearing interest, 57,556*l*; bills of exchange in circulation not bearing interest, 146,805*l* 13s 6d; balances due to other banks, 4,685*l* 14s 6d; cash deposited not bearing interest, 157,464*l* 1s 4d; cash deposited bearing interest, 661,192*l* 3s 8d (total due to the public, 974,703*l* 13s); capital paid up, 500,000*l*; reserved fund, 117,458*l*; profit and loss, 51,703*l* 17s 6d (due to shareholders, 669,161*l* 17s 6d)—total, 1,643,865*l* 10s 6d. Assets—Coin and bullion, 129,593*l* 8s 5d; balances due from other banks, 43,969*l* 18s 5d; promissory notes and bills of other banks, 1,289*l* 12s 9d; Government securities, 170,463*l* 2s 4d; landed or other property of the corporation, 31,900*l*; notes and bills discounted, or other debts due to the corporation not included under the foregoing heads, 1,266,649*l* 8s 7d—total, 1,643,865*l* 10s 6d. Profit and loss account :—Dividend, July, 1870, 25,000*l*; ditto, January, 1871, 25,000*l*; expenses of establishment, including directors' and auditors' remuneration, officers salaries, building expenses, rent, taxes, stationery, income tax on net profits, &c., 31,284*l* 18s 11d; balance this year, 51,703*l* 17s 6d—total, 132,988*l* 16s 5d. Balance last year, 52,162*l* 9s 1d; interest of reserved fund, 7,226*l* 13s 11d; profits from all offices, 73,599*l* 13s 5d—total, 132,988*l* 16s 5d.

BANK OF VICTORIA.

The following report was presented to the proprietors at the half-yearly general meeting, held at the bank, Melbourne, August 1, 1871 :—

The board of management of the Bank of Victoria have now to submit their thirty-seventh half-yearly report to the proprietors of the bank stock, together with the balance sheet for the same period, duly certified by the auditors. BELFAST BANKING COMPANY.

Profit and loss and reserve fund on July 31, 1871, 312,181*l*.

BIRMINGHAM BANKING COMPANY.

The fifth general meeting of the shareholders in this company was held July 31, at the Queen's Hotel, Birmingham, when the manager read the following report of the directors, and the balance sheet :—

The directors with much pleasure report that after paying all charges, writing off bad debts, and making provision for doubtful ones, and for rebate of interest on bills current, the net pro-

fits of the bank for the last year amount to 21,624*l* 12s. This, with 941*l* 15s 9d, the unappropriated balance of the preceding year, will amount to 22,566*l* 7s 9d. An interim dividend for the half-year ending December 31, 1870, at the rate of 7½ per cent. per annum, was paid on February 1 last, amounting to 4,162*l* 10s. They have now added to the guarantee fund the sum of 10,860*l*; to bank premises redemption fund, 307*l*; and they propose to declare a dividend on the paid-up capital for the half-year ending June 30, 1871, at the rate of 10 per cent. per annum, payable on August 1, 5,777*l* 10s, leaving a balance to be carried forward to next account of 1,459*l* 7s 9d. The guarantee fund now amounts to 55,000*l*, and is invested in accordance with the articles of association. Since the last annual meeting, the long-pending negotiations for the sale to this company by the shareholders of the old bank of its remaining assets have been concluded. By this arrangement, all persons interested not only obtained in immediate payment the full value of those assets, but secured the further greater advantage of the dissolution of the Birmingham Banking Company by the Master of the Rolls on May 22 last. In carrying out this arrangement, your directors have acted in accordance with the original prospects of your company, and trust—by care and economy in realising the property thus acquired—to prove that this has been accomplished without prejudice to the interests of their own proprietors. The experience of the board during the five years in which the bank has been in operation has shown the necessity of some alterations in the articles of the association, which will be submitted for your consideration at the special meeting, to be held at the close of the ordinary meeting, Balance sheet, June 30, 1871:—Liabilities—Proprietors' capital, viz., 23,110 shares, 5*l* paid, 115,550*l*; due by the bank on deposit, current, and other accounts, 1,015,545*l* 18s 7d; seven days and other drafts, 8,232*l* 3s 1d; redemption fund for bank premises, 1,630*l* 18s 6d; guarantee fund, 55,000*l*; amount reserved for dividend, at 10 per cent. per annum, payable on August 1, 5,777*l* 10s; balance, being unappropriated profits, carried forward, 1,459*l* 7s 9d—total liabilities, 1,203,195*l* 12s 11d. Assets—Cash in hand, at the Bank of England, and with agents, 137,477*l* 5s 7d; investments on account of guarantee fund—New Three per Cents., 10,000*l*; Consols, 16,000*l*; Lancashire and Yorkshire Railway debentures, 5,000*l*; Borough of Birmingham bond, 5,000*l*; East India Government debentures, 4,000*l*; bills of exchange, 619,033*l* 3s 6d; due to the bank on current and other accounts, 382,433*l* 19s; bank premises and furniture, 24,251*l* 4s 10d—total assets, 1,203,195*l* 12s 11d.

BIRMINGHAM JOINT STOCK BANK, LIMITED.

The following quarterly statement has been issued:—

The liability of the shareholders is limited. The capital of the company is 3,000,000*l*, divided into 30,000 shares of 100*l* each. The number of shares issued is 20,390. Calls to the amount of 10*l* per share have been made, under which the sum of 203,900*l* has been received. The liabilities of the company on June 30, 1871, were:—Proprietors' capital, 203,900*l*; due to the public on deposit, current, and other accounts, 1,199,653*l* 15s 7d; bank premises redemption fund, 653*l* 8s 4d; reserved funds, 216,500*l*—total, 1,620,707*l* 3s 11d. The assets of the company on that day were:—Government securities, railway debentures, &c., 201,353*l* 8s 4d; bills of exchange, 585,099*l* 15s 11d; promissory notes to the bank, 38,492*l*; advances and loans on security, 607,126*l* 17s 11d; bank premises, being freehold in New street, and leasehold in Temple row, West, 19,424*l* 12s 5d; cash in hand and at agents, 169,210*l* 9s 4d—total, 1,620,707*l* 3s 11d.

BIRMINGHAM AND MIDLAND BANK.

At the annual meeting of shareholders, held August 14, at the Bank, Birmingham, the following report was presented:—

The directors have to report that the profits for the past year, after paying income tax, writing off bad debts, and carrying 6,365*l* 8s for interest to the guarantee fund, amount to 55,100*l* 2s 5d; to which has to be added the balance brought forward from last year, 3,467*l* 11s 8d; making a total for distribution of 58,567*l* 14s 1d, which is thus appropriated:—A dividend of 5*l* per share was paid for the half-year ending December 31, 1870, 27,500*l*; the directors recommend a dividend at the same rate for the half-year ending June 30 last, 27,500*l*,—55,000*l*; and that the balance be carried to next year's account, 3,567*l* 14s 1d. The guarantee fund at the last annual meeting amounted to 212,180*l*; add interest to June 30, 6,365*l* 8s; present amount, 218,545*l* 8s. The paid-up capital is 275,000*l*.

BIRMINGHAM TOWN AND DISTRICT BANKING COMPANY.

The following report of the directors was presented to the shareholders at the thirty-fifth annual ordinary meeting of the company, held at the Great Western Hotel, July 24, 1871, and unanimously adopted:—

In submitting to the shareholders the result of the business of the bank for the past year, the directors consider the annexed balance sheet will itself be the best evidence that the bank is steadily rising in public estimation, and that its progress is satisfactory. After deducting current expenses, rebate on bills, paying income tax, and providing for all bad and doubtful debts, the net profits amount to 17,617*l* 7s 1d, to which sum must be added 330*l* for premiums upon shares allotted, and 310*l* 10s 1d, the balance of last year's profit and loss, making for distribution, 18,257*l* 17s 2d. The shareholders having already received an interim dividend out of the above amount at the rate of 7½ per cent. upon the paid-up capital, the directors now recommend the payment of a dividend at the same rate (being six shillings per share) free of income tax, payable on August 1. They also propose to add 6,000*l* to the reserve surplus fund, thereby increasing that fund to 34,000*l*; to transfer 150*l* to a new account for the redemption of the bank premises, and to carry forward the balance of 203*l* 17s 2d to next year's profit and loss account. Balance sheet, June 30, 1871:—Liabilities—Capital account—20,000 shares, 8*l* per share paid, 160,000*l*; reserve surplus fund, 34,000*l*; unclaimed dividends, 641*l* 17s; drafts on London agents, 21,020*l* 18s 8d; due on deposit, current, and other accounts, 533,379*l* 2s 11d; amount reserved for dividend, payable August 1, 6,000*l*; bank premises redemption fund, 150*l*; balance to next year's profit and loss account, 203*l* 17s 2d—total, 755,395*l* 15s 9d. Assets—Bills of exchange, 338,204*l* 1s 3d; cash in hand, at Bank of England, and at agents, 70,131*l* 9s 2d; Government stock, 40,673*l* 14s 10d in New and Reduced 3 per Cents. at cost price, and real estate, 43,109*l* 6s 6d; bank premises, furniture, &c., 18,854*l* 10s 7d; advances on current accounts, &c., 285,096*l* 8s 3d—total, 755,395*l* 15s 9d. Profit and loss account for the year ending June 30, 1871:—Dr. Dividend, paid Feb. 13 last, at six shillings per share, free of income tax, 5,904*l*; dividend of six shillings per share, free of income tax, payable Aug. 1, 6,000*l*; amount added to reserve surplus fund, 6,000*l*; bank premises redemption fund, 150*l*; balance to carry forward to next year's profit and loss account, 203*l* 17s 2d—total, 18,257*l* 17s 2d. Cr. Balance from profit and loss account, June 30, 1870, 310*l* 10s 1d; premiums on shares allotted, 330*l*; net profit for the year ending June 30, 1871, 17,617*l* 7s 1d—total, 18,257*l* 17s 2d.

BRADFORD DISTRICT BANK, LIMITED.

The annexed report of the directors was presented to the members at the nineteenth ordinary general meeting, held August 2, 1871:—

The directors have pleasure in presenting to the members the annexed statement of accounts (as certified by the auditor) for the half-year ending June 30 last, on reference to which it will be seen that the net profit amounts to 12,366*l* 19s 10d, which with 773*l* 3s 8d brought from the December balance, gives a total of 13,140*l* 3s 6d to be disposed of. The directors propose to add 5,000*l* to the reserved fund, which will then be raised to 67,000*l*, to pay a dividend at the rate of 7 per cent. per annum (free of income tax), absorbing 6,825*l*, and to carry forward 1,315*l* 3s 6d to profit and loss account for the present half-year. Balance sheet, June 30, 1871:—Liabilities—Capital called up—viz., 30*l* per share on 6,500 shares of 100*l* each, 195,000*l*; reserved fund, 62,000*l*; amount due to customers on current deposit, and other accounts, 344,973*l* 4s 11d; unclaimed dividends, 217*l* 16s; profit and loss, balance of this account, 13,140*l* 3s 6d—total, 615,331*l* 4s 5d. Assets—Cash and bills on hand, balances owing by customers, and with bankers, 608,493*l* 0s 5d; bank premises, 6,762*l* 3s 6d; stamps on hand, 76*l* 0s 6d—total, 615,331*l* 4s 5d. Profit and loss account:—Current expenses—viz., salaries, income tax on profits, stationery, directors' remuneration, &c., &c., Bradford and Keighley, 2,748*l* 10s 5d; dividend account for payment of dividend of 2s per share, 6,825*l*; reserved fund, 5,000*l*; balance carried to profit and loss, new account, 1,315*l* 3s 6d—total, 15,888*l* 13s 11d. Balance on Dec. 31, 1870, 773*l* 3s 8d; interest, commission, &c.—balance after deducting rebate of interest on bills discounted not yet due, and making provision for bad a doubtful debts, 15,115*l* 10s 3d—total, 15,888*l* 13s 11d.

BRADFORD OLD BANK, LIMITED.

At the half-yearly ordinary meeting, held July 24, 1871, the following report of the directors was presented to the proprietors:—

The directors have much pleasure in presenting the shareholders with the balance sheet for the past half-year. The profit after providing for bad and doubtful debts, amounts to 23,114*l* 14s 9d, and this, with the balance of 2,371*l* 13s 4d brought forward from last account, makes a total of 25,486*l* 8s 1d, which, after the deduction of 357*l* 4s 8d for income tax, will give a sum of 25,129*l* 3s 8d to be dealt with by this meeting. The directors recommend that a dividend of 1*l* 2s 6d per share, clear of income tax, be paid, which will absorb 21,734*l* 8s 9d, leaving a balance of 3,394*l* 14s 11d to be carried forward to the credit of the next half-year's account. The branch bank at Bingley was opened on May 1, and is proceeding satisfactorily. Bala

sheet, June 30, 1871 :—Liabilities—Capital stock, 386,440*l*; less calls in arrear, 50*l*; leaving, 386,390*l*; reserved fund, 125,000*l*; deposits, credit balances, &c., 901,943*l* 17s 11d; unpaid dividends, 61*l* 18s 9d; rebate on bills, 4,296*l* 6s 4d; profit and loss—balance from last half-year, 2,371*l* 13s 7d; profit this half-year, 23,114*l* 14s 9d; together, 25,486*l* 8s 4d; less income tax, 357*l* 4s 8d, leaving 25,129*l* 3s 8d—total, 1,442,821*l* 6s 8d. Assets—Bills of exchange, 769,466*l* 12s 1d; cash in bank and at call, 134,645*l* 15s 2d; loans on stock and other securities, 54,211*l* 11s 6d; investments, 16,700*l*; advances on current accounts, 447,536*l* 0s 7d; stamps on hand, 261*l* 7s 4d; bank premises and furniture, 20,000*l*—total, 1,442,821*l* 6s 8d.

BRITISH LINEN COMPANY BANK.

The annexed annual report to the court of proprietors is dated June 19, 1871 :—

The directors have to submit to the proprietors the statement of the affairs of the bank for the year ending April 15, 1871 :—The reserved fund or rest, as per last report, was 346,219*l* 11s 6d; and the balance of profit and loss account for the past year, after providing for bad and doubtful debts, is 137,432*l* 1s 11d; together, 483,651*l* 13s 5d; of this sum there was applied in payment of half-year's dividend at Christmas last 55,000*l*; and the directors now recommend that there be applied—1st, in payment of half-year's dividend on June 26, at the rate of 11 per cent. per annum, free of deduction for income tax, 55,000*l*; 2nd, in payment on June 26, of special dividend or bonus out of the profits of the year, of 2 per cent., free of income tax, 20,000*l*; 3rd, in reduction of cost of bank offices, 5,000*l*; these amount to 135,000*l*; and leave a free balance in rest account of 348,651*l* 13s 5d.

CALEDONIAN BANKING COMPANY.

At the thirty-second annual general meeting of shareholders, held at Inverness, August 7, 1871, the following report of the directors was presented :—

The directors have the pleasure of submitting herewith an abstract statement of the bank's accounts, as at June 30 last. The balance of profit and loss account for the year ending June 30, 1871, after providing for bad and doubtful debts, and income tax, is 18,070*l* 9s 9d, and, including 3,050*l* 10s 1d brought from last year's account, amounts to 21,120*l* 19s 10d, which the directors propose to appropriate as follows :—15,000*l* in payment of a dividend at the rate of 12 per cent., free of income tax, being 6,250*l*, or 5 per cent., paid to account of dividend in February last, and 8,750*l*, or 7 per cent., which the directors recommend should be paid on August 14 ; 2,000*l* for addition to the surplus fund, increasing it to 54,000*l*; 1,000*l* annual instalment in reduction of the cost of the bank's houses; 3,120*l* 19s 10d balance to be carried to next year's account. The directors will continue to make the half-yearly payment in February of 5 per cent. to account of dividend, as formerly arranged. The amount at debit of the bank's house property has been increased by the payments for the new banking premises at Kingussie. Balance sheet at June 30, 1871 :—Liabilities—Paid-up capital, 125,000*l*; circulation, 111,568*l*; deposit accounts, interest, receipts, &c., 768,252*l* 6s 2d; surplus fund, 52,000*l*; balance of profit and loss account brought forward from June 30, 1870, 3,050*l* 10s 1d; net profits for year ending June 30, 1871, 18,070*l* 9s 9d—total, 1,077,941*l* 6s. Assets — Bills discounted, credit and other accounts, 720,730*l* 14s 3d; bank's houses and furniture at head office and branches, 24,917*l* 18s 10d; Government and other securities and investments, 200,857*l* 0s 6d; specie, notes of other banks, and balances due by banking correspondents, 131,435*l* 12s 5d—total, 1,077,941*l* 6s. Profit and loss account at June 30, 1871 :—Half-yearly payment, in February last, to account of dividend, at 5 per cent., 6,250*l*; half-yearly dividend, payable on August 14, at 7 per cent., making together a dividend of 12 per cent. for the year, 8,750*l*; bank's houses, being transfer to this account of 1,000*l* (reducing the cost of buildings to 23,917*l* 18s 10d) ; for addition to the surplus fund (increasing it to 54,000*l*), 2,000*l*; balance to be carried to next year's account, 3,120*l* 19s 10d—total, 21,120*l* 19s 10d. Balance of this account brought down, 21,120*l* 19s 10d.

CARLISLE CITY AND DISTRICT BANKING COMPANY.

The following is dated Carlisle, July 28, 1871: —

The directors have declared a dividend of 1*l* 5s per share for the half-year ending June 30 last, being equal to 20 per cent. per annum. The profits for the half-year, after payment of all expenses, amount to 8,599*l* 16s 4d, being at the rate of 21*l* 9s 1d per cent. per annum. Annexed is an abstract of the balance sheet for the half-year ending June 30, 1871 :—Liabilities—Capital stock, 80,162*l* 10s; deposits, balances of accounts, and notes in circulation, 401,027*l* 12s 2d; guarantee fund, 71,009*l* 10s; auxiliary fund, 9,282*l* 7s 3d; net profits for the half-year, 8,599*l* 16s 4d; balance of profit and loss, from December 31, 1870, 421*l* 1s 10d—total, 570,502*l* 17s 7d. Assets—Bank premises at Carlisle, Cockermouth, and Workington, 4,986*l* 13s 5d; cash and bills in the bank, advances on securities, &c., 565,516*l* 4s 2d—total, 570,502*l* 17s 7d. Profit and loss and auxiliary fund :—Dr. Dividend to June 30, 1871, 8,016*l* 5s; auxiliary fund, 9,282*l* 7s 3d; surplus profits, carried to next account, 1,004*l* 13s 2d—total, 18,303*l* 5s 5d. Cr. Auxiliary fund, from last statement, 9,260*l* 7s 9d; profit and loss, from ditto, 421*l* 1s 10d; net profits, June 30, 1871, 8,599*l* 16s 4d ; transfer fees, &c., 21*l* 19s 6d—total, 18,303*l* 5s 5d.

CARLISLE AND CUMBERLAND BANK.

Annexed is a statement of accounts for the half-year ending June 30, 1871 :—

Liabilities—Capital stock paid up, 51,925*l*; circulation, deposits, and other liabilities, 479,378*l* 10s 4d; reserve surplus fund, 30,000*l*; contingent fund, 14,175*l* 9s 1d ; net profits for the half-year, 6,854*l* 0s 9d—total, 582,333*l* 0s 2d. Assets—Cash and bills in the bank and other available securities, 572,333*l* 0s 2d ; real property at Carlisle, Appleby, Penrith, and Keswick, 10,000*l*—total, 582,333*l* 0s 2d.

CENTRAL BANK OF LONDON.

The fifteenth ordinary general meeting of the shareholders was held at the London Tavern, Bishopsgate street, July 20, when the following report and accounts were taken as read :—

The directors submit the result of the operations of the bank for the half-year ending June 30, 1871. The accounts show a gross profit, including the sum brought forward from last half-year, of 15,226*l* 5s 9d, and deducting from this the charges at head office and branches, directors' remuneration for the past half-year, and interest to customers, and writing off an adequate sum from the amount expended on bank premises, there remains a balance of 7,144*l* 16s 11d. The directors have, out of this balance, applied the sum of 2,000*l* in part payment of the 4,000*l* voted to them by the shareholders, and they now recommend that a dividend at the rate of 6*l* per cent. per annum, free of income tax, be declared for the past half-year, that the sum of 500*l* be added to the reserve fund, and that the surplus, amounting to 1,644*l* 16s 11d (including rebate), be carried forward to profit and loss new account. The directors think it right to add that they have agreed to postpone the payment to themselves of the remaining 2,000*l* until after the shareholders shall have received a dividend of 6*l* per cent. per annum, instead of 5*l* per cent., as mentioned in the resolution. General balance sheet, June 30, 1871 :—Capital and liabilities — Capital—authorised, 1,000,000*l*; issued in 20,000 shares of 10*l* each, 200,000*l*; amount paid up, viz., 5*l* per share on 20,000 shares, 100,000*l*; amount due on current and deposit accounts, 572,082*l* 5s 10d ; reserve fund, 5,000*l*; rebate of interest on current bills, 804*l* 13s 1d; profit and loss account—net profit as per statement, 6,340*l* 3s 10d—total, 684,227*l* 2s 9d. Assets—Cash at Bank of England, in hand, and at call, 172,714*l* 10s 5d ; bills discounted, loans, &c., 379,972*l* 3s 5d ; bank premises, fittings, and furniture, 36,045*l* 7s 7d ; investments at cost (market value at June 30, 1871, 24,175*l* 9s 10d), 95,495*l* 1s 4d—total, 684,227*l* 2s 9d. Profit and loss account :—General charges at head office and branches, including directors' fees for the past half-year, 5,628*l* 0s 1d ; amount written off bank premises account for depreciation of leasehold premises, furniture, &c., 708*l* 3s 9d ; interest paid and due on current and deposit accounts, 1,745 *l*5s; rebate of interest on current bills, 804*l* 13s 1d; balance, being net profit to June 30, 1871, 6,340*l* 3s 10d—total, 15,226*l* 5s 9d.

Balance at Dec. 31, 1870, 4,157*l* 1s 5d; deduct amount of fourteenth dividend paid, at the rate of 5 per cent. per annum, 2,500*l*; leaving 1,657*l* 1s 5d; balance of profit for the half-year ending June 30, 1871, after providing for estimated loss by bad and doubtful debts, 13,569*l* 4s 4d—total, 15,226*l* 5s 9d.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

The following circular to the shareholders is dated Oct. 11, 1871:—

The directors being unable on the present occasion to convene a general meeting for the purpose of declaring a dividend, it is considered desirable, as the accounts of the bank are only published annually, to lay before the shareholders a statement of the progress made during the six months ended June 30 last. After bringing the operations to a point at the above date, the net profits for the half-year amount to 27,012*l* 9s 2d, a result which cannot but be deemed satisfactory, considering the difficulties in the way of profitable business, arising from the low value of money in the East, and the unremunerative state of the exchanges. The balance sheet, made up to December 31 last, exhibited a deficiency of 59,022*l* 9s 11d, which has been reduced by the above-mentioned profits to 32,010*l* 0s 9d. The directors are able to report, after a strict re-valuation, that the provision made for bad and doubtful debts at the close of 1870 is in every respect ample, and they have pleasure in adding that since then no bad debt has been incurred.

CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

The report states that the half-yearly statement of accounts to June 30 last shows a net profit of 43,047*l* 2s 7d. A dividend of 3 per cent. for the above period, free of income tax, amounting to 22,500*l*, is declared, leaving a balance of 20,547*l* 2s 7d carried forward to next account. It is added that—"The continued adverse state of Eastern exchanges during the whole of the half-year has again seriously affected the profitable working of the bank; but under these unfavourable circumstances, it is hoped the result may be considered not unsatisfactory."

CITY BANK, LONDON.

At a general meeting of the shareholders, held at the London Tavern, July 18, 1871, the following report was read and adopted:—

The statements of liabilities and assets and of profit and loss for the half-year ending June 30, presented herewith, show that—after providing for interest on current and deposit accounts and for bad and doubtful debts—the gross profits, including 1,585*l* 14s 8d brought from the previous half-year, amount to 48,370*l* 17s 5d. The directors having made provision for current expense and rebate on discounted bills, not due, declare a dividend at the rate of 8*l* per cent. per annum, free of income tax; add 5,000*l* to the reserved fund, which now amounts to 105,000*l*; and carry forward 1,894*l* 5s 7d to the new account. The directors have to announce that Mr John Woolmore Duncan retired from the joint management of the bank on March 31 last, and that, in recognition of his services, they have granted him a retiring allowance, which they feel sure will have the approval of the shareholders. The sole management of the bank has devolved upon Mr Alfred George Kennedy. The dividend was then declared for the half-year ending June 30 last, at and after the rate of 8*l* per cent. per annum on the paid-up capital, free of income tax.

CITY OF GLASGOW BANK.

Annexed is the thirty-second annual report by the directors to the shareholders, read at the annual meeting, held July 5, 1871:—

The directors have now, in terms of the contract, to submit for the approval of the shareholders the thirty-second annual report on the bank's affairs, along with the usual abstract balance sheet, as at June 7 last. The reserve fund, or undivided profits of the bank, amounted at last annual balance to 260,000*l*; the balance at the credit of profit and loss account, brought forward from last year, amounts to 13,144*l* 1s 4d; less income tax paid on dividend to shareholders, in accordance with the resolution of last annual meeting, 1,305*l*; leaving the sum brought forward, 11,839*l* 1s 4d; the balance at the credit of profit and loss, for the year ending June 7 last, after deducting for bad debts, is 98,706*l* 14s 8d; making a total of 370,545*l* 16s; from which the directors recommend—1st, that a dividend at the rate of 9 per cent. per annum, free of income tax, be declared, payable August 1 and February 1, amounting to 78,300*l*; 2nd, that 10,000*l* be added to the reserve fund, making the amount 270,000*l*; 3rd, that property account be further credited with a sum of 5,000*l*; 4th, that the balance be carried forward at profit and loss account to next year, 17,245*l* 16s. Abstract balance sheet, as at June 7, 1871:—Liabilities—Deposits at the head office and branches, including balances at the credit of banking correspondents, 6,231,763*l* 4s 3d; banknotes in circulation in Scotland and the Isle of Man, 638,127*l*; drafts outstanding, due, or with a currency not exceeding fourteen days, 155,609*l* 16s; drafts accepted by the bank and its London agents on account of home and foreign constituents, 774,812*l* 16s 6d; liabilities to the public, 7,800,312*l* 16s 9d: capital account, 870,000*l*; reserve fund, 260,000*l*; profit and loss, 110,545*l* 16s—liabilities to partners, 1,240,545*l* 16s—total liabilities, 9,040,858*l* 12s 9d. Assets—Bills of exchange, local and country bills, credit accounts, and other advances upon security, 6,346,939*l* 13s 8d; advances on heritable property, and value of bank buildings and furniture, 209,037*l* 0s 1d; cash on hand—viz., gold and silver coin and notes of other banks at head office and branches, 889,012*l* 5s 9d; Government stocks, Exchequer bills, railway and other stocks and debentures, and balances in hands of banking correspondents, 1,595,869*l* 13s 3d—total assets, 9,040,858*l* 12s 9d.

COLONIAL BANK.

The sixty-seventh half-yearly general meeting of the proprietors was held at the London tavern, Bishopsgate street, July 6, when the following report of the directors was read:—

In pursuance of the provisions of the charter, the directors submit to the proprietors the following statement of the debts and assets of the corporation on December 31, 1870, which also exhibits the net profit made during the half-year then ending:—Debts—Circulation, 335,893*l* 19s 2d; deposits, bills payable, and other liabilities, 2,541,150*l* 2s 11d; paid-up capital, 500,000*l*; reserve fund, 153,000*l*; balance of profit from last half-year, 1,832*l* 12s 5d; net profit for the half-year, 46,648*l* 0s 3d—total, 3,578,524*l* 14s 9d. Assets—Specie, 208,018*l* 10s 4d; due to the bank in the colonies on bills discounted and purchased (including those past due), &c., 1,664,230*l* 11s 1d; due to the bank in the colonies on current accounts, 24,295*l* 15s 9d; due to the bank in London on bills remitted, cash at bankers, &c., 1,673,801*l* 19s 6d; bank premises and furniture in London and in the colonies, 8,177*l* 18s 1d—total, 3,578,524*l* 14s 9d. The directors have pleasure in presenting the above statement to the proprietors, and in adding that they expect the result of the half-year which ended on the 30th ult. will be equally satisfactory. It will be observed that in the above statement, the paid-up capital is entered as 500,000*l*, which arises from its having been made up to December 31, 1870, whilst the resolution increasing the paid-up capital to 600,000*l*, by applying 100,000*l* of the reserve fund, was only passed on January 5, 1871. The directors now recommend that out of the net profit stated above, which, after providing for all bad and doubtful debts and income tax, amounts to 46,648*l* 0s 3d, an ordinary dividend be made of 6 per cent., being at the rate of 12 per cent. per annum, and an extraordinary dividend of 2 per cent. on the paid-up capital of the corporation for the half-year ending December 31, 1870, which will together require 40,000*l*, leaving 6,648*l* 0s 3d; to which add amount brought from last half-year, 1,832*l* 12s 5d, making 8,480*l* 12s 8d; from this amount the directors propose to carry to the reserved fund 6,000*l*, which, after the above transfer, will stand at 59,000*l*, and the balance of 2,480*l* 12s 8d forwarded to next half-year.

COMMERCIAL BANKING COMPANY OF SYDNEY.

The annexed 46th report was presented to the shareholders at a general meeting, held at the Banking House, July 21, 1871:—

The directors have to report that, after deducting rebate on current bills, paying note tax, and making provision for bad and doubtful debts, the profits for the half-year amount to 43,949*l* 10s 6d, the undivided balance from last half-year 4,633*l* 12s; together, 48,583*l* 2s 6d, which the directors appropriate thus:—Dividend for the half-year at the rate of 15 per cent. per annum, 30,000*l*; bonus of 5s per share, 4,000*l*; reserve fund, 10,000*l*; undivided balance, 4,583*l* 2s 6d.

CONSOLIDATED BANK, LIMITED.

At the half-yearly meeting, held July 14, 1871, the following report was received and adopted:—

The directors in submitting to the shareholders the accounts and balance sheet for the half-year ending June 30, 1871, regret to have to observe that since the last meeting the bank has sustained an exceptional loss. This loss having been entirely written off in the present accounts, the net amount of profit available for dividend has thereby been reduced. The accounts show that after payment of all expenses, and making provision for bad and doubtful debts, there remains a net profit for the half-year of 18,122*l* 1s 8d, to which has to be added the balance from December 31, 1870, of 5,537*l* 18s 3d, making a total available for distribution of 23,659*l* 19s 11d; this sum the directors propose to appropriate as follows:—To the payment of a dividend at the rate of 5 per cent per annum, 20,000*l*; to carry forward to the next account, 3,659*l* 19s 11d; the reserved surplus fund has been increased by the addition of interest, and stands at 55,825*l*.

CUMBERLAND UNION BANKING COMPANY, LIMITED.

The annexed statement of accounts is dated June 30, 1871:—

Capital paid up, 225,000*l*; reserve or guarantee fund, 65,000*l*; deposits on receipt and current account balances, 1,200,914*l* 0s 5d; notes in circulation, 32,615*l*; balance of profit and loss account, 15,260*l* 4s 1d—total, 1,547,789*l* 5s 1d. Cash on hand at head office and branches, 102,055*l* 19s 1d; ditto at call, and on security at short notice, 318,838*l* 1s 5d; bills of exchange, customers' and sundry balances, 1,025,151*l* 3s 11d; investment of reserve fund in Consols and other investments, 65,094*l* 15s; bank property at Carlisle and branches, 36,176*l* 6s 5d; bills and other stamps on hand, 472*l* 19s 3d—1,547,789*l* 5s 1d. Profit and loss account for the half-year ending June 30, 1871:—Expenses at head office and branches, 5,436*l* 11s 7d; interest on deposits and credit balances, and rebate on bills, 10,323*l* 11s 10d; directors' remuneration for the half-year, 262*l* 10s; balance, 15,260*l* 4s 8d—total, 31,282*l* 18s 1d. Balance brought forward from December 31, 1870, 15,106*l* 15s 5d; less dividend declared February 6, 1871, 13,500*l*; balance, 1,606*l* 15s 5d; less income tax for the year, 409*l* 4s 6d; leaving 1,197*l* 10s 11d; gross income at head office and branches during the half-year, after making provision for bad and doubtful debts, 30,085*l* 7s 2d—total, 31,282*l* 18s 1d.

ENGLISH BANK OF RIO DE JANEIRO.

At the annual meeting of the shareholders, held May 31, at the offices, St Helen's place, Bishopsgate, the following report of the directors was presented:—

The directors have much pleasure in submitting to the shareholders the annexed statement, showing the assets and liabilities of the bank, and the profit and loss account for the financial year ended February 28 last. The gross profits for the year, after making ample provision for bad and doubtful debts, amount to 89,353*l* 17s 10d, from which have to be deducted rebate of interest on current bills and drafts, and all charges at the head office and at the branches in Rio de Janeiro, Pernambuco, and Santos, leaving as net profit 62,190*l* 10s 3d, including a balance of 4,534*l* 12s 10d brought forward from the previous year. A dividend on account, of 8s per share, amounting to 20,000*l*, was paid in December last, and it is now recommended to divide the sum of 30,000*l*, or 12s per share, on June 9, making the dividend for the year 20s per share, or 10 per cent. on the paid-up capital of the bank, free of income tax. After providing for the dividend on account already paid, and for the payment of the dividend now recommended, there will remain a balance of 12,190*l* 10s 3d to the credit of profit and loss account, which the directors recommend to be carried forward. A considerable further advance in exchange having taken place in Brazil during the year, and there being now a well-founded prospect of somewhat greater stability in the currency of that country, the directors consider themselves justified in recommending to the shareholders that 60,000*l* of the 120,505*l* 9s 7d, standing at credit of depreciation of capital account, be carried to reserve fund; to effect which a resolution will be submitted to the meeting. Liabilities and assets, Feb. 28, 1871:—Dr. Capital—authorised of of 50,000 shares of 20*l* each, with power to increase, 1,000,000*l*; paid up 10*l* per share, 500,000*l*; liabilities—amount due on current and deposit accounts, 921,276*l* 8s 11d; bills payable, other liabilities, and credit balances, 1,850,935*l* 11s 1d; depreciation of capital—amount reserved as per statement of Feb. 28, 1869, 120,505*l* 9s 7d; rebate of interest on current bills and drafts, 5,207*l* 2s 8d; profit and loss account, as per statement below, 42,190*l* 10s 3d—total, 3,440,115*l* 2s 6d. Liabilities on bills negotiated, 32,378*l* 16s 7d. Cr. Cash at bankers and on hand, 603,882*l* 4s 7d; bills receivable in hand and deposited with the company's bankers, 2,045,542*l* 5s 1d; other assets and debit balances, 790,690*l* 12s 10d—total, 3,440,115*l* 2s 6d. Profit and loss account:—Dr. Amount of dividend of 8s per share, declared by the ordinary meeting held on May 25, 1870, 20,000*l*; balance carried down, 4,534*l* 12s 10d—total, 24,534*l* 12s 10d. General charges at head office and branches at Rio de Janeiro, Pernambuco, and Santos, including directors' remuneration, 26,490*l* 17s 9d; amount paid as dividend on account for the half-year ended August 31, 1870, 20,000*l*; rebate of interest on current bills and drafts, 5,207*l* 2s 8d; balance carried down, 42,190*l* 10s 3d—total, 93,888*l* 10s 8d. Cr. Balance on February 28, 1870, 24,534*l* 12s 10d. Balance brought down, 4,534*l* 12s 10d; gross profits in London, Rio de Janeiro, Pernambuco, and Santos, after allowing for interest on deposits, bad debts, &c., 89,353*l* 17s 10d—total, 93,888*l* 10s 8d. Balance brought down, 42,190*l* 10s 3d.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

At the thirty-sixth ordinary meeting, held July 31, at the offices, in Cornhill, the following report was presented:—

The statement of accounts which the directors have to present shows a balance at the credit of profit and loss of 29,782*l* 2s 2d, after providing for current expenses, and for all debts reported as bad or doubtful within the half-year by the colonial managers. The proprietors will observe that the business of the bank has improved during the last six months, the deposits, circulation, and profits all exhibiting a satisfactory increase.

Referring to the losses anticipated on the realisation of the station securities held at the branches, as communicated in the last report, the directors have now the satisfaction of announcing that the ascertained deficiency is only 27,226*l* 9s 10d, which they propose to meet by transferring 20,000*l* from the reserve fund, and 7,226*l* 9s 10d from the above-mentioned balance. The reserve fund will then stand at 20,000*l*, and there will remain available for distribution the sum of 22,555*l* 12s 4d, which the directors recommend should be appropriated as follows, viz:—To the payment of a dividend at the rate of 7 per cent. per annum, free of income tax, on 600,000*l*, the paid-up capital of the bank, 21,000*l*; to the reduction of bank premises and furniture accounts, 1,000*l*; leaving 555*l* 12s 4d to be brought into the current half-year. The directors have pleasure in expressing their confident belief that the depression which has so long weighed upon the Australian colonies has now passed away, and that they have now entered upon a period of prosperity. The prospects of the chief industries are highly encouraging. Wool has advanced very materially in price; in South Australia there has been a most abundant wheat harvest, and copper mining shows symptoms of a return to its former activity. In Victoria there are indications of an increased yield of gold; and in New South Wales rich and extensive goldfields are being discovered. Liabilities—Paid-up capital, 600,000*l*; deposits, 815,916*l* 5s; bills payable and other liabilities, 202,420*l* 3s 6d; circulation, 102,175*l*; reserved fund, 40,000*l*; balance of profit from last half-year, 3,425*l* 8s 1d; amount carried to profit and loss account, 41,756*l* 8s 9d—total liabilities, 1,805,763*l* 5s 4d. Assets—Bills receivable (including the estimated value of those overdue), loans on securities, cash at bankers, &c., 1,529,644*l* 3s 3d; specie and bullion, 217,633*l* 13s 4d; bank premises and furniture, 86,347*l* 2s 6d; less written off, 27,861*l* 13s 9d; leaving 58,485*l* 8s 9d—total assets, 1,805,763*l* 5s 4d. Profit and loss account—Current expenses in Adelaide, Melbourne, Sydney, and sub-branches, 12,450*l* 16s 1d; ditto in London, including directors' remuneration and income tax, 2,948*l* 18s 7d; together, 15,399*l* 14s 8d; balance, 29,782*l* 2s 2d—total, 45,181*l* 16s 10d. Balance from last half-year, 3,425*l* 8s 1d; amount brought down, 41,756*l* 8s 9d—total, 45,181*l* 16s 10d.

EXCHANGE AND DISCOUNT BANK, LIMITED.

The following is an abstract of the report of the directors, dated Leeds, June 30, 1871:—

In submitting the tenth report to the shareholders, your directors recommend that a dividend at the rate of 7½ per cent. per annum, free of income tax, be declared for the past half-year, and that the balance, 1,438*l* 18s, together with 6 per cent. interest, 255*l* 19s 10d, together amounting to 1,694*l* 17s 10d, be added to the reserve fund, thereby increasing it to 10,227*l* 15s 3d. A douceur of 10 per cent. upon their salaries has been given to the clerks. On June 30, 1871, after payment of the dividend, 7½ per cent., the reserve fund amounted to 10,227*l* 15s 3d. General balance, June 30, 1871:—Dr. Bills and cash in hand and at call, and country cheques in transit, 94,108*l* 11s 2d; current accounts, 35,526*l* 3s 10d; rents (bank chambers) due June 30, 118*l* 15s; bank furniture, 293*l* 15s 9d; trade expenses, salaries, &c., 1,226*l* 1s 1d; rates and taxes, 7*l* 8s 8d; rebate on bills discounted not yet due, 486*l* 9s 3d; bank premises and chambers, 9,000*l*; purchase of business—J. J. Cousins' shares, 16,666*l* 13s 4d; H. Allen's shares, 8,333*l* 6s 8d; interest paid, 2,415*l* 15s 10d; commission paid London and Westminster Bank, Irish and Scotch banks, &c., 362*l* 10s 5d; duty on drafts, 54*l* 5s—total, 168,599*l* 16s. Cr. Paid on shares, 50,000*l*; deposit accounts, 18,680*l* 1s 1d; current accounts, 42,744*l* 0s 9d; customers' deposited bills left for discount, 6,991*l* 8s 2d; reserve fund (balance from December 31, 1870, 8,532*l* 17s 5d; 6 months' interest to date at 6 per cent., 255*l* 19s 10d), 8,788*l* 17s 3d; bills and cheques left for collection, &c., 698*l* 17s; balance of undue interest, 460*l* 6s 7d; drafts in circulation, 32,352*l* 1s; rents, 220*l* 10s; transfer fees, 2*l*; rebate on drafts, 26*l* 2s 8d; interest received, 5,590*l* 17s 8d; commission received, 2,044*l* 13s 10d—total, 168,599*l* 16s. Bills of exchange account:—Dr. Bills under discount and deposited with the bank for discount, 213,847*l* 19s 8d. Cr. Bills rediscounted, 132,710*l* 14s 5d; bills not rediscounted, 81,137*l* 5s 3d—total, 213,847*l* 19s 8d. Profit and loss account:—Dr. Trade expenses, salaries, postage, &c., 1,226*l* 1s 1d; rates and taxes, 7*l* 8s 8d; bad debts, 99*l* 11s 6d; rebate on undue bills, 486*l* 9s 3d; interest paid, 2,415*l* 15s 10d; commission paid London and Westminster Bank, and Irish and Scotch banks, 362*l* 10s 5d; draft duty, 54*l* 5s; balance down, 3,313*l* 18s—total, 7,965*l* 19s 9d. Cr. Rents, 220*l* 10s; transfer fees, 2*l*; rebate on undue drafts, 26*l* 2s 8d; interest received, 5,590*l* 17s 8d; commission received, 2,044*l* 13s 10d; sundry items, 81*l* 15s 7d—total, 7,965*l* 19s 9d. Dr. Dividend at 7½ per cent., 1,875*l*; balance to reserve fund, 1,438*l* 18s—total, 3,313*l* 18s. Cr. Balance, being net profit for the half-year, 3,313*l* 18s. Reserve fund:—Dr. Balance carried down, 10,227*l* 15s 3d. Cr. Balance, December 31, 1870, 8,532*l* 17s 5d; 6 months' interest thereon, at 6 per cent., to June 30, 1871, 255*l* 18s 10d; balance (profit and loss), June 30, 1871, 1,438*l* 18s—total, 10,227*l* 15s 3d.

GLAMORGANSHIRE BANKING COMPANY.

At the half-yearly meeting of the proprietors, held at Neath, August 3, 1871, the following report was presented and read, and also summaries of the liabilities and assets of the company as they stood on June 30, 1871:—

The directors and managers submit to the proprietors summaries of the liabilities and assets of the bank as they stood on June 30, 1871. And they have to report that, after making provision for bad and doubtful debts, they are enabled to recommend that a dividend out of the profits at the rate of 10 per cent. per annum, free from income tax, be declared upon the paid-up capital of 180,000*l*, that the guarantee fund be increased to 72,000*l*, and that the sum of 847*l* 3s 10d be carried forward to next half-year. The directors beg to report that since the last meeting the Upper Forest Tin-plate Works have been disposed of for the sum of 20,000*l*.

HALIFAX COMMERCIAL BANKING COMPANY, LIMITED.

At the thirty-fifth annual general meeting of proprietors, held at Halifax, August 4, 1871, the following report was submitted to the shareholders:—

The directors have much pleasure in submitting to the shareholders the balance sheet for the year ending June 30 last. The past year has again witnessed an extremely low value of money; but latterly there has arisen an increased commercial activity in in the district, compensating in some measure by larger returns for otherwise smaller profits. The net profit for the year, after providing for bad and doubtful debts and rebate on bills, &c., is 16,017*l* 0s 6d; this sum, with the deduction of the interim dividend paid in January last, leaves an available balance of 10,517*l* 0s 6d, which amount the directors propose should be appropriated as follows:—A dividend of 10 per cent. per annum, 5,000*l*; a bonus of 8s per share, 4,000*l*; interest at 5 per cent. on 20,000*l* paid on new shares, 500*l*; amount to credit of contingent fund, 1,017*l* 0s 6d—10,517*l* 0s 6d. The subjoined is a statement of the liabilities and assets as certified by the auditor:—Liabilities—Dr. Capital stock, 100,000*l*; reserved fund, 50,000*l*; first and second call of 5*l* per share on 2,000 new shares, 20,000*l*; deposit receipts and credit balances, 226,391*l* 9s 8d; rebate on bills and interest on deposits, 1,957*l* 2s 6d; note account, 15,000*l*; shareholders' dividend account, 33*l* 10s; balance of profit and loss account, 16,017*l* 0s 6d; less dividend in January, 5,500*l*—10,517*l* 0s 6d—total, 423,899*l* 2s 8d. Assets—Cr. Bills of exchange, 220,945*l* 19s; advanced on current account and in banker's hands, 182,980*l* 7s 3d; bank premises account, 4,000*l*; stamps on hand, 230*l* 10s 5d; cash on hand, 15,742*l* 6s—total, 423,899*l* 2s 8d.

HALIFAX AND HUDDERSFIELD UNION BANK.

The annual meeting of the above bank was held on July 26, at the offices, in George street, when a report of the proceedings of last year was submitted by the directors to a large and influential meeting of shareholders. The profits for the year, including the balance of 2,719*l* 16s 3d brought forward, amount to 38,666*l* 19s 3d, out of which a dividend was declared of 15 per cent., and a bonus of 5s per share, equal to 17½ for the year, leaving 3,666*l* 19s 3d to be carried forward to next account. The report of the directors was considered highly satisfactory to the proprietors, and ordered to be printed and distributed amongst the shareholders. At a special meeting, held immediately after the annual meeting, the directors proposed a resolution, which was unanimously carried, to increase the paid-up capital of the company to 250,000*l*, by the issue of 5,000 new shares, 4,000 of which to be distributed amongst the present proprietors at a premium of 15*l* per share, and 1,000 shares to be held by the directors for distribution from time to time, in such manner as they may deem best calculated to promote the interests of the bank. It was further resolved that the premium to be obtained on the new shares be added to the reserve surplus fund, which will then amount to upwards of 175,000*l*.

HALIFAX JOINT STOCK BANK.

The directors have declared an interim dividend and bonus of 15s per share (free from income tax), being 7½ per cent. for the half-year ending June 30, 1871.

HAMPSHIRE BANKING COMPANY.

At the thirty-seventh annual general meeting, held August 2, 1871, the following report of the directors was presented to the shareholders:—

The directors beg to submit to the shareholders the accompanying statement of the assets and liabilities of the company, and of profit and loss for the year ending June 30, which, from the exceptional condition of affairs as affected by the continental war and the limited demand for, and low value of, money, will be considered satisfactory. The business of the bank shows continued progress, 522 new accounts having been opened during the past

year, with a commensurate increase in the amount of deposits. After payment of the current expenses, interest on deposits, and deducting rebate on bills discounted not yet due, there remains a balance of profit for appropriation amounting to 18,322*l* 15s 4d. In arriving at this result, the directors have carried out their usual practice of carefully valuing the assets of the company, and, where necessary, of writing them down to their saleable value. They have also made provision for every account upon which loss has been sustained, or which needs a fund to meet any probable contingencies. It is proposed to apply the above amount of profit as follows:—2,625*l* to payment of half-year's annuities; 8,250*l* to payment of dividend at the rate of 11 per cent. per annum; 3,000*l* in payment of a bonus of 4s per share; and 4,447*l* 15s 4d to guarantee fund. The following statement is to June 30, 1871:—Dr. Amount of paid-up capital, 150,000*l*; amount of guarantee fund at June 30, 1871, 52,320*l* 11s 8d; amount due on deposit and current accounts, and on drafts issued, 1,434,523*l* 16s 8d; interest due on deposits, 11,357*l* 2s 2d; rebate of interest on bills not due, 1,274*l* 1s 9d; amount of net profit, 28,447*l* 15s 4d—total, 1,677,923*l* 7s 7d. Cr. Government stocks, guaranteed India railway debentures and other securities, 218,709*l* 13s 2d; bills discounted, loans, and advances on current accounts, 1,218,451*l* 1s 1d; freehold banking premises at the head office and branches, with furniture and fittings, 26,302*l* 12s 2d; dividends and annuities paid Feb. 1, 1871, 10,125*l*; cash in hand and at call, 204,335*l* 1s 2d—total, 1,677,923*l* 7s 7d. Account of profit for the year ended June 30, 1871:—General expenditure of the company at head office and branches, including allowance to directors and income tax, 24,311*l* 1s 1d; rebate of interest on bills discounted but not yet due, 1,274*l* 1s 9d; half-yearly payment due February 1, 1871, on annuities granted to shareholders, 2,625*l*; half-yearly payment, due August 1, 1871, on annuities granted to shareholders, 2,625*l*; half-yearly dividend, at 10 per cent. per annum, Dec. 31, 1870, 7,500*l*; half-yearly dividend, at 11 per cent. per annum, to June 30, 1871, 8,250*l*; bonus of 4s per share, 3,000*l*; balance to guarantee fund, 4,444*l* 15s 4d—total, 54,032*l* 18s 2d. Amount of gross profit, 54,032*l* 18s 2d. Guarantee fund:—Amount as per last account, June 30, 1870, 52,320*l* 11s 8d; balance of profit, 4,447*l* 15s 4d—total, 56,768*l* 7s. 50,000*l* of this fund is invested in Consols and 3 per Cent. stock.

HONG KONG AND SHANGHAI BANKING CORPORATION.

The following twelfth report of the directors was presented to the shareholders at the ordinary half-yearly general meeting, held at Hongkong, August 14, 1871:—

The directors have now to submit to you a general statement of the affairs of the corporation, and balance sheet for the half-year ending on June 30 last. The net profits for that period, including $22,554.33 brought forward from last account, after paying all charges and deducting interest paid and due, and making full provision for all bad and doubtful debts, amount to $388,401.39, of which, after deducting rebate on bills not yet due, and remuneration to directors, there remains for appropriation $371,331.04. From this sum, the directors recommend the distribution of a dividend of $7.50 per share on the paid-up shares, and of $4.50 per share on the new shares, being equivalent to six per cent. for the half-year; this will absorb $240,000, and of the balance, the directors propose carrying $100,000 to the reserve fund (thus raising it to $900,000) and $31,331.04 to the credit of new profit and loss account. The directors are glad to state that the amount set aside at the end of last half-year proved amply sufficient for purposes contemplated, and that they are now quite satisfied with the position of the bank's securities. The directors consider that the result of the past half-year's working is very satisfactory, and congratulate the shareholders on the continued prosperity of the corporation. The fourth call of $25 per share on the new shares, due on July 1, has been promptly met on 19,417 shares out of 20,000; the balance outstanding is due mostly on shares held by proprietors absent from the colony, from whom the necessary remittances are shortly expected to come in.

IMPERIAL OTTOMAN BANK.

At the eighth annual general meeting of shareholders, held at the Cannon Street Terminus Hotel, June 21, 1871, the following report was presented:—

The general committee have the honour to lay before the shareholders their eighth annual report. The accounts, made up to December 31, 1870, show a gross profit of 425,905*l* 9s 7d. After deducting all expenses, and making full provision for bad and doubtful debts, and adding the 9,400*l* 18s 6d brought forward from the previous year, a sum of 239,170*l* 9s 10d remains available for distribution, in accordance with the statutes. The great increase in the difference between the gross and net profits of the year 1870, compared with that of 1869, is to be explained by the necessity for writing off a large amount for bad debts incurred by the sudden collapse of credit in the East, and the consequent ruin of many houses whose standing had hitherto justified the facilities accorded to them. In addition to which it should be stated that the securities held by the bank were, following the usual practice, valued at the quotations of the end of the year 1870, and consequently at a period of exceptional depression. After deducting from the sum of 239,170*l* 9s 10d above mentioned the statutory addition to the reserve fund and interest on same (raising that fund to 209,095*l* 7s 4d) and the percentages in accordance with the statutes, there remain 205,639*l* 5s 7d, of which 101,250*l* was distributed by way of interim dividend in January last. The committee now recommend a further payment of 10s per share, making, with the previous distribution, a dividend of 10 per cent. for the year 1870, and leaving a balance of 3,139*l* 5s 7d to be carried forward to the current year. Annexed is a statement of the liabilities and assets at Dec. 31, 1870:—Liabilities—Capital, 4,050,000*l*; reserve fund and interest on same, 186,118*l* 8s 3d; bank notes in circulation, 62,300*l* 18s 2d; bills payable, 484,009*l* 10s 10d; current and drawing accounts of the Government, 391,675*l* 10s 4d; ditto of sundries, 3,341,471*l* 4s 5d; deposit for fixed terms, 163,497*l* 7s 4d; profit and loss (including 9,400*l* 18s 6d balance from last account), 239,170*l* 9s 10d—total, 8,918,243*l* 9s 2d. Assets—Capital not called up, 2,025,000*l*; cash in hand at Constantinople,

464,923*l* 16s 8d; ditto at the branches, 384,528*l* 3s 8d; bills receivable and other securities, 2,471,586*l* 0s 3d; current and drawing accounts of the Government, 1,534,179*l* 19s 9d; ditto of sundries, 1,122,764*l* 12s 6d; advances on public securities and merchandise, 884,443*l* 16s 7d; bank premises and furniture, 30,816*l* 19s 9d—total, 8,918,243*l* 9s 2d. Profit and loss account, 1870:—Distribution of 10s per share, made on January 1, 1871, at the rate of 5 per cent. per annum, in accordance with the statutes, 101,250*l*; 10 per cent. on profits, transferred to the reserve fund, 22,976*l* 19s 1d; one-twentieth of the balance provided by the statutes to be appropriated to the founders of the bank, 5,277*l* 2s 7d; ditto to the administrators of the bank, 5,277*l* 2s 7d; proposed dividend payable on July 1 of 10s per share, 101,250*l*; balance account carried forward 3,139*l* 5s 7d—239,170*l* 9s 10d. Balance from last account, 9,400*l* 18s 6d; net profits for the year ending December 31, 1870, 229,769*l* 11s 4d—total, 239,170*l* 9s 10d.

ISLE OF MAN BANKING COMPANY, LIMITED.

The twelfth half-yearly meeting was held on July 17, at Douglas, when the following report and balance sheet were taken as read:—

In submitting their twelfth half-yearly report, the directors have much pleasure in referring the shareholders to the annexed balance sheet and statement of profit and loss as on June 30 last (with the auditors' report thereon), from which it will be seen that the net profits for the half-year, after deducting current expenses and making provision for bad and doubtful debts, amount to 2,734*l* 12s. This sum, added to 2,175*l* 6s 6d, the unappropriated balance from the preceding half-year, makes a total of 4,909*l* 18s 6d, which amount the directors propose to apply as follows, viz:—1,200*l* in payment of a dividend of 10 per cent. per annum on the paid-up capital; 12*l* 10s to account of bank premises, fixtures, &c.; and 1,067*l* 6s (being one-half the amount of profit exceeding 5 per cent. per annum) to the reserve fund, making the amount at credit of that account, 7,425*l* 2s 4d, thus leaving a balance of 2,630*l* 2s 6d to be carried to the profit and loss account for the current half-year. Annexed is the balance sheet to June 30:—Liabilities—Capital, 150,000*l* in 15,000 shares of 10*l* each, 12,000 of which have been issued, on which 2*l* per share have been received, 24,000*l*; amount of deposits, 201,800*l* 3s 9d; amount of notes in circulation, 23,488*l*; rebate of interest on bills current, 401*l* 7s 4d; dividends unpaid, 5*l* 14s 2d; reserved fund, 6,357*l* 16s 4d; profit and loss, being net profit as per annexed statement, 4,909*l* 18s 6d—total, 260.963*l* 0s 1d. Assets—Cash in hand and at bankers, 23,563*l* 18s 5d; bills discounted and advances on current accounts, 149,956*l* 15s 8d; securities, including security for issue of notes, 86,942*l* 11s 9d; bank premises, fixtures, &c., 499*l* 14s 3d—total, 260,963*l* 0s 1d. Profit and loss:—Dr. Total amount of interest paid and owing by bank on deposits at head office and branches, and for rebate of interest on bills current, &c., 4,942*l* 5s 2d; total amount of commission paid by bank, including banker's commission for payment of drafts, &c., 93*l* 13s; current expenses for half-year at head office and branches, including salaries, directors' fees, rents, postages, stationery, &c., and for allowance for bad and doubtful debts, 1,137*l* 2s 11d; balance (being net profit for half-year) carried down, 2,734*l* 12s—total, 8,907*l* 13s 1d. Cr. Total amount of interest received by and owing to bank on sundries at head office and branches, 7,797*l* 1s 8d; total amount of commission, &c., received by and owing to bank on sundries at head office and branches, 1,110*l* 11s 5d—total, 8,907*l* 13s 1d. Balance from last half-year, 2,175*l* 6s 6d; balance brought down, 2,734*l* 12s.

LEEDS AND COUNTY BANK, LIMITED.

At the general meeting of shareholders, held at Leeds, August 2, 1871, the following seventeenth half-yearly report was presented by the directors:—

The directors, in submitting to the shareholders the balance sheet for the past half-year, have to report that the profits for the half-year ending June 30, 1871, are 13,084*l* 13s 10d; out of which the directors propose to declare a dividend for the past half-year of 15s per share (free of income tax), being at the rate of 6 per cent. per annum on the shares issued, numbering 1 to 9,200 inclusive, which will absorb, 6,900*l*, rebate of interest on bills not due, 1,000*l*; together 7,900*l*; leaving a balance of 5,184*l* 13s 10d, of which the directors propose to carry 3,000*l* to reserve fund, and the balance to the contingent fund. The profits for the past half-year, notwithstanding the continued low rate of interest, show a satisfactory increase over those of the corresponding period last year. Liabilities—Shareholders for paid-up capital on 9,200 shares of 25*l* per share, 230,000*l*; reserve surplus fund, 7,000*l*; contingent fund, 1,671*l* 10s 5d; depositors on receipts and credit accounts, 665,099*l* 2s 9d; interest due on deposits, 2,308*l* 0s 2d; unpaid dividends, 7*l* 10s; profit and loss account, 13,084*l* 13s 10d—total, 919,170*l* 17s 2d. Assets—Bills of exchange and cash on hand, 389,543*l* 5s 9d; loans and current account balances, 509,502*l* 12s 8d; freehold and leasehold bank premises, and furniture at head office and branches, 19,633*l* 12s 5d; stamps on hand, 491*l* 6s 4d—total, 919,170*l* 17s 2d.

LLOYD'S BANKING COMPANY.

At the twelfth ordinary general meeting of this bank, held on August 10, at the Exchange Rooms, Birmingham, the following report and statement of accounts were taken as read:—

Your directors present herewith a statement of assets and liabilities of the company on June 30 last. The available balance of profit and loss for the past half-year (including the amount brought forward from the previous half-year), after payment of all charges and expenses, carrying forward the amount necessary for the rebate of bills, and making full provision for bad debts and contingencies, is 29,470*l* 10s 8d. Your directors recommend that out of this sum 22,842*l* be appropriated to the payment of a dividend at the rate of 15*l* per cent. per annum; that 5,000*l* be added to the reserve fund, which will then stand at 90,000*l*, and that the balance, being 1,628*l* 10s 8d, be carried forward to the credit of profit and loss for the next half-year. The business of the bank during the half-year shows nothing that requires comment from your directors. The great abundance of money in the money market, and the low rates which have consequently ruled, have not been favourable to large banking profits. The new bank premises in Ann street were opened on July 1. They afford greatly improved accommodation for the working of the business, and the situation is found convenient by the customers of the bank. The dividend will be payable on and after Aug. 14, free of income tax.

LIABILITIES AND ASSETS—June 30.

LIVERPOOL COMMERCIAL BANKING COMPANY, LIMITED.

The following statement is dated August 1, 1871:—

The liability of the shareholders is limited. The capital of the company is one million, divided into fifty thousand shares of twenty pounds each. The number of shares issued is thirty-five thousand. Calls to the amount of ten pounds per share have been made, under which the sum of three hundred and fifty thousand pounds has been received. The liabilities of the company on July 31:—Deposits not bearing interest, 6,702*l* 2s 10d; deposits bearing interest, 746,182*l* 1s 11d; seven-day and other bills, 38,044*l* 16s 6d—total, 790 929*l* 1s 3d. In addition to the above, the bank is under liability on bills rediscounted, 100,667*l* 8s 9d, and foreign bills sold, 8,790*l* 7s 11d. The assets of the company on that day were—Bills of exchange on hand, 726,776*l* 17s 2d; cash on hand and at bankers, 45,923*l* 18s 5d; together, 772,700*l* 15s 7d; loans, 418,428*l* 1s 11d; bank premises and other freehold property, 150,000*l*; other securities, exclusive of unpaid calls on shares, 674*l* 1s 3d—total, 1,341,802*l* 18s 9d. Assets as above stated, 1,341,802*l* 18s 9d; liabilities ditto—deduct, 790,929*l* 1s 3d; leaving 550,873*l* 17s 6d. Capital paid up, 350,000*l*; reserve fund, 200,000*l*; profit and loss balance, 873*l* 17s 6d—total, 550,873*l* 17s 6d.

LONDON BANK OF MEXICO AND SOUTH AMERICA, LIMITED.

At the ordinary general meeting, held at the company's offices, London, September 19, 1871, the following report was presented to the shareholders:—

The directors, in submitting to the shareholders the accompanying audited balance sheet and profit and loss account, for the half-year ending June 30 last, have the satisfaction to report that, after paying charges, deducting rebate, and making provision for bad and doubtful debts, there remains an available balance of 22,126*l* 11s 4d, including 2,434*l* 0s 10d brought forward from last half-year. The directors recommend that the above sum of 22,126*l* 11s 4d be appropriated as follows:—Dividend for the half-year at the rate of 9 per cent. per annum, being 18s per share, free of income tax, 16,210*l* 16s; reserve fund, 3,000*l* (thereby making it 20,000*l*); leaving a balance of 2,915*l* 15s 4d to be carried forward to the next half-year, subject to reduction by the payment of income tax.

LONDON AND BRAZILIAN BANK, LIMITED.

At an extraordinary meeting of the shareholders, held Oct. 16, at the Cannon Street Hotel, for the purpose of passing certain resolutions relative to the reconstitution or modification of the company, the chairman, Mr John White Cater, said that as this meeting was called for a special purpose, he need not detain them with any lengthened remarks. The shareholders were aware that it had been the uniform desire of the directors to put this bank upon the best possible footing. No doubt it had been somewhat of a trial to the directors to have to move any alteration in the articles of association, but they felt that it was to the interests of the shareholders; and, therefore, however unpleasant it might be to them, they felt it right to state what they had stated before, that it would be for the good of the bank, and for the good of the shareholders, that the reconstruction, in some shape or the other, should be carried out. Two propositions had been made, and it had been a question which should be adopted. One would require the carrying out of the whole process of dissolving the present bank, and paying all the dues abroad, and getting the sanction of the parties in Brazil; hence the directors recommend to the shareholders the reduction of the capital in place of a reconstitution by the sale to a new bank. There were some gentlemen who had dissented from both propositions; therefore, the conduct of the directors must depend upon the future course which those dissentients might take. In the meantime, it was most gratifying to the directors to find that their recommendation had been so upheld, and so sanctioned by the general body of shareholders. Although the notice had been sent out only ten days, nearly four-fifths had signified their approval by actually signing the papers and returning them to the directors. Beyond this, he ought to mention that all of those who had not sent in their assent could not be looked upon as dissentients, inasmuch as many gentlemen were away from home, and he hoped that before the next meeting was called the number of assents would be still further increased. In conclusion, the chairman moved the adoption of the following resolutions:—1. That the 18th and 19th articles of the bank's articles of association be and the same are hereby repealed. 2. That the following articles, numbered 18 to 19B (both inclusive), be added to the bank's articles of association, and be, as they are hereby declared to be, part of the regulations thereof, subject, nevertheless, to be added to, altered, or repealed by special resolutions to be passed in accordance with the Companies' Acts, 1862 and 1867, and any Act amending or explaining the same, as general meetings may from time to time think fit; and that the same be read after article 17 of the present articles. Article 18. The company may, from time to time, by the resolution of a general meeting, consolidate and divide the capital, or any part thereof, into shares of larger amount than its then existing shares, or convert all or any part of its paid-up shares into stock. Article 19. The company may, from time to time, by special resolution, reduce its capital. The board may, at any time after any such resolution being passed, apply to the proper court, and do all other things necessary or expedient to obtain the confirmation thereof. Article 19A. The company may, from time to time, by special resolution, divide its capital, or any part thereof, by subdivision of its shares, or any of them, into shares of smaller amount than is fixed by the memorandum of association, provided that in the subdivision of the shares the proportion between the amount which is paid and the amount (if any) which is unpaid on each share of reduced amount, shall be the same as it was in the case of the existing share, from which the share of reduced amount shall be derived. Article 19B. The directors may, on behalf of the company, enter into agreements with all or any of the shareholders of the company for all or any of the following purposes, and all such agreements already made are hereby confirmed. (*a*) Cancelling such part as shall be agreed on with each such shareholder respectively of the amount paid upon his shares, the said cancellation to be upon such terms and conditions as shall be agreed with him. (*b*) Consenting that in the event of the company or any liquidators thereof selling its business and property to another company, upon the terms of receiving in compensation or part compensation for such sale shares in such other company, the shareholders with whom such agreement is made, shall accept his proportion of such shares in satisfaction of his interest in the company, and releasing or agreeing to release, absolutely or conditionally, the rights created in favour of dissentient shareholders by the 161st section of the Companies' Act, 1862. (*c*) Consenting and agreeing to such other things as the directors shall consider expedient for carrying into effect the reduction of nominal or paid-up capital, or the reconstruction of the company. (*d*) Consenting that any transfer to be made of his shares by any such shareholder shall be expressed to be subject to the agreements made by him under this article. 3. That in pursuance of Article 178 of the Articles of Association, and of all other powers enabling to this effect, the company shall, if and when the directors think fit, be reconstituted and modified, by selling and transferring the whole of its business, property, and assets to a new bank to be incorporated for that purpose (of which all or any of the directors of this bank may be directors) for the sum of 480,000*l*, payable by instalments at such time or times as the directors shall think fit, and upon the condition that the said new bank shall bear, pay, and discharge the expenses of the company of and incident to such sale and transfer, and all the liabilities of the company, except its liability to its shareholders for paid-up capital, and upon such other terms and conditions as the directors shall think fit; and that the directors be and are hereby authorised and empowered to make such sale and transfer accordingly, and to do on behalf of the company all things necessary or expedient for carrying the same into full effect; and that for the purpose of such transfer the company shall be dissolved, upon a special resolution being, after such transfer, passed for that purpose. 4. That the preceding resolutions shall not limit or restrain any powers which the directors now have under the articles of association of the bank. Mr Edward Johnson seconded the resolution, which, after some discussion, was carried without a dissentient.

LONDON CHARTERED BANK OF AUSTRALIA.

At the nineteenth ordinary general meeting of the proprietors, held at the City Terminus Hotel, Cannon street, June 2, 1871, the following report of the directors was presented to the shareholders:—

The present being the period appointed for the usual annual meeting of the company, in conformity with the terms of the Royal Charter of incorporation and deed of settlement, the directors now submit to the proprietors their nineteenth yearly report, together with the accounts duly audited, showing the position of the bank's affairs up to December 31, 1870. The calamitous war which has prevailed on the continent, having seriously disturbed the course of trade as well as finance in all parts of the world, could not be without its effects on business in the colonies. The proprietors will accordingly be prepared to learn that the profits of the bank, if compared with those of the previous year, show some slight diminution. Although commerce in Australia has to some extent suffered from the war, it is gratifying to the directors to be able to report that the chief industry of the country, namely its pastoral interest, has not been prejudiced by the same cause. The wool market has been characterised by firmness, while the success which has attended the recent introduction of meat-preserving has insured to the settlers a continued sale for their surplus stock, and under these cheering influences, the flock owners of Australia, after the severe trials they have passed through, appear now again about to enjoy a revival of their former prosperity. On the other hand, the directors have to state that the past year has not been favourable to the numerous class of individuals and large capital embarked in gold mining operations. Owing to adverse seasons, and also in consequence of the prevalence of undue speculation, gold mining in Victoria may be said to have suffered a severe check, and the result is exemplified in the diminution of its annual gold yield. The latest dates received from Melbourne extend to March 27 last, and the directors have pleasure in informing the shareholders that in his letters, the inspector and general manager, Mr Brett, speaks in favourable terms of the prospects and position of the bank. The accounts appended to this report are made up to December 31 last, from which it appears that, after the usual deductions, and also after making allowance for bad and doubtful debts, there remains at the credit of profit and loss the sum of 48,376*l* 2s 10d, out of which the directors recommend that a dividend be declared for the half-year at the rate of

8 per cent. per annum, free of income tax, which will amount to 40,000*l*, leaving to be carried to next account a balance of 8,376*l* 2s 10d.

LONDON AND COUNTY BANKING COMPANY.

At the half-yearly general meeting of the proprietors, held August 8, 1871, at the City Terminus Hotel, Cannon Street Station, the following report for the half-year ending June 30, 1871, was read by the secretary:—

The directors in presenting to the proprietors the balance sheet of the bank for the half-year ending June 30 last, have the satisfaction to report that after paying interest to customers and all charges, allowing for rebate, and making provision for bad and doubtful debts, the net profits amount to 90,100*l* 16s 8d. This sum, added to 4,349*l* 0s 8d brought forward from the last account, produces a total of 94,449*l* 17s 4d. They have declared the usual dividend of 6 per cent., with a bonus of 3 per cent., for the half-year, free of income tax, being at the rate of 18 per cent. per annum, which will absorb 90,000*l*, and leave 4,449*l* 17s 4d to be carried forward to profit and loss new account.

LONDON JOINT STOCK BANK.

The following is the sixty-eighth report:—

The directors have much pleasure in submitting to the shareholders the annexed statement of the liabilities and assets of the bank and of the profit and loss account for the half-year ending June 30 last, by which it will be seen that after providing for rebate of interest on bills discounted, not yet due, and crediting the guarantee fund with the usual interest, a net profit has been realised of 134,772*l* 6s 9d. Of this amount the directors have appropriated the sum of 120,000*l* for payment of the usual dividend at the rate of 12½ per cent. per annum on 1,200,000*l*, the present paid-up capital of the bank, with a bonus of 11s 3d per share, together 30s per share, leaving a balance of 14,772*l* 6s 9d to be carried forward to profit and loss new account. The guarantee fund with the accrued interest now stands at 441,058*l* 5s 8d.

LONDON AND PROVINCIAL BANK, LIMITED.

At the ordinary general meeting of the shareholders, held at the London Tavern, Bishopsgate street, August 9, the following report of the directors and statement of accounts (copies of which had been previously sent to the proprietors) were taken as read:—

The directors in submitting to the shareholders the following statement of accounts and balance sheet to June 30, 1871, have the pleasure to report that the re-construction of the bank has been attended with complete success, and has operated favourably on the business of the bank, as will be seen by the increase in the amount of current and deposit accounts. The directors also beg to direct attention to the item Consols, and other Government stocks, 115,184*l* 18s 11d, which has been increased nearly 50 per cent. during the last half-year. They consider that this increase is calculated to largely inspire confidence in depositors and customers generally. The gross profits for the half-year, after making provision for bad and doubtful debts, and including the amount brought forward from last account, are 18,949*l* 9s 1d, and after deducting all current expenses, income tax, directors' remuneration, and interest to customers, there remains a balance of 6,639*l* 18s 2d. The directors recommend that this amount be appropriated in the following manner, viz.:—3,796*l* 17s 6d to the payment of a dividend at the rate of 7½ per cent. per annum for the half-year, free of income tax; 864*l* 18s 10d to rebate on bills; and 2,028*l* 1s 10d carried forward. It will be observed that the directors could have recommended a larger dividend, but they think that the permanent interests of the bank will be better served by not dividing the profits too closely. And they would remind the shareholders that the benefit of such a policy would be felt in the future. Representations having been made to the directors of the want of banking facilities in the large and increasing metropolitan suburb of Lewisham, they have, after due investigation, opened a branch there. No nominations have been received in reply to the directors' circular of July 15. Balance sheet for the half-year ending June 30:—Dr. Capital, 101,250*l*; amount due by the bank on current, deposit, and other accounts, 503,076*l* 17s 7d; balance of last profit and loss account, 1,946*l* 8s 8d; less part expenses of reconstruction, 616*l* 12s 6d—1,329*l* 16s 2d; gross profit for half-year, after making provision for bad and doubtful debts, 17,619*l* 12s 11d—total, 623,276*l* 6s 8d. Cr. Cash at head office and branches, and deposited on call or short notice, and cheques, &c., in transitu, 97,885*l* 7s 5d; Consols and other Government stocks, 115,184*l* 18s 11d; amount due from customers on current accounts, bills of exchange, promissory notes, &c., 375,943*l* 8s; freehold and leasehold premises at head office and branches, also bank furniture and fittings at head office and branches, 22,003*l* 1s 5d; current expenses, including income tax, salaries, rent, &c., at head office and branches, and directors' remuneration, 9,476*l* 1s 2d; interest paid on current and deposit accounts, &c., 2,783*l* 9s 9d—total, 623,276*l* 6s 8d. Profit and loss account—Dr. Current expenses, as above, 9,476*l* 1s 2d; interest paid, 2,783*l* 9s 9d; dividend, 3,796*l* 17s 6d; rebate on bills not due carried to new account, 864*l* 18s 10d; balance carried forward, 2,028*l* 1s 10d—total, 18,949*l* 9s 1d. Cr. Gross profit, as above, 18,949*l* 9s 1d.

LONDON AND SOUTH-WESTERN BANK.

The sixteenth ordinary general meeting of the shareholders in this bank was held at the Cannon Street Station Hotel, on August 8, when the following report and statement of accounts (copies of which had been previously circulated among the proprietors) were taken as read:—

The directors have the pleasure to submit to the proprietors their report for the half-year ending June 30, 1871. It will be seen by the following statement of accounts, that the gross profits for the half-year, after making provision for bad and doubtful debts, and including balance brought forward from the last account, amounted to 19,610*l* 14s 3d, and after deducting charges for expenses, interest paid, &c., there remains a net dis-

posable balance of 6,749*l* 6s. The directors recommend the payment of a dividend at the rate of 8s per share, free of income tax, which will leave a balance of 3,242*l* 18s (including 679*l* 1s 5d for rebate on bills not matured) to be carried forward to profit and loss new account. Annexed is the balance sheet:—Dr. Capital paid up, 175,320*l*; reserve fund, 3,500*l*; amount due by the bank on current, deposit, and other accounts, 574,614*l* 2s 11d; liabilities on acceptances, 29,756*l* 9s 6d; balance of profit and loss brought from last account, 2,074*l* 5s 3d; gross profits for the half-year, 17,545*l* 9s—total, 802,810*l* 6s 8d. Cr. Cash in hand and at call, 99,081*l* 8s 7d; bills discounted, loans, and temporary advances to customers, 667,058*l* 9s 10d; bank premises—freehold and leasehold—furniture and fixtures, 23,800*l*; current expenses—head office and branches, 9,692*l* 0s 3d; interest paid on current and deposit accounts, &c., 3,178*l* 8s—total, 802,810*l* 6s 8d. Profit and loss account:—Current expenses as above, 9,692*l* 0s 3d; interest paid, 3,178*l* 8s; dividend at the rate of 8s per share, 3,506*l* 8s; carried forward to profit and loss new account:—Rebate on bills not due, 679*l* 1s 5d; balance of unappropriated profit, 2,563*l* 16s 7d — total, 19,619*l* 14s 3d. Balance brought from last account, 2,074*l* 5s 3d; gross profits for the half-year, 17,545*l* 9s—total, 19,619*l* 14s 3d.

LONDON AND WESTMINSTER BANK.

At a special general meeting of the proprietors, held July 19, the secretary read the following report and balance sheet:—

The directors have to report that—after making provision for all bad and doubtful debts, paying the income tax, setting apart 2,000*l* towards the buildings of the bank—the net profits for the last half-year amount to 184,830*l* 0s 10d. This sum, added to 1,630*l* 5s 4d, the unappropriated balance of the preceding half-year, will amount to 186,460*l* 6s 2d. The directors now declare a dividend to the shareholders at the rate of 6 per cent. per annum, and by way of further dividend out of the profits, a bonus of 6 per cent. upon the paid-up capital of 2,000,000*l*. After these payments are made, there will remain 6,460*l* 6s 2d, which the directors have carried to profit and loss account for the current half-year.

MANCHESTER AND COUNTY BANK, LIMITED.

The following report of the directors was presented to the shareholders at the half-yearly ordinary general meeting, held July 21, 1871:—

The directors have pleasure in presenting to the shareholders the annexed statement of accounts for the half-year ending June 30, 1871, on reference to which it will be seen that, including the balance of 3,166*l* 17s 10d brought forward from the previous half-year, there is now a net profit of 48,418*l* 16s 5d to be appropriated. Of this amount the directors propose to add 10,500*l* to the reserve fund, which will thus be raised to 220,500*l*, to write 3,000*l* off bank property account, to pay a dividend at the rate of 10 per cent. per annum (absorbing, with provision for income tax, 31,157*l* 7s), and to carry forward 3,761*l* 9s 5d to the profit and loss account of the present half-year. Balance sheet, June 30, 1871:—Dr. Capital, being 15*l* per share on 40,000 shares, 600,000*l*; reserve fund, 210,000*l*; lodgments on current and deposit accounts, &c., 2,929,524*l* 15s 7d; balance of profit and loss account from December 31, 1870, 3,166*l* 17s 10d; gross profit for the half-year (as below), after making provision for bad and doubtful debts, 71,199*l* 10s 4d; together, 74,366*l* 8s 2d; less expenses, 12,346*l* 14s 3d; leaving 62,019*l* 13s 11d—total, 3,801,544*l* 9s 6d. Cr. Bills of exchange, loans, credits, cash on hand, and with bankers, &c., 3,769,036*l* 3s 6d; bank property, 32,508*l* 6s—total, 3,801,544*l* 9s 6d. Profit and loss account, December 31, 1870, to June 30, 1871:—Expenses at head office and branches, directors' and auditors' remuneration, 12,346*l* 14s 3d; dividend of 15s per share and provision for income tax, 31,157*l* 7s; reserve fund, 10,500*l*; bank property account, 3,000*l*; balance carried forward, 3,761*l* 9s 5d—total, 60,765*l* 10s 8d. Balance, December 31, 1870, 3,166*l* 17s 10d; gross profit (as above) after making provision for bad and doubtful debts, 71,199*l* 10s 4d; less rebate of bills on hand, 13,600*l* 17s 6d; leaving 57,598*l* 12s 10d—total, 60,765*l* 10s 8d.

MERCANTILE BANK OF SYDNEY.

The following report was presented at the general meeting, held at the Banking House, Sydney, and agreed to on July 26:—

The directors have now the pleasure of laying before the shareholders the annual balance sheet, showing the position of the bank on June 30 last, and the result of its operations during the year which then closed. The profits for the year, after deducting rebate on current bills, and accrued interest on deposits, amount to 17,106*l* 14s 3d; which, with an undivided balance from last account of 3,624*l* 3s 2d, gives for distribution the sum of 20,730*l* 17s 5d: this amount the directors have appropriated as follows—in payment of the total cost of management for the year in Sydney and at London agency, 1,935*l* 2s 6d; in payment of gratuities of 10 per cent. on the salaries of the officers and clerks, 107*l* 4s 2d; in payment of dividend for the year at the rate of 10 per cent. per annum, 12,000*l*; in payment of bonus of 2½ per cent. on the capital (making with the dividend now declared a distribution of 12½ per cent. per annum), 3,000*l*; leaving an undivided balance of 3,688*l* 10s 9d. Balance sheet, June 30:—Dr. Capital paid up, 120,000*l*; fixed deposits and other liabilities, 143,480*l* 12s 7d; profit and loss—amount at credit, 20,730*l* 17s 5d—total, 284,211*l* 10s. Cr. Cash in hand, and at bankers at call, and New South Wales Government securities, 41,270*l* 6s 10d; bills discounted, securities for advances, and other assets, 240,171*l* 8s 8d; office furniture, 834*l* 12s; management expenses for one year in Sydney and at London agency, including salaries, rent, stationery, &c., 1,935*l* 2s 6d—total, 284,211*l* 10s. Profit and loss:—Dr. Total cost of management for one year in Sydney and at London agency, including salaries, rent, stationery, &c., &c., 1,935*l* 2s 6d; gratuity of 10 per cent. on the salaries of the officers and clerks for the past year, 107*l* 4s 2d; dividend paid to the shareholders, at the rate of 10 per cent. per annum for the year ending 30th June, 1871, 12,000*l*; bonus to shareholders, at the rate of 2½ per cent., for the past year on the paid-up capital, 3,000*l*; undivided surplus carried to next account, 3,688*l* 10s 9d—total, 20,730*l* 17s 5d. Cr. Balance brought forward from 30th June, 1870, 3,624*l* 3s 2d; profit for the year ending 30th June, 1871, after deducting rebate on current bills, and accrued interest on deposits, 17,106*l* 14s 3d—total, 20,730*l* 17s 5d.

METROPOLITAN BANK.

The eighth ordinary general meeting of this company was held at the London Tavern, July 20, when the following report was presented:—

The directors have pleasure in presenting to the proprietors a statement of the accounts for the half-year ending June 30 last. After payment of all charges, including interest paid to customers, making provision for bad and doubtful debts and rebate, the net profits realised by the bank during the past six months, including the balance of 2,331*l* 2s 2d brought forward from last account, amount to 7,270*l* 4s 2d. The directors recommend that a dividend at the rate of 5 per cent. per annum (free of income tax) be declared, leaving 2,270*l* 4s 2d to be carried to the credit of profit and loss new account, exclusive of rebate, 1,339*l* 10s 8d. Balance sheet, June 30, 1871:—Liabilities—Dr. Proprietors' capital, 200,000*l*; reserve fund, 15,000*l*; current, deposit, and other accounts, and loans on securities, per contra, 589,992*l* 1s; acceptances and bills negotiated, 102,190*l* 12s 9d; rebate on bills discounted, not yet due, 1,339*l* 10s 8d; balance of profit and loss, 7,270*l* 4s 2d—total, 915,792*l* 8s 7d. Assets—Cr. Cash in hand at Bank of England and at call, 127,871*l* 19s 4d; East India debentures, and City bonds, 40,609*l* 12s 9d; bills discounted, loans, current, and other accounts, 626,240*l* 7s 3d; stamps, 634*l* 3s 1d; bank premises (head office and branches), 18,245*l* 13s 5d; securities against acceptances and bills negotiated, per contra, 102,190*l* 12s 9d—total, 915,792*l* 8s 7d. Profit and loss account:—Dr. Current expenses (head office and branches) including directors' fees, salaries, and all other expenses, 5,493*l* 5s 4d; proposed dividend at 5 per cent. per annum for the half-year, 5,000*l*; rebate on bills discounted, not yet due, carried to profit and loss account, 1,339*l* 10s 8d; balance of profit and loss carried to new account, 2,270*l* 4s 2d—total, 14,103*l* 0s 2d. Cr. Balance brought forward, December, 1870, after transfer of 5,000*l* to reserve fund, 7,331*l* 2s 2d; less dividend 5 per cent. to December 31, 1870, 5,000*l*; leaving 2,331*l* 2s 2d; balance of gross profits for the half-year, after provision for bad and doubtful debts, and payment of interest, 11,771*l* 18s—total, 14,103*l* 0s 2d.

MIDLAND BANKING COMPANY, LIMITED.

At the annual meeting of the shareholders, held at the Great Northern Hotel, Lincoln, on July 28, the following report was taken as read:—

The directors feel great satisfaction in laying before their fellow shareholders the accompanying balance sheet and statement of profit and loss, showing the result of the company's operations for the half-year ended June 30, 1871; examined and certified as usual by the auditors. The gross profits for the half-year, after making provision for bad and doubtful debts, were 32,864*l* 3s 10d, including balance brought from last account; and after deducting therefrom interest paid or due to customers, and all the current expenses of the bank, there remained a disposable balance of 11,996*l* 6s 6d. The directors propose to declare an ad interim dividend for the half-year, at the rate of 6 per cent. per annum, free of income tax, which will absorb 4,813*l* 10s; and to carry forward to profit and loss new account the whole of the balance of 7,182*l* 16s 6d, which includes the rebate on bills discounted and not due. With so large a balance carried forward, the directors fully expect at the end of this year, besides making a considerable addition to the reserve fund, to be able to declare an increased dividend, in accordance with the anticipations of their last report. Balance sheet, June 30, 1871:—Dr. (Capital subscribed, 804,000*l*.) Capital paid up, 160,450*l*; reserve fund, 10,000*l*; current and deposit accounts and other liabilities, the company having no acceptances current, 1,051,618*l* 2s 2d; profit and loss, balance brought from last account, 1,137*l* 18s 3d; gross profit for the half-year, after making provision for bad and doubtful debts, 31,726*l* 5s 7d; together, 32,864*l* 3s 10d—total, 1,254,932*l* 6s. Cr. Cash on hand, with agents, and at Bank of England, Leeds, 134,428*l* 11s 3d; freehold and copyhold premises, and bank fittings at head office and branches, 16,635*l* 3s 10d; bills and promissory notes discounted and other advances to customers, 1,083,000*l* 13s 7d; current expenses, including all salaries, rents, &c., at head office and branches, agency charges, directors' remuneration, income tax, &c., 10,010*l* 3s 4d; interest paid or accrued on current and deposit accounts, &c., 10,857*l* 14s—total, 1,254,932*l* 6s. Profit and loss account—Dr. Current expenses, as above, 10,010*l* 3s 4d; interest paid or due to customers, 10,857*l* 14s; interim dividend at the rate of 6 per cent. per annum, 4,813*l* 10s; carried forward to profit and loss new account—rebate on bills not due, 2,040*l* 7s 2d; unappropriated profit, 5,142*l* 9s 4d—7,182*l* 16s 6d—total, 32,864*l* 3s 10d. Cr. Unappropriated profit from last account, 1,137*l* 18s 3d; gross profit for the half-year, after making provision for bad and doubtful debts, 31,726*l* 5s 7d—total, 32,864*l* 3s 10d.

MUNSTER BANK, LIMITED.

The following report is for the half-year ending June 30, 1871:—

The directors have to report that the gross profits of the bank for the half-year ending June 30 last are 43,504*l* 2s 5d. After providing for interest on deposit and public accounts, charges, salaries, rebate on bills not at maturity, a balance remains of 14,612*l* 18s 5d, to this is to be added 2,302*l* 10s 5d, undivided profits from last account, making an available total of 16,915*l* 8s 10d. The directors propose to pay a dividend for the half-year at the rate of 8 per cent. per annum, (free of income tax), which with interest on new capital will amount to 10,068*l* 13s 3d, leaving a balance of 6,846*l* 15s 7d to credit of profit and loss to be carried to next account. The annexed table shows the progress of the bank since its opening:—

	Capital.	Deposit and Current Accounts.	Dividend. Per Cent.	Reserve Fund and Undivided Profits.
	£ s	£ s d		£ s d
1865. December 30	86,303 0	250,026 6 7	6	19,965 10 0
1866. December 29	137,941 10	357,033 18 4	6	28,668 4 2
1867. December 28	175,000 0	639,264 19 4	6	32,771 17 1
1868. December 26	175,000 0	846,935 7 8	6	35,649 5 10
1869. December 31	175,000 0	1,010,833 18 4	7	40,320 5 2
1870. December 31	231,862 10	1,330,742 4 0	8	72,302 10 5
1871. June 30	262,491 10	1,456,496 4 6	8	76,816 15 7

Statement of account at June 30, 1871:—Dr. Capital subscribed, 750,000*l*; paid up, 262,491*l* 10s; due on deposit and current accounts, 1,456,496*l* 4s 6d; due on seven-day bills, 14,125*l* 12s 7d; reserve fund, 70,000*l*; balance from former account, 2,302*l* 10s 5d; gross profits for six months ending June 30, 1871, 43,504*l* 2s 5d, total—1,848,919*l* 19s 11d. Cr. Cash on hand and at bankers, 199,408*l* 13s 8d; Government and other convertible securities, and advances on ditto, 72,322*l* 13s 7d; bills discounted and due on current and loan accounts, 1,522,742*l* 13s 7d; bank premises and furniture, 29,054*l* 14s 1d; interest paid and due on deposits, 12,377*l* 4s 11d; charges, salaries, rents, &c., at head office and branches, 13,013*l* 19s 1d—total, 1,848,919*l* 19s 11d. Profit and loss account:—Interest paid on deposit and current accounts, 12,377*l* 4s 11d; charges, salaries, &c., at head office and branches, 13,013*l* 19s 1d; rebate on bills not at maturity, 3,500*l*; dividend at 8 per cent., and interest at 8 per cent. on new issue, 10,068*l* 13s 3d; balance carried forward, 6,846*l* 15s 7d—total, 45,806*l* 12s 10d. Balance from former account, 2,302*l* 10s 5d; gross profits for six months ending June 30, 1871, 43,504*l* 2s 5d—total, 45,806*l* 12s 10d.

NATIONAL BANK.

The half-yearly meeting of the shareholders was held on July 25, at the offices of the bank, College green, Dublin, when the following report was taken as read:—

The directors submit the following statement of accounts and the auditors' report, showing the position of the society at June 30, 1871:—Assets—Gold and silver coin at branches, 1,009,362*l* 11s 6d; cash in hand, at the bank of England, and at call, 537,347*l* 13s 11d; advances on securities, at call, and at short notice, 792,185*l* 7s 2d; Government stock, Exchequer bills, Exchequer bonds, and debentures, 513,227*l* 6s 5d; ditto advances on parliamentary and other deposits, 79,560*l*; Government of Canada and other bonds, 405,146*l* 18s 3d; advances on securities at sundry dates, and current accounts, including balances due by country bankers, 1,786,787*l* 9s 4d; bills discounted, 3,548,745*l* 19s 6d; bankers' guarantees and securities held against acceptances, per contra, 5,790*l* 2s 10d; bank premises in London, Dublin, and branches, freehold and leasehold, 227,667*l* 4s—total assets, 8,905,820*l* 12s 11d. Liabilities—Notes in circulation, 1,423,490*l*; due by the bank on deposits and current accounts, 5,845,916*l* 18s 5d; acceptances to bankers' drafts and on security, 5,790*l* 2s 10d; capital paid up, 1,500,000*l*; reserve fund, 59,092*l* 8s 4d; balance of profit and loss, 71,531*l* 3s 4d—total liabilities, 1,905,820*l* 12s 11d. Profit and loss, June 30, 1871—1870. Dec. Amount transferred to reserve fund, 2,500*l*; 1871. Jan. Half-year's dividend to December 31, 1870, 52,500*l*; total expenditure at the head office and all the branches, including rent, taxes, salaries, &c., 56,993*l* 16s 1d; balance to profit and loss new account, applicable to payment of dividend to June 30, 1871, 71,531*l* 3s 4d—total 183,524*l* 19s 5d. Balance at December 31, 1870, 56,975*l* 1s 4d; gross profits for the half-year ending this day, after payment of interest, income tax, duty on circulation, and providing for all bad and doubtful debts, 137,113*l* 18s 1d; less rebate of interest on bills not due, 10,564*l*; leaving, 126,549*l* 18s 1d—total, 183,524*l* 19s 5d. The profit and loss account of the bank for the past half-year, including 1,975*l* 1s 4d carried over from last account, leaves a balance applicable for dividend of 71,531*l* 3s 4d. The board have therefore declared a dividend at the rate of 8 per cent. per annum, or 24s per share for the half-year, payable, free of income tax, on and after the 1st proximo. The dividend absorbs 60,000*l*, and leaves the sum of 11,531*l* 3s 4d, of which amount 7,500*l* has been carried to reserve, and 4,031*l* 3s 4d to profit and loss new account. The improvement which has taken place in some of the securities held against the lock-up accounts, formerly classed under the head of special advances, warrant the directors, with the full concurrence of your auditors, in at once reducing the large provision made for these advances by the sum of 35,000*l*, which amount being added to the reserve, this fund will stand at 101,592*l* 8s 4d. The directors report with satisfaction the continued increase in the deposit and current accounts, which now amount to 5,845,916*l* 18s 5d. The directors have opened during the past half-year new branches at Cahirciveen, Ennistymon, and Cahir, and established ten additional sub-offices. They have every confidence that this additional accommodation to their friends and customers will increase the connection and revenue of the bank.

NATIONAL BANK OF INDIA, LIMITED.

Annexed is the general balance sheet, as at June 30, 1871:—Liabilities—Dr. Capital, consisting of 37,096 shares of 25*l* each, having 12*l* 10s paid up, 463,000*l*; 12 shares of 500 rs each, having 250 rs paid up, 300*l*; together, 464,000*l*; reserve fund, invested in Government securities, 19,000*l*; amount due on current and fixed deposit accounts, 1,089,823*l*; bills payable, 699,663*l* 10s 5d; sundry accounts, 5,383*l* 11s 5d; profit and loss account, as below, 11,985*l* 8s 9d—total, 2,289,855*l* 10s 7d. Assets—Cr. Cash in hand and at bankers, 91,711*l* 15s 2d; Government securities, 509,075*l* 13s 7d; together, 600,787*l* 8s 9d; house property, furniture, and stamps, 45,527*l* 10s 5d; bills of exchange, 1,273,798*l* 4s 2d; loans on Government paper and other securities, 85,264*l* 12s 1d; cash credits on ditto, 259,369*l* 17s 11d; sundry accounts, 25,107*l* 17s 3d—total, 2,289,855*l* 10s 7d. Profit and loss account for the half-year ending June 30, 1871:—Balance, 11,985*l* 8s 9d. Net profit for the half-year ending June 30, 1871, after defraying all current charges, rebates, and interest paid and due to constituents on current and fixed deposit accounts, 11,985*l* 8s 9d.

NATIONAL BANK OF LIVERPOOL, LIMITED.

The following is the thirteenth report of the directors:—

The directors of the National Bank of Liverpool, Limited, beg to present to the proprietors their thirteenth report for the half-year ending June 30, 1871. The following are the duly audited

accounts of the bank:—Assets—Cash in hand and at bankers, 187,738*l* 7s 5d; due to the bank on bills discounted, loans to customers, &c., 1,083,539*l* 8s 2d; bank premises, 83,586 15s 6d—total assets, 1,354,864*l* 14s 1d. Liabilities—Due by the bank on deposit and current accounts, &c., 813,252*l* 3s 1d; acceptances, 21,960*l* 0s 10d; total liabilities to public, 835,212*l* 3s 11d; capital paid up, 449,415*l*; reserve fund, 55,000*l*; rebate at 2¼ per cent., 2,467*l* 5s 10d; profit and loss, 12,770*l* 1s 4d—total, 1,354,864*l* 11s 1d. Profit and loss account:—Balance from last half-year, 1,344*l* 0s 7d; net profit for half-year ending June 30, 1871, after writing off bad and providing for doubtful debts, 16,013*l* 17s 9d; less rebate at 2¼ per cent. on bills current, 2,462*l* 17s; ditto payment to Mr Hyde, 2,125*l*; leaving 11,426*l* 0s 9d—total, 12,770*l* 1s 4d. The above accounts show a net profit for the half-year of 11,426*l* 0s 9d, to which must be added 1,344*l* 0s 7d, brought forward from last account, making together 12,770*l* 1s 4d available, which the directors have applied as follows:—To an interim dividend of 7s 6d per share, free of income tax, being at the rate of 5 per cent. per annum, 11,250*l*; to profit and loss new account, 1,520*l* 1s 4d. Your directors have further the pleasure to add that the increase of business secured by the arrangement with the Alliance Bank, already advised, has been very satisfactory. In the face of unusually low rates of discount, it has enabled a result to be attained, as shown by the preceding statement of accounts, better than could have been anticipated from the declining amount of the bank's operations during the first four months of this year; and there is reason to expect that the benefits of this arrangement will become more apparent upon the issue of their next report.

NORTH KENT BANK, LIMITED.

Annexed is a statement of accounts for the half-year ending June 30, 1871:—

Liabilities—Subscribed capital, 65,500*l*; capital paid up, 22,230*l*; reserve fund, 1,000*l*; current, deposit, and other accounts, 73,985*l* 3s 11d; net profit, 1,708*l* 9s 6d—total, 98,923*l* 13s 5d. Assets—Bills discounted, loans, &c., 86,465*l* 13s 7d; leaseholds at Blackheath and Greenwich, furniture, &c., 2,700*l*; invested in Russian stock, 2,805*l*; cash in hand and at Barclay, Bevan, Tritton, Twells, and Co., 6,952*l* 19s 10d—total, 98,923*l* 13s 5d. Profit and loss account:—Expenditure, including interest paid to customers on current and deposit accounts, rent, taxes, salaries, and stationery, 1,889*l* 6s 4d; balance, 1,708*l* 9s 6d (which the directors propose to deal with as follows—To dividend at 8 per cent. per annum, 872*l* 4s 10d; reserve fund, 250*l*; write off house account, 100*l*; new profit and loss account, 486*l* 4s 8d)—total, 3,597*l* 15s 10d. Gross profit for the six months, 2,759*l* 15s 9d; balance from last half-year, 838*l* 0s 1d—total, 3,597*l* 15s 10d.

NORTH AND SOUTH WALES BANK.

The following report was presented by the directors to the proprietors at their thirty-fifth annual meeting, held at Liverpool, July 21, 1871:—

The directors have to report the prevalence of a low rate of interest during the last twelve months, the average minimum rate of discount at the Bank of England having been about 2⅞ per cent. The results of the year's operations nevertheless have enabled the directors to make the same distribution in dividend and bonus as in the previous year, viz., 17½ per cent. per annum on the capital. The following is the statement of profit and loss account:—Gross profits of the year, including a balance of 10,254*l* 15s 3d from last account, after deducting interest due to depositors, rebate on bills not due, and making provision for losses, 95,262*l* 4s 1d; deduct total expenditure of twenty-eight establishments, including rent, taxes, salaries, directors' fees, and other expenses, 31,809*l* 7s 5d—leaving, 63,452*l* 16s 8d; less—dividend paid to the proprietors, for the half-year ended December 31, 1870, at the rate of 10 per cent. per annum, 15,000*l*; ditto, June 30, 1871, 15,000*l*; bonus December 31, 1870, 7,500*l*; ditto, June 30, 1871, 15,000*l*; income tax on profits, 807*l* 7s; together, 53,307*l* 7s—leaving a balance to be carried to next account of 10,145*l* 9s 8d. The following were the liabilities and assets of the bank at June 30 last:—Liabilities—Deposits, credit balances, &c., 2,324,275*l* 18s 10d; acceptances and credits of bank current, 80,300*l* 0s 2d; notes in circulation, 57,505*l*; capital paid up, 300,000*l*; reserve fund, 150,000*l*; undivided profits, 10,145*l* 9s 8d—total, 2,922,226*l* 8s 8d. Assets—Bills discounted, advances to customers, loans on securities, &c., 2,015,596*l* 5s 10d; cash in hand and with London agents at short notice and Consols, 906,630*l* 2s 10d—total, 2,922,226*l* 8s 8d. The various branches of the bank have, as usual, been visited by deputations of the directors, the country manager, and the bank's inspector, and the result of their investigations has been throughout very satisfactory. The directors note with pleasure a steady increase in the amount of deposits, and also in the number of the bank shareholders, now 668,—an increase of 80 within the year,—and the directors would again remind the shareholders that, by their individual exertions, they have it in their power greatly to extend the business and profits of the bank.

NORTHERN BANKING COMPANY.

The following report of the directors and committee was submitted to the proprietors at their forty-seventh annual meeting, held September 28, 1871:—

The net profits of the bank for the past year, after the usual allowances, amount to 41,495*l* 10s 11d, to which has to be added the amount carried forward from last year, 3,537*l* 8s; making together, 45,032*l* 18s 11d; out of which the proprietors have been paid dividends in March last, at the rate of 15 per cent. per annum on the old shares, and 7½ per cent. on the new shares, absorbing a sum of 16,875*l*; on the 9th instant like dividends, 16,875*l*; and at same date a bonus of 10 shillings per share on old shares, and 5 shillings per share on new shares, absorbing 3,750*l*; together, 37,500*l*; leaving a balance of 7,532*l* 18s 11d to be carried forward to next account. The directors and committee regret to have to inform the shareholders that the bank will sustain a considerable loss by the fraudulent conduct of the late manager and sub-manager of their Derry branch, which conduct had been connived at and concealed from the directors by some of the other officers at that branch. So far as your directors can at present ascertain, the ultimate loss that will arise to the bank will be about 20,000*l*, which they hope to provide for out of the profits of the next two or three years without interfering with the usual dividend to their shareholders, or reducing the present amount of the reserve fund. As this is the first time since the establishment of the Northern Bank that your directors have been obliged to look to their sureties in in consequence of loss arising from the dishonesty of any of their officers, they have deemed themselves justified in considering it entirely exceptional, and in dealing with it in this way. The paid-up capital of the bank stands at 300,000*l*, and the reserve fund at 191,027*l* 2s 2d. New branches of the bank have been opened in Dungiven, in the County Derry, and in Hillsborough, in the County Down, during the past year.

PARR'S BANKING COMPANY, LIMITED.

At the half-yearly meeting of the directors and shareholders of this company, held July 27, at Warrington, the following report of the directors was read:—

The directors have had before them the audited balance sheet of the company of June 30, 1871, and they beg to report that the profits of the past half-year, after providing amply for all bad and doubtful debts, have been very satisfactory. The amount of the accumulated profits at the close of the half-year was such that the directors felt justified in paying to Messrs Parr and Co. the entire balance of the purchase price due to them, and this was effected on July 1. The directors have therefore decided to defer no longer making the further call of 5*l* per share, which will raise the paid-up capital to 150,000*l*. Formal notice of this call, which will be made payable on Oct. 2, will be sent to each shareholder. Meanwhile, the directors recommend that an interim dividend, after the rate of 8 per cent. per annum, free of income tax, be now declared for the half-year ending June 30, 1871, payable at the bank, or any of its branches, or at the house of Messrs Glyn, Mills, Currie, and Co., London, on and after August 3. After providing for this dividend, the balance of profit is carried to next account. The position and prospects of the business continues in every way satisfactory.

PROVINCIAL BANK OF IRELAND.

At the forty-sixth yearly general meeting, held May 18, 1871, the following report of the directors was presented to the proprietors and adopted:—

In meeting the proprietors on this occasion, the directors have pleasure in stating that the year 1870 was one of prosperity for the agricultural classes in Ireland. The potato crop was probably the best in quality which had been grown there since 1845. Though its acreage was little more than in 1869, the produce was one-fourth greater, and the abundance and good quality of this valuable crop enabled the farmers to reserve their grain for sale and for seed, and thus added materially to their means. The grain crops were also satisfactory. Wheat and oats, as well as barley, were fairly productive, and the quality of each was good. The long-continued dryness of the season, though it enabled the cereal and hay crops to be saved early and in good condition, was, as might be expected, injurious to the pastures and green crops; but the prices of cattle and butter, and of other descriptions of stock and produce, were high, and the results were certainly, on the whole, favourable to the farming classes. Flax was less grown than in 1869, or for several years preceding, but the produce was larger than for some years past, and the quality of the fibre was generally good. The linen trade was, on the whole, in a more healthy condition than in 1869, though the improvement shown in the early part of the

year was checked by the outbreak in July of the lamentable war between France and Germany, which for a long period topped the continental demand. The home trade, and also that with America, were, however, fairly active. The average rate of discount was low. The rate allowed on deposits was of course proportionate, and commercial failures were few, so that the bank's profits were satisfactory, as will be seen by the following statement, to which the attention of the proprietors is now requested:—The account submitted to the yeaaly general meeting in May, 1870, showed the amount of rest, or undivided profits, at March 26, 1870, to be 243,930*l* 1s 8d; out of which there has been paid to the proprietors the amount of two ordinary and extraordinary dividends, as follows:—At Midsummer, 1870—ordinary dividend of 4 per cent., 21,600*l*; extraordinary dividend of 6 per cent., 32,400*l*: at Christmas, 1870—ordinary dividend of 4 per cent., 21,600*l*; extraordinary dividend of 6 per cent., 32,400*l*; together 108,000*l*; leaving a balance of 135,930*l* 1s 8d, to which there has since been added the amount of net profits for the year ending on the 25th, being the last Saturday, of March, 1871, after deducting property tax, and providing for all bad and doubtful debts, 104,421*l* 17s 9d; making the rest or undivided profits at March 25, 1871, 240,351*l* 19s 5d. The profits are less than on some previous occasions, but the satisfactory condition of the rest admits of the continuation of the same rate of dividend as has been paid for several years past, and the directors have therefore the pleasure of announcing their intention to pay, in July, an extraordinary dividend of 30s on each 100*l* share, and 12s on each 10*l* share of the capital stock of the bank, in addition to the ordinary dividend of 4 per cent.; making the amount to be then paid 2*l* 10s on each 100*l* share, and 1*l* on each 10*l* share, for the half-year ending at Midsummer; and they purpose also, as heretofore, to pay the property tax for the proprietors.

ROYAL BANK OF IRELAND.

The following report of the directors was submitted to the proprietors at their thirty-fifth annual meeting, held at Dublin, September 27, 1871:—

The directors feel satisfaction in presenting to the proprietors the accompanying statement of profit and loss for the year ended August 31 last, as it shows that the average rate of the bank's profits has been maintained, notwithstanding a state of monetary affairs during that period extremely unfavourable to the profitable employment of the bank's resources. The net profits of the present year amount to 42,450*l* 4s 10d; to this has been added the balance of 3,682*l* 7s 3d from last year's account, making an available total of 46,132*l* 12s 1d, and after payment of the dividends at the rate of 12 per cent. per annum, which absorbed 36,000*l*, and a transfer of 5,000*l* to the bad and doubtful debt fund, there remains a sum of 5,132*l* 12s 1d to be brought forward to the new profit and loss account. The directors are gratified to be able to report that the accounts of the bank, both at the head office and branches, which have undergone a thorough examination by the managing and other directors, exhibit a continuing progression, both in number and importance. The directors appeal to the shareholders to aid them in increasing the prosperity of the bank, both by keeping their own accounts with it, and by using their individual exertions to introduce new business. They are the more constrained to refer to this subject, as they fear it is a point which the general body of proprietors do not keep in view to the extent which its importance demands. The annexed statement of accounts is to August 31, 1871:—Liabilities—Dr. Proprietors' paid-up capital, 300,000*l*; reserve fund, 190,000*l*; amount due by the bank on current and other accounts, and on deposit receipts, 1,556,675*l* 13s 2d; English and Irish post bills and foreign circular notes, 55,857*l* 17s 3d; balance of profit and loss unappropriated last year, 3,682*l* 7s 3d; net profit for year ending this date 42,450*l* 4s 10d; deduct—February dividend paid to proprietors, 18,000*l*; leaving 24,450*l* 4s 10d—total, 2,130,666*l* 2s 6d. Assets—Cr. Bills discounted on hand, 1,296,222*l* 5s 4d; advances on Government stock and other securities, 458,954*l* 13s 6d; cash and Government stock on hand, and bankers' balances at call, 347,672*l* 19s 3d; bank premises, 27,816*l* 4s 5d—total, 2,130,666*l* 2s 6d. Profit and loss account:—Dr. Amount of interest paid on deposit receipts and current accounts, &c., 24,558*l* 16s 7d; total expenditure, including salaries, rent, taxes, stationery, &c., 18,092*l* 8s 9d; income tax paid, 724*l* 10s 10d; balance, being net profit, as above, 42,450*l* 4s 10d—total, 85,826*l* 1s. Cr. Gross banking income for this year, after providing for rebate on current bills, 85,826*l* 1s. Appropriation:—Dr. Dividend of six per cent. for half-year ended February 28 last, 18,000*l*; ditto for half-year ending this date, 18,000*l*; amount carried to bad and doubtful debt fund, 5,000*l*; balance unappropriated at this date, 5,132*l* 12s 1d—total, 46,132*l* 12s 1d. Cr. Balance brought down, 42,450*l* 4s 10d; unappropriated balance from last year, as above, 3,682*l* 7s 3d—total, 46,132*l* 12s 1d. Reserve fund:—Dr. Present amount, 190,000*l*. Cr. Balance from last year, 190,000*l*.

SHEFFIELD AND HALLAMSHIRE BANK.

At the thirty-fifth general annual meeting of the shareholders, held at Sheffield, July 14, 1871, the following report was read:—

Your directors have pleasure in laying before you their report of the bank's operations for the year ending June 30, 1871. After payment of all the expenses of the bank, reserving rebate on bills not due at five per cent., and making ample provision for bad and doubtful debts, the net profits are 24,366*l* 4s 4d. Out of this sum the following amounts have been paid, viz.: 9,160*l* for dividend, at the rate of ten per cent. per annum, for the half-year ending December 31, 1870, and 356*l* 12s 6d, for income tax, leaving a balance unappropriated of 14,849*l* 11s 10d. Your directors now declare a dividend after the rate of ten per cent. per annum for the half-year ending June 30 last, amounting to 9,160*l*, together with a bonus of 2½ per cent. for the year, amounting to 4,580*l*, and recommend that the remainder, 1,109*l* 11s 10d, be added to the surplus fund. The foregoing summarised as follows:—Income tax, 356*l* 12s 6d; dividend for half-year ending December 31, 1870, already paid, 9,160*l*; dividend for half-year ending June 30, 1871, now declared, 9,160*l*; bonus at two-and-a-half per cent., now declared, 4,580*l*; added to surplus fund, 1,109*l* 11s 10d—total, 24,366*l* 4s 4d. The dividend and bonus now declared may be received, without deduction for income tax, on or after July 18. The surplus fund, on June 30, 1870, was 52,981*l* 4s 3d; added, balance of this year's profits, 1,109*l* 11s 10d—present amount of surplus fund, 54,090*l* 16s 1d. Your capital account stands thus: 7,328 shares, 25*l* per share paid, 183,200*l*; surplus fund, as above, 54,090*l* 16s 1d—making a total working capital of 237,290*l* 16s 1d. General balance, June 30, 1871:—Liabilities—Paid-up capital of 25*l* per share, on 7,328 shares, 183,200*l*; surplus fund, 54,090*l* 16s 1d; due by the bank on current accounts, deposit receipts (including interest to this day), notes in circulation, and interest on bills in the bank, 457,687*l* 3s 8d; dividend for the half-year, after the rate of ten per cent. per annum, on paid-up capital of 183,200*l*, 9,160*l*; bonus of 12s 6d per share on 7,328 shares, being 2½ per cent. per annum on the paid-up capital, 4,580*l*—total, 708,717*l* 19s 9d. Assets—Cash in the banks, bllis dicounted, balances owing by customers, and other securities, 703,717*l* 19s 9d; bank premises and furniture, 5,000*l*—total, 708,717*l* 19s 9d. Profit and loss, June 30, 1871:—Dr. Dividend for the half-year ending December 31, 1870, at the rate of ten per cent. per annum, on 183,200*l* paid-up capital, 9,160*l*; dividend for the half-year ending June 30, 1871, at the same rate, 9,160*l*; bonus of 12s 6d per share on 7,328 shares, being 2½ per cent. per annum on the paid-up capital, 4,580*l*; income tax, 356*l* 12s 6d; balance carried down, 54,090*l* 16s 1d—total, 77,347*l* 8s 7d. Cr. Balance of unappropriated profits, June 30, 1870, 52,981*l* 4s 3d; amount of profits, after payment of expenses, 24,366*l* 4s 4d—total, 77,347*l* 8s 7d. Balance of unappropriated profits brought down, being surplus fund, 54,090*l* 16s 1d.

SHROPSHIRE BANKING COMPANY.

The annexed thirty-fifth annual report is dated July 18, 1871:—

The directors of the Shropshire Banking Company have much pleasure in meeting the proprietors and presenting their annual report. The accounts, which have been duly audited by the directors, show the net profits for the year to be 5,607*l* 11s 3d. The directors now recommend a dividend at the rate of 5 per cent. per annum, and a bonus of 2½ per cent., which together with a dividend of 5 per cent. per annum, paid in February last, will amount to 7½ per cent. per annum, free of income tax. This will absorb 3,375*l*, and will leave to be carried to bad and doubtful debt account the balance of 2,232*l* 11s 3d. Should this recommendation be adopted, the account will then stand as fellows:—Net profits for the year ending June, 1871, 5,607*l* 11s 3d; dividend for the half-year ending December, 1870, 1,125*l*; dividend for the half-year ending June, 1871, 1,125*l*; bonus for the year, 2½ per cent., 1,125*l*; balance to bad and doubtful debt account, 2,232*l* 11s 3d—5,607*l* 11s 3d. Guarantee fund, 15,000*l*.

STAFFORDSHIRE JOINT STOCK BANK, LIMITED.

The annexed report is dated Bilston, July 12, 1871:—

In announcing the usual interim dividend for the half-year, the directors have pleasure in reporting that the net profits have amounted to 10,488*l* 0s 7d, exclusive of a balance of 780*l* 15s 2d and the rebate 2,352*l* brought forward in January; together, 13,620*l* 15s 9d. Out of this sum your directors now declare a dividend of 15s per share. This will require 6,558*l* 15s, leaving a balance of 7,062*l* 0s 9d to be carried forward to the end of the year. The progress of business continues of a satisfactory character.

STOURBRIDGE AND KIDDERMINSTER BANKING COMPANY.

The annual meeting of the shareholders of this bank was held on August 15, at the offices of the company, Stourbridge. The report stated the net profits of the year to be 21,983*l*, of which

was added 1,201*l* brought forward, making a disposable balance of 23,184*l* 0s 8d. A dividend of 10s and a bonus of 2s 6d per share was paid in February last. The directors recommended a dividend of 10s and a bonus of 10s per cent. for the present half-year, being at the rate of 20 per cent. per annum. They further recommended that 5,000*l* be carried to a new guarantee fund, and that the balance of 1,704*l* 11s 2d remaining, after awarding a gratuity of 10 per cent. on their salaries to all the bank officers, be carried forward. The report was adopted, and the dividend therein recommended was declared.

ULSTER BANKING COMPANY.

The following report of the committee was submitted to the proprietors at their thirty-fifth annual general meeting, held September 28, 1871:—

The committee in submitting their report for the year ended August 31 last, congratulate the company upon the statement they are able to lay before them. Notwithstanding the low rates for money which have prevailed during the whole of the past year, the usually half-yearly dividends, at the rate of 12 per cent. per annum, and two bonuses at the rates of 3 per cent. and 5 per cent. respectively—making in all 20 per cent. for the year—have been paid to the shareholders. Provision has also been made out of the year's profits, for the payment of a bonus of 10 per cent. upon their salaries to the officers of the company. The usual sum of 5,000*l* has been added to the reserved fund, thus raising the amount of that fund to 135,000*l*, and there remains a balance of 7,520*l* 1s 9d at the credit of the undivided profits account. The present position of the bank, and its increased business, have led the directors to decide on raising its paid-up capital to the amount originally proposed in the prospectus issued in 1835, namely, 100,000 shares of 10 each, with 25 per cent. of the amount paid up, making the total paid up 250,000*l*. They have, therefore, with the entire concurrence of your committee, determined to allot the unissued shares in the manner which has already been made known to the shareholders, at the price of 7*l* 10s per share; of this sum 2*l* 10s per share will be appropriated to capital, thus placing the shares (from and after August 31, when all the instalments shall have been paid up) upon precisely the same footing as the already existing shares in the bank, and so much of the balance of 5*l* per share will be added to the reserved fund as will make it up to 250,000*l*, and the remainder will be placed to credit of undivided profits. The circulars which have been issued along with the allotment letters will have explained the times and modes of payment of the several instalments, the interest charges on those remaining unpaid, and that allowed on those paid prior to the days fixed for their several payments. The shareholders are also aware that on application to the directors a temporary accommodation will be afforded to such as may require it, to enable them to meet the several calls. In order that none of the present shareholders may be prohibited from holding the additional shares allotted to them, the directors and the committee recommend that the deed of co-partnership shall be altered so as to increase the limit of shares that may be held by any one shareholder, from 2,000 to 3,000 shares. Since the last general meeting branches of the bank have been opened in Killybegs, County of Donegal, and in Ballymote, County of Sligo. It is intended in future to send the dividend warrants by post to the shareholders, and they will therefore be good enough to give notice of the proper addresses to be put on their letters. The subjoined statement of accounts is to August 31, 1871:—Dr. Capital paid up, 183,405*l*; deposits and credit accounts, 2,596,010*l* 14s 8d; notes in circulation, 638,643*l* 7s 6d; reserved fund, 135,000*l*; undivided profits, 7,520*l* 1s 9d—total, 3,560,579*l* 3s 11d. Cr. Government stock, Exchequer bonds, and Indian securities, 310,425*l* 11s 6d; bills discounted, advance to customers, loans on securities, &c., 2,726,567*l* 12s 2d; cash on hand, and balance with London bankers, 523,586*l* 0s 3d—total, 3,560,579*l* 3s 11d. Profit and loss:—Dr. Dividend paid in March last, at the rate of 12 per cent. per annum, 11,004*l* 6s; and bonus of 3 per cent., 5,502*l* 3s; dividend now payable at the rate of 12 per cent. per annum, 11,004*l* 6s; and bonus of 5 per cent., 9,170*l* 5s; reserved fund account, 5,000*l*; undivided profits carried forward, 7,520*l* 1s 9d—total, 49,201*l* 1s 9d. Cr. Undivided profits, from August 31, 1870, 4,055*l* 11s 6d; net profits for the year, after deducting rebate on bills current, and interest due on deposits, writing off all bad, and making full provision for doubtful, debts, and also providing for bonus to officers, 45,145*l* 10s 3d—total, 49,201*l* 1s 9d. Reserved fund:—Dr. Present balance, 135,000*l*. Cr. Balance, August 31, 1870, 130,000*l*; profit and loss, as above, 5,000*l*—total, 135,000*l*.

UNION BANK OF AUSTRALIA.

The following thirty-third annual report of the directors was presented to the proprietors at the annual general meeting, held July 10, 1871:—

The directors have satisfaction in presenting to the proprietors a statement of accounts which has enabled them, after amply providing for every bad and doubtful debt, to declare a dividend of 6½ per cent. for the half-year, being at the rate of 13 per cent. per annum. By latest advices from the colonies the dulness and contraction of trade generally, which have been noticed on previous occasions, still prevailed, but from the recent great rise, in this market, in the value of their chief staple, wool, the directors are hopeful that an impetus will be given to business generally in the colonies, from which the bank must derive benefit. The directors have found it necessary for the better carrying on of the business of the bank to obtain authority to sue and be sued in the name of the public officer, applied to Parliament during the present Session, and obtained an Act for that purpose. It is a pleasing duty on the part of the directors again to record their high estimation of the ability, zeal, and assiduity displayed by the general manager, branch managers, and officers generally, in the colonies, as well as by the manager, secretary, and staff in the London office. The annexed statement of accounts presents a net profit of 84,010*l* 5s available for division, of which the dividend for the half-year, free of income tax, will absorb 81,250*l*, being at the rate of 1*l* 12s 6d per share, leaving 2,760*l* 5s to be carried forward.

UNION BANK OF LONDON.

At the annual general meeting of the proprietors, held at the City Terminus Hotel, Cannon street, July 12, 1871, the following report was read by the secretary:—

The directors have to report that the net profits of the bank for six months ending June 30 last, after payment of all charges (including the sum of 65,886*l* 2s 8d for interest paid and due to customers on their current and deposit accounts), and making full provision for all bad and doubtful debts, are 121,280*l* 17s 11d, which, with 30,125*l* 9s 3d brought forward from December 31 last, amount to 151,406*l* 7s 2d. The directors now declare a dividend for the last six months at the rate of 15 per cent. per annum, and a bonus of 2½ per cent. on the paid-up capital, clear of income tax. After payment of the dividend and bonus, amounting to 120,000*l*, there will remain an unappropriated balance of 31,406*l* 7s 2d to be carried forward to profit and loss new account.

GENERAL BALANCE for the Half-year ending June 30, 1871.

UNION BANK OF MANCHESTER, LIMITED.

At the thirty-fifth annual general meeting, held at the bank, Manchester, July 26, 1871, the following report was read:—

The directors have the pleasure to present to the proprietors the yearly report and balance sheet of the bank to June 30, 1871. After deducting rebate on bills not due, and all expenses of head office and branches, and making provision for bad and doubtful debts, the net profits for the year, including a balance brought from last account of 1,409*l* 13s 8d, amount to 46,116*l* 11s 11d. Two dividends at the rate of 8s per cent. per annum, and a bonus of three shillings per share, each half-year, have absorbed 44,717*l* 5s 8d, leaving a balance of 1,469*l* 6s 3d to be carried forward to next account. The reserve fund stands at 94,612*l* 10s, and the property account at 10,000*l*. The business of the bank at head office and branches continues to increase satisfactorily. The directors have been obliged to extend their operations to Oldham, where a branch has just been opened in Manchester street; the contiguity of this with the Middleton branch makes it easy to work them under one manager. Balance sheet for the year ended June 30, 1871:—Dr. Capital, 37,896 shares with 11*l* each paid up thereon, 416,856*l*; reserve fund, 94,612*l* 10s; current and deposit accounts, 1,004,300*l* 12s 3d; accepted bills, 51,123*l* 16s 11d; property account, 10,000*l*; balance of profit and loss, June, 30, 1870, 1,409*l* 13s 8d; profits for the year, 66,034*l* 9s 7d; less expenses, interim dividend, and appropriations as below, 39,434*l* 14s 4d; leaving 26,601*l* 15s 3d—total, 1,604,904*l* 8s 1d. Cr. Bills on hand, loans to customers, credits, and other securities, 1,296,659*l* 14s 1d; accepted bills, 51,123*l* 16s 11d; cash on hand and at call, 230,069*l* 19s 11d; bank premises, 27,050*l* 17s 2d—total, 1,604,904*l* 8s 1d. Profit and loss account:—Dr. Total expenses of the head office and branches, including directors' fees, salaries, income tax, rent, taxes, and stationery for the year, 17,074*l* 1s 6d; interim dividend and bonus already paid, 22,358*l* 12s 10d; balance to be divided, 23,827*l* 19s 1d, as follows:—Dividend at the rate of 8*l* per cent. per annum, and 3s per share bonus, 22,358*l* 12s 10d; balance forward to next account, 1,469*l* 6s 3d—total, 63,260*l* 13s 5d. Cr. Balance of profit from last year, 1,409*l* 13s 8d; profits for the year, after making provision for bad and doubtful debts, 66,034*l* 9s 7d; less rebate on bills on hand, 4,183*l* 9s 10d; leaving 61,850*l* 19s 9d—total, 63,260*l* 13s 5d.

WHITEHAVEN JOINT STOCK BANKING COMPANY.

At the annual general meeting, held at the bank, Whitehaven, on August 7, 1871, the following forty-second report was adopted:—

The directors have now the pleasure to report, that after defraying all current expenses, and making allowance for all bad and doubtful debts, the net profits of the year amount to 11,137*l* 3s 3d, which sum added to 763*l* 10s 3d, the unappropriated balance from last year's account, amounts to 11,900*l* 13s 6d. Out of the above profits, the directors now declare a dividend of 3*l* 10s per share, being equal to 23½ per cent. on the paid-up capital of the bank, and leaving a balance of 829*l* 5s 6d to be carried to next year's account. The income tax is also paid by the bank. The surplus fund now amounts to 21,114*l* 5s 8d, and the estimated value of bank buildings and other property at Whitehaven, Penrith, and Maryport, is 9,538*l*, as per statement appended. The directors have likewise to announce that they have recently established a branch bank at Maryport, and for that purpose have purchased there very suitable premises on advantageous terms. Annexed is a statement of accounts:—Balance from last year's account, 763*l* 10s 3d; net profits this year, 11,137*l* 3s 5d; together, 11,900*l* 13s 6d; which is thus appropriated:—Dividend, 3*l* 10s per share, 10,220*l*; income tax, 236*l* 8s 5d; interest on surplus fund, 614*l* 19s 7d; together, 11,071*l* 8s; leaving balance to next year's account, 829*l* 5s 6d. The surplus fund on June 30, 1870, was 20,499*l* 6s 1d; interest to June 30, 1871, 614*l* 19s 7d; together, 21,114*l* 5s 8d. Bank buildings and other property at Whitehaven, Penrith, and Maryport, 9,533*l*.

WORCESTER CITY AND COUNTY BANKING COMPANY, LIMITED.

At the annual general meeting of shareholders, held at the Shirehall, Worcester, on August 8, 1871, the directors presented the following report and balance sheet for the year ending June 30, 1871:—

The directors beg to present herewith the annual balance sheet of the bank to June 30, 1871. The result of the year's operations is a profit of 32,973*l* 6s 10d, including the amount brought forward from last year; out of which has been paid a dividend at the rate of 10 per cent. per annum to December 31 last, and the directors recommend that a dividend at the same rate (free of income tax) be declared for the past half-year, and that the usual sum of 500*l* be written off bank premises account, leaving an unappropriated balance of 7,473*l* 6s 10d, to which the directors recommend to be added from the reserve fund 10,000*l* (thereby leaving the surplus reserve fund at 90,000*l*), which amount will enable the directors to fully provide for the whole of the bad debt of W. T. Adcock, and to carry forward to the credit of profit and loss account for the current year a sum of 766*l* 5s 4d, having previouly made ample provision for all other bad and doubtful debts out of the profits of the past year. The directors have much satisfaction in informing the shareholders that the business of the bank has continued to improve during the past year, both in the number of accounts and increased transactions. Balance sheet, June 30, 1871:—Liabilities—Dr. Capital paid up—20,000 shares, 12*l* 10s per share—250,000*l*; amount due to the public on deposit, current, and other accounts, 738,943*l* 5s 9d; notes and drafts in circulation, 22,079*l* 11s 7d; interest due on deposit receipts, and rebate on bills of exchange current, 7,896*l* 1s 8d; reserve fund, 100,000*l*; profit and loss, balance, June 30, 1870, 6,263*l* 6s 5d; net profits of the year after providing for bad debts, 26,710*l* 0s 5d; together, 32,973*l* 6s 10d; less interest and dividend paid, and amount written off bank premises, to December 31, 1870, 12,750*l*; leaving 20,223*l* 6s 10d—total, 1,139,143*l* 5s 10d. Assets—Cr. Cash in hand and at agents, 117,013*l* 5s 6d; Government securities (Consols 60,000*l*), 54,484*l* 10s 10d; bills of exchange, advances on current accounts, loans, and securities, 938,580*l* 16s 9d; bank premises (freeholds) at Worcester, Kidderminster, Ludlow, Leominster, Tenbury, Bromsgrove, and Evesham, 29,063*l* 12s 9d—total, 1,139,142*l* 5s 10d. Profit and loss account, for the year ending June 30, 1871:—Dr. General charges, including salaries, rents, taxes, directors' remuneration, and auditor's fee, with all other expenses at head office and branches, 12,667*l* 2s 1d; dividend paid to December 31, 1870, at the rate of 10 per cent. per annum, free of income tax, 12,500*l*; reduction of bank premises, December 31, 1870, 250*l*; payment of dividend at the rate of 10 per cent. per annum to June 30, 1871, free of income tax, 12,500*l*; amount to be written off bank premises to June 30, 1871, 250*l*; balance, unappropriated profits, 7,473*l* 6s 10d—total, 45,640*l* 8s 11d. Cr. Balance of profit and loss, June 30, 1870, 6,263*l* 6s 5d; gross profits of the year, after providing for bad debts, half-year ending December 31, 1870, 19,450*l* 7s 2d; ditto June 30, 1871, 19,926*l* 15s 4d—total, 45,640*l* 8s 11d.

YORKSHIRE BANKING COMPANY.

At the fifty-sixth half-yearly general meeting of the shareholders, held at Leeds, August 2, the following report was presented:—

The directors in presenting their usual half-yearly report have to state that the profits for the half-year ending June 30 last amount to 31,851*l* 16s 8d, out of which they propose payment of a dividend of 25s per share, free of income tax, which will absorb 25,000*l*, placing to the reserved surplus fund a further sum of 4,000*l*, making that fund now to stand at 66,000*l*, and carrying to the credit of the bad and doubtful debt fund the balance of 2,851*l*. The following is a statement of liabilities and assets, as certified by the auditor. Liabilities—Shareholders, for capital stock, 250,000*l*; shareholders, for unpaid dividends, 190*l* 11s; deposits and credit balances, 1,708,601*l* 4s 3d; interest on deposit receipts and rebate of discount, 12,683*l* 12s 11d; notes in circulation, 112,805*l*; bad and doubtful debt fund, 1,634*l* 1s 7d; reserved surplus fund, 62,000*l*; profit and loss account, 31,851*l* 16s 8d—total liabilities, 2,179,796*l* 6s 5d. Assets—Bills, securities, and cash on hand, 632,999*l* 6s 9d; amount invested in Consols, 100,000*l*; advanced on current accounts and in bankers' hands, 1,406,289*l* 12s 6d; freehold property and furnishings, 39,895*l* 17s 5d; stamps on hand, 581*l* 9s 9d—total assets, 2,179,766*l* 6s 5d.

Agriculture.

POULTRY BREEDING.

That the rural classes who occupy land derive far less advantage from keeping and rearing poultry than they might easily obtain by more care and attention to the subject is notorious. Still of late years the efforts of prize poultry rearers have done much, both in diffusing good breeds, and in showing the benefit of generous feeding. As regards the supply of eggs, various kinds of food, and a sufficiency of food, are the main elements of success. We have also found that in order to obtain large numbers of eggs in the autumn and winter, fowls of various breeds should be kept together, and that as many early pullets as possible should be reared with a special view to the winter's supply of eggs. This of course precludes the improvement of any particular pure breed, which must be left to those who seek to render their poultry yards profitable by the perfection of the birds themselves, and not as layers of eggs. At a recent meeting of the Midland Farmers' Club, the Rev. A. G. Brooke read a good paper on "the Breeding and Management of Poultry," which contains a large fund of information, from which a few propositions of general application may be gathered. Mr Brooke seems, like most exhibitors, to prefer a pure breed of some sort. He said—"As regarded starting with an entirely fresh strain, it would answer their purpose best to keep dark Brahmas.....,The dark Brahmas were very hardy, extremely prolific, and good mothers." Pullets hatched in April will lay during the following winter, and with plenty of food the chickens soon become fit for market, "and by no means coarse for the table." Mr Brooke had been very successful with this breed, having "sold most of his birds at the rate of 50s a cockerel and two pullets." He recommended farmers to keep nothing but Brahmas. Possibly this may be deemed a little of the hobby-riding; but we believe that if a farmer would always secure good Brahma cocks, he might usefully keep all or any varieties of hens. We have found Dorkings, Game, and Spanish hens very good for crossing with the dark Brahma cock.

More progress has been made in increasing the weight of ducks and geese than that of fowls. Thus, at the late Birmingham Show, the first prize couple of Aylesbury ducks weighed over 18 lbs; the Rouens, 19 lbs 4 ozs; while geese weighed 58 lbs and 56 lbs the couple. It may be remarked, however, that for many purposes smaller fowls are preferred to the very large sorts. Turkeys are also brought to great weights, the old prize hens reaching 35 lbs and 34 lbs, and the young ones 31 lbs and 29 lbs.

But whatever breed of poultry be used, "they must be careful to infuse fresh blood into them every spring."

The poultry houses must be well ventilated, light, and free from draught, and above all kept clean. We may add the caution that in a country well stocked with poultry, the outlets should be carefully secured at night. And Mr Brooke tells us—"In winter, eight o'clock is almost early enough for fowls to be let out of their house, but before so doing it is a good plan to give them a liberal supply of soft food (warm if possible) as it will teach them to become attached to their abode, and the setting hens will reap the benefit of a regular meal." Mr Wise was a large fowl keeper. He gave them plenty of hot food—such as potatoes, Indian meal, and oats—fed them regularly and well, and found them most profitable. Mr Lort had kept Malays on poor land where he succeeded with no other kind. Mr Masfen strongly supported the advice of the lecturer to introduce a good male bird every year.

CHEESE FACTORIES.

The success which has attended the cheese factories of America has at length drawn the attention of English farmers to the subject, and it well deserves their attention.

Mr Coleman (Derbyshire) lately dealt with the subject of "English Cheese Factories" at the London Farmers' Club. In Derbyshire such a factory has been established. The price paid to the farmer sending in milk has been 6½d per gallon (of 10 lbs); he has the whey besides after the cream has been taken off for making butter, and any surplus after paying the working expenses is divided *pro rata* with the farmers who supply the milk. To accomplish this a guarantee fund of 4,000*l* was subscribed on the establishment of the factory. A manager, with his implements, was obtained from America, and the concern has worked smoothly. A description of the plan of the factory and the methods of working would prove too long for our columns. It may be mentioned that milk, if cooled before starting, may be sent five miles to the factory in the hottest weather.

The following is Mr Coleman's estimate of the savings effected by the factory system:—"I will take a factory of 750 cows, which is the best number, as far as we at present can judge, to work up together. Now suppose this number made up of 30 dairies of 25 cows each (which is above the average in Derbyshire), one skilled dairy-maid is employed in each dairy—so that 25 are so engaged, or the farmer's wife takes the place; and at any rate it is proper to value the labour of the wife quite as high as that of the hired servant, and therefore the calculation remains the same:—

30 Farm Dairies of 25 Cows each.	£	s	d
30 dairy-maids; wages, 15*l* per annum	450	0	0
Board of ditto, 20*l* per annum	600	0	0
	1,050	0	0

Factory of 750 Cows.	£	s	d
1 manager	150	0	0
2 men, 40 weeks, at 1*l* per week	80	0	0
2 lads, 40 weeks, at 12s per week	48	0	0
Extra help	22	0	0
	300	0	0
Gain by factory	750	0	0
	1,050	0	0

This calculation gives 1*l* per cow saved in labour only. Now, I have asked many of our Derbyshire farmers what their cheese, with all hired labour, costs them to make, and their estimate varies from 7s to 8s per cwt, and if we reckon 4 cwt per cow as a good average of cheese for one season, this puts the labour at 30s per cow, whereas in the factory it is less than 10s." This is a very important element. Then the factory-made cheese commands a better price in the market by about 4s per cwt than the average of farm dairies. Some of the farmers join together in sending their milk to the factory, thereby lessening the cost to each. Should the factory system become general, it will induce many farmers who have declined to keep dairy herds on account of the trouble dairies give in the house, and keep only grazing stock where notoriously the dairy stock would pay better. Eventually there can be no doubt that the local factors, whose trade must be much interfered with by factories, will themselves establish them, and buy milk instead of cheese from the farmers. The mixing of milk of different qualities that takes place in a cheese factory seems to be one cause of the superiority of factory-made cheese.

BRAN AS FOOD FOR CATTLE.

In feeding cattle there are two requisites on which profit altogether depends. First, judgment in buying or breeding the store animals; secondly, economy in supplying them with feeding provender.

The following statement by the *Elgin Courant* of the proceedings of a Scotch grazier indicates that Mr Mackessack possesses both requisites:—"A feat performed by Mr Mackessack (of Ardgye) in Forres market, recently, is well worthy of special attention. In less than an hour he sold from his own farms 132 fat cattle, at an average of nearly 40*l* a-head, the whole amount realised being 5,125*l* 10s. This is an amount of business in cattle which, we venture to say, was never transacted in the North in so short a space of time. Only a few of these 132 animals were bred by Mr Mackessack himself, the rest having been all bought in the local markets, and from farmers in the district. They have been in Mr Mackessack's possession, on an average, barely twelve months, and they have paid very handsomely for their feeding during that time. It is generally said that they have nearly doubled the prices they were bought at, and we have reason to believe this is not far from the truth. Mr Mackessack's winter feeding is straw, turnips, oilcake, and bran. He has for years had great faith in bran as a feeding stuff, and this year he tried an experiment with it that is worth mentioning. He bought ten cattle about 14 months ago, at 18*l* each, and for the last twelve months they had got about half a stone of bran each every day, except in the months of May and June, when they were out on grass. In July they were taken into the court and got nothing but hay, bran, and water, until the end of September. They then began to get turnips and about three pounds of oilcake each a day, with a very little bruised oats, the quantity of bran given along with the other feeding stuffs for the last two months being lessened. These ten cattle were sold at 44*l* a-head."

TEACHING BY WARNINGS.

Some time since Lord Warwick became very irate with the Warwickshire Chamber of Agriculture, on account of a somewhat free discussion of the Game Laws which took place at a meeting of the Chamber at Coventry, and withdrew, or threatened to withdraw, his name and countenance from the Chamber. Whether his lordship proceeded to the extremity of withdrawal we know not; but whether he did or no the Chamber still flourishes, and the feeling against the Game Laws amongst its farmer members goes on intensifying.

However, the following paragraph from the *Warwick Advertiser* fully explains the source of Lord Warwick's irritation when the code protecting his sacred game is freely handled. Whether Lord Warwick, like a fellow game-

preserver, has *understated* the actual results of his Christmas butcheries we have no information; but surely such lists must operate as a warning not only to farmers to avoid game-preserved estates, but also to the public not much longer to permit such flagrant abuses of proprietary rights. The names of his Lordship's "brother butchers" are given in the paragraph:—"During the week the Earl of Warwick has entertained a shooting party at the Castle, his guests being Earl Somers, the Hon. Colonel Scott, Captain Boultby, Captain Dormer, J. W. R. Repton, Esq., and H. S. Lucy, Esq. The shooting, which commenced on Tuesday and closed yesterday evening, afforded abundant evidence of the success which has attended the efforts of Mr Watts, Lord Warwick's gamekeeper, to stock the noble lord's preserves. During the three days' sport there were bagged 1,097 pheasants, 371 hares, 174 rabbits, 6 partridges, 5 woodcocks, and 2 snipes—the grand total of 'fur and feathers' being 1,655." It would form a very useful statistical inquiry to ascertain how many police constables have been employed during the past year, and for how many hours, in watching this "head of game." Also how many persons have been convicted for game offences on Lord Warwick's estate? and what has been the cost of their maintenance in jail? and what has been the cost to the parochial rates for the maintenance of their wives and children during the fathers' incarceration? Will the chief constable for Warwickshire and the Poor Law auditor afford the information? As a pendant to the above, the following statement made by Mr Snell, a farmer, at the Callington Agricultural Society, may operate as a warning to game-preserving M.P.'s. He said:—"A well-known Member of Parliament for a Western county, notwithstanding all that had been said about the Game Laws, thought proper to sell the right of sporting over certain farms for a few paltry sovereigns, and when the tenant's son was on one occasion walking over one of these farms, with his dog at his heels, he was accosted by a strange man, was accused of trespassing, although he protested against it, was summoned before the magistrates, and actually fined. Now, can any man say it is right that a landlord should possess such a right as that? The farmers will go to any fair length to give their landlords sport—it is our pride and pleasure to do so; but is it right that the landlord shall have the power of making any coming adventurer superior to the tenant? Public opinion is not strong enough to reach men of that sort. This man is a Member of Parliament, but public opinion does not influence him; and if that is the case, how can you expect that it will influence stay-at-home squires? The fact is that the Legislature must step in between the weak and the strong."

Though many farmers profess to believe that if hares and rabbits are given up to the occupying tenants the rest of the Game Laws may go on as at present, it will be found, the moment the subject begins to be seriously debated in Parliament, that any such sham-reform is absolutely impracticable. To the public morality the preservation of pheasants is at least as noxious as the preservation of hares or rabbits. The system is so rotten that when touched it must be abrogated altogether.

HOW A LANDOWNER MAY IMPROVE.

The following account of the improvement by the late Lord Walsingham of a tract of poor and thin land ought to convey a lesson to many owners of light land properties, who want nothing but some slight knowledge of their own business—landowning—to be able to follow such a rational example. Probably no such improvement will be generally made until the law and habit of entail have been abrogated. Even landowners who have the necessary funds and knowledge care not to devote their energies (where any) to the improvement of a property all of which must go to one child, and he, perchance, the least worthy of the family. The account is from the *Mark Lane Express*:—"At the time Lord Walsingham succeeded to the Merton property, a considerable portion, about 4,800 acres, was held in large rabbit-warren farms, one consisting of as much as 2,100 acres. His Lordship's first object was to get rid of the warren as the leases fell out, and that was effected in the course of a few years. This step necessitated the building of farm-houses and premises, and the sub-division of the land; and the holdings here now range from about 600 to 700 acres, while pains have been taken of late to reduce the rabbits. The main improvement necessary was to strengthen the staple of the sandy soil by marling or claying, for which there existed every facility. This proceeded slowly in the hands of the tenants, and large tracts were consequently taken in hand by Lord Walsingham himself, who at one time occupied in all about 3,500 acres. Large portions have now been marled or clayed at the rate of from 80 to 100 loads per acre, or, in some instances, much more, and the arable lands divided by fences. Enough already has been effected to show that, by liberal but not necessarily very expensive cultivation and careful farming, good crops may be grown on land where formerly the produce was but little more than rabbits." Does not this statement say to each sluggish landowner—"Go thou and do likewise?"

COMMERCIAL AND MISCELLANEOUS NEWS.

The report of the American whale fishery for 1870, like its predecessors for several years, is a gloomy one. It is said to have been a year of poor returns for those engaged in the fishery, while prices, which at the opening of the year were unremunerative, have steadily declined, closing at the lowest quotations of any year since 1861. Sperm oil has had but limited consumption. Whale oil has been affected by the introduction of cotton-seed oil, and both have felt the effects of a closed foreign market caused by the European war. This also had a depressing influence on whalebone, of which America has been a large exporter. The poor results and low prices have deterred many from fitting out their ships again, and the fleet at home ports on New Year's-day was larger than in any former year. The fleet has also declined in numbers, and the future discloses only a gloomy prospect. Fully one-fourth of the smaller number of whaling vessels are now at home idle. On January 1, 1870, there were in the whaling fleet 321 vessels with 73,137 tonnage, which number on January 1, 1871, was reduced to 288 vessels with 69,372 tonnage. The decrease is 33 vessels with 3,765 tons. In the Atlantic fishery the fleet is now reduced below 100 vessels, and the low prices will deter merchants from refitting this year the arriving vessels, the consequence being that the fleet will be still more reduced. There were 48 vessels in the North Pacific fleet last year. One whaler visited the Ochotsk Sea and one Bristol Bay. Coast whaling seems to have been abandoned. In the operations of the Pacific fleet a new feature is reported in the landing of bone at San Francisco, and its shipment across the continent by railway to New Bedford, Massachusetts, the cost being 2c per lb currency. At present the distribution of the fleet is about as follows:—Atlantic, 51 vessels; Indian Ocean, 41; Pacific Ocean, 65, principally sperm whaling; Hudson's Bay, 5; North Pacific, 51 (of the latter there being 8 outward and 20 homeward bound). In 1871 the North Pacific fleet, it is said, will comprise about 40 ships of all nationalities. The total number of vessels now at sea is 213, leaving 75 now at home in port. During 1870 the imports into the United States were 55,183 barrels sperm and 72,691 barrels whale oil, and 708,365 lbs of whalebone, against an importation of 1869 of 47,936 barrels sperm and 85,011 barrels of whale oil, and 600,603 lbs of bone. In 1870 the United States exported 22,773 barrels of sperm oil, 9,872 barrels whale oil, and 347,918 lbs of bone, compared with exports during 1869 of 17,239 barrels of sperm oil, 3,842 barrels whale oil, and 311,605 lbs of bone. In 1870 the home consumption was 28,812 barrels of sperm oil, 64,812 barrels of whale oil, and 226,947 lbs of bone, against a consumption in 1869 of 17,239 barrels sperm oil, 56,256 barrels whale oil, and 197,098 lbs of bone. On January 1, 1871, the stock on hand was 28,650 barrels sperm oil, 36,000 barrels whale oil, and 400,000 lbs of bone. For 1871 the imports are estimated at 50,000 barrels sperm oil, 70,000 barrels whale oil, and 650,000 lbs of bone. The heaviest American tonnage ever engaged in the whale fishery was in 1853, at the close of which year the total was 208,399 tons; on January 1, 1858, it was 203,149 tons, since which time there has been a steady and rapid decline, there now being only 69,372 tons.

The *London and China Telegraph* states that the Great Northern Extension Telegraph Company have chartered the steamer Africa, of about 2,500 tons, for the purpose of conveying the section of the submarine cable to be laid from Vladiwastok (Possietto) to Nagasaki, while the Great Northern, expected from China in a fortnight, will take on board the section to connect Nagasaki and Shanghai, about 1,200 miles of cable in all. It is expected that these vessels will be despatched about the 15th April, via Suez Canal, calling at Singapore and Hongkong *en route*. Under favourable circumstances the cable will be laid down and communication established about the 15th July. As already announced, the land lines through Russia to Vladiwastok are now in operation, thus affording a direct chain of communication from London to Shanghai. This company are also laying a cable from Shanghai to Hongkong, which will probably be completed on the turn of the monsoon in April. The Telegraph Construction Company, under contract with the China Submarine Company, have despatched vessels to connect Singapore and Hongkong, and this line will, barring accidents, be completed in April. The cable to connect Australia and Java will also be despatched in a few months. The project, started in Hongkong, for connecting Siam, Saigon, Manilla, and Hongkong, the land lines for which were last year despatched to Singapore, is, we believe, likely to be carried out, either on its original footing, or by an amalgamation with another company.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the third week of February, 1871, and of the corresponding week in 1870:—

	Paupers.

Correspondence.

THE MAYOR'S COURT.

TO THE EDITOR OF THE ECONOMIST.

SIR,—As you are the recognised organ of the monetary interest, and as I feel assured that you do not desire in any manner to mislead it, let me therefore say a few words respecting the Mayor's Court, upon which you are so severe in your last number, particularly as my knowledge has been obtained through an extensive practice in it.

I may say that the Court does not and never has claimed any authority or jurisdiction over goods out of the City of London, and all persons will so be told if they apply to the Court.

The process of foreign attachment may be said to be peculiar to this Court, and it is not very wonderful that any creditor will call into use any process by which he can obtain payment of his demand. It must not be supposed that this Court, though an inferior Court, deals in small figures, or that the process of foreign attachment is only used for small demands, or for the purpose of the money lender. It is of great commercial use, as evidenced by the annual official return; thus, for the last three years the amount sought to be recovered under this process and the average of each attachment is as follows:—

	Amount Sought to be Recovered.	Average Attachment.
	£	£
1868	516,930	555
1869	375,427	377
1870	1,159,427	1,045

This shows that it is of commercial value, and I may say that many thousands are annually recovered by this process that would otherwise be lost to the creditor. There is however this absurdity with reference to the custom—it exists only in the City of London and not in Middlesex; and rather should it be said apply it generally than abolish it, or, as you suggest, abolish the Court. As to abolishing the Court, the rapid and continuing increase of business in it points it out as a Court whose process and practice should be copied rather than abolished. The facility of the proceedings, and the very small fees taken in it, knowing that it pays its expenses, renders it almost a marvel when it is, as an Inferior Court, compared with the County Courts, whose fees are preposterous, and which yet cost the country more than a quarter of a million per year. This increase is as marked in its ordinary as in its extraordinary jurisdiction. There are few merchants in the City of London who would venture into a County Court; there are few who would hesitate to prosecute a right in the Mayor's Court. Its Judges and its officers are men who possess the highest qualities, and I know of no Court in Westminster Hall or at Guildhall where justice is more evenly administered. Let me say, in conclusion, that the process of foreign attachment as exercised in the Mayor's Court has been the subject of inquiry by two Royal Commissions, and each has recommended its continuance.—I am, Sir, your faithful servant,

G. DILLON WEBB.

Union Bank chambers, June 7.

[We should quite agree with our correspondent that the writ of foreign attachment ought to be extended, but the issue of such writs is no proper work for a Court which is the mere appendage of a moribund Corporation. The cases we commented on were cases in which a jurisdiction was attempted to be obtained not over foreigners who had goods in this country, but over English subjects domiciled here upon various flimsy pretexts.—ED. ECON.]

SWITZERLAND, AUSTRIA, AND INTERNATIONAL COINAGE.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The National Council of Switzerland has decided upon taking a step calculated to facilitate commercial and financial dealings with England, and to protect travellers of all nations from the not unfrequent rapacity of Swiss money-changers and hotel keepers. The resolution for a tarification of English sovereigns at the fixed exchange of 25 *francs* 10 *centimes*, at which they will henceforth be legally current in Switzerland, has been arrived at on consideration of a report from one of the members of the Council, M. Feer-Herzog. This gentleman, formerly a manufacturer, is well known for his writings on International Coinage, published at Aarau and Geneva, and for the ability with which he represented his country at the Monetary Conferences of 1867-70, where he at all times consistently advocated the larger measure of interest and policy to England, and of public good to all nations involved in the plan for the reduction of the sovereign of the future to the intrinsic weight of 25 francs exactly, of gold nine-tenths fine. The chances of a further full consideration of such a plan are, perhaps, nearer to practical realisation than is generally imagined. So soon as peace between the North German Confederation and France shall be established upon a firm basis, the report of M. Ozenne, the Secretary of the Paris Commission of 1870, printed in first proof just before the war broke out, will doubtless be considered as a guide of the highest importance in determining the course of further action in regard to the adoption of a single and exclusive gold standard within a definite and limited period of time, both by the Governments of France and of her monetary allies, and of the North German Confederation and of those States whose commercial and general polity are moulded on its model.

In the meanwhile, the Swiss tarification of the sovereign at a fixed exchange, although it has not the claim of novelty, has at least the effect of showing the continuous and earnest desire now spreading in many nations to cease to look with jealousy on the impress of their own mints as the sole guarantee of their legal tender metallic circulation, and to regard rather the intrinsic value of such coins of foreign countries as are loyally and fairly struck, and entitled to the same right of freedom of currency as the home manufacture. On such grounds, the Swiss tarification of the sovereign may be viewed as giving a certain additional stimulus to the expectation that Parliament will, at no distant date, follow up the Chancellor of the Exchequer's disposition to favour the plan of reducing the future coined value of the sovereign to that of 25 francs exactly. Not only is our convenience, but indirectly our financial influence also, mixed up with this question. To a great extent, indeed, our old national pride at seeing the circulation our gold coin attained as the most widely spread in the universe has already suffered a check. The sovereign has already been greatly distanced, as regards amount of pieces in circulation, by the vastly larger recent coinage of 20-franc pieces of the countries of the Monetary Convention.

It is not so generally known that the Austro-Hungarian Government are now signifying to foreign countries the complete adhesion of Austria and Hungary to the principles of this Convention, and their avowal that it is done in order to prepare the way for the introduction of a gold standard. Pieces marked 20 *francs* or 10 *francs* respectively on the left-hand, and 8 *florins* or 4 *florins* respectively on the right-hand, of the Imperial eagle, have already been struck in Austria and Hungary, with inscriptions in Latin and Hungarian. These coins are in precise conformity with the weights and conditions stipulated in the Monetary Convention, and are entitled to full reciprocal and international circulation, in terms of the Monetary Treaty of 31st July, 1867, which was signed by the late Baron de Hock and M. de Parieu as Commissioners Plenipotentiary. The Austro-Hungarian Government had previously, by Treaty of 13th June, 1867, withdrawn from the Treaty of 24th January, 1857, with the German States, the "golden crown" established by the latter Treaty, of an exact metrical weight, but without other than a fractional proportion to the leading units of gold coinage, having been found to be a practical mistake.

The present adhesion of the Austrian Empire to the Monetary Convention of December, 1865, brings up to 130 millions of souls the total population of the nations thus included in international arrangements giving currency to a compact gold coinage of any existing units of circulation whose common denominator is 5 francs. Thus the English and Australian sovereign stands excluded from the charmed circle by a difference of about 20 centimes, or something under twopence; and the half-sovereign by a difference of 10 centimes, or (say) one penny; and what would be one of the most useful coins of the Convention—the 25-franc piece, identical with 10 florins, and with 5 dollars of what the American gold coinage of

the future will almost certainly be—is indefinitely postponed, from our English over-hesitation in facing a change which we know must inevitably have to be made at some time or another.

In the interval—during which "public opinion" is supposed to be making up its mind—it is not a little remarkable to see how we allow certain interests, more or less concerned in keeping up the present state of things, to throw dust in our eyes, so that the difficulties of a change are magnified, and the advantages it presents to our commerce and industry unduly made light of. We strain at the gnat—for the 20 centimes reduction of our present pound could be made up to us by the proposed plan of a seignorage, to serve the double purpose of a mint-charge for manufacture, and of a perpetual fund for sustentation of the coinage in its integrity; whilst we swallow the camel — or, in other words, as easy-going Englishmen, we put up with Swiss National Councils and Foreign Mints treating our poor sovereigns—whose intrinsic worth is quite 20 centimes above 25 francs—as worth only 10 centimes above it in their tarifications. Indeed, it is even refreshing and generous on their part to give us so much, seeing that in postal, railway, telegraph, steam packet, and other Conventions of an international character—(to say nothing of the terms on which foreign loans are generally placed by contractors on our market)—we willingly allow ourselves to be mulct to the tune of millions, by giving up altogether the whole of our 20 *centimes* per pound sterling, allowing it to be treated as 25 francs. Besides this, in our love for things as they are, we subject our coin—through the operation of a free mint, and the upholding of an obsolete system of finality in our standard—to a serious degradation from its due rank and power, as a leading coin of the world, down to the lowest point any coin can possibly sink to, where it is only—as mere bullion—food for the melting pot, a pasture ground for the profits of a small monopoly and clique of changers and bullion dealers, and a hindrance to that clear and easy relation and proportion between the coins of all great countries, which should, so to express it, speak a common and intelligible language of value and price in all their contracts and engagements. If this could be so—and if the will exist the way is clear—it would contribute, so far as any material object can, to a promotion of that good understanding between nations and races that subserves feelings of amity and peace, and interposes yet another bar to disunion and war, from which the rightly constituted mind of nations great in industrial and commercial rank is ever sincerely averse.—I am, &c.,

FREDK. HENDRIKS.

February, 1871.

Agriculture.

CRIMINALITY AND GAME-PRESERVING.

THERE are few more pleasant counties than Hertfordshire. Its climate is salubrious: its soil is capable of bearing large crops of every kind of agricultural produce. A considerable proportion of its farms are well cultivated. Its proximity to the Metropolis affords the opportunity of disposing advantageously of meat, grain, hay, and roots; and of getting back stores of manure, whereby the intelligent farmer may increase the produce of his farm almost indefinitely. Rural labour, too, is fairly paid, and though somewhat rough in manner, the farm working people are in general well-disposed and industrious. But there is one curse which goes far to blight the favourable prospects of the rural districts of Herts. It is grievously infested with game preserves. The county abounds in considerable woodlands, and these woodlands are the sites of game preserves, from whence issue the Game Law-protected wild creatures which devastate the farmers' crops, and spread savagery and crime amongst the otherwise industrious rural population. Some conspicuous and frightful illustrations of this occurred at the late Hertford assizes. At those assizes, it appears from the calendar now before us that no less than twelve men were charged—in four different game preserves—with night poaching, armed with guns or bludgeons, and in three of the cases with most savage assaults upon the gamekeepers. We some years ago knew a landowner—then a young man—who, following the foolish fashion of his class, became a great preserver of pheasants. A case of night poaching occurred in his preserve, wherein so much violence and so near an approach to murder took place, that, although he prosecuted the night poachers to conviction, he determined never again to have such fearful scenes enacted upon his property, that he gave up game-preserving. How happy would it be for the farmers and labourers of the county—aye, and for the landed proprietors also—if the Hertfordshire landowners would go and do likewise. In the first case at Hertford, George Burgess, aged 22, and George Fenson, aged 27—both labourers, of Luton, Beds—were accused of "night poaching, with bludgeons, and violently assaulting John Walker, the gamekeeper of Charles Hale, Esq., at King's Walden." In sentencing Fenton to ten years' penal servitude, the Lord Chief Justice said his offence had "been aggravated by the exercise of most brutal and cruel violence towards the keepers.....Now, you seem to think that *in this county* you are not only at liberty to commit trespasses and offences against the Game Laws, but that when interfered with by the keepers, whose duty it is to protect the interests of their employers, you are at liberty to use brutal force and savage violence by attacking in the way it has been proved you have done. This must be put a stop to.....You and your companion Gray (who escaped), who I wish stood by your side on the present occasion that I might make an example of him, attacked the unfortunate Walker with murderous weapons—the one with a bludgeon, a blow from which might have fractured a man's skull, and thus have taken his life; and your companion (Gray) with a spud, armed with a metal end, every blow from which produced a wound on the unfortunate man's head, cutting him to the very bone. Besides that, he had bruises on every part of his body, and his arm was broken. In fact it was a mercy and a marvel that the man's life was not sacrificed. For days he was in danger, and if he had died you would have had to answer for his life with your own." And Fenton, it appeared, had been convicted three times under the Game Laws, and five times more for poaching and assault. His companion Burgess, who committed no violence, was punished with six months' imprisonment.

In the second case, George Wright, aged 52; William Edmonds, aged 36; and John Rolph, aged 26—all of Wheathampstead—were prosecuted for night poaching with guns, and assaulting Blundell, the keeper, on the property of Earl Cowper, at Brocket Hall, lately belonging to Lady Palmerston. Rolph was acquitted, but was told by the Chief Justice that he had a narrow escape. To Wright his Lordship said—"When the keeper did his duty in coming up to you, you struck him two violent blows with the end of your gun, one of which inflicted a severe wound upon him, and the other nearly knocked his teeth down his throat.....With regard to you, Edmonds, when this poor man had been knocked down and beaten, and was about to rise, and while he was begging for mercy, you came back and gave him a brutal blow under the ribs, which, but for the powder-horn he had in his pocket, and which the violence of the blow smashed up, would have broken his ribs and endangered his life."

Both these men were sent to penal servitude for five years. Edmonds had been convicted of offences against the Game Laws no less than thirteen times!

The third case was "night poaching with violence, armed with guns, at Offley, on the land of (to his shame be it) a gentleman farmer and a London banker. The offenders were John Seymour, a bricklayer, aged 33; Frederick Simpson, labourer, aged 25; and John Trueman, labourer, aged 20—all of Luton. Seymour was wounded by the discharge of the gun of a companion, and pleaded guilty. A very unpleasant feature of this case was the fact, elicited from the gamekeeper on cross-examination, that he keeps a mastiff to go out with him at night looking for poachers. He is a fierce dog. Trueman presented a gun to the breast of a policeman, who had joined the gamekeepers in assisting to preserve the game. On being remonstrated with he turned his gun and shot the dog. Thereupon the policeman knocked him down with his staff, and got on him to hold. Then another poacher fell on the policeman and beat him, while others attacked the gamekeepers with guns and sticks. The policemen and gamekeepers received serious injuries. All the three poachers were visited with seven years' penal servitude.

In his address to the jury, the Lord Chief Justice observed: "It appeared that the keeper Payne had a dog with him on the night in question, and, judging from its breed, one of a very ferocious nature. He thought it was a pity that a man should have had with him such an animal on such an occasion, because he was unable to control the animal to the same degree as he could control himself." His Lordship also said he "was extremely sorry that the constable raised his staff and used it as he did at the moment, because it might have been the means of provoking an attack (which it undoubtedly did) which might otherwise not have taken place."

Again, his Lordship thought it necessary to say to the jury, "let no consideration of the Game Laws stand in your way for a moment." Surely when such a caution is deemed proper by the Judge, in a case involving so much savage violence—on both sides—a stronger condemnation, by implication, of the Game Laws could scarcely be made.

In the last of the four cases, George Boltwood, aged 20; Richard Higgins, aged 19, labourers, of Wormley; and Geo. Robinson, aged 21; and George Hodge, aged 19, labourers, of Cheshunt, were convicted of night poaching, armed with guns, at Broxbourne, on the land of Mr H. Smith Bosanquet. Here, no violence having been used, the lads were punished with only six months' imprisonment, with hard labour.

What a picture do these trials present of a civilised (save the mark) country? Such things are the usual—the necessary

—results of game preserves in every district where game-preserving has been general or long-continued. In both respects Hertfordshire has a most discreditable prominence. How long, oh, how long, will the nation bear the bad laws and selfish practices which conduce to such dreadful criminality?

THE AGRICULTURAL LABOURER.

A MEETING of some significance was lately held at Lientwardine, a village on the borders of Herefordshire and Shropshire. The audience consisted entirely of agricultural labourers, the chairman, Mr Strange, having himself risen from the rank and file of rural industry. The chairman, in a long address, after describing some of the difficulties of the farm labourer, recommended as the main remedy the division of farms into large, middle, and small sized farms. He said:—"Let us for a moment look at a large farm, say 500 acres. Now out of that take a farm of 200 acres, and one of 100 and two of 50 acres each; there you see would be four families living where only one now lives; or, suppose we took another of 600 acres. Then out of that take one of 300 acres, one of 100, two of 50, and three of 33, you will then have seven families where now but one lives." And though admitting that the large farmer may employ as many labourers as the aggregate body of smaller farmers, amongst whom it is proposed to divide the large farm, Mr Strange contended that with smaller farms there would be more work for the local tradesmen, and that the landlord, notwithstanding the necessity of keeping up more farm houses and steadings, "would not have to build such mansions as are called for on grouped farms." Without doubt the consolidation of farms has, in some districts, been carried too far, because the occupier does not in most cases employ a proportionate increase of capital, and a landowner who has yet some small farms will do well to consider whether he cannot promote improvement without consolidation. It is, however, the fact that in small farm districts the farming is, as the rule, worse, and wages lower, than in districts where large farms are occupied by farmers with fairly sufficient capital.

Then a discussion followed, and both the chairman and the labourers concurred in demanding better cottages, some of them wishing to rent their cottages directly from the landlord, and not from the farmers for whom they work. The truth is that every farm should contain some cottages over which the farmer has complete control, while other cottages in the same locality should be let directly to labouring men.

But the main burden of the labourer's complaint was lowness of wages. One man "had a wife and two children to keep on 11s a week." Another "thought it only reasonable and right that they should have 15s per week." A third remarked, "that if a man worked two or three hours overtime he ought to be paid for it." One man had a wife and seven children, with wages of 9s a week.

Then one speaker said—"They ought to be bound to give us wages enough to bring up our children properly;" while a subsequent one said—"We get our masters to lower the rent and raise the wages." And Thomas Green thought they wanted a labourer's club-room. "Through competition, if one man did not take the work from a farmer another did, and so, through the men not sticking together, they lost ground gradually. If labourers would only stick to each other, and stick out, they might do much, as the farmer could not do without them."

Now, the first requisite to any general advance of agricultural wages is a better system of managing landed property. Abrogation of game-preservation, long and rational leases to farmers of competent capital, and the due performance by the owners of such durable improvements as properly belong to them, are the main points on which the wages question depends. All these are entirely within the control of the landowners and beyond the control of the farmers. Whether the searching scrutiny to which the law and practice of landowning in England is becoming subject will awaken the landowners to something like a rational sense of the duties *and* their interests it is difficult to say; but if England is to continue the paradise of landlords they must look about them, and that without loss of time. On the other hand, it should be pressed on the attention of the labouring classes that the reckless way in which they marry very early in life, without having made any kind of provision for a family, has much to do, not only with the pressure which they individually sustain from numerous families, but also with the competition which exists amongst them for employment.

SOCIETE GENERALE
FOR THE DEVELOPMENT OF COMMERCE AND INDUSTRY IN FRANCE.

REPORT of the BOARD of DIRECTORS for the Year 1870.

GENTLEMEN,—In conformity with Art. 39 of our Statutes, your Board of Directors has convoked you to a general meeting, to submit for your approval the accounts for the year 1870.

We should have wished to be better prepared to present to you the inventory of the last year, notwithstanding the inevitable delays resulting from the interruption, during the siege of Paris, of all communication with our agencies in the provinces and our correspondents abroad; but the situation has unfortunately been continued too long for it to be at this moment possible for us to submit to you the regular balance sheet of the operations for the year. We must therefore restrict to a less comprehensive measure the accounts, usually so detailed, of the direction given to our affairs.

From the commencement of the war we applied ourselves to realising, with the least possible sacrifice, all that portion of our assets corresponding to our liabilities exigible, and, facilitated by the nature of our investments, we were able in a few months to reimburse the enormous sum of 135,264,702f 12c, as you may see by the table annexed to the balance sheet.

This facility in realising your capital is the best proof of the solicitude your Board of Directors has always shown in the choice of investments for the funds our customers confide to us for temporary use.

This is for a credit establishment a capital point, which, as you may now judge, we have never lost sight of. You will acknowledge, on this occasion, how well justified your Board was in refusing to extend the circle of our participation in industrial operations from the moment that we were not able to obtain authorisation to issue bonds at a long date; industrial investments have always a character of fixity that might have been fatal to the interests of our Company.

After having rendered to you an account of the general direction given to our affairs, we have to inform you of the measures adopted in prevision of the investment of Paris, for the direction to be given to our agencies in the provinces, and the movement of our business abroad.

M. Bourgeaud, one of our sub-directors was charged to organise provisional offices at Geneva, and from there he was able to direct with facility, and under the most favourable conditions, the realisation or continuance of the banking operations engaged in abroad. The director of the branch agencies also proceeded with a staff detached from the central offices, first to Lyons and then to Marseilles, centralising in his hands all the ramifications of our provincial administration; he maintained the regular working of our operations, and fulfilled in the departments, as we were doing in Paris, all the obligations of the Company.

It was by those different measures, adopted in due time, that we were able to meet all the requirements of the situation.

That duty fulfilled, your council had to provide for a not less important interest. We refer to our participation in the Guano undertaking and in the Peruvian loan.

The business of those two affairs is and was conducted principally in London, an intermediary station between Peru and France. MM. Dreyfus Freres and Cie., agents in Paris for the Peruvian Government, having transferred their firm to London, two members of our Board of Directors, in accord with your President, followed up in concert with them those vast operations; by their aid and with the intelligent and devoted co-operation of MM. Dreyfus Freres, we were able to meet all the difficulties presented by so exceptional and unforeseen a situation.

There remained for us, after having exhibited to you the measures adopted by us to preserve the interest of our Company, to give to you a detailed account, as we were accustomed to do each year, of our various operations.

We regret that we are not able, in consequence of the considerations referred to above, to present to you an account in the usual form.

We shall have to again take up at some future period the examination of a year so fertile in instruction, and to show to you, by an exposition of the facts, as well as by the results, the solidity of which your Company has given proofs in this fearful crisis.

The complete examination made by your Board of the situation of the Company permits us to propose to pay a dividend of 5 per cent. on the paid-up capital. The Board is convinced that the profits on the year 1870 will be sufficient to cover that distribution, but in the general state of incertitude, it does not think advisable to fix the derivation of that sum before drawing up a regular balance sheet. For that reason, and although in all probability we shall not be under the necessity of having recourse to our reserves (extraordinary and statutary), we must ask you to postpone the imputation of the sum to be distributed. We there confine ourselves to submitting for your approval the following resolution:—

"The general meeting of shareholders, in the proposal of the Board of Directors, declares that there is reason to distribute the interest of 5 per cent. on the paid-up capital, or 12f 50c per share, that sum to be imputed either to the profits of the year 1870 or to the reserves."

You may see, gentlemen, that notwithstanding the unprecedented crisis we have gone through, your interests have been guarded. We are also desirous to respond to the anxiety some of you have manifested to us, to affirm that nothing in the present circumstances, and in the nature of the operations in course of execution, requires a call of funds on your shares.

A few days back the revival of affairs justified the belief that the commercial crisis so successfully passed through by the Company, at the head of which we have been placed by your confidence, had at length terminated; whatever may be the movements in store, let us all hope that the future will preserve to our establishment the credit and the position it has hitherto merited.

Your Committee of Audit, associated in all our labours and in all our efforts, will tell you what perfect unity and harmony of opinions has not ceased to reign between us. It is by means of that accord that we have been able to obtain the results which we have the honour to submit to you, and of which the favourable character is made more manifest by the gravity of the circumstances.

In terminating, your Board of Directors has to mark its sense of the zeal and devotedness of which your Director, M. Herpin, has given proofs in the trying circumstances against which we have had to contend. His forethought and solicitude have provided for the necessities of a situation, the favourable results of which we are happy to have been able to announce to you. Your Sub-Director and Secretaries have been equal to their task; your auxiliaries have also fulfilled their duties to the Company, and at the same time have performed the patriotic service required of them by the siege of Paris.

The Board informs the meeting of the resignation given in by MM. Ed. Hentsch and Alph. Pinard of their functions as members of the Board of Directors; and by M. Ed. Cahen (d'Anvers) of his functions of Auditor.

Report of the Auditors, presented by M. Wolowski, one of them.

GENTLEMEN,—Your Committee of Audit, after having examined the situation as presented to you by your Board of Directors, has recognised the perfect exactitude of it. We must, as last year, bear witness to the order that reigns in the different parts of the administration. The auditors, actively associated in the labours of the Board, have co-operated in the frequent verifications of the cash, deposits, bills, and advances on securities or warrants.

Our principal mission consists in the verification of the inventory, which circumstances have not permitted us to draw up at present. But we must say that the situation authorises the distribution of 5 per cent on the paid-up capital as proposed to you.

We join entirely in the well-deserved testimony which your Board has expressed in excellent terms of the zeal and intelligence of which your administration and staff of officials have given fresh proof in the midst of such difficult circumstances.

Resolutions of the General Meeting.

I.

In conformity with the proposal of the Board of Directors, the general meeting authorises a distribution of 5 per cent. on the paid-up capital, or 12f 50c per share, this sum to be taken from the profits of the year 1870, or from the reserves.

In consequence there shall be distributed to the shareholders from the 1st April, 1871, a sum of 12f 50c per share, representing the interest of 5 per cent. for the year, on the paid up capital.

II.

In conformity with Arts. 18, 19, and 31 of the Statutes, and the decision of the general meeting of the 2nd August, 1864, MM. Ed. Blount, H. Davillier, B. Premsel are re-elected directors for five years, and M. Louis Wolowski, auditor, for three years.

The Assembly decided on adjourning the appointment of two Directors and one Auditor, to replace MM. Ed. Hentsch and Alph. Pinard, Directors, and M. Ed. Cahen (d'Anvers), Auditor, who have resigned.

III.

On the motion of a shareholder the meeting voted unanimously its thanks to the Board of Directors for the different measures it adopted to preserve the interests of the Company, and for the management of the business during the year 1870.

The attendance-book, signed at the commencement of the proceedings, showed that 117 proprietors, representing 24,792 shares, and giving a right to 258 votes, took part in the general meeting.

BALANCE SHEET on the 31st December, 1870—Not including the accounts of the Agencies in the Provinces.

Agriculture.

A SHORT-HORN HISTORY.

THERE is nothing more useful than to ascertain and record the steps by which great success has been attained in any branch of rural economy. There are so many obstacles to success in husbandry and stock-breeding; the time, the cost, the patience, the discretion, and the judgment required to attain it, constitute such a combination of qualities and circumstances requisite to eminent success, that we do not wonder the mark desired is so frequently missed. Everyone who knows anything of the English short-horn knows Richard Stratton, very long a leading breeder and prize taker. Mr Stratton has lately offered for sale the greater part of his herd, on quitting a farm at Burderop (Wilts) where he has lately resided. The following account of the rise and progress of Mr Stratton's herd, taken from a local report, possesses considerable interest:—"There is a halo of romance about the history of Mr Stratton's herd which is capable of development by a facile writer. Thirty years ago Mr Stratton saw a shorthorn cow in Highworth market, and his keen eye detected many points of merit in this animal, whose pedigree was unknown. Mr Stratton bought her at the price of an ordinary dairy cow. She calved Moss Rose, and this cow, and her stock, with the famous bulls old Phœnix and Lottery, formed the foundation of a herd which has since earned world-wide fame. During the last thirty years, prizes exceeding the sum of 5,000*l* have been won by Mr Stratton at all the principal shows in the kingdom, besides eight gold and thirty silver medals. Last season several prizes were obtained at the Royal, Bath and West of England, and other shows; and three animals, James 1st and two of his daughters, exhibited at Keighley, in Yorkshire, were each first in their respective classes, and collectively won the 50*l* cup as the best three animals in the yard from one herd. The cattle whose pedigrees were given in the catalogue are of the same blood as the celebrated Broad Hinton and Walls' Court prize winners, whilst the sires occurring in the pedigrees will, on reference to the herd book, be found to combine much of Bates and Booth best blood, though Mr Stratton attributes much of the success to the use of two bulls nearly allied to Mr Jobling's famous bull Wellington 679. James 1st 24,202, by the prize bull Lamp of Lothian, and Eighth Duke of York 23,808, by Mr Bowley's celebrated Duchess bull Seventh Duke of York, are the sires that have been chiefly used of late; they are from own sister cows. The former was reserved, the latter was let at the close of the sale to Mr Thomas Arkell, of Dravcott, a neighbour of Mr Stratton's."

The result of this sale, which was a clearance one, was satisfactory, a fair average having been obtained. But though Mr Stratton does not obtain such high averages as some other of our distinguished breeders, his merits as a breeder of shorthorns place him very high on the list. As will be obvious from the above history of the herd, his pedigrees are not so long as those of many herds, but then his accurate judgment has enabled him to produce animals of the highest qualities, most successful competitors for prizes, and superior dairy cattle. Probably no one has done more to diffuse amongst farmers the best sort of cattle for use and for profit, and in so doing we are glad to know that he has acquired for himself and his family well-earned reward for his industry and skill.

GAME-PRESERVERS' PROMISES.

NOTHING is more common than a farmer taking a game-ridden farm, under the verbal promise that the rabbits or the game, or both, shall be kept down so as not to injure the crops, and then the agreement, or lease, by which all game, &c., is reserved to the landlord is signed by the confiding tenant. Of course such an agreement is never kept—is never intended to be kept—on the part of the landlord, and it has been commonly assumed that the deluded and defrauded tenant has no legal remedy. Such, however, is not the case. The law *will* meet such landlord delinquencies. This has been recently determined in the Court of Exchequer, in the case of Morgan *v.* Griffith, being an appeal from the Northamptonshire County Court. The facts were simple and very common. Griffith agreed to hire some grass-land of Morgan, the landlord, upon the terms of a lease to be signed at a future day. The tenant entered on the land at Michaelmas, 1867, and found it overrun by the landlord's rabbits. At Lady-day, 1868, when paying his rent he complained of this, and refused to sign the lease which had been tendered to him in consequence, and expressed his determination not to continue to occupy the land unless the rabbits were destroyed. Thereupon Morgan promised to destroy them. At Michaelmas, 1868, the lease was again tendered to the tenant, who again complained of the rabbits, and refused to sign the lease or to hold the land beyond the current year. The defendant then said to the tenant—"I promise you faithfully the rabbits shall be destroyed." The defendant requested that to be inserted in the lease. This the landlord refused, but again promised the rabbits should be destroyed. The tenant then signed the lease, which (in the usual way) reserved all game and rabbits to the landlord. As everyone who knows the rural districts would expect, the landlord failed to destroy the rabbits as he had verbally promised. The tenant brought an action in the County Court, and a jury gave him a verdict. Against that the landlord appealed to the Court of Exchequer. For the landlord it was contended that the tenant was bound by the lease, and that the verbal agreement was of no legal validity. Imagine a landlord setting up such a plea! If it were not constantly seen in practice no one would believe it of an English gentleman; but somehow or other landlords' verbal promises are generally found to be of about the same value as lovers' vows. In this case however, law and common honesty were found in unison. The Judges held that the verbal agreement was collateral to the lease, and was founded on good consideration. They wisely said, "the tenant, unless the promise to destroy the rabbits had been given, would not have signed the lease, and that the decision of the County Court Judge was quite right.

Now, the importance of this decision can scarcely be overrated. In most cases, on game-preserve estates tenants are deluded into taking or continuing in the occupation of their farms by verbal promises to keep down the game vermin, while the written contract provides for their preservation. Hitherto the landlord has laughed at the tenant's claims for compensation, but now, on the authority of this decision of the Court of Exchequer, any tenant-farmer thus taken in should bring an action against his landlord for damages sustained by the game or rabbits promised to be kept down.

DISTRESS FOR RENT.

IT is commonly found that while privileges operate unfairly upon the non-privileged, they do not in any fair sense really benefit the privileged themselves. This is the case with the law of distress for rent, under which the English landlord has the power, on his own mere motion, to take possession of his tenant's effects, and sell them for the payment of rent actually due. The law of hypothec in Scotland goes somewhat beyond the analogous law of England. There the landlord has power of preventing the tenant from disposing of his crops *before* the rent becomes due, and may even compel a person who may have purchased the tenant's produce to pay the money over again to the landlord.

Though somewhat more stringent and unjust on the north side of the Tweed, the privilege which enables the landlord to seize and prepay his rent is essentially in character and effect the same on both sides of the border. Indeed in the recent discussion in the House of Commons on the Scotch law of hypothec, the admissions—the necessary admissions—by the supporters of the Bill for abolishing the law of hypothec, that the principles involved in, and the arguments against, that law applied to the English law of distress, proved fatal to the Bill, for the English landowners rallied to the support of the kindred privilege of their Scotch brethren.

A standing fallacy put forward in defence of the landlord's privilege of distress is that it enables the landlord to accept or retain a small farmer whose capital is not sufficient to manage his farm properly, and that if the privilege were abolished, such small farmers could not obtain or hold farms. But, as the *Mark Lane Express* very justly remarks—"What does this plea come to, but that these small men in reality go into business at other people's expense?" But it is the fact that in Scotland the small farmers are as averse to the existence of this landlord's privilege as the larger farmers. Mr M'Combie said, in the hypothec debate—"The large farmers, the small farmers, and the crofters of Aberdeenshire, numbering 2,481, signed a petition in favour of the law of hypothec, and the great majority were small farmers and crofters."

There is no greater injury that can be inflicted upon a man than to induce him to occupy a farm—large or small—for the management of which his capital is insufficient, and one of the reasons why the law of distress for rent is too mischievous to agriculture, is that landowners are induced to accept a tenant without sufficient capital, *because* they know that if the tenant fails all he has may be seized by the landlord without a minute's notice, and all other persons who have trusted may whistle for their debts. It is worthy of remark, that in the course of the debate referred to, Mr Albert Pell, one of the high professing "farmers' friends," said—"That so far as England was concerned, he thought there should be no special legislation for Scotland, which might prove the thin end of the wedge for England, where the law was not complained of, but rather favoured the attempt s of men rising from the rank of labourers or foremen to that of farmers.....That to alter the law would damage the cause of these men, and not improve that of the larger tenants." Such farmers are the friends in whom you place your political trust!

LOCAL TAXATION.

THERE are but few, even among the farmers, who are deluded by the movements made by landowners at county sessions and in Chambers of Agriculture to throw on other people the rates and charges hitherto borne by the land. But even the few deluded farmers should see the view their own organ, the *Mark Lane Express*, takes of the subject, where, in an article on local taxation, it is said :—"As the more burdens taken off the land, the more must it be to the owner's individual advantage.....It is the fresh tax imposed during the run of his term which the tenant has chiefly to guard against, and here the proposed plan of half-rating (half to tenant, half to landlord) would manifestly conduce to something like an equitable distribution.....Large landowners who have not granted leases will be but slightly affected by a disturbance which they can set right at the next Michaelmas or Lady-day. *The moiety of the rates will be in such cases simply added to the rent*, and the only result of the measure will be to impose additional trouble and uncertainty on the local officer." But suppose (an unlikely hypothesis) that the landlords succeed in relieving the land from existing rates, how long will it be before the yearly tenant finds the amount of the rates which has been taken off added to his rent? Farmers should beware of being made catspaws of the landowners to throw off their own burdens. Depend upon it that the fable of the earthen pot and the metal floating down a stream very aptly represents an alliance between farmers and landowners—the weakest vessel will sustain a loss of what the stronger gains.

COMMERCIAL AND MISCELLANEOUS NEWS.

Mr J. R. Scott, the Registrar of the London coal market, has published the following statistics of imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during October, 1871:—

IMPORTS.

By Sea.	Ships.		Tons.	By Railway and Canal.	Tons.	cwt.

Export list, showing the distribution of coal imported into the port or district of London by sea, rail, and canal, and afterwards exported coastwise or to foreign parts, or sent beyond limits of London district, by rail or inland navigation, during October, 1871:—

EXPORTS.

1. Railway-borne coal passing "in transitu" through district ..... tons		54,295
2. Sea-borne coal exported to British Possessions, or to foreign parts, or to the coast ..... tons	37,815	
Ditto sent beyond limits by railway	4,015	
Ditto by canal and inland navigation	2,146	
		43,976
3. Railway-borne coal exported to British Possessions, or to foreign parts, or to the coast	13,960	
Ditto by canal and inland navigation	324	
		14,284
4. Sea-borne coal brought into port and exported in same ships		2,655
Total quantity of coal conveyed beyond limits of coal duty district during October, 1871		115,210
Ditto, October, 1870		96,610

The Consular reports, so far as they have been issued this year, contain divers references to the influence of the French-German war upon trade. France being the seat of war, commerce in many parts of that country was absolutely annihilated. Germany also suffered very severely. Consul Crowe (Leipsic) gives an account of the state of the country. Able-bodied men were called from commerce to arms; horses were impressed; the troops monopolised all the means of transport. Farmers were put to straits for housing their crops; manufacturers found commissions countermanded; stocks and shares became unsaleable; there was a run on all the banks of issue; credit was restricted or withdrawn. The reports of the Consuls at Stettin, Lubeck, Oux-haven, Bremerhaven show how much commerce was stopped or checked. In parts dependent on river traffic trade was paralysed, for though the French blockade was not generally effective it was sufficient to disturb trade. The light and pilot vessels were removed from the Elbe, causing the stranding of many vessels. But to some the war brought good fortune for a time. German silk manufacturers, says Consul Crowe, were able to substitute themselves for the French in supplying the markets of England and the United States. The Saxon cotton spinners made larger profits than they had known for years. The manufacturers of cloth, flannel, and hosiery had overwhelming orders for delivery to the armies in the field. At one period it was difficult to purchase woollen stocks in any quantity: and the great number of German victories caused an extraordinary demand for that class of light woollen stuffs which are used in making flags. The farmers reaped the advantage of the rise in prices caused by the demand for the consumption of the army. The blockade of the Baltic ports gave Holland the benefit of a large proportion of the North German trade for transmission to Germany. Rotterdam came in for much of this transit trade, which would otherwise have passed direct to the blockaded ports; and the Rhenish shipping trade derived great benefit from the quantity of goods for transport. At Genoa there was a great demand for wheat, flour, and biscuit for France, and all the smaller industries were doing well. The vermicelli or pastemakers and the biscuit makers had a very profitable year. The British Consul at the French colony of Saigon (Cochin China) notes the withdrawal of the competition of the many German vessels in those ports. In all 452 vessels, aggregating 213,051 tons register, loaded at Saigon in 1870; and no less than 183 vessels of 89,480 tons register were British. The Republic was proclaimed at Saigon on the 20th of October, and one of the first acts under the new *regime* was the expulsion of the German merchants. The consul mentions that a very large business was done at Saigon last year in the staple article of rice, but the demand for China and Japan is too strong to allow of much satisfactory business with Europe. The trade is in the hands of Chinese. The system of credit at Singapore offers them tempting facilities, and goods bought there at three months' credit are often bartered at Saigon at a loss for rice, which is at once sold for cash or shipped to China on speculation. The port of Saigon is now one of the first in the world for the supply of rice. 225,000 tons were exported in 1870. The principal traders are Chinese—energetic, enterprising merchants—who owing to their great domestic economy almost defy European competition.

The yield of gold obtained from quartz in Victoria is now about equal to that from the alluvial workings, which in the earlier days of the gold-digging formed the only source from which gold was obtained. As only an infinitesimal portion of the quartz reefs of the colony is supposed to have been as yet discovered, it is maintained that the mining industry will be profitably followed for centuries. The mining registrars' and surveyors' reports estimate the quantity of gold raised in the second quarter of the year 1870 (exclusive of mining in scattered parts, from which returns are not obtained), at 355,430 ozs, or 42,000 ozs more than in the previous quarter: 180,744 ozs from alluvial ground, being an increase of 7,000 ozs; and 174,686 ozs from the quartz reefs, an increase of 35,000 ozs. The total of the mining population at the end of the quarter stood at 57,429, of whom 27,084 Europeans and 14,487 Chinese were alluvial miners, and 15,760 Europeans and 114 Chinese were quartz miners. In Collmann and Tacchi's mine at Sandhurst the quartz was raised from levels ranging from a depth of 210 ft to 720 ft; the yield per on was 2 ozs 8 dwts from 490 tons. The Albion Company's shaft at Steiglitz is down 868 ft beneath the surface, and two auriferous reefs have been struck at this depth. There is considerable excitement in Ballarat East on the question of the right to mine under the town. Ballarat proper is now divided into the city of Ballarat and the borough of Ballarat East, and it appears that shafts have been recently sunk in the borough, and good paving ground discovered. The owners of the soil, who have built upon it, naturally object that undermining their buildings will cause them to subside or fall. The miners appear determined to proceed with or without consent. Already it is stated that one or more houses have been bought in the borough, with the view of enabling miners to sink shafts in them unobserved, and then drive away from the bottom of the shafts to where the wash dirt is believed to lie. The Custom-house returns show an export of 984,130 ozs of Victorian gold in 1871 up to the end of July, being an increase of 138,737 ozs over the corresponding period of 1870.

Of the 196,075 emigrants who went to the United States in 1870 140,895 embarked at English ports, 16,682 at Scotch, and 38,318 at Irish—viz., from Liverpool, 137,321, of whom 16,587 were married men, 19,888 married women, 49,318 single men, 17,458 single women, 12,557 boys between the ages of 1 and 12, 10,760 girls between the same ages, 3,668 male and 3,212 female infants, 2,404 males and 1,469 females not distinguished as to age; 65,807 were English, 4,494 Scotch, 29,453 Irish, 33,694 foreigners, and 3,873 not distinguished. From London, 3,574 embarked, of whom 487 were married men, 561 married women, 1,288 single men, 366 single women, 345 boys between the ages of 1 and 12, 373 girls between the same ages, 69 male and 77 female infants, and eight males not distinguished as to age; 3,109 were English, 30 Scotch, 234 Irish, 193 foreigners, and eight not distinguished. From Glasgow, 16,862 embarked, of whom 1,057 were married men, 1,055 married women, 6,607 single men, 3,675 single women, 1,831 boys between the ages of 1 and 12, 1,647 girls between the same ages, 594 male and 396 female infants; 11 were English, 12,114 Scotch, 406 Irish, 4,330 foreigners, and one not distinguished. From Cork, 30,227 embarked, of whom 1,458 were married men, 2,312 married women, 12,610 single men, 9,727 single women, 1,550 boys between the ages of 1 and 12, 1,507 girls between the same ages, 348 male and 273 female infants, 326 males and 116 females not distinguished as to age; 8 were English, 2 Scotch, 29,759 Irish, 18 foreigners, and 440 not distinguished. From Londonderry, 8,091 embarked, of whom 346 were married men, 367 married women, 3,289 single men, 2,918 single women, 452 boys between the ages of 1 and 12, 475 girls between the same ages, 118 male and 121 female infants, and 4 male and 1 female not distinguished as to age; 8,039 were Irish, 46 foreigners, and 6 not distinguished. Of the 196,075 emigrants, 19,985 were married men, 24,183 married women, 73,112 single men, 34,144 single women, 16,735 boys between the ages of 1 and 12, 14,762 girls between the same ages, 4,797 male and 4,079 female infants, 2,742 males and 1,586 females not distinguished as to age; 68,935 were English, 16,640 Scotch, 67,891 Irish, 38,281 foreigners, and 4,328 not distinguished.
